

Studies in  
Applied Electromagnetics and Mechanics, 10

# **NONLINEAR ELECTROMAGNETIC SYSTEMS**

*Proceedings of the International ISEM Symposium on  
Nonlinear Electromagnetic Systems  
Cardiff, Wales, UK, 17–20 September, 1995*

*Editors:*

A.J. Moses and A. Basak

*School of Engineering  
University of Wales, Cardiff  
UK*

1996

**IOS**  
Press  
  
Ohmsha

*Amsterdam, Oxford, Tokyo, Washington, DC*

# Contents

Preface	V
<b>Electromagnetic Devices</b>	
Aspects of magnetic levitation by bulk high-T <sub>c</sub> superconductor based on dynamical characteristics, <i>T. Hikihara and F.C. Moon</i>	3
Effect of switching multi supporting magnets in magnetic levitation system for steel plate conveyance, <i>H. Hayashiya, H. Ohsaki and E. Masada</i>	7
Dynamic response of a magnet levitated above an excited high-T <sub>c</sub> superconductor, <i>T. Sugiura and H. Fujimori</i>	11
Performance of a 25kVA amorphous core distribution transformer, <i>A. Nafalski, W.B. Lawrence and M.J. Rooney</i>	15
Torque estimation for switched reluctance motors by an on-line procedure, <i>R. Rabinovici</i>	19
A hybrid of single-phase induction motor with a magnetic frequency-changer, its structure and characteristics, <i>R. Goleman, T. Janowski and L. Jaroszyński</i>	23
Flux distribution in 5 limbs transformer of 160kVA, <i>R. Rygal, S. Sieradzki and M. Soiński</i>	27
Application of the third magnetic flux harmonic of transformer cores in plasma reactors, <i>T. Janowski and H.D. Stryczewska</i>	31
The basic characteristics of the vertical linear synchronous motor for a ropeless elevator, <i>H.J. Kim, I. Muraoka, S. Torii, M. Watada, D. Ebihara and M. Karita</i>	35
Rotational flux distribution in three-phase induction motor model core with disconnection problem, <i>M. Enokizono, T. Todaka, I. Serikawa and T. Kanada</i>	39
Finite element analysis of a three-phase induction motor taking into account the secondary circuit for improved torque characteristic, <i>M. Enokizono, T. Todaka and T. Ayaka</i>	43
New aspects regarding the additional magnetization of three-phase transformer cores, <i>A. Simion, M. Cojan, R. Stincescu and L. Livadaru</i>	47
Increase of energetical performances of a three-phase frequency ferromagnetic tripler additionally magnetized, <i>M. Cojan, A. Simion, L. Livadaru and C. Domnișoru</i>	51
Stray flux and losses in distribution transformer tank walls, <i>A. Basak and G. Lloyd</i>	55
Control of a square armature DC linear motor with electronic commutation, <i>F.J. Anayi and A. Basak</i>	59
Computation of magnetic flux density in a PM DC linear motor by 3D edge elements method, <i>A. Basak, A.F. Flores Filho and J.P.A. Bastos</i>	63
Investigation of a 3-phase wound-core amorphous transformer, <i>A. Basak, A.J. Moses and M.R. Yasin</i>	67
Free oscillations study due to non-linear magnetic circuit of the synchronous machines, <i>C. Domnișoru and M. Cojan</i>	72
FEM analysis of magnetic field of two linear oscillating ferroresonant motors, <i>M. Rizzo</i>	76

