The 4th European Conference on Advanced Materials and Processes

Padua/Venice, Italy
25-28 September 1995

Symposium D - Structural Metallic Materials
Symposium E - Surface Engineering

Organized by
Associazione Italiana di Metallurgia

on behalf of
The Federation of European Materials Societies
<table>

</table>
The tensile behaviour of electron beam welds in a high strength 
(α+β) titanium-based alloy in two orientations pag. 89

Effect of the heat treatment on the microstructure and mechanical properties of a Ti-6Al-4V plate " 95
L.M. Plaza, F. Zapirain, A.M. Irisarri, A. Vega de Seoane

E2 - HIGH INTENSITY BEAMS SURFACE PROCESSES

Electron beam surface alloying of Ti6Al4V with SiC " 101
H.M. Wekianos Hailu, A. Bloyce, T. Bell

Laser surface alloying and wear of aluminium -12% silicon " 107
A.S. Bransden, W.J. Tomlinson

Laser surface alloying: why? how? " 113
A.B. Vannes, J.M. Pelletier

E4 - SURFACE CHARACTERIZATION

Characterization of surface engineering of aluminium alloys with optical and electrochemical methods " 123
J. Vereecken

Contribution of ultrasonic non destructive testing to the characterisation of plasma sprayed coatings " 129
D. Lescriba, F. Lakestani, J.F. Coste, W.J. Vortrefflich, R.F. Denis

E6 - OTHER SURFACE PROCESSES

Polymer derived oxidation protective ceramic coatings on C/C-SiC composites " 135
D. Heimann, J. Biil, F. Aldinger

Atom by atom vapour condensation applied to the development of novel magnesium titanium alloys for enhanced corrosion resistance " 141
S.B. Dodd, R.W. Gardiner

E3 - THERMAL SPRAYING PROCESSES

The influence of fuel gas on the microstructure and wear performance of alumina coatings produced by the high velocity oxyfuel (HVOF) thermal spray process " 147
A.J. Sturgeon, M.D.F. Harvey, F.J. Blunt

Improvement of the erosion resistance of thermal sprayed coatings " 155
S. Giovanardi, R. Martinella, L. Menetti, V. Regis
Corrosion behaviour in marine water of WC + 12Co coatings obtained by high velocity oxygen fuel spraying on 34CrMo4 steel

Effect of high temperature ageing on the phase stability of Y-PSZ plasma sprayed coatings
P.G. Orsini, P. Scardi, A. Denoijean, A. Grimaud, P. Fauchais

E5 - THIN LAYERS: DIAMOND - LIKE AND TiN COATINGS

Mechanical properties microprobing of TiN coatings deposited by different techniques
S. Zheng, Y. Sun, T. Bell, J.M. Smith

Real time control of diamond film growth elaborated by a microwave plasma assisted CVD technique

D3 - LIGHT ALLOYS (AL, Mg, Ti) FOR TRANSPORTATION SYSTEMS

Foamed aluminium - light structural and insulation material
F. Simancik, H.P. Degischer, H. Wörz

Microstructural and notch effects on fatigue of high-pressure nitrided Ti-6Al-4V
J.K. Gregory, U. Holzwarth

Principles of titanium alloys' structure control with the purpose of increasing their mechanical properties
M. Brun, G. Shachanova

Creep of rapidly solidified Al-Si-Ni-Cr and Al-Si-Cu-Fe alloys at intermediate temperatures
E. Evangelista, E. Cerri, S. Spigarelli, J. Stobrawa, L. Kloc

Cyclic deformation behavior of the β-titanium alloy TIMETAL 21S
H.J. Maier, J. Manzke, H.-J. Christ

Microstructural investigation of ageing of Udimet 520 nickel superalloy

Modelization of residual stresses in aluminium alloy welded joints. Experimental validation and application on Ariane 5 main tank
J.P. Bonnafe', C. Destandau

D4 - INNOVATIVE STEELS AND SUPERALLOYS

Determination of internal strains in single crystal nickel-based superalloys by neutron diffraction
U. Glatzel, M. Feller-Kniepmeier, A. Müller, W. Reimers

Creep fatigue behaviour of directionally solidified nickel base superalloy
J. Zrnik, Z.G. Wang, Y. Yu, J.A. Wang, M. Zitnansky
Cyclic creep behavior of the single crystal superalloy SRR99 at 980 °C
P.D. Portella, J. Kinder, H. Frenz, A. Bertram

