Mine Planning and Equipment Selection 1995

Edited by
RAJ K. SINGHAL
Université Laval, Québec, Federal Government of Canada
International Journal of Surface Mining, Reclamation and Environment, Canada

ANIL K. MEHROTRA
The University of Calgary, Alberta, Canada

JOHN HADJIJEORGIOU
Université Laval, Québec, Canada

RICHARD POULIN
The University of British Columbia, Vancouver, B.C., Canada

Associate editors
KOSTAS FYTAS & JEAN-LUC COLLINS
Université Laval, Québec, Canada

E. M. DE SOUZA
Queen's University, Kingston, Canada

A.A. BALKEMA / ROTTERDAM / BROOKFIELD / 1995
# Table of contents

Foreword xvii

Organization xix

1 Design and planning of surface and underground mines

Economic evaluation; Mine production; Mine simulation; Production scheduling; Computerized mine planning

Pit optimization of Sapan Dalam multi-seam coal deposit of Indonesia 3

*E.Y. Baafi, E. Milawarma & C. Cusack*

A dragline simulation model for complex multi-seam operations 9

*E.Y. Baafi, H. Mirabediny & K. Whitchurch*

Planning of ore recovery parameters based on economical and mathematical modelling of ore drawing 15

*V.S. Bolkisev, V.N. Shashkin & K.A. Amiralin*

A rational approach to the design of underground marble quarries 19

*M. Bosu, R. Ciccu & P.P. Manca*

'INFRA' – Computer-aided planning of mine transportation systems 29

*C. Buhrow*

Managerial aspects of mining projects in remote sites 39

*A. P. Chaves*

Optimum open pit limit of Hekimhan-Deveci iron mine: Determination by the moving cone optimising technique 45

*A. Dağ & U. Özer*

Planning for safety: The use of risk assessment 49

*P.J. Foster & J.S. Edwards*

Development of a short term planning tool at the Compagnie Minière des Guemassa, ONA, Morocco 57

*D. Goetz, P. Masurel, S.M. Ait Rahou & M. Sellami*

Numerical methods and their user-friendly applications 65

*M. K. Gökay*
Prediction of gas-geomechanic situation of coal-gas deposit during underground mining in panel
G.I. Gritsko, B.V. Vlasenko & V.A. Fedorin

Top coal caving technology in dip thick coal seams
Yu Haiyong, Wu Fengdong, Li Chongxun, Zhang Yongjiu, Zhang Yuliang & Yan Zhongyang

Meaningful rates of return for project evaluation
M. M. Hajdasiński

Precision drilling extends the range of long hole blasting
H. Hamrin

Peculiarities of recultivation by placer deposit mining
V. F. Hnykin

Short-term production scheduling for open pit mines by PERT network with resource constraints
Qinghuai Hu, Wei Wei & Shihong Fang

The study of rational bench height of deep open pit mines based on haulage cost
Wang Jiachen & Liu Qi

The forecasting report of the moment of the mine retirement from the coal area mine fund
I. G. Kondratova & N. S. Bulychev

Three dimensional modeling in planning ornamental stone quarries
J. C. Koppe, A. C. Zingano & J. F. C. L. Costa

Study and analysis of problems and disturbances caused by oversize boulders in a mine production system: A case study
U. Kumar

An intelligent system of optimizing the mine production planning of underground mine
Yinglong Li, Xiaohua Chen & Guangxu Tong

Intellectual supporting system of VACS operator based on the fuzzy diagnostic model
I. V. Lockshina

Computerized mine planning at Brunswick Mining & Smelting
G. E. MacPherson, P. G. Stothart & J. G. Torrance

Hydrotransport system simulation modeling for Syncrude's North Mine
J. McTurk, P. Batty & D. W. Ellis

Hard dimension stone production by splitting and cutting methods in Italian quarries
R. Mancini, M. Cardu & M. Fornaro

Layout and equipment of a modern high productive mine operation at great depths: The Ensdorf Mine
A. Meyer & D. Gessner

UBC mining method selection
L. Miller-Tait, R. Pakalnis & R. Poulin

An expert system controlling ore flow in large scale orepass systems
G. Mogi, J. Yamatomi & T. Adachi
Block modelling and long range mine planning using SURPAC  
J.Nachmias & Y.Pavlov  
177