Finite element prediction of flux pulsations in induction machines, <i>A. Canova, M. Chiampi and V. Ravello</i>	80
Analysis of a linear motor by a nonlinear complex formulation, <i>H. Hedia, F. Henrotte, B. Meys, R. Belmans, A. Genon and W. Legros</i>	84
FEM analysis of a permanent magnet DC motor, <i>I. Tičar, K. Preis and O. Biró</i>	88
Air-gap flux optimisation in a DC permanent magnet motor, <i>L. Petkovska, M. Cundev and G. Cvetkovski</i>	92
Electromagnetic field and circuital analysis of nonlinear transformers via an equivalent network model, <i>N. Esposito, A. Musolino, F. Nencioni and M. Raugi</i>	96
Nonlinear analysis of electromagnetic fields in permanent magnet machines via an integral formulation, <i>N. Esposito, A. Musolino and B. Tellini</i>	100
Secondary construction enhancing damping effects in permanent magnet type synchronous motor, <i>T. Onuki, J. Enomoto, T. Kashiwagi and T. Yamamura</i>	104
Pole shape optimization for the EMF harmonics reduction of synchronous generators, <i>D.H. Im, J.P. Hong, C.E. Kim and Y.B. Jung</i>	108
Input and output characteristics of induction motors using finite element analysis, <i>T. Nakamura, Y. Ohdachi and Y. Kawase</i>	112
Measurement of magnetization property of high-T <sub>c</sub> superconductor by pulse magnetic field, <i>K. Fukuoka and M. Hashimoto</i>	116
A non linear anisotropic modeling of a power transformer "T" joint, <i>M. Mekhiche, F. Ossart and T. Waeckerle</i>	120
Analysis of induction motors by time stepping finite element method considering the skew of rotor bars, <i>H.-B. Lee, D.-W. Kim, H.-K. Jung, S.-Y. Hahn, K.-S. Lee and I.-H. Park</i>	124
Parallel linear solver under PVM for electric machine design, <i>H.J. Kim, H.S. Kim, K. Choi, H.B. Lee, H.K. Jung and S.-Y. Hahn</i>	128
Modelling of vector controlled induction machine using permeance network and bond-graph methods, <i>E. Delmotte, C. Delforge and B. Lemaire-Semail</i>	132
Design and development of an axial-field printed circuit spindle motor for computer disk drives, <i>M.A. Jabbar</i>	136
Dynamic analysis of induction motor with tapped stator winding for vector control using FEM, <i>D.H. Im, B.I. Kwon, J.H. Lee, K.I. Woo, C.E. Kim and Y.B. Jung</i>	140
Application of high T <sub>c</sub> superconductor to passive control of plasma position, <i>T. Uchimoto, N. Ikatsu, Y. Yoshida and K. Miya</i>	144
Application of superconductor rings to reduce toroidal ripple, <i>T. Nguyen, I. Sebestyen and A. Ivanyi</i>	148
Performance and characteristics of a high temperature superconducting magnetic bearing, <i>I. Vajda, L. Mohácsi, J. Lukács, J. Bánkuti and A. Szalay</i>	152
Simulation and experiment on vibration control of a cantilever beam levitated by high T <sub>c</sub> superconductor, <i>M. Murai, T. Takagi and J. Tani</i>	158
Damping mechanism of the superconducting electrodynamic suspension system, <i>K. Higashi, S. Ohashi, H. Ohsaki and E. Masada</i>	162
Development of an optimised linear stepping motor, <i>A. Basak and A.F. Flores Filho</i>	166
<b>Optimisation, Inverse and Biological Studies</b>	
Intelligent computation for the optimisation of metal cutting and forming, <i>R. Teti</i>	173
On determining the range of design parameters to support design optimisation, <i>R. Rong, D.A. Lowther and C.S. Brett</i>	182
A method for improving the quality of sound waveform using analysis-synthesis system, <i>M. Akita</i>	186