Investigation of local lattice parameter changes in monocristalline nickel-base turbine blades after service
H. Biermann, H. Mughrabi, S. Spangel

Strain and stress distributions in the single crystal nickelbase superalloy SC 16
T. Gnaupel-Herold, W. Reimers

Mechanical properties characterisation of an advanced steam piping material
N. Taylor, S. Tettamanti, A. Benvenuti, P. Bontempi, C. Guardamagna

Comparison of the mechanical behaviour of the single crystal superalloy SC 16 and the polycrystalline alloy IN 738 LC at high temperature
H. Frenz, H. Klingelhöffer

Effect of plastic strain in the mechanisms and kinetics of γ' precipitate rafting in nickel based superalloys: experimental investigations and mesoscopic computer simulations
M. Veron, Y. Brechet, F. Louchet

The effect of Nb contents on the structure and properties of W-Mo-V+Si 9-2-2 type high-speed steels
L.A. Dobrzanski, A. Zarychta

D2 - PROCESSING

Influence of the steel/molten zinc reaction kinetics on thickness and morphology of reinforced concrete galvanized steel bars
M. Memmi, B. Brevaglieri, M. Mongelli, S. Natali

Effect of melt ultrasonic treatment on the structure and properties of magnesium ingots and alloy wrought semiproducts
G.I. Eskin

An experimental investigation on extrusion processes of an aluminium alloy
A. Forcellese, F. Gabrielli, F. Tantucci

Characterization of D2 large diameter tool steel billets sprayformed by the Osprey process
C. Spiegelhauer, L.E. Shaw, G. Oakes

D5 - MECHANICAL DAMAGE IN SERVICE

Simulation of the deformation behaviour of martensitic 9-12% chromium steels on microstructural basis
P. Polcik, S. Straub, W. Blum
Influence of constraint on the microscopic fracture of pearlitic steels
J. Toribio, E. Vasseur

Quasistatic deformation behaviour and fracture mechanics
of bolting materials at 20 °C, -196 °C and -268.8 °C
L. Crippa, G. Merckling, A. Colaiuda

POSTER

E1 - ADVANCED NDT

Influence of the powder morphology and particle size distribution
on plasma sprayed in relation to the coating characteristics
E. Fleury, L. Laas, F. Rossi

E2 - HIGH INTENSITY BEAMS SURFACE PROCESSES

Modification of the surface properties of a Fe-Cr alloy, by Mo or Ni
electron beam alloying
C. Vignaud, M. Keddam, F. Pillier, S. Tosto, F. Nenci

Effect of the laser paint stripping process on the mechanical
behaviour of fibre reinforced composites
Sp.G. Pantelakis, Al.Ch. Despotopulos, G. An Lentzos,
Th.B. Kermanidis

Manufacturing of high-Tc superconducting paths on the surface of metal
conducting substrate using a high power Co2 laser
D.I. Pantelis, A.G. Mamalis, G. Pantazopoulos

Effect of the excimer laser surface treatment on ion-plated thin Mn-coating
on steel substrate
D.I. Pantelis, G. Pantazopoulos

Investigations of excimer laser induced modification of conductivity of
silver salt filled polyimide film
Z. Kocsis, Z. Kincses, I. Mudra, G. Ripka, I. Hajdu, B. Hopp

Effect of laser surface treatment on the high-cycle fatigue behaviour
of AISI 316L stainless steel
U. Holzwarth, H. Stamm, D.J. Boerman, A. Olchini,
F. Dos Santos Marques, R. Zausch

Effect of processing parameters on structure and properties
of surface melted aluminium bronze
Z. Shi, A. Bloyce, Y. Sun, T. Bell

Macro and microstructural aspects induced by surface fusion
with laser in tool steels
M.C. Filippini Lerardi, A. Garcia, A. Rodrigues da Costa, R. Vilar
Hot cracking sensitivity of laser deposited austenitic stainless steel coatings
F. Fouquet, C. Kuntz, P. Sallamand, J.D. Wagnière

Processing, microstructure and properties of laser-clad hadfield steel on low carbon steel
J.M. Pelletier, P. Sallamand, C. Barthoud, A.B. Vannes

Balance bearing manufacturing by the laser using
B.G. Levcovici, S.M. Levcovici, D.T. Levcovici