Technogenic potash seams and their mining prospects  
M.P.Nesterov & V.Y.Marakov  
183

Safety during filling of underground cavern gas storage  
A.Otáhal & L.Hájek  
189

Underground hard-rock mining strategy development  
L.D.Pareja & C.W.Pelley  
193

Re-examination of a century old mining area: Boleo, Baja California, Mexico  
D.M.Parkes  
199

Exploitation planning in slate quarries by merging the recovery and quality indices  
205

Coal mine pollution flows monitoring  
L.A.Puchkov, V.D.Ayurov & N.O.Kaledina  
209

The mathematical model of interaction of mining and transport equipment at the quarry’s working zone  
B.Rakishev, U.Djarlkaganov & J.Marat  
215

Turning mining enterprises in Russia into private and joint-stock companies  
M.Revazov & S.Likhterman  
221

Short term mining operation sequencing and control: The B2 approach as a case study  
J.Schleifer, M.Ismail & E.Caumartin  
227

Application of deposit simulation model in mine design  
Hang Shu, Peng Yang & Guangxu Tong  
231

Discussion on the mechanism of cut pulling in underground mines  
S.P.Singh  
235

A field study of sources of hole alignment deviations  
T.Sinkala  
243

On the issues of the solution of dynamics simulation of coal production within the coal mining process in coal faces  
P.Šnapka  
249

Fundamental considerations on a mining technology beyond continuous and longwall mining  
K.Spies  
255

Contribution to ventilation of shafts during their closing  
V.Strakoš & V.Kebo  
261

Long term open pit scheduler  
B.Tolwinski & T.S.Golosinski  
265

Simulation for design, planning and control in the automated mine  
N.Vagenas, M.Scoble & G.Baiden  
271
An integrated approach to the extraction of the Rio Grande silver/lead/zinc orebodies at Mount Isa
E.Villaescusa, G.Karunatillake & T.Li

An interactive multiple criteria decision support system for production sequencing in an underground longwall hard coal mine
F.L.Wilke & B.M.Winkler

Mine planning, pit design and production scheduling for Eshidiya phosphate mines
J.Woreikat & F.Hayek

BEGS – A simulation model for assessing risks in mineral resources estimation
E.A.Wright

Mining’s new frontier: The Fording Coal g.p.s. experience
E.Wusaty & L.Paulhus

Self-adaptive control of productional operations for surface mining
Q.X.Yun & G.Q.Huang

Analysis of stability of gate entries in retreating longwall mining
M.Zhang & A.K.Bhattacharyya

Oil content estimation in sedimentary rock assisted by geostatistics
A.C.Zingano, J.F.C.L.Costa & J.C.Koppe

2 Mine equipment, materials handling and equipment maintenance

Equipment selection procedures; Pipeline transportation; Continuing mining systems; Drilling and blasting equipment; Change over to continuous mining systems; Dredging; Truck/shovel, draglines, conveyors, etc.; Mine maintenance; In-pit crushing/conveying

A detailed classification of rotating excavators
L.Adler & S.D.Thompson

Determination of equipment downtime/breakdown and availability coefficients for continuous surface mining systems
Z.G.Agioutantis & C.Kavouridis

The economics and logistics of moving car bunker systems applied to modern underground coal mines
P.M.Barlow

Equipment selection in the Iranian marble quarries (dimension-stone industry): Procedures and problems
S.H.Bassir

Conversion from bucketwheel to truck-shovel operation at Suncor, Oil Sands Group
A.Blazo

A systematic decision making model for optimum surface mining equipment selection
T.Cebesoy, M.Gözzen & S.Yaşi
Equipment selection for small scale mining
M.W.Chanda

Estimation of the air quality index in the case of operation of numerous diesel-powered units in Greek underground bauxite mines
J.N.Economopoulos & P.T.Kontothanassis

Intelligent dispatch system for technological monitoring
N.I.Fedunec, O.E.Fomicheva & D.G.Lasht

Research on the interval between equipment examinations
Liu Fengtai, Gao Hongwei, Ma Yunlong & Hu Mingdong

Diagnosis of machines running at unstable speeds of revolution
B.Geropp, H.-W.Keßler & P.Burgwinkel

Application of high angle conveyor at Majdanpek open pit copper mine
M.Grujic & Z.Stanisic