Optimal design of stator of closed slot type permanent magnet motors for cogging torque reduction, <i>J.-S. Chun, J.-S. Yoon and H.-K. Jung</i>	190
MHD stability of tight-aspect-ratio toroidal plasma - transition of spheromak to tokamak, <i>A. Kamitani, S. Ikuno, T. Kanki, M. Nagata and T. Uyama</i>	194
Source identification in complex sound field, <i>K. Kuroiwa</i>	198
Pipe manufactual analysis by 3-D finite element method, <i>M. Enokizono, T. Todaka, and D. Noda</i>	202
Inverse analysis by boundary element method with Laplace transform, <i>M. Enokizono, T. Todaka and K. Shibao</i>	206
A study on the optimum design of ladder type LIM considering space harmonics, <i>D.-H. Im, J.-P. Hong and S.-B. Yoon</i>	210
Hybrid GA optimization of electromagnetic devices, <i>O.A. Mohammed and G.F. Üler</i>	214
Premature convergence in the application of genetic algorithms to optimal design problems in electromagnetics, <i>O.A. Mohammed and G.F. Üler</i>	218
Reduction of magnetic field distortion in loudspeaker drivers with long throw coils, <i>L.A. Binks</i>	222
Optimization of plane separators using permanent magnets, <i>W. Kappel, A. Rusu-Petroaia, St. Alexandru and I. Bahrin</i>	226
Intermediate induction reheating in rolling mills for optimum temperature distribution, <i>I. Artuso, F. Dughiero, S. Lupi and A. Lainati</i>	230
Enforcing manufacturability in the topological design of magnetic devices, <i>D.N. Dyck and D.A. Lowther</i>	234
Mesh generation for numerical methods for automatic optimization purposes, <i>M. Jesenik, M. Trlep and B. Hribernik</i>	238
A new economic boundary element technique for coupled electromagnetic and thermal transient problems of multiconductor systems, <i>S. Yuferev</i>	242
A 3D investigation on the design optimisation of electromagnetic devices using FEM, <i>J.A. Ramirez, C. Chat-uthai and E.M. Freeman</i>	246
Ultrasounds influence on the electrical field of the electrodeposition process, <i>E. Ratajewicz-Mikołajczak and J. Sikora</i>	250
An efficient algorithm of the 3-D inverse problem, <i>L. Gong, K. Zhang and R. Unbehauen</i>	254
Sensitivity analysis for electric resistivity tomography, <i>M.-K. Kim, H.-K. Jung, C.S. Koh, B.-S. Suh and S.-Y. Hahn</i>	258
An inverse problem for the transducer with rotating magnetic field, <i>R. Grimberg, E. Radu, O. Mihalache and A. Savin</i>	262
Inverse analysis of two-dimensional electric field problem by symbolic computation, <i>K. Yasutake and Y. Kagawa</i>	266
Electrical impedance tomography based on higher order finite element approximation of conductivity, <i>T. Kurzatkowski, J. Sikora and M. Milosz</i>	270
Vibration control of a structure having magnetic vibration absorbers by means of neural networks with consideration of higher modes, <i>L. Li and K. Nagaya</i>	274
Emphasis of feature parameters for the pattern recognition by determination using neural networks, <i>M. Akita, T. Aoki and S. Uchino</i>	278
Hybrid method for inverse electromagnetic coil optimization using multi-transition and Hopfield neural networks, <i>T. Yamamoto, V. Ćingoski, K. Kaneda and H. Yamashita</i>	282
Calculation of cage induction motor parameters using artificial neural network based FEM results, <i>D.J. Bae, C.S. Koh, H.K. Jung and S.Y. Hahn</i>	286

Efficient distribution of quantized loads over a tree network of processors for elliptic solver, <i>H.J. Kim and J.-W. Jang</i>	290
Physiological analogs of artificial neural networks, <i>H. Pfützner, C. Nussbaum, T. Booth, and F. Rattay</i>	294
Identification of circular holes in thin plates using a neural network approach, <i>F.C. Morabito, R. Albanese, E. Coccorese, R. Martone and G. Rubinacci</i>	298
An automated learning system for the design of magnetic devices, <i>H.H. Saliah and D.A. Lowther</i>	302
Estimation of traveling source in the human brain associated with auditory evoked magnetic fields, <i>S. Iwaki and S. Ueno</i>	306
Effects of magnetic fields on diffusion of fibrinogen molecules, <i>M. Iwasaka, S. Ueno and H. Tsuda</i>	310
Enzymatic reaction of glucose oxidase in magnetic fields of up to 8 T, <i>M. Yaoita, M. Iwasaka and S. Ueno</i>	314
Enzymatic activity of serine proteinases in strong magnetic fields, <i>M. Iwasaka, S. Ueno and H. Tsuda</i>	318
Effects of magnetic fields on the behavior of dissolved oxygen in aqueous solution, <i>S. Ueno, M. Iwasaka and G. Furukawa</i>	322
Selective magnetic stimulation of cervical nerve roots with a figure-of-eight coil, <i>M. Kobayashi, S. Ueno and T. Kurokawa</i>	326
Spatio-temporal simulation of MEG activities generated by spreading multiple dipoles, <i>K. Ueno, K. Iramina and S. Ueno</i>	330
Measurements of spatial distribution of visually evoked MEG activities over the whole cortex during discrimination of colours, <i>K. Ueno, S. Ueno, K. Iramina and H. Weinberg</i>	334
Source modeling of extremely slow components of MEG activities during memory and recognition processes, <i>H. Yoshida, S. Ueno and H. Weinberg</i>	338
Spatio-temporal properties of visually evoked MEG and EEG activities associated with verbal cognitive processes, <i>S. Nakagawa, S. Ueno, K. Iramina and H. Weinberg</i>	342
A model of nerve excitation elicited by a train of pulsed magnetic stimulation, <i>A. Hyodo, A. Kyura and S. Ueno</i>	346
A magnetoelastic sensor for stress measurement in a bone fracture fixation plate, <i>H. Oduncu and T. Meydan</i>	350
Magnetic orientation of red blood cells with or without plasma proteins, <i>T. Suda and S. Ueno</i>	354
Electrostatic attitudes of a frequent ophthalmologic bioimplants, <i>P. Grabner</i>	358
<b>Magnetic Materials</b>	
Modeling the magnetic properties of materials for circuit simulator applications, <i>D.C. Jiles and Z. Gao</i>	365
Fundamental aspects of rotational magnetostriction, <i>H. Pfützner and A. Hasenzagl</i>	374
Open problems in the Preisach modeling of magnetic hysteresis, <i>O. Benda and Š. Barta</i>	380
The effect of heat treatment on the stress-magnetization properties of amorphous wires, <i>A. Saito, M. Nakamura, J.N. Nderu and J. Yamasaki</i>	386
The effect of slight deformation on the formation of induced magnetic anisotropy in Fe-3% Si alloy during thermomechanical treatment above the Curie point, <i>G. Kurlyandskaya, T.Y. Zayarnaya and V. Gundyrav</i>	390
Effect of aggregation of particles on thermohydrodynamic characteristics of a magnetic fluid susceptible to temperature in a nonuniform magnetic field, <i>K. Shimada, M. Iwabuchi and K. Okui</i>	394

