Practical Design of Ships and Mobile Units

Edited by

H. Kim
Seoul National University

J. W. Lee
Inha University

VOLUME 1

The Society of Naval Architects of Korea
CONTENTS OF VOLUME 1

Preface to Volume 1

Plenary Lectures

What about Double Hull for Bulk Carriers ............................................................ xix
   F. S. B. Chao
Korea's Role in the World Shipbuilding Industry ................................................... xxviii
   Y. S. Song

Hull Form ( I )

Resistance Prediction through Regression Analysis for High Speed Marine Craft .......... 1.1
   M. Waugh and P. K. Sahoo
Introduction of Airship Form Bulb and Further Studies on Its Resistance Characteristics
   by Means of Model Experiments and Rankine Source Method .................................. 1.12
   M. Ikehata and K. Suzuki
Hull Form Development of an 86,000 DWT Lakemax Crude Oil Tanker ....................... 1.24
   S. J. Park, H. H. Chun and S. H. Lee

Hull Form ( II )

An Approach of Hull Form Optimization Oriented to the Wave Resistance .................. 1.38
   M. Mifune, A. Masuko and S. Ogiwara
U.S. Navy Hull Form Investigations for Strategic Sealift ........................................ 1.50
   S. C. Fung, D. N. McCallum, G. Karafiath and J. R. Lee
Application of Finite Volume Method with Moving Boundary Technique
   to Hull-Form Design ......................................................................................... 1.68
   H. Akimoto, T. Ohmori, K. Kimura and H. Miyata

Flow around Ship

A Computational Study on Viscous Flow Characteristics around HSVA and RINA
   Tankers .............................................................................................................. 1.83
   S. H. Van and H. T. Kim
A Study on the Resistance and Wake Characteristics of a Full Ship Series ................ 1.97
   S. S. Rhyu and H. Kim
Wave Resistance

Application of Nonlinear Ship Wave Calculations in Design ....................... 1.111
H. C. Raven and H. H. Valkhof

Computation of Wave Resistance of Surface Ships ................................. 1.123
Y. S. Hong

Scale Effect on Wave Resistance Obtained by Longitudinal Cut.
Experimental Results and Numerical Calculations ............................... 1.135
D. Bruzzone, P. Cassella, S. Miranda, C. Pensa and I. Zotti

Performance

Propulsor-Hull Interaction ......................................................... 1.147
A. Jonk

A Study on the Energy-Saving Effect of the L. V. Fin ................................ 1.159
T. Ishiguro, G. Yamamoto, T. Manabe and T. Yokota

Speed Trial or Trial Speed ......................................................... 1.171
A. H. Hubregtse and G. G. J. Mennen

Propulsors and Cavitation (I)

Design and Performance Prediction of a Contra-Rotating Propeller
for 300,000 TDW Class Tanker ..................................................... 1.182
K. S. Min, H. G. Lee and Y. K. Kwak

Propeller Design Optimization Technique for the Minimization of Propeller Induced
Vibration Using Artificial Intelligence and Numerical Optimization ............ 1.194
C. Dai and S. Hambrick

Design of Propeller Blade Shape by Vortex Distribution Method ................. 1.207
J. H. Kim, S. K. Kim and C. S. Lee

Propulsors and Cavitation (II)

Propeller Design and Model Evaluation of U.S.Navy's SWATH Ship,
T-AGOS 23 ................................................................................. 1.219
K. H. Kim, M. B. Wilson and G. Karafiath

Theoretical Design of Highly Skewed Propeller ..................................... 1.231
Offshore Engineering

A Study on Representation and Stability of Floating Offshore Structures ........ 1.243
H. Shin and K. W. Park

Deflection of a Multiple Module Long Offshore Structure
in Directional Spectrum Waves ........................................... 1.254
T. Hirayama and N. Ma

Investigation of Oil Fence Performance in Calm Water and Waves ............. 1.266
C. M. Lee and K. H. Kang

Propulsors and Cavitation (III)

Propeller Operating in a Seaway ........................................ 1.278
Y. Chevalier and Y. H. Kim

Correlation Investigations for Wake, Cavitation and Pressure Fluctuations
behind Whole Ship Models .............................................. 1.292
J. Friesch

Prediction of Hull Surface Pressures Induced by a Cavitating Propeller ........ 1.308
Y. G. Kim, C. S. Lee and I. S. Moon

Propeller-Rudder Interaction

The Performance of Propeller-Rudder System with Rudder Angle .............. 1.321
M. Tamashima, J. Yang, S. Malsui and R. Yamazaki

Some Effects of Rudder-Propeller-Hull Arrangements
on Maneuvering and Propulsion ....................................... 1.333
A. F. Molland and S. R. Turnock

A Practical Calculation Method for Thick Wings ................................ 1.346
K. Nakatake, J. Ando, K. Kataoka and A. Yoshitake

Seakeeping (I)

Speed Loss and Maneuverability of a Full Ship in Directional Spectrum Waves .... 1.357
S. E. Kim and T. Hirayama

Practical Formula of Added Resistance in Short Crested Irregular Wave
and Bow Form ............................................................ 1.369
S. Naito and K. Takagishi

A Computation of Hydrodynamic Forces by Using 3-Dimensional Higher Order
Panel Method ............................................................. 1.382
S. P. Ann, H. S. Lee and S. K. Lee
Seakeeping (II)

