Contents

Preface	x
---------------	---

Defects and Charge Transport

Atomistic Simulation Methods Applied to Defect Structure and Transport Phenomena in Solid Materials	3
---	---

John Corish

Point Defects and Transport of Matter and Charge in Nonstoichiometric Oxides (II)	33
---	----

Rüdiger Dieckmann

Defect Structure of Pure and Sn, Ca-Doped In_2O_3	51
---	----

Yasuro Ikuma

Grain Boundary Induced Perturbations in Electrical Ceramics	61
---	----

J.L. Baptista, P.Q. Mantas, and J.R. Frade

Electrical Transport in Ultrafine Ceramics: Effects of Grain Size-Dependent Solute Segregation and Nonstoichiometry	79
---	----

Yet-Ming Chiang

Sodium Metal Deposition by Electron Beam Irradiation During SEM Observation	91
---	----

Y. Saito, M. Yamada, M. Nakagawa, and O. Nakamura

Diffusion

Toward Determination of Reliable Grain Boundary Diffusion Coefficients for Oxides	101
---	-----

Yong-Chae Chung, Michael Liberatore, and Bernhardt J. Wuensch

A New Approach to Investigating Surface Transport in Ceramics	117
--	-----

Andreas M. Glaeser

Surface Mass Transport Under High-Pressure Inert Gas and Hot Isostatic Process for Producing Porous Materials	137
---	-----

Kozo Ishizaki, Atsushi Takata, Makoto Nanko, and Yoshihiro Okumoto

Effect of Iron on the Nitriding Rate of Silicon	149
Kazunori Kijima	
Diffusive Phenomena in Si ₃ N ₄ Ceramics with MgO.....	169
Yoshio Ukyo and Naohiro Terao	
Phase Transformation	
α - to β -SiAlON Phase Transformations in Post-Sintering Heat Treatment	179
Yi-Bing Cheng	
Grain Growth and Solubility Change of SiAlON Composites During Annealing.....	191
Yoshio Ukyo and Akihiko Suda	
Phase Transition Investigation of Zirconia by Synchrotron Radiation... ..	201
Claude Landron	
Change of Ionic Conductivity Accompanied by Phase Transformation in Partially Stabilized Zirconia.....	213
H. Tsubakino, H. Ikeda, H. Maeda, and B. Zhang	
Solid-State Reactions	
Oxidation of Carbon Constituents from Multiphase Microstructures.....	227
James D. Cawley	
High-Temperature Oxidation of CVD Silicon-Based Ceramics.....	245
Takashi Goto, Toshio Hirai, Takayuki Narushima, and Yasutaka Iguchi	
Microwave Interaction with Ceramics and Its Application to Spinodal Decomposition.....	259
Jian-bao Li, Yong Huang, and Zhi-peng Xie	
Microstructure of an Icicle-Like Spinel Grown at the MgO/MgAl ₂ O ₄ Interface in the Dense and Coarse MgO-Fine Al ₂ O ₃ Powder System.....	269
T. Kuwabara, A. Matsumoto, O. Sakurada, M. Hashiba, and Y. Nurishi	
Expansion Behavior of Powder Compacts During Spinel Formation... ..	283
Zenbe-e Nakagawa	
Solid-State Reactions and Some Physical Properties of Reduced Europium Niobates Eu _x NbO _y (0.5 \leq x \leq 2)	295
A. Nakamura, N.M. Masaki, M. Nakada, M. Saeki, K. Tomimoto, and J. Akimitsu	

Liquid Phase Formation and Its Migration in Aluminum Nitride Ceramics	307
Kazuo Shinozaki, Yutaka Sawada, and Nobuyasu Mizutani	

