CONTENTS

SAFETY AND RELIABILITY

Operation and Maintenance

Basic Aspects of the Concept of Reactor Compartment Handling (Including Damaged Compartments) Management During Utilization of Nuclear Powered Submarines High Priority R&D
V. A. Mazokin, V. V. Borisov, M. E. Netecha, Y. V. Orlov, G. A. Stanislavsky, and V. K. Ulasevich............................................................. 1

Mathematical Method for the Assessment of the Metal Test Efficiency and Optimization of the Pressure Vessels and Pipes Periodic Tests
V. V. Tkachev.................................................................................. 11

The Establishment of Bed Type Germanium-Based Whole Body Counter
Ming-Chun Chen, Chih-Lin Sun, and Wei-Wen Yeh.............................. 15

Radiation Factors Specifying Safety in Reactor Compartments Handling in the Process of Decommissioning Nuclear-Powered Submarines
E. S. Ezovit, V. A. Mazokin, M. E. Netecha, and Y. V. Orlov................. 21

An Integrated Approach To Fire Penetration Seal Management
Ronald D. Rispoli........................................................................ 27

Accident Simulation and Analysis

TMI MSLB Analysis Using TRAC-PF1 Coupled With Three-Dimensional Kinetics

An Analysis of ROSA-JV/LSTF 10% Main Steam Line Break Test Run SB-SL-01 Using RELAP5/MOD3
Heedo Lee, Hoje Seong, Gooncherl Park, Hiroshige Kumamaru, and Yutaka Kukita................................................................. 41

Performance of Passive Heat Removal System Under Accident Conditions: A Study Case
Alessandro Mazzola and Marco E. Ricotti........................................ 51

Application of CATHARE Code to the Isolation Condenser Experiment in PIPER-ONE Loop
F. D'Auria, M. Mazzini, H. Kalli, and J. Sorjonen.................................. 61

Analysis of the Vent Path Through the Pressurizer Manway Under the Loss of Residual Heat Removal (RHR) System During Mid-Loop Operation in PWR
G. S. Ha, W. S. Kim, Y. J. Chung, W. P. Chang, and K. J. Yoo........... 537

Use of RELAP5 Code to Evaluate the BOP Influence Following Instability Events in BWR
F. D'Auria, V. Pellicoro, and O. Feldmann........................................ 71

Quantitative Similarity Analysis of Small-Break Loss-of-Coolant Accident Scenarios
Andrej Prosek, Ivo Klenak, and Borut Mavko................................... 79

Totyu L. Totev........................................................................... 87

Transient Simulation of Feedwater Vaporization During a DBA LOP/LOCA Using RELAP5/MOD3.1
James R. Harrell and Robert W. Fuller........................................... 91

Qualitative Analysis of Scaling Effects in Isolation Condenser Behavior With RELAP5/MOD3.1 Thermalhydraulic Code
Francesco D'Auria and Vittorio Faluomi........................................... 113

Risk Management for Low Carbon Steels in the Reactor Coolant Loop William H. Clark and Michael Schnapp...................................... 123

Consideration Failure Consequences While Estimating Reliability of "Safety System: Protection Object" Complex
Arcady I. Pereguda........................................................................ 531
Investigation of Accidents With Decrease of Boric Acid Concentration in the Priary Coolant of VVER-1000/Model 91 Reactor Plant

Aleksandr Gromov, Sergei Kalugin, Aleksandr Podshibyakin, Perti Siltanen, and Riitta Kyrki-Rajamäki .......................................................... 127

The Errors of the Radioactive Release Source Term Recovery

Boris L. Semenov, Vladimir I. Tarasov, Vyacheslav E. Gorshkov, Eugene V. Tkalya, and Rafael V. Arutyunyan ........................................... 141

Comparison Between Small LOCA Scenarios in Eastern and Western Type PWRs

F. D’Auria, G. M. Galassi, P. Gatta, L. Mastrantonio, and P. Marsili .......................................................... 475

The IPSN Method for Uncertainty and Sensitivity Analysis and the Associated Software: SUNSET

E. Chojnacki and A. Ounsy ..................................................................... 545

Evaluation of CATHARE 2 V1.3 Capability to Simulate the Performance of Automatic Depressurization Systems in PWRs

Paride Meloni .................................................................................. 483

Determination of the Uncertainties of the Constitutive Relationships in the CATHARE 2 Code