E3 - THERMAL SPRAYING PROCESSES

Microstructural and diffusional phenomena in the NiCoCrAlYTa coated AM-3 superalloy under four points bending high temperature low cycle isothermal fatigue
A. Sanz, J.P. Bernadou, L. Llanes, M. Anglada, M.B. Rapaccini

Erosion-corrosion characteristics of composite ceramic coatings
H. Chen, H. Zhao, H. Shao, S. Zhao

Characterization of three WC+12Co powders and the coatings obtained by high-velocity-oxygen-fuel (HVOF) spraying
J.M. Guilemany, J. Nutting, J.M. De Paco

Characterization of WC+Co+Cr coatings obtained by HVOF-spraying
J.M. Guilemany, F.J. Sanchez, L. Delaey, L. Jacobs

Study of the phases formed during a heat treatment of an aluminium coating on AISI 310 and 316 steels
B. Brevaglieri, M. Mongelli, S. Natali, F. Gauzzi

Microstructural studies of Al65Cu20Fe15 layers obtained by plasma spray deposition
A. Csordás-Pintér, Á. Csanády, V. Stefániay, I. Sajó, L. Tóth, A. Lovas, G. Konczos, J. Takács

E4 - SURFACE CHARACTERIZATION

Characterization of superficial layers obtained by roll grinding processes
D. Axinte, M. Anghel, I. Dan, M. Axinte

Surface state of pieces machined by electric discharge
F. Ghanem, H. Sidhom, C. Braham, J. Ledion

Some tribological aspects of the IC50 ordered alloy
G. Straffelini, R. Dorigatti, S. Gialanella, A. Molinari

E5 - THIN LAYERS: DIAMOND - LIKE AND TiN COATINGS

Modification of PACVD process to improve the TiN corrosion protection
E. Lunarska, N. Ageeava, J. Michalski
Microstructural and tribological study of magnetron sputtered TiAlN coatings
B. Škoric, D. Kakaš

Gradients of structure and properties of thin hard coatings
K. Fischer, H. Oettel

E6 - OTHER SURFACE PROCESSES

Metal-ceramik interfaces: control of wettability, adhesion and mechanical strength
Y. Naidich

Large scale friction surfacing
G.M. Bedford, L.J. Ward, P.J. Tooley, R.P. Sharp

The use of the method of plasmachemical modification of surface for production of oxycarbonitride coatings on hard alloys
L.A. Ivashchenko, V.I. Ivashchenko, G.V. Rusakov

Alloying and hard silver superficial deposition on copper by electrical spark
I. Alexandru, I. Carcea, C. Baciu, A. Alexandru

The relationship between brightness and structure of the organic agents in electroplated nickel
B. Szepetzka

Simulation of a multi-step boost-diffusion carburizing process
G. Maizza, J. Amstalden, G. Scavino

Microstructural characteristics of composite coatings produced by electrodeposition
X.M. Ding, N. Merk, B. Ilschner

Study of several basic processes taking place in the glow discharge region during the ion nitriding by a radio frequency field inductively coupled to the discharge cathode
A. Arabagiu, C. Chiriac, Gh. Vlaicu

Characterization of tungsten films on polyimide substrate
S. Benayoun, L. Fouilland, J.J. Hantzpergue, R. Bigot, A. Lost

Behaviour of some copper-based shape memory springs trained in tension by stabilised stress induced martensite method
J.M. Guilemany, J. Fernández, R. Franch

Characterization of phosphate glasses-steel interface by indentation
F. Barbieux, P. Vast, R. Bigot, A. Lost

Steady state with convection approach for the finite element analysis of arc plasma surface hardening of steel
M. Pietrzyk, M. Kryzhanovski
D1 - FUNDAMENTALS

Computer modelling of elasto-plastic fracture mechanics of ball indentation in ductile aluminum sheet
M. Afzal Khan, M. Nazeer Malik, A. Naeem, A. ul Haq, A.G. Atkins p84. 491

The characterization of the structure of light Al-Li cast alloys
M. Vasilescu, I. Vasilescu 495

Small-Angle neutron scattering study of single-crystal nickel-based superalloys and precipitate shape modelling
P. Strunz, P. Lukáš, A. Wiedenmann, J. Zrnik 499

Influence of Cd and Zn on the kinetics of formation of the GP zones for Al alloys
M. Kadi-Hanifi, H. Yousfi, N. Tighiouart 503