The coupling of magnetoacoustic waves propagated in a viscous plasma of finite conductivity, <i>R. Gazi, I. Ciubotariu, V. Frunză and I. Gottlieb</i>	398
Behaviour of water and paramagnetic solution under strong magnetic fields, <i>S. Ueno, M. Iwasaka, N. Hirota, T. Homma, H. Sugawara, K. Kitazawa, H. Yokoi, Y. Kakudate and S. Fujiwara</i>	402
Change in ionic conductivity of strong electrolytic solutions in static magnetic fields, <i>S. Ueno, M. Iwasaka and G. Furukawa</i>	406
Vibrational characteristics of a magnetic liquid bridge subject to a collinear magnetic field, <i>M. Ohaba, T. Sawada, S. Sudo, S. Uzaki, S. Saito and T. Tanahashi</i>	410
Solitons and Bose-condensation of magnons in ferrites and planar ferrite structures, <i>A.E. Rosenson and S.A. Shekh</i>	414
Non linear dynamics of magnetic domains in finite dimensions with bar-like 180° domain structure, <i>M. Rouff</i>	418
On the equilibrium configuration of the Kittel type domain structure with Bloch walls 180°, <i>H.G. Gavrila</i>	422
Magnetic domain observation on structural steel under stress, <i>H.F. Lau, A.J. Moses and T. Meydan</i>	426
Domain observations under DC representation of rotational magnetisation, <i>F.A. McQuade, A.J. Moses and T. Meydan</i>	430
Stochastic resonance and related phenomena in an asymmetric bistable potential, <i>A.N. Grigorenko, P.I. Nikitin and G.V. Roschepkin</i>	434
Unidirectional stripe domain motion in the mechanically stressed single crystal YIG plates, <i>A.A. Cherechukin, L.V. Koledov, V.V. Koledov, V.A. Mitroshin, V.G. Shavrov, A.A. Tulaikova and H.H. Yasrebdust</i>	438
Influence of ion implantation on core loss of cobalt, <i>E. Klugmann</i>	442
Non-linear dependencies between grain orientation and anisotropy of magnetic properties of electrical steel sheets with Goss texture, <i>A.J. Moses and M. Soński</i>	446
Magnetomechanical coupling in magnetostrictive materials, <i>Z. Kaczkowski</i>	450
Magnetomechanical coupling in the $\text{Fe}_{73.5}\text{Cu}_1\text{Nb}_3\text{Si}_{15.5}\text{B}_7$ metallic glass annealed in helium at temperatures 510 and 530°C, <i>Z. Kaczkowski, L. Lanotte and M. Müller</i>	454
Production and characterisation of thin-films produced by a novel rotating cryostat technique, <i>H. Kockar, D. Atkinson, T. Meydan, B. Mile, A.J. Moses and P. Sillman</i>	458
Magnetic bistability in amorphous glass-covered wires, <i>H. Chiriac, G. Pop, F. Barariu and T.-A. Óvári</i>	462
Strain ageing characteristics of low carbon non-oriented materials and their effects on mechanical and magnetic properties, <i>Z.S. Soghomonian, T. Irons, J.H.R. Page and A.J. Moses</i>	466
The effect of carbon content on the magnetisation of steel, <i>J.M. Makar and B.K. Tanner</i>	472
Magnetoelastic properties of shape memory compound $\text{Ni}_2\text{MnGa}$ , <i>A.N. Vasil'ev, R.Z. Levitin, V.V. Snegirev, D.L. Dalidovich, V.V. Kokorin, V.A. Chernenko, T. Takagi and J. Tani</i>	476
A system for dynamic measurements of magnetomechanical properties of arbitrarily excited silicon-iron sheets, <i>S.A. Lundgren, A.J. Bergqvist and S.G. Engdahl</i>	483
Magnetic properties of $\text{Fe}_{100-x}\text{Tb}_x$ ( $x=11; 18; 26$ ) thin films, <i>N. Perov and A. Radkovskaya</i>	487
Image processing applications in measurements of features in SEM magnetic domain images, <i>E. Mivehchi, D.H. Horrocks and P. Beckley</i>	491
Model-based inversion of transient eddy-current signals, <i>M.J. Johnson and J.R. Bowler</i>	495