Selection of opencast mine equipment using knowledge base and genetic algorithm
A.Haidar & S.Naoum

Selection of drill rigs for development drifting in underground mines
H.Hamrin & L.Gustafsson

Conveyor belt selection criteria
M.Hardygora

Current collectors for trolley mine locomotives
A.B.Ivanov

Determination of the distribution function of conveyor belt operating time based on the belt model
L.Jurdziak & M.Hardygora

On-line fault diagnosis of a bucket wheel gear box in a German open cast coal mine
H.-W.Keßler, B.van den Heuvel, B.Bauer & B.Geropp

Double roll crusher – Tooth base and bimetallic cap developments
A.Khan, D.Reid, K.Obaia & D.Adamic

Modern mine maintenance: Toolbox, blackbox, or tribo-technology?
R.L.Kincaid

The pipeline transportation of grinded copper ore at Cerovo mine – From concept to implementation
D.Knežević, Z.Marković, S.Stupar, D.Dragić & D.Dumitrašković

Planning and keeping in operation of coal-cavings
T.Kovacs & L.Nemeth

On the property of hydraulic coupling
Li Guang Bu

Design of an economic mobile slasher for underground coal extraction
S.N.Maity, S.K.Chaulya & B.B.Dhar
BEdisp – A computer-based truck dispatching system for small-medium scale mining operations
G.N.Panagiotou & T.N.Michalakopoulos

Magnetic defectoscopy of steel ropes
J.Pištora, M.Lesniák, D.Ciprian & V.Mádr

The problems of control of power consumption in the mining enterprises
G.Pivnyak

The development of welded structures for mining equipment
B.Powers

Maintenance characteristics of mobile mine equipment at Falconbridge Strathcona mine
N.Runciman, N.Vagenas & R.A.Howes

Simple and exact mining using surface miners
B.Schimm

Measurement and analysis of dragline operating parameters for block excavation
G.B.Sharrock, T.O.Aspinall & A.Scott

Estimation of applicability of a drilling machine in Japanese open pit limestone quarry
H.Shimada & K.Matsui

An introduction of a continuous mining system in hard rock open pit mines using a modified surface miner
F.X.Spachtholz & F.L.Wilke

The use of off-the-road tyres in a Turkish opencast lignite mine and its importance in mine economics
M.Z.Sunu & A.O.Yilmaz

Appropriate technology for the cleaner mining of coal by smaller operators
L.Wade & T.T.H.Woodyatt

Performance analysis of PDC pin and hybrid core bits in rock drilling
M.D.Waller & A.Ersoy

Automatic selection of aggregate images from a moving conveyor belt
W.Wang

Availability control and equipment monitoring on large hydraulic shovels with the aid of on-board computers
U.Wulfert

Experimental study on estimation of leakage discharge through concrete crack
H.Yanagi, S.Matuoka & T.Fukuhara

Semi-continuous coal haulage system in Chinese surface mines
3 Innovative mining systems
   Machine automation and control; Mine-wide data gathering and monitoring; Expert systems; Automation in surface and underground mining; Equipment health and performance monitoring systems

Research on the global optimization theory for mining engineering systems
Jianshe Chai, Xianping Xie & Guangxu Tong

Fully automated laser system for surveying a stockpile from a tripper car
B.Clifford

Integrating communications and applications in the automated underground mine
J.Hackwood & R.Poole

Intelligence decision-making system for selecting tunnelling equipment
Gao Hongwei, Zhang Youxiang, Liu Fengtai, Ma Yundong & Hu Mingdong

The system design principles of mining machines with the combined main parts
Y.I.Klimov

Applications of a flexible automation and robotics in mining: Database for designers
V.Konyukh

TMS™ – Total Mining Systems: An intelligent management, production control and planning facility
J.Peck & C.Hendricks

Power- and resources saving technology of rockmass destruction
A.V.Rashkin, V.F.Kuzin & V.P.Myazin

Integrated computer system for planning and controlling mining
P.Stepanov & G.Piven

Simulation and animation of surface mines in the Western United States
J.R.Sturgul, J.Tiedemann, C.Ritter & T.Fliess

Apparatus and programme providing microprocessory means of mining automation
V.Tkachov & G.G.Pivniak