A. de Crécy ........................................................................................ 491

The Best Estimate Codes Applied to VVER Calculations Validation Methodology

Vladimir N. Kolochko ........................................................................ 497

Data Base for Transient Analyses in VVER-1000 Nuclear Plants

Nicola Cerullo, Monicafrogheri, Francesco D’Auria, and Ivan Hinovsky .......................................................... 503

Stability Analysis

TRACG Simulation of the February 1992 Startup of the Dodewaard Natural Circulation BWR

Jacorien A. A. Wouters, Jaime B. Morales, and H. T. Kim ...................................................................................... 149

Local Instability in BWR Reactor Simulator

F. D’Auria and V. Pellicoro .................................................................. 157

LAPUR-K BWR Stability Benchmark

Richard C. Kern, Richard J. Rohrer, and Lofti A. Belblidia ................ 163

Safety Analysis of Probabilistic Dynamic Systems

Olga N. Aneziris and Ioannis A. Papazoglou ........................................ 171

Korea (DPRK) Project — Safety Analysis and Radiation Release

Democratic People’s Republic of Korea LWR Project Status

J. B. Mulligan ................................................................................. 180

Levels of Safety

Andrey A. Povyakalo ......................................................................... 181

A Reduced Integral Solution to the Ground Level Dose Rate Due to Non-Stationary Release

Alexander V. Veselko, Vyacheslav E. Gorshkov, and Vladimir I. Tarasov .......................................................... 187

Bleed and Feed Studies to Assess the Development of Emergency Operating Procedures for VVER-Type Reactors

G. ÉzsöI, L. Perneczky, and L. Szabados ........................................... 511

Severe Accident Analysis

Scoping Test and Analysis on CSI Aerosol Behavior in a Straight Pipe in Wind Project

Minoru Igarashi, Akihide Hidaka, Yu Maruyama, Nachiko Nakamura, Kazuhiro Hashimoto, and Jun Sugimoto ........................................... 193

BWR Analyses for Beyond-Design Events in a German BWR With ATLAS

W. Pointner .................................................................................. 551
WIND Project Tests and Analysis on the Integrity of Small Size Pipe Under Severe Accident Condition  
Naohiko Nakamura, Kazuichiro Hashimoto, Yu Maruyama, Minoru Igarashi, Akihide Hidaka, and Jun Sugimoto

Post-Test Analysis of the BTF-104 Severe-Fuel-Damage Experiment Using the CATHENA Thermalhydraulics Code  
N. K. Popov, L. C. Walters, T. V. Tran, J. W. DeVaal, L. W. Dickson, and J. D. Irish

Investigation of Steam Generator Cooling Capability Under the Loss-of-RHR Accident During the Mid-Loop Operation of Yonggwang Nuclear Units 3/4  
Jae-Jun Jeong, W. S. Kim, K. S. Ha, K. D. Kim, and W. P. Chang

Mathematical Simulation of the RBMK Reactor Pressure Tubes Ruptures During Accidents: Computer Code and Verification  
V. V. Tkachev and K. K. Zheltukhin

Improvements in Modelling (By ESCADRE mod1.0) Radiative Heat Losses Through Gas and Aerosols Generated by Molten Corium-Concrete Interaction  
Roberto Passalacqua, Magali Zabiego, Gerard Cognet, Claire De Pascale, Alain Commandé, and Claude Renault

Core Disruptive Accident Analysis for Advanced CAPRA Cores  
Werner Maschek, D. Thiem, and P. Lo Pinto

Severe Accident Features  
Use of a Parametric Source Term Estimating Code in Level 2/3 PSAs  
Raymond E. Schneider, Richard G. Sider, and Tomas Öhlin

Enhanced Situation Awareness and Decision Making for an Intelligent Reconfigurable Reactor Power Controller  
Stephen J. Kenney and Robert M. Edwards

Temperature Limits for LMFBR Fuel Cladding Under Upset and Emergency Operating Conditions  
S. Govindarajan and S. C. Chetal

Development of a Hybrid Safety System: Actuation of the Secondary Automatic Depressurization System at an Early Stage  
Masae Nishimoto, Shigemitsu Umezawa, Kazuharu Okabe, and Tsuyoshi Matsuoka

A Hot Leg Break Accident With HPIS Failure and Nitrogen Injection by the Accumulators in the BETHSY Facility  
J. C. Barbier, P. A. Clement, and R. L. Deruaz

Severe Accident Management  
BWR Containment Flooding During a Large Break LOCA Under Different Core Damage Conditions  
Mansur A. Alammar, Nick G. Trikouros, and Paul N. Hansen