<b>Computational Techniques and Modelling</b>	
Knowledge based approaches to electromagnetic device design, <i>D.A. Lowther</i>	501
Dynamic hysteresis and power loss modelling in soft magnetic materials, <i>G. Bertotti</i>	505
Engineering applications of artificial intelligence, <i>D.T. Pham</i>	511
Calculation of electrohydrodynamic flow in a circular cylindrical conduit, <i>J. Caldwell, M.S. Chen, S. McKee and R. Watson</i>	520
A two-dimensional time periodic analysis of hysteretic cores, <i>O. Bottauscio, M. Chiampi and M. Repetto</i>	524
A thermodynamic vector hysteresis model for ferromagnetic materials, <i>A.J. Bergqvist</i>	528
Computation of hysteresis loops using a modified Preisach-model, <i>A. Binner, G. Biru Worku and W. Kunze</i>	532
Application of wavelet analysis in eddy current problems with current vector potential method, <i>Z. Chen and K. Miya</i>	536
Experimental validation of a two dimensional vector model of ferromagnetic hysteresis, <i>H. Geirinhas Ramos and P.M. Silva Girão</i>	540
Modelling of rotational hysteresis loss in electrical sheet steels, <i>J.G. Zhu, V.S. Ramsden and J.D. Sievert</i>	544
High speed modelling for dynamic weighing by non-linear auto regression, <i>D.H. Horrocks and M. Danaci</i>	548
Numerical simulation of transient scattering phenomena using Dirichlet gauge BEM, <i>H. Kawaguchi and T. Honma</i>	552
The method of single scalar magnetic potential for 3-D magnetostatic problems, <i>Q. Jingen, N. Guangzheng, L. Ronglin, C. Weiyang and P.P. Silvester</i>	556
Three-field formulation and its application on magnetostatic problems, <i>I. Nishiguchi and H. Matsuzawa</i>	560
Homogenizing spatially periodic materials with respect to Maxwell equations: chiral materials by mixing simple ones, <i>A. Bossavit</i>	564
Integro-differential method for permanent magnet modeling in 3-D space using edge finite elements, <i>V. Čingoski and H. Yamashita</i>	568
Numerical transient analysis of coupled electromagnetic and mechanical phenomena, <i>K. Srairi and M. Feliachi</i>	572
Electrostatic field analysis of devices with nonlinear dielectric materials by a polarization charge approach, <i>N. Esposito, A. Musolino and A. Tellini</i>	576
A new approach for the calculation of nonlinear magnetic circuits, <i>A. Heitbrink and H.D. Storzer</i>	580
Application of the dynamic Preisach model to the simulation of circuits containing soft magnetic cores, <i>M. Pasquale, M. Canali, G. Bertotti and V. Basso</i>	584
FEM computation of moving-conductor transient magnetic fields in open boundary domains, <i>G. Aiello, S. Alfonzetti, S. Coco and N. Salerno</i>	588
FEM solution of unbounded non-linear skin effect problems, <i>G. Aiello, S. Alfonzetti, S. Coco and N. Salerno</i>	592
Losses computation in soft magnetic laminations, <i>L.L. Rouve, F. Ossart, T. Waeckerle and N. Labbe</i>	596
The multi-grid method for computation of the outer-region matching data in resistive MHD stability analyses, <i>T. Kanki, S. Tokuda, T. Watanabe and T. Uyama</i>	600
On the electromagnetic state quantities in electrodynamics of moving media, <i>A. Panaitescu</i>	604
The effectiveness of anisotropic magnetic material modelling methods, <i>J. Liu, A. Basak and A.J. Moses</i>	608

