Fourth International Symposium on the
UTILIZATION OF
HIGH STRENGTH/
HIGH PERFORMANCE
CONCRETE
29-31 May 1996, Paris, France

Quatrième symposium international sur
L'UTILISATION DES BÉTONS À HAUTES PERFORMANCES
29-31 mai 1996, Paris, France

7) Use of blastfurnace slag cement with high slag content
for high performance concrete ........................................... 213
E. LANG, J. GEISELER

112) High strength concrete produced by a low binder amount ........ 223
V. PENNTALA, J. KOMONEN

113) Replacement of condensed silica fume by rice husk ash for the production
of high strength concrete in developing countries ......................... 235
D.H. DALHUISEN, P. STROEVEN, D.D. BUI, N.T. QUY

114) High strength concretes with energetically modified cement and
modeling of shrinkage caused by self-desiccation ....................... 245
J.-E. JONASSON, V. RONIN, H. HEDLUND

115) Utilization of glass for fine aggregate to produce high performance concrete 255
D. SURAATMADJA, D.R. MUNAF, M.N. ASNAN

116) Flowcyl – How to determine the flow properties of the matrix phase
of high performance concrete ........................................... 261
E. MORTSELL, S. SMEPLASS, T.A. HAMMER, M. MAAGE

117) Mixing and compacting techniques for the production of
very high performance precast concrete products ..................... 269
J. BRESSON

118) The rheological and mechanical properties of water reduced
superplasticised high strength concretes ................................ 273
C. ELLIS

119) The rheological behavior of fresh high performance concrete .......... 281
T. YEN, H.J. CHEN, J.W. TANG, W.H. WU

120) Finishing high strength concrete using ultrasonic vibration .......... 287
I. UCHIZAKI

121) Ultra-high strength cement concrete: the properties and the field
of effective application ................................................ 295
N.V. SVIRIDOV

122) Effect of characteristics of testing machine on measured
compressive strength of high strength concrete ......................... 301
T. NOGUCHI, F. TOMOSAWA

1 - 2

Shrinkage, creep and relaxation /
Retrait, fluage et relaxation

123) Experimental study on shrinkage and creep of high performance concrete 311
W.H. DILGER, C. WANG, K. NIITANI

124) Influence of autogenous shrinkage on cracking in high strength concrete .......... 321
E. TAZAWA, S. MIYAZAWA

125) Creep and shrinkage data of high strength concrete .................. 331
I. SCHRAGE, R. SPRINGENSCHMID

126) Creep and shrinkage of young high strength concrete ................ 339
N. HAN, J.C. WALRAVEN
127 Time-dependent behaviour of high strength concrete, dimension effect 349
J.-L. TRINH, N.C. MENEZES, B. FOURÉ

128 What kind of drying creep for HSC/HPC? 357
L. GRANGER, P. ACKER

129 Creep and relaxation of high performance young concrete 367
G. WESTMAN

130 Creep of high performance concrete – Characteristics and
code-type prediction model 377
H.S. MÜLLER, C.H. KÜTTNER

131 The AFREM code type model for creep and shrinkage of
high performance concrete 387
R. LE ROY, F. de LARRARD, G. PONS

Posters

132 Influence of the type of coarse aggregates on shrinkage
and creep of high strength concretes 397
J.-F. CUBAYNES, G. PONS

133 (Early) Basic creep of high performance concrete 405
B. PERSSON

134 Modelling the temperature rise in massive HPC structures 415
V. WALLER, F. de LARRARD, P. ROUSSEL

135 Influence of solar radiation on temperature development in thin
high strength concrete elements 423
E.A.B. KOENDERS, M. TÖLLNER, K. VAN BREUGEL, H. OUWERKERK

136 Behaviour of HPC under thermal and moisture loads 433
C. BEN AMOR, J.-L. CLÉMENT

137 Influence of retarding on the early age thermal cracking behaviour
of high performance concrete 439
G. DE SCHUTTER

1 - 3

Durability: microstructure, permeability and corrosion /
Durabilité : microstructure, perméabilité et corrosion

138 Microstructure and moisture properties of high performance concrete 451
V. BAROGHEL-BOUNY, J. GODIN, J. GAWSEWITCH

139 Relationship between air permeability and compressive strength
of concretes 463
M.-P. YSSORCHE, J.-P. OLLIVIER

140 A microstructural and microanalytical study of high strength
concretes with porous aggregates 471
O.H. WALLEVIK, K.O. KJELLESEN

141 Durability of high performance cement pastes in contact
with chloride solutions 479
A. DELAGRAVE, J. MARCHAND, M. PIGEON

</table>
Evolution of the microstructure of reinforced HPC in relation to the loading and the influence on durability 623
R. FRANÇOIS, A. KONIN, G. ARLIGUIÉ

II - STRUCTURES / STRUCTURES

II - 1
Mechanical strength and law of behaviour / Résistance mécanique et loi de comportement

201 Non destructive testing of high strength concrete 637
W.F. PRICE, J.P. HYNES

202 Compressive strength of concrete: from cylinders to the structures 645
P. LAPLANTE, P.-C. AÏTCIN

203 Extension of stress-strain curves for design and analysis to high strength concrete 655
P. MARRO, L. TAERWE, A. VAN GYSEL

204 Empirical constitutive law for concrete in compression and extrapolation to very high strength concrete 663
B. FOURÉ

205 Eccentrically loaded prisms of high strength concrete 669
G. MARKESET

206 Constitutive law of high performance concrete under tensile strain 677
B. GÉRARD, J. MARCHAND, D. BREYSSE, A. AMMOUNE

207 High performance multimodal fiber reinforced cement composites (HPMFRCC) 687
P. ROSSI, S. RENWEZ

208 Are high performances concretes (HPC) suitable in case of high rate dynamic loading? 695
F. TOUTLEMONDE, P. ROSSI

209 Fatigue of concrete piles of high strength concrete exposed to impact load 705
G. HOLMBERG, K. CEDERWALL

Posters

210 Further studies on the utilization of maturity functions to a high strength concrete mixture 711
R.C.A. PINTO, K.C. HOVER

211 Strength development of high performance concrete at early ages 719
H.J. CHEN, T. YEN, J.D. CHIU

212 Influence of the curing temperature on the strength development of high strength concrete 725
L. VANDEWALLE

213 Nondestructive evaluation of strength development of high performance concrete using the P-wave velocity 735
Y. LIN, M.-T. CHANG, H. CHANGFAN

214 Influence of high carbon steel fibres on the stress-strain curve for high strength concrete under compression 741
A. VAN GYSEL, L. TAERWE

119
Fracture mechanics properties of steel fibre-reinforced high performance concrete

P. GROTH, K. NOGHABAI

Research on fatigue behavior of high strength concrete under compressive cyclic loading

G.-Y. ZHAO, P.-G. WU, L.-M. BAI
