Advances in Refractories for the Metallurgical Industries II

The first symposium in the series was held in Winnipeg, Manitoba in 1987. The proceedings were published by the Canadian Institute of Mining and Metallurgy, Montréal, Québec, under the title Advances in Refractories for the Metallurgical Industries. (M.A.J. Rigaud, Editor).
Contents

Preface v
Editors’ Biographies vii
Symposium Organizing Committee ix

REFRACTORIES FOR THE STEEL INDUSTRY I

Refractories — 30 Years Ago and in the Future
R.O. Russell (abstract only) 3

Improvements in BOF Refractory Life in Brazil
P.O.R.C. Brant, A.O. Figueiredo, Jr. and M.D.S. Pereira 5

Refractory Design (Design WITH and OF Refractories)
R.C. Bradt 21

BASIC AND CARBON-BONDED REFRACTORIES

The Application of Doloma Refractories in Steelmaking Applications
D.J. Griffin and C. Richmond 31

The Outlook for Synthetic Resin-Bonded Magnesia-Graphite Bricks
P.Bartha and G.Weibel 45

Behaviour of Various Kinds of Carbon in Carbon-Containing Refractories
A.Yamaguchi and S.Zhang 59

Characterization of Flake Graphite for Carbon-Bonded Refractories
M. Rigaud, X. Li, M. Lagacé, and R. Nykyforuk 73

The Application of Thermo-Mechanical Modelling to Carbon-Bonded
Refractory Structures
D.T. Evans, M. Frith and I. Strawbridge 85

Effect of Graphite Quality on Oxidation and Corrosion Resistance of
Magnesia-Carbon Refractories
X. Li and M. Rigaud 95

REFRACTORIES FOR THE STEEL INDUSTRY II

Unshaped Basic Refractories for Steel Melting Electric Arc Furnaces
W.M. Seigl and M. Waidacher 111

The Introduction of Monolithics in European Steel Ladles: Our Experience
P. Atkinson, F. Etienne and R. Mutch 125

Step of Reliability of Steel Ladles at Sollac
D.Verrelle, D. Themines, M. Alonso, M. Puillet and J. de Lorgeil 135

xi
An Experimental Study of the Interactions Between Liquid Steel and a MgO-Based Tundish Refractory
J. Lehmann, M. Boher and M.C. Kaerlé 151

Development of the Refractory Performance for an Electric Arc Furnace
H. Schliephake and G. Münsternmann 167

A Study on Mineralogical and Physical Changes in Used Indian Silica Coke Oven Bricks
M.H. Dalmia, J.D. Panda, G. Goswami and P. Sahu 179

CASTABLES

Non-Destructive Testing of Refractories
D.A. Bell, A.D. Deighton and F.T. Palin 191

Product and Installation Innovations for High Technology Refractory Concretes
P.T. Troell, J.P. Sutton, A.M. Burkhart and M.C. Langenohl 209

Shotcreting of Ultra Low Cement Castables Refractories
R.J. Scharff 221

Formless Casting of Cement Free Castables
M.L. Alexander 233

Thermal Shock of Refractory Castables: Test Procedures and Results
S.B. Bonsall and J.E. Bogan 245

Effect of Compositional Variation on Expansion Behaviour of MgO/Al₂O₃ Compact During Spinel Formation
Z.N. Nakagawa, T. Itoh and N. Enomoto 257

REFRACTORIES FOR THE ALUMINUM INDUSTRY

Recent Developments in Refractories for Aluminum Cells
A.T. Tabereaux 271

Thermomechanical Properties of Corundum-Mullite-Zirconia Sintered Materials
X.C. Zhong and G.C. Sun 283

Corrosion Resistance of Aluminosilicate Ceramics to Molten Al-5%Mg Alloy
M. Allahverdi, S. Afshar and C. Allaire 295

Wettability and Reactivity of Silica-Alumina Refractories in Contact with Cryolitic Baths
G. Oprea 305

Corrosion of Refractories at the Bellyband in Aluminum Holding and Melting Furnaces
S. Quesnel, C. Allaire and S. Afshar 321

Ceramic Matrix Composites for Use in Molten Aluminum Applications
D.R. McLachlan and J.A. Kuszyk 329
Refractory Maintenance Program Using SPC Tools  
L. Pearson and D. Maxwell 339

REFRACTORIES FOR THE COPPER-NICKEL INDUSTRY I

New Ways of Improving the Thermal Shock Behaviour of Periclase Products by Selective Optimization of Their Microstructure  
W. Schulle, V.T. Anh and J. Ulbricht 347

Extending the Life of Inmetco’s Submerged Arc Furnace Refractory Lining  
D.M. Hoffman, W.J. Koshut, R.H. Hanewald, C. Doyle, J. Hrepic and C. Diaz 357

The Mineralogy, Corrosion Resistance and Properties of Six Commercial Rebonded Fused Grain Magnesite-Chrome Bricks  
C. Doyle, K. Cushnie, C. Diaz, J. Hrepic and J. Brennan 367

The Effect of Slag Composition Control on the Performance of Magnesite-Chrome Refractory Linings in Top Blown Rotary Converters  
G. Cuthbert, R. White, B. Martin, C. Doyle, J. Hrepic and C. Diaz 381

Use of Porous Plugs in molten Copper Production and Refining  
A.J. Rigby and M.D. Lanyi 393

BASIC SCIENCE

Stabilization of γ-Aluminum Oxynitride (ALON) and Preparation of ALON Bonded Corundum Refractory  
Y. Li, N. Li and R. Yuan 407

Study on Varied Types of Ultrafine Powder Used in Refractory  
X.M. Li, Q. Wu and Y.Wu 417

Influence of Thermal Treatment on the Mechanical Properties of Partially Stabilized Zirconia Refractories  
H. Balmori-Ramirez, J.M. Hallen-López and J.F. Garcia-Robledo 429

Reaction of O’-Sialon-ZrO, Composite Materials with Alumina in Steel  
W. Zhong, W. Li and X. Zhong 441

Microstructural Analysis of Corrosion Mechanisms in Oxide-spinel Steelmaking Refractories  
W.E. Lee, P. Korgul, K. Goto and D.R. Wilson 453

E.D. Spectroscopy, X-Ray Throdiffractometry and Mechanical Characterization of XO-x Bonded Basic Refractories (X=Si,P)  
M. Rivernet, J.C. Boivin, F. Abraham, N. Ruchaud and P. Hubert 467

Development of Temperature-elevation Schedules for On-site Drying of Refractory Concrete Slabs Castables Based on a Finite Element Model  
Z.-X. Gong and A.S. Mujumdar 477
REFRACTORIES FOR THE COPPER-NICKEL INDUSTRY II

The Evaluation of Novel Refractory Materials for the Non-Ferrous Industry
J.R. Donald, H. Fukuyama and J.M. Toguri 489

S. Roussel, A. Bilodeau and B. Guérout 499

Development and Application of a Novel Refractory Cooling System
A.R. Leggett and N.B. Gray 519

ZrO₂ Modified Basic Refractory Bricks
P. Rúz, C. Acuno, A. Soto and S. Miglani (abstract only) 533

Particle Size Determination of Refractory Castables by Laser Analysis from 0.1 Microns to 3500 Microns (6 Mesh)
M.D. Cook 535