Sintering Process

Effect of Liquid Phase on Microstructural Coarsening in Ceramic Systems	325
Martin P. Harmer, Jeong-Joo Kim, F. Jorge Alves, and Helen M. Chan	
Interface Instability in Alumina Under Chemical Inequilibrium	333
Yeong-Kyeun Paek, Ho-Yong Lee, Jeong-Yong Lee, and Suk-Joong L. Kang	
Thermoelectric Properties of Fe-Si Alloys: Effects of Oxidation and SiO ₂ Dispersion	345
Chul-Hoon Pai and Tae-Ho Song	
Binder Segregation in the Processing of Ceramics	357
Yao Zhang and Keizo Uematsu	
Reactivity of Boron in Solid-State Reaction and Sintering for Consolidation of Boron Compounds	375
Hideaki Itoh	
Microstructure Development and Solid-State Reactions During Liquid Phase Sintering	393
Hitoshi Yokoi and W. David Kingery	
Computational Modeling of Mass Transfer for Ceramic Microstructure	403
Hideaki Matsubara and Richard J. Brook	

Posters

Conductivity Enhancement in Fluorides by Grain Boundary Activation	421
Y. Saito and J. Maier	
Electrical Transport Properties and Electronic Structure of La _{2-x} Sr _x CoO ₄	429
Tatsuya Miyajima, Takahisa Omata, and Hiroyuki Ikawa	
High-Temperature Deformation and Point Defects in Yttria	439
T. Rouxel, J.F. Baumard, and J.L. Besson	
Degradation in Ionic Conductivity of Yttria Full Stabilized Zirconia ...	453
T. Yamada, T. Fukui, Y. Kodera, and H. Matsubara	

Evaluation of Grain Boundary Groove Profiles and Surface Diffusion Coefficients in SiC Ceramics Using Atomic Force Microscopy	463
Hidenori Fusamae, Woosuck Shin, Won-Seon Seo, and Kunihito Koumoto	
Selection and Evaluation of Sintering Aids for Low-Temperature Sintering of AlN Ceramics	473
Koji Watari, Motohiro Toriyama, and Shuzo Kanzaki	
Grain Growth Behavior of Ceramics Under the Existence of a Liquid Phase	483
Y. Iwamoto, S.G. Shin, and H. Matsubara	
Microstructures of Inactive Synroc-C Samples Produced by Different Hot-Consolidation Methods	491
M.L. Carter, M.W.A. Stewart, S.H.F. Leung, M. Colella, and E.R. Vance	
Role of Boron Oxide in Growth of Boron Nitride Grains	505
Milan Hubáček and Masanori Ueki	
Preparation and Characterization of Fine La-Cr-Zr Oxide Ceramics by Chemical Coprecipitation at High Temperatures	521
Chen-Feng Kao and Jyh-Shen Jou	
Phase Relationships in the Si₃N₄-SiC-La₂O₃-Y₂O₃-SiO₂ System Under High-Pressure Gas Processing	539
D.S. Perera, K. Liddell, S. Moricca, J. Drennan, W. Ding, and Q.S. Fan	
Light-Emitting Properties of Porous SiC with Different Microstructures	553
Woosuck Shin, Won-Seon Seo, Yutaka Suzuki, Kuniyuki Kitagawa, and Kunihito Koumoto	
Photovoltaic Effect in Ferroelectric Ceramics with Various Defects	563
Kazuhiro Nonaka, Morito Akiyama, Akira Takase, Toshiyuki Baba, Keisuke Yamamoto, Makoto Hiraoka, and Hiroataka Ito	
Effect of Pores on the Fracture Toughness of TiB₂/Si₃N₄ Composites	575
Seiji Shimakami, Misao Iwata, and Hirokazu Matsunaga	
Cavitation Mechanisms During Tensile Creep of an Advanced Silicon Nitride	585
F. Lofaj, A. Okada, H. Usami, and H. Kawamoto	
Friction Properties of Metal Oxide-Doped Silicon Nitride	601
Junji Ishizaki, Yoshitsugu Kato, and Misao Iwata	

Charge Transport in Highly Humidity-Sensitive Alkali-Doped Titania Thin Films	611
Enrico Traversa and Gualtiero Gusmano	

Index	625