Hysteresis loops of anisotropic materials calculated by statistic domain behaviour, <i>P.L. Fulmek and H. Hauser</i>	612
Non-linear transformations for soft magnetic material measurements, <i>I. Zemánek</i>	616
<b>Sensors and Non-Destructive Testing</b>	
Advances in transient eddy current nondestructive evaluation, <i>J.R. Bowler and M.J. Johnson</i>	623
Non linear magnetoresistance, <i>D.J. Mapps, N. Fry and D. Smith</i>	628
New sensitive and quick-response micro magnetic sensor using magneto-impedance effect, <i>K. Mohri, K.-I. Bushida, T. Uchiyama and L.V. Panina</i>	634
Static and utility frequency magnetic shielding using high-T <sub>c</sub> YBCO bulk superconductor, <i>S. Torii, S. Hosono and D. Ebihara</i>	640
Magnetic shielding by grain oriented silicon steel composite panels, <i>Y. Okazaki and M. Fujikura</i>	644
Magnetic shielding effects of high-T <sub>c</sub> superconducting plates – application of low-permeability model and Bean model, <i>A. Kamitani, M. Shibata and T. Yokono</i>	648
Magnetic material in shielding, <i>A. Ivanyi</i>	652
Magnetic field of thin film heads using a Schwarz-Christoffel transformation, <i>A. Lopes Ribeiro and V. Maló Machado</i>	656
Development of MLS using meander coil as the scale, <i>H. Wakiwaka, S. Yanase, M. Nishizawa, T. Mizuno and S. Yamamoto</i>	660
Design problems of magnetoelastic force transducers, <i>J. Zakrzewski</i>	664
Non-conventional soft magnetic materials for magnetoelastic force transducers, <i>J. Zakrzewski and J. Kwiczala</i>	668
Time delay of acoustic waves caused by a crack in a piezoelectric strip, <i>D. Gafka and J.P. Nowacki</i>	672
Simulation tool for magnetomechanical systems with moving parts, <i>M. Kaltenbacher, H. Landes and R. Lerch</i>	676
On the use of magnetostrictive amorphous wires in force sensors, <i>H. Chiriac, E. Hristoforou, M. Neagu, I. Darie and F. Barariu</i>	680
Sound detection in complex sound field, <i>K. Kuroiwa and S. Hanada</i>	684
Magneto-optical displacement sensor, <i>M. Gaugitsch, H. Hauser, F. Haberl, J. Hochreiter and K. Vorlicek</i>	688
The response of the eddy current transducer with orthogonal coils, to different material discontinuities, <i>R. Grimberg, E. Radu, O. Mihalache and A. Savin</i>	692
Transducer with orthogonal coils used to control flat products, <i>A. Savin, E. Radu, O. Mihalache, E.B. Bradu, A. Andreeescu and R. Grimberg</i>	696
Eddy current transducer with rotating magnetic field, <i>R. Grimberg, A. Savin, O. Mihalache, E. Radu and E.B. Bradu</i>	700
Finite element modelling and design of capacitive angular displacement sensors, <i>S.H. Khan and F. Abdullah</i>	704
Micro-ECT by flexible microloop magnetic sensor array, <i>M. Uesaka and K. Miya</i>	708
Special solutions of Stoner-Wohlfarth equation and their applications for magneto-resistive sensors, <i>B.-Z. Kaplan and E. Paperno</i>	712
Eddy current tomography for NDT, <i>S.Y. Hahn, H.K. Jung, I.H. Park, B. Pańczyk and J. Sikora</i>	716
Magnetic property assessment as basis for nondestructive evaluation for steel components in nuclear engineering, <i>A. Gilanyi, K. Kitsuta, M. Uesaka and K. Miya</i>	720
Performance assessment of mutual induction type ECT probe by 3-D eddy current analysis, <i>H. Fukutomi, M. Hashimoto, T. Takagi and J. Tani</i>	724