Simulation of 3-D Sloshing and Structural Response in Ship's Tanks .................................. 1.394
J. Y. Kim, K. J. Lee, J. M. Kang, D. J. Yum, Y. S. Seol, S. Rashed and A. Kawahara

Seakeeping Design of the New Finnish Multipurpose Icebreaker ............................................. 1.406
T. Karppinen, H. Eronen, P. Lohi and E. Koivumäki

A Practical Prediction Method of Sloshing Loads in Cargo Ship Tanks on Board Ships .................. 1.418
Y. J. Park, J. K. Choi, Y. S. Kim and Y. S. Bae

Wave-induced Load

On the Impact of Green Water Loading on Ship and Offshore Unit Design ................................. 1.430
B. Buchner

Analysis on Extreme State of Sea and Prediction of Motions in Waves for Marine Structures ............. 1.444
Y. Wang, J. Miao and F. Li

Development of Design Sea Pressure on the Hull Considering Phase Difference .......................... 1.456
Y. K. Chon and T. B. Ha

Stability (I)

Transverse Stability of Ships in Irregular Astern Seas .......................................................... 1.467
M. Hamamoto and W. Sera

The dynamic Stability and Manoeuvring of a Ship in a Seaway ............................................. 1.479
P. A. Bailey, W. G. Price and P. Temarel

From Surf-Riding to Loss of Control and Capsize: A Model of Dynamic Behaviour of Ships in Following/Quartering Seas ................................................................. 1.494
K. J. Spyrou and N. Umeda

Wave-induced Dynamic Response

Experimental Investigation of Hydrodynamic Loadings on Twin Hulled Marine Vehicles in Dynamic Positioning Aspects ................................................................. 1.506
T. M. Wu

A Case Study of the Wave Characteristics in the Actual Sea for the Sea Keeping Quality of Small Fishing Boats ................................................................. 1.518
S. Takeda, K. Satoh and K. Kobayashi
Feasibility of a Second-Order Strip-Theory for the Longitudinal Strength of Ships .................................................. 1.530
D. Bruzzone, A. Pittaluga and C. P. Bonvino

Nonlinear Dynamics

A Study on the Wave Drift Damping of Moored Ships ......................... 1.542
I. K. Park and H. S. Choi

Application of Stochastic Analysis to the Solution of Nonlinear Ship
Rolling Problems .................................................. 1.554
S. H. Kwon and D. W. Kim

Stability ( II )

Probabilistic Damage Stability Calculations in Preliminary Ship Design .......................................................... 1.565
J. J. Jensen, J. Baatrup and P. Andersen

Roll Motion Modeling: Parameter Determination and Their Effects on Ship Nonlinear Stability ........................................... 1.578
C. Jiang and A. W. Troesch

Stability Criteria for Fishing Vessels Operating in Astern Sea
- Shallow Water Situation ........................................... 1.590
A. Maimun and D. Vassalos

Manoeuvring ( I )

A Fresh Method for Investigating Inherent Maneuverability at the Design Stage .................................................. 1.602
C. G. Biancardi

Developing a Manoeuvring Design Capability for Naval Vessels .................. 1.616
D. Vassalos, S. H. Park and B. S. Lee

A Prediction Method of Maneuverability Including the Effects of Side Profile at the Initial Design Stage ........................................ 1.629
C. G. Kang and Y. G. Kim

H. S. M. V. ( I )

Comparison Study of Resistance and Performance of an SES .......................... 1.638

A Practical Method of Prediction of Resistance for Displacement Vessels ........ 1.648
L. J. Doctors

Development and Operation of the SWATH Type Underwater Test Support Ship .................. 1.660
C. T. Song, B. W. Park, B. H. Heo and J. G. Kim
Slamming

A Study on Slamming Characteristics and Optimization of Bow Forms of Ships ............................ 1.672
  M. Arai, L. Y. Cheng, Y. Inoue, T. Miyauchi and M. Ishikawa

Effect of Structural Elasticity on Slamming against Wetdecks of Multihull Vessels .......................................................... 1.684
  J. Kvålsvold, O. M. Faltinsen and J. V. Aarsnes

Manoeuvring (II)

The Influence of Rudder Area on the Maneuverability of a Ship with Large Beam-to-Draft Ratio ........................................ 1.700
  I. Y. Gong, C. G. Kang, Y. G. Kim, Y. B. You, D. Huh and Y. H. Kim

The Development of Practical Simulation System to Evaluate Ship Maneuverability in Shallow Water ........................................ 1.712
  E. Kobayashi

Development of New Sea Trial System Based on DGPS ................................................................. 1.724
  D. J. Yum, T. I. Lee and Y. B. Kim

H. S. M. V. (II)

A Study on the Conceptual Design of Wing-in-Surface Effect Ships ........................................ 1.735
  T. Fuwa, T. Takahashi, N. Hirata and A. Kakugawa

The Development of High Speed Vessel with Hybrid-Hydrofoil .................................................. 1.747
  J. H. Park, Y. G. Kim, S. S. Rhyu, J. H. Yoo, S. E. Kim and Y. B. Yim

The Transverse Dynamic Stability of Hard-Chine Planing Craft ........................................ 1.759
  E. M. Lewandowski

Index of Contributors .................................................................................. IC-1