4 Surface mining and the environment
   Off-site impacts of surface mining operations on reclaimed land; Self-sustainable reclamation and recultivation; Minesite closure decommissioning and reclamation of contaminated sites; Acid mine drainage

Methods and results of the field measuring of geotechnical rock properties on spoil banks of brown-coal mines
J.Aldorf

Ethics, surface mining and the environment
W.Cragg, D.Pearson & J.Cooney

Monitoring systems in mining environmental management and control
L.de Salles Leal Filho, W.T.Hennies, D.Owen & S.Durucan
Integrated reclamation planning of disconfigured landscape after surface mining operations at Ghana Consolidated Diamonds limited (GCD), Akwatia, Ghana

J.A.F.Fenteng, R.K.Asabere & G.B.Solomon

Ferric phosphate coating to prevent pyrrhotite oxidation

Z.Georgopoulou, K.Fytas, H.Soto & B.Evangelou

Surface coal mining in the South Wales environment

M.J.Haigh

Opencast mine planning creates the prerequisite for environmental compatibility

M.Hartung

Underground limestone mining in Brazil as an economic environmental issue

W.T.Hennies, A.Stellin Jr & L.C.Ghizzi

The social and environmental effects of surface coal mining

S.Heycock

Mine rehabilitation close to urban areas: The case of Itaquera Quarry, São Paulo, Brazil

M.M.Ibrahim, S.M.Eston & L.E.Sanchez

Study on biochemical treatment of Acid Mine Drainage (AMD) and comprehensive utilization of its sludge

Zhu Jianwei

Environmental approach and the future of mining in the Urals region of Russia

A.V.Khokhryakov, I.V.Dementyev & V.G.Albrecht

Modelling rainfall/runoff on reclaimed land

M.P.Kilmartin

Classification of waste rock at Island Copper Mine for acid rock drainage potential

D.Lister & G.W.Poling

Geotechnical stability of slope of the opencast mine of Czechoslovak army at the foot of the Ore Mountains

O.Lošť'ák

Tracking of heavy metals in drainage from abandoned mines, Big Cottonwood Creek, Utah

R.L.McNearny

Principles and practises of sustainable development – With TransAlta examples

D.A.Mikalson

The identification, location and assessment of abandoned mine hazards – The first step toward rehabilitation

A.Mitchell & W.O.Mackasey

Particulate emissions from some sources in surface mining

M.A.-K.Mohamed

Lithological and mineralogical influences on pyrite oxidation during the generation of acidic drainage

K.J.Mountjoy & G.W.Poling
Environmental problems associated with blasting operations and their remedies  
C.B. Navalkar

Saline gold mine wastes in arid Western Australia: Revegetation establishment in the absence of topsoil  
J.M. Osborne

Self-sustainable reclamation: Shrub and tree establishment on saline mine wastes  
J.M. Osborne

Environmental issues of energy use in mines  
G.G. Pivniak & A.B. Ivanov

Risk management for mine waste and tailings  
R. Poulin

Environmental problems associated with mining of bentonite clay deposits at Boa Vista, Paraíba, Brazil  
C.M.M. Silva, S.M. Eston & E.C. Damasceno

Surface mining and the responsibility for environmental impacts: New situations and challenges for the Czech coal industry  
I. Svoboda & M. Vrbová

Areal dubbing of mining activity in the largest mining company in the Czech Republic: Most Coal Joint Stock Company (JSC MUS)  
J. Třiska

5 Geotechnical stability in surface and underground mining

Pre-mining investigation; Blasting and controlled blasting; Slope stability prediction and monitoring techniques; Haulroad design and construction; In-situ instrumentation; Design and construction of waste dumps; Liquid storage and tailing ponds; Groundwater; Application of geotextiles; Slope stability analysis; Remote sensing; Pit slope stabilization techniques

Parameter optimization and control in blasting works for ore and coal mines  
V. Arad & S. Arad

The stability and reliability analysis of development openings in the Valea Jiului  
V. Arad & S. Arad

The feasibility study of waterproof and water-protection technologies on the basis of Ukrainian mining regions geotechnical systems  
V. I. Bondarenko & I. A. Sadovenko

Buffer action in the carboniferous clays rocks located on hard coal heaps  
Z. Bzowski

A general stochastic methodology for rock work design  
R. Cotza & B. Grosso

Static collapse of mine waste fills  
R. F. Dawson & N. R. Morgenstern