A new mechanical test for the complex characterization of the mechanical properties of solids

Characterisation of rough surfaces
E. Charkaluk, M. Bigerelle, A. lost 511

D2 - PROCESSING

The effect of melt ultrasonic treatment on structure and properties of ingots and wrought semiproducts in hypereutectic Al-Si alloys
Yu.P. Pimenov, G.I. Eskin, G.S. Makarov 515

Mechanisms of fine filtration of aluminium alloys in the ultrasonic cavitation field
B.I. Bondarev, G.S. Makarov, G.I. Eskin 519

Influence of some factors on the sintering of baharia iron ore
M.E.H. Shalabi, O.A. Mohamed, N.A. Abd El-Khalek, N.A. El-Hussiny, M.G. Khalifa 523

Experimental measurement of segregation parameters in some Ni-base superalloys
D. Ma, M. Meyer ter Vehn, P.R. Sahm 529

The reduction of iron ore pellets

The influence of copper on stereological parameters of microstructure of the white cast iron
A. Tabor 541
D3 - LIGHT ALLOYS (AL, MG, TI) FOR TRANSPORTATION SYSTEMS

Microstructural aspects of Al-Li-Mg base alloy containing Ce
C. Capotorto, C. Lupi, B. Verdini  pag. 545

Stretching and bending of 8090 Al-Li alloy
E. Romhanji, S. Tadic, M. Burzic, V. Milenkovic  549

Effects of microstructure on the fracture toughness of the high strength titanium alloy Ti-6246
M.J. Kennard, P. Bowen, M.T. Cope  553

Effect of plastic straining on precipitation reactions of an aluminum alloy containing metastable or stable phases
E. Cerri, E. Evangelista, S. Spigarelli, N. Ryum  557

A study on laser beam welded superalloys and titanium alloys by means of thermal modelling
F. Bonollo, A. Tiziani, S. Gobbi, L. Zhang  561

Mechanism and kinetics of precipitation of alloy AILi 8091 at continuous heating
O. Novitovic, L. Kovacevic, B. Jordovic  565

Threshold stress in AlMgZn and AlMgSi superplastic alloys
N.Q. Chinh, A. Juhász, P. Tasnádi, I. Kovács, E. Kovács-Csetényi  569

D4 - INNOVATIVE STEELS AND SUPERALLOYS

Analysis of matrix and interfacial dislocations in the Nickel based superalloy CMSX-4 after creep in [111] direction
R. Völkl, U. Glatzel, M. Feller-Kniepmeier  573

On Nb in an Fe-base superalloy (I) Effect of Nb on mechanical properties

On Nb in an Fe-base superalloy (II) Distribution of Nb in the alloy and its effect on microstructure

Possibilities in improvement of deformation capacity of sintered porous sheets
I. Vida-Simiti, O. Costin, V. Seiculescu  585

Creep properties of ferritic oxide dispersion strengthened alloys for heat exchanger applications
M.F. Brunella, I. Bertolini, C. Guardamagna, L. Ranzani  589

Duplex stainless steel embrittlement due to ageing at 275-475 °C temperatures
A. Molinari, G. Straffelini, R. Roberti, R. Bertanzi, G.M. La Vecchia  593

Inoculation of GS-3DK nickel superalloy by titanium nitride
E.V. Kolotukhin, G.V. Tyagunov, S.P. Avdyukhin  597
Contributions to characterize the production of alloy steel plates used for severe conditions in petrochemistry  
V. Munteanu, D.T. Levcovici, L. Farkas, A. Popa  

Peculiarities in fracture behaviour of duplex 02Cr22Ni5Mo3N steel  
I. Dlouhy, V. Kozák, M. Holzmann  

Viscoplastic stress relaxation at intermediate temperatures in alloy N-18  
V. Provendier-Aubourg, J.L. Strudel, J.Y. Guedou  

D5 - MECHANICAL DAMAGE IN SERVICE  

Evolution of microstructure during long-term cyclic creep of the Martensitic Steel X22 CrMoV 12 1  
S. Straub, T. Hennige, P. Polcik, W. Blum  

Creep damage evaluation via accelerated tests and microstructural analysis  
S. Tettamanti, N. Taylor, A. Garzillo  

Fracture toughness of ultra-low carbon bainitic steels  
S.M. Pytel, C.I. Garcia, A.J. DeArdo