Big Rock Point Severe Accident Management Strategies  
Brian A. Brogan and Jeff R. Gabor

A New Decontamination Set-Up for Localization of Iodine and Cesium Radioaerosols During Severe Accidents at NPPs  
Sergei A. Kulyukhin, Nikolai B. Mikheev, and Alla N. Kamenskaya

Effectiveness of Emergency Procedures Under BDBA-Conditions: Experimental Investigation in an Integral Test Facility (PKL)  
Klaus Umminger, Wolfgang Kastner, and Patrick Weber

Lessons Learned From CEOG Generic Accident Management Guidelines Confirmation (Validation) Exercise  
Yehia F. Khalil, Raymond E. Schneider, and Mark A. Greene

Emerging Risk-Based PRA Applications  
Application of PSA in Modifying Plant Technical Specifications  
Raymond E. Schneider, Susan C. Jaquith, Bruce H. Smith, Alan Hackerott, and R. Lindquist
A Practical Implementation Procedure for Risk-Based Inservice Inspection
S. R. Gosselin, R. Gamble, V. B. Dimitrijevic, P. J. O'Regan, and
J. R. Chapman .......................................................... 335

Lessons Learned From the Maintenance Rule Implementation at Northeast Utilities' Operating Plants
Kevin B. Hastings, Yehia F. Khalil, and Wes Johnson .......................................................... 343

Configuration Management of On-Line Maintenance
C. R. Grantom .......................................................... 345

Cofrentes NPP Activities on PSA and Severe Accident Analysis
Joaquín Suárez, Pablo J. García, and Lourdes Borondo .................................................. 517

PSA/PRA Applications
Evaluation of Severe Accident Risk During Mid-Loop Operation at SURRY Unit-1
Vinod Mubayi, J. Jo, C. C. Lin, L. Neymotin, and W. T. Pratt ........................................ 351

A Probabilistic Approach to Quantify the Uncertainties in Internal Dose Assessment
Using Response Surface and Neural Network
Min Baek, Sang Kyung Lee, Un Chul Leem, and Chang Sun Kang .................................. 361

Level 2 PSA Insights Relative to Filtered Vent System
R. Kenneth Deremer, Karl N. Fleming, and Jurg Landolt .............................................. 375

Assessment of Safety Measures and Plant Risks During Shut-Down Periods at NPP Biblis
Hartmut Pamme and Peter H. Röb .................................................. 383

Understanding the Risk Significance of Nuclear Plant Technical Specifications
Lichung T. Pong and R. Niall M. Hunt .................................................. 391

PSA — Applications and Procedures
Formation of Concise Risk Level Cut Sets for Operational Safety Assessments
Phillip J. Fulford .......................................................... 397

PSA as a Tool of RBMK Upgrading Efficiency Analysis
Eugene A. Shiversky .......................................................... 401

Top Event Prevention Analysis: A Deterministic Use of PRA
R. B. Worrell and David P. Blanchard .................................................. 409

Improved Monte Carlo Simulation of Generalized Unreliability in Probabilistic Dynamics
P. E. Labeau .......................................................... 419

Reliability and Operational Characteristics of VVER Nuclear Units
Josef Královč and František Dráb .................................................. 569

PSA — Procedure and Policy
Assessment of Importance of Elements for Systems That Condition Depends on the Sequence of Elements Failures
Andrey A. Povyakalo .................................................. 427

Extending PSA to Accident Management (AM): The Case of the Steam Generator Tube Rupture (SGTR) Emergency Operating Procedures (EOP) Assessment
Miguel Sánchez and José Melara .................................................. 523

Dynamic PSA Applications
Continuous Cell-To-Cell Mapping and Dynamic PSA
Beatrice Tombuyse and Tune Aldemir .................................................. 431

A. K. Verma, P. V. Varde, S. Sankar, and Prem Prakash .................................................. 439

International Project: RBMK Safety Review
Steven F. Hall and Boris A. Gabaraev .................................................. 561
PSA — Policy and Miscellaneous

Nuclear Regulatory Commission Probabilistic Risk Assessment Implementation Program: A Status Report
Mark P. Rubin and Mark A. Caruso

Accuracy Quantification in SPE-1 to SPE-4 Organized by IAEA
F. D'Auria, A. Eramo, M. Frogheri, and G. M. Galassi

Development of High Performance BWR Spacer