A signal processing method for eddy current testing of steam generator tubing, <i>G. Chen, Y. Yoshida, K. Miya and A. Yamaguchi</i>	728
Scaling law for magnetoelastically coupled vibration of thin conducting components in a fusion reactor, <i>Y. Yoshida, K. Demachi and K. Miya</i>	732
A novel computerised technique for predicting the mechanical hardness of non-oriented electrical steels during the production process, <i>Z.S. Soghomonian, H.J. Stanbury, A.J. Moses and T. Meydan</i>	736
Detection of material inhomogeneity in electrical steels using a RCP compensated on-line loss measuring system, <i>A. Khanlou, A.J. Moses, T. Meydan and P. Beckley</i>	740
An application of (1+6) evolution strategy to eddy current NDT of axisymmetric conductor pipe, <i>D. Jeon, H.-K. Jung, K.-S. Lee and S.-Y. Hahn</i>	744
New electromagnetic NDT technique for the detection of discontinuities in metallic plates, <i>C.S. Daróczsi, J. Szöllösy, G. Vértesy, J. Pávó and K. Miya</i>	748
Identification of a backside defect by using eddy current testing, <i>M. Enokizono, T. Todaka and T. Katai</i>	752
Searching defect under rotating magnetic field, <i>M. Oka and M. Enokizono</i>	756
Influence of noise to cracks in glass plates, <i>A. Tanaka and A. Ito</i>	760
Magnetostriction measurement using interferometer in open magnetic circuits, <i>T. Sasaki, S. Takada, S. Saiki and K. Hibi</i>	764
Evaluation of fatigue in Inconel by measuring its magnetic properties, <i>T. Miki, K. Harada, Y. Ishihara and T. Todaka</i>	768
3D numerical analysis method for natural cracks on ECT, <i>M. Hashimoto, H. Fukutomi and H. Sata</i>	772
The measurement of shock wave energy by means of a magneto-elastic sensor, <i>L. Rahf, T. Kiesewetter and J. Sievert</i>	776
Defect-shape reconstruction in three-dimensional eddy current NDE problems by an optimization technique, <i>Z. Badics, Y. Matsumoto, K. Aoki and F. Nakayasu</i>	780
Virtual instrumentation for loss measurement in magnetic materials, <i>Ö. Görl, C. Soankwan, A. Nafalski and T. Doan</i>	784
Real-time dipole localization in large spatial applications using a multi channel flux- gate magnetometer, <i>M.P. Lassahn</i>	788
A virtual instrumentation based magnetics test system, <i>J.J. Dalton, J. Liu, A.J. Moses, D.H. Horrocks and A. Basak</i>	792
Hallmagnetometer for external static fields up to 17 T, <i>H. Varahram, M. Reissner, W. Steiner and H. Hauser</i>	796
Effects of shape on samples of silicon-iron on the directions of magnetic field and flux density, <i>N.J. Layland, A.J. Moses, N. Takahashi and T. Nakata</i>	800
Differential type VSM sensible to $10^{-2}$ A/m subtracted by a dummy sample magneti- zation, <i>K. Yamada, Y. Kikuchi, K. Onda, S. Shoji and K. Arai</i>	804
Investigations with three co-ordinate v.s. magnetometer, <i>A.N. Bazhan</i>	808
<b>Electronic and Electrical Applications</b>	
Non-linear transistor modelling: parameters extraction from RF measurements, <i>P.J. Tasker, M. Demmler and M. Fernández Barciela</i>	815
Optimization of brushless DC motors with q axis flux barriers, <i>J.F. Eastham, T. Betzer, E. Demeter and D.M. Ionel</i>	821
Unsteady fluid flow around oscillating wire induced by corona discharge in system of wire and plate electrodes, <i>Y. Itoh, T. Tsuzuki and M. Yoshizawa</i>	827
Nonlinear oscillations of a conducting wire in time-varying magnetic field, <i>M. Yoshizawa, Y. Tsukada, J. Onoe, S. Hiraishi and T. Sugiura</i>	831

