STRUCTURAL DYNAMICS: RECENT ADVANCES

Proceedings of the 5th International Conference

Volume II

Proceedings of the Fifth International Conference on Recent Advances in Structural Dynamics, held at the Institute of Sound and Vibration Research, University of Southampton, England, from 18th to 21st July, 1994, co-sponsored by the US Airforce European Office of Aerospace Research and Development and the Wright Laboratories, Wright Patterson Air Force Base.

Edited by

N.S. FERGUSON

*Institute of Sound and Vibration Research,
University of Southampton, Southampton, UK.*

H.F. WOLFE

*Wright Laboratory,
Wright Patterson Air Force Base, Ohio, USA.*

and

C. MEI

*Department of Mechanical Engineering and Mechanics,
Old Dominion University, Norfolk, Virginia, USA.*

Contents

Page No.

INVITED PAPERS

V.M. RYABOY

Limiting performance and optimal synthesis of the
vibration isolating structures

681

R.D. ADAMS and M.R. MAHERI

Natural frequencies and damping in fibre reinforced
plastic plates

699

RANDOM VIBRATION

60. J. NAPRSTEK and L. FRYBA

Interaction of a long beam on stochastic foundation with
a moving random load

714

61. S. McWILLIAM and R.S. LANGLEY

Random response of offshore vessels to non-linear wave
forces

724

62. M. MOSHREFI-TORBATI and J.K. HAMMOND

Approximation of fractional systems by conventional
models

734

63. Q. FENG and R-Y SHEN

The effect of noise on chaotic behaviour of piecewise
linear systems

745

64. G. OLIVETO, A. GRECO and I. CALIO

Dynamical response of a structural model with
foundation uplift

755

65. D.P. THAMBIRATNAM, S.M. WILKINSON and
H.J.B. CORDEROY

Dynamic analysis of asymmetric buildings subjected to
earthquakes

765

66.	G. OLIVETO and A. SANTINI Complex modal analysis of a soil-structure interacting model	775
67.	A. STEINWOLF Analysis and approximation of probability distribution of vehicle random vibrations with consideration of kurtosis and skewness values	785
68.	Z. WANG, F. ZHANG, B. FEI and Q. DU Economic life prediction of fatigue for vibrating structures	795

NUMERICAL METHODS

69.	R.I. MACKIE Applying dispersion correction to numerical models of 2-D waves	804
70.	S. SALIM, N.G.R. IYENGAR and D. YADAV Free vibration of composite plates with random material characteristics	814
71.	S.A. RIZZI and J.F. DOYLE Dynamic fracture mechanics analysis for an edge delamination crack	824
72.	M. SATHYAMOORTHY, D. RADOSAVLJEVIC and A. CROGAN Dynamic analysis of wing type structures using a symbolic manipulation technique	835
73.	I.I. SUNGUR Design curves for the natural frequencies of cable-stayed bridges	849
74.	G.Q. LI and B.S. CHOO Free vibrations of coupled shear walls	859
75.	S.D. GARVEY, M.I. FRISWELL and J.E.T. PENNY Efficient evaluation of composite structure modes	869
76.	M.I. FRISWELL, S.D. GARVEY and J.E.T. PENNY Model reduction using an iterated IRS technique	879

77. A.V. PESTEREV and G.A. TAVRIZOV
Quick inversion of some meromorphic characteristic matrices 890
78. R.C. SHIEH
Fully implicit massively parallel computational methods for transient structural response analysis 900

CONTROL

79. P. WARNITCHAI and T. PINKAEW
Modelling of liquid sloshing for damper application 911
80. M. KSIAZEK
Comparison of optimal passive and active vibration isolation systems for a sitting human operator body 924
81. R.L. CLARK
A hybrid, autonomous control approach 934
82. Y. BEN-HAIM and D.J. INMAN
Vibration control with unknown disturbances represented by convex models of uncertainty 945
83. M.E. JOHNSON and S.J. ELLIOTT
Minimization of volume velocity as an active control strategy 962
84. M.J. BRENNAN, S.J. ELLIOTT and R.J. PINNINGTON
Active control of flexural waves using power as a controlling parameter 973
85. G. MICCOLI and A. CONCILIO
Gain and phase characteristics of noise and vibration active control device by piezoceramic transducers 983
86. R.W. PRATT and K.J. SMITH
Stability issues and the relevance of multivariable control in multichannel fatigue and vibration tests 993

VIBROACOUSTICS

87. R.S. LANGLEY
Wave group velocity and modal density in aerospace structures: curved panels and periodic constructions 1003

88. H. VAN DER AUWERAER, D. OTTE and F. AUGUSZTINOVICZ
Application of principal field decomposition to aircraft interior noise analysis 1013
89. Y.Y. LEE and C.F. NG
The prediction of the effects of stiffness and damping on noise reduction of small enclosure 1023
90. P. HERSTER, E. GSCHWEITL and G. Ph. RAINER
Use of airborne noise calculation to develop low noise engines 1033
91. L. MAESTRELLO
Control of sound from high-speed jets using an oscillating lip and a porous plug nozzle 1045

SIGNAL PROCESSING

92. N.E. KING and K. WORDEN
An expansion technique for calculating Hilbert transforms 1056
93. J.W.A. FACKRELL, P.R. WHITE, J.K. HAMMOND, R.J. PINNINGTON and A.T. PARSONS
The bispectral analysis of vibration signals 1066
94. C. OZTURK, T. SUMER and E. KUTLAY
Significance of choosing correct time windows to determine the inherent dynamic properties of washing machines 1078
95. B.D. LIM and Y.H. KIM
The use of the wave number vector in modal analysis; its formulation and applications 1088
96. S. HASHEMI and J.K. HAMMOND
Inverse methods for dynamical systems 1098
