Proceedings of the International Workshop

Monitoring Tailor-made

An international workshop on monitoring and assessment in water management

20-23 September 1994
Beekbergen
The Netherlands

ISBN 9036945429

Organized by RIZA - The Netherlands Institute for Inland Water Management and Waste Water Treatment

Section 2 - Monitoring Strategies

Introduction ......................................................... 83

Water quality monitoring as an information system ......................... 84
  Robert C. Ward
  USA

Strategy for water quality assessment ...................................... 93
  C.J.van Leeuwen
  The Netherlands

Ecological assessment of water systems .................................... 105
  The Netherlands

Water quality control in the production of drinking water from river water 118
  Peter G. Stoks
  The Netherlands

Information requirements as design criteria for surface water monitoring 126
  M. Adriaanse
  The Netherlands

Demand for information as the basis for groundwater monitoring strategies 134
  M.J. van Bracht
  The Netherlands

Section 3 - Network Design and Optimization

Introduction ......................................................... 145

Factors to consider in optimization of a monitoring network ................ 146
  Thomas G. Sanders, Jim C. Loftis
  USA

The most important statistical aspects .................................... 153
  Graham B. McBride, Jim C. Loftis
  USA

Compliance with standards - the problems .................................. 162
  J.C. Ellis, P.J. Newman
  United Kingdom

Quality management of monitoring programmes ................................ 178
  W.P. Cofino
  The Netherlands

A review of data processing and presentation techniques .................. 188
  R.M.A. Breukel
  The Netherlands
New approaches to the interpretation and classification of water quality data based on techniques from the field of artificial intelligence ........................................ 195
   W.J. Walley
   United Kingdom

Section 4 - Case Studies

Development of a national programme for water quality monitoring in England and Wales ........................................................................................................ 211
   J. Seager
   United Kingdom

Development of surface water quality assessment system in Hungary .................. 220
   P. Varga, S. Kisgyörgy
   Hungary

An approach to lake monitoring in Poland .............................................................. 232
   H. Sozka, D. Kudelska
   Poland

Transboundary rivers: Belgian - Dutch experiences ............................................. 241
   M.J.A. Verdievel
   Belgium

Monitoring strategies in the Po river basin ............................................................ 250
   R. Pagnotta, M. Benedini, G. Guiliano, R. Passino - Italy

Biological monitoring of large freshwater bodies as integrated part of water management in the Netherlands ................................................................. 262
   R. Noordhuis, K.H. Prins, E.C.L. Marteijn, M.C.M. van Oirschot,
   P. Jesse, W.H. Mulder
   The Netherlands

Strengthening of the monitoring, laboratory analysis and information capabilities of the riparian countries of the Danube basin .............................................. 277
   T.J. Lack, K.J. Andersen, T.T. Kuipers, A. Lynggaard-Jensen,
   J.B. Nielsen, P.D. Whalley
   United Kingdom, The Netherlands, Denmark

Monitoring of the hydrosphere in Slovakia .......................................................... 291
   B.Minárik, S.Groot, M.Adriaanse, R.M.A.Breukel
   Slovakia, The Netherlands

A decision support system for water management in river basins .......................... 301
   S.Groot, P.J.M.A.Kerssens, R.D.Koeze, E.F.W.Ruijgh,
   M.Kollár, H.Zajicová, B.Minárik
   The Netherlands, Slovakia

Design of a trend detection network for water authority Friesland ....................... 3122
   M.W. Blind, R.H. Aalderink, R. Maasdam
   The Netherlands
Monitoring of surface waters in Latvia and possible ways in optimization of the network .................................................. 318
I. Lyulko
Latvia

Improvement of the Estonian coastal sea monitoring on the example of the investigations in the Tallinn bay 321
A. Nõmm
Estonia

Hydrological-ecological monitoring of changeable and vulnerable water objects: the Volga delta and nearshore zone of the Caspian sea as an example .............................................................. 324
V.N. Mikhailov
Russia

The water quality modelling for accidental pollution spills as a component of river basin monitoring and managing systems ............................... 328
N.N. Shagalova, A.G. Shagalov, S.V. Tretjakov
Russia

Organic chemicals in the Ukrainian reaches of the Danube ............................. 332
O.G. Tarasova
Ukraine

A method for quantifying the effects of groundwater shortage on aquatic and wet ecosystems ................................................................. 336
J.M.J. Gieske, J. Runhaar, H.L.M. Rolf, M.J. van Bracht
The Netherlands

WQSTAT II: A Water Quality Data Analysis Package .............................. 340
Thomas G. Sanders, Jim C. Loftis, Robert C. Ward
USA

Conclusions

Closing Speech by the Conference President .................................................. 347
J.de Jong
The Netherlands

List of delegates .......................................................................................... 349