Computation of generation and impact of electromagnetic fields on ferromagnetic structures surrounding the plasma in a DEMO fusion reactor, <i>P. Ruatto</i>	835
Numerical analysis of MPD thruster considering the Hall effect, <i>T. Endo, H. Kawaguchi and T. Honma</i>	839
Numerical analyses of properties of HTSC flywheel and HTSC fault current limiter, <i>M. Tsuchimoto and T. Honma</i>	843
Force control of a soft-handling gripper driven by a piezoceramic stack, <i>S. Chonan, Z.W. Jiang and M. Sato</i>	847
On the finite element analysis of high frequency induction heating systems fed by voltage driven inductor, <i>M. Féliachi, D. Benzerga, S. Mimoune and J. Fouladgar</i>	851
A novel algorithm for numerical evaluation of ion flow fields associated with HVdc unipolar and bipolar transmission lines - the method of minimum divergence, <i>M. Yu and E. Kuffel</i>	855
Combination of 2D and 3D non-linear eddy current calculations for the design of braking systems, <i>D. Albertz, S. Dappen and G. Henneberger</i>	859
A synthetical theory of the finline ferrite device, <i>S.-C. Zhu</i>	863
Magnetoelastic buckling of two-rod system, <i>H. Yabuno, Y. Kurata and N. Aoshima</i>	867
Magnetic field and performances of a magnetic separator, <i>E. Demeter, F. Hantila, F. Constantinescu and M. Vasiliu</i>	871
Numerical modelling of linear actuator with magnetically saturable armature, <i>K. Srairi and M. Féliachi</i>	875
3D non-linear eddy-current problems taking into account magnetic saturation using magnetodynamic finite elements, <i>C. Guérin and G. Meunier</i>	879
Coupled fields produced by moving structural defects in dielectrics, <i>J.P. Nowacki and A. Drabik</i>	883
Magnetic properties of epitaxial ReIG-based films with high Pr-ions content, <i>I.M. Syvorotka, P.M. Vetoshko, P.S. Kostiuck, V.B. Volkovoy and S.B. Ubizskii</i>	887
Prototype of a high-T <sub>c</sub> superconducting current limiter, <i>R. Bruckberger, H. Hauser, P.L. Fulmek, H. Fillunger and S. Gründorfer</i>	890
Modelling of pulse sharpening effects in ferrite-loaded coaxial lines, <i>J.E. Dolan, H.R. Bolton and A.J. Shapland</i>	894
Vibration control of overhung rotor by magnetic bearing system, <i>H. Sakurai, J. Tani and T. Takagi</i>	898
Use of neodymium-iron-boron in permanent magnet lifting devices, <i>N.A. Shirazee and A. Basak</i>	902
Dynamic characteristics of linear oscillatory actuator for artificial heart, <i>M. Watada, K. Imachi and D. Ebihara</i>	906
Methods to shape spatially heating power in induction systems, <i>K. Bodziak</i>	910
Novel depolarization properties of multilayered nonreciprocal chiral slab, <i>A. Kusunoki and M. Tanaka</i>	914
Characteristic analysis of electric field for suspension insulator using an optimization technique with FEM, <i>I.-K. Song, K.-P. Park, P.-S. Shin and H.-R. Kwak</i>	918
Alternating current potential drop for cracks in the specimen under high load, <i>D. Gajka</i>	922
A 2D h-formulation with current in the cross section and application to lightning impact on structures, <i>B. Meys, P. Dular, J.F. Remacle, R. Belmans, A. Genon and W. Legros</i>	926
Two-dimensional pn junction analysis using the finite-element method, <i>V. Maló Machado and A. Lopes Ribeiro</i>	930
Contribution of digital simulation to the design of a differential circuit breaker, <i>J.P. Masson, F. Marthouret, J.J. Rousseau, M. Paupert and P. Mas</i>	934

Analysis of FEL radiation field structure by electron in ponderomotive potential, <i>H. Kawaguchi, J. Matsuoka and T. Honma</i>	938
Wave propagation in non saturated ferrites: use in modelling, <i>K. Berthou-Pichavant and P. Gelin</i>	942
Numerical analysis of radiation pattern from phased array antennas on a vibrating beam, <i>M. Miyauchi and Y. Ohki</i>	946
3D modelling for radio-frequency plasma devices, <i>M. Féliachi, F.-Z. Louai, D. Benzerga and G. Develey</i>	950
Consideration of eddy current distribution in vibration element using giant magneto- strictive material, <i>H. Wakiwaka, D. Furihata, K. Kuwahara, F. Nakamura, H. Kamata, T. Yoshikawa and H. Yamada</i>	954
Authors Index	959
