NANIA
 "All Together"

Comprehensive Watershed Management

Proceedings of the
Eighteenth Annual Conference
of the
Association of State Floodplain Managers

May 8-13, 1994
Tulsa, Oklahoma
# TABLE OF CONTENTS

Part One: Local and Regional Approaches to Floodplain Management

- **All Together in Northbrook, Illinois**  
  Carl F. Peter ................................................. 3

- **Boulder Creek Joint Use Area Multi-Purpose Flood Mitigation Project**  
  Nancy Boudreau Love and Alan R. Taylor .................... 8

- **The Historic Arkansas River Project**  
  Donald H. Brandes, Jr. ........................................ 14

- **Watershed Management in Mecklenburg County, North Carolina**  
  Robert E. Wilson, W. Dave Canaan, and Andrew J. Reese .... 19

- **Upper Sloan Lake Basin: A Small Community Experience in Implementing a Multi-Objective Flood Control Project**  
  Robert Martin and David Lloyd .............................. 24

- **Range Wash Confluence Detention Basin Optimization Techniques**  
  Donald W. Davis .............................................. 29

- **Development of a P.L. 566 Nonstructural Plan to Reduce Flood Damages in the Upper French Broad River, North Carolina**  
  William H. Farmer, Jr., Michael J. Hinton, and John E. Webb .... 35

- **City of Tallahassee Stormwater Management Program**  
  John W. Hood and Sam A. Amantia ............................ 39

- **The McDonald Creek Flood Control Project, Arlington Heights, Illinois: A Model Community Flood Mitigation Project**  
  Cleighton D. Smith, Farrukh Mazhar, and Dennis Bowe .......... 45

- **A New Approach to Flood Control in the Cypress Creek Watershed, Harris County, Texas**  
  Andrew C. Yung ............................................... 51
Contents

Clear Creek Regional Flood Control
Thomas A. Guillory ...................................... 57

Flood Control Design in a Piedmont Watershed: Henderson, Nevada
Ken D. Gilbreth and George K. Cotton .................. 63

FEMA Floodplain Case Studies
Ronald W. Morrison ..................................... 68

Part Two: Floodplain Management in Tulsa and Oklahoma

Rooftop to River: Tulsa’s Unified Local Program for Floodplain and Stormwater Management
Charles L. Hardt ......................................... 75

From Rooftop to River: Tulsa’s Floodplain and Stormwater Management Story
Federal Emergency Management Agency, Region VI ........... 79

Jumping Hurdles in Project Implementation: Mingo Creek Local Flood Protection Project
Valerie S. McCaw and Ruben W. Haye .................... 84

Stormwater Planning and Capital Improvements in Tulsa, Oklahoma
H. Dale Reynolds ......................................... 90

Finding the Local Vision, Leadership, and Political Courage
Kathryn B. Hinkle ........................................ 96

Putting It All Together, Keeping the Systems Working, and Paying the Tab
Mike Buchert ............................................. 101

Community-Based Flood Mitigation Projects: A Design Consultant’s Perspective
Paul D. Zachary and Barend W. Meiling .................. 105

Saving Your Residents’ Money: Some Local Experiences with CRS
Pat Hoggard .............................................. 111

Flooding in Oklahoma: Past, Present, and Future
William K. Morris, Brian R. Vance, Michael E. Mathis, and Harold L. Springer ......................... 113

Part Three: Building and Construction Standards

Harvey Cedars, New Jersey, Field Evaluation in Response to the December 11-12, 1992 Northeaster: Pilot Study on the Effectiveness of NFIP Construction Standards in Reducing Coastal Flood Damages
Jennifer M. Phelan and Todd Davison .................... 121

Erosion Hazards and Coastal Construction Deficiencies Observed on Kauai After Hurricane Iniki
A. Todd Davison, Charles E. Bornman, and Melvin Nishiara ........... 127

Performance of Manufactured Homes During Hurricane Emily
Albert Romano, Christopher Hanson, and Cecelia Rosenberg .... 132

Developing Technical Guidance Materials on Elevating Substantially Damaged Buildings in the Midwest United States in Response to the Great Midwest Flood of ’93
Clifford E. Oliver, Cecelia Rosenberg, Bruce Boltz, and Carroll Ringlestein ......................... 138

Part Four: Floodproofing

Local Floodproofing Programs
Joseph R. Wanielista ..................................... 147

Low Interest Loans for Floodproofing
French Wetmore ........................................ 154

A Floodproofing Success Story
Conrad Battreal and Gary House ......................... 159

Floodproofing Open Houses
French Wetmore ........................................ 165
Part Five: Flood Control Structures

Flood Control Projects Utilizing Existing County Roadways
Cecil R. Bearden .................................................. 173

Application of Sand Filter for Urban Runoff Control
Hung V. Truong and Mee See Phua ............................... 177

Falling Through the Cracks: A Look at Kansas Levees
Lisa C. Bourget and Johnny J. Green .......................... 182

Protecting from Alluvial Fan Flooding with Measures Aligned Perpendicular to Flow Paths
Edward R. Mifflin .................................................. 188

Desert Wash to Multiple-Use Floodway: Utilizing Roller Compacted Concrete
Donald W. Davis ................................................. 194

Part Six: Forecasting and Precipitation Records

Choosing a Hydrologic Model for Flood Forecasting
David C. Curtis .................................................... 203

Real Time Flood Forecasting: Stillwater, Oklahoma
C.T. Haan, J. Zhenwen, R. McFadden, R. Riley, E. Beard, and D. Storm ................................. 210

Use of WSR-88D and Surface Rain Gage Network Data in Issuing Flash Flood Warnings and Main Stem Flood Forecasts
Steven A. Amburn and Suzanne Fortin ........................ 216

The Use of WSR-88D Radar Data and an Interactive Hydrologic Model in Forecasting a Severe Flood in Northeast Oklahoma
Rick Sloan and Steven Piltz ...................................... 222

Radar-Rainfall Data for the Great Flood of 1993
David C. Curtis, Joe D’Aleio, and Lee Larson .................. 226

Part Seven: Modeling, Computer Applications, and Geographic Information Systems

Beyond Steady State: FEMA Perspective Computer Programs—Their Use in Supporting NFIP Maps
Alan A. Johnson and Thomas W. Smith .......................... 249

A Stochastic Integral Equation Analog for Rainfall-Runoff Modeling
T.V. Hromadka II .................................................. 253

Two-Dimensional Modeling: A Case Study
Dave Carlton and Kerry Ritland .................................. 259

Automated HEC-2 Modeling Using CAD
Chris E. Maeder ................................................... 265

The Use of HEC-2 for Flood Insurance Study Revisions: Problems and How to Avoid Them
Joseph B. Chapman and Moe Khine .............................. 269

CHECK-2: The Automated HEC-2 Review Program
Zekrollah Momeni and Moe Khine ................................ 273

Digital Flood Insurance Rate Maps: Standards for Shared Data
Alan A. Johnson and David P. Preusch .......................... 280

The Use of Geographic Information Systems to Manage New Jersey’s Historical Shoreline Data
Mark N. Mauriello .................................................. 286

GIS to the Rescue: GIS and the Mississippi River Flooding
Sue Hoegberg ....................................................... 290
## Contents

### Using GPS/GIS to Inventory Damaged Structures
Eric Berman .......................................................... 294

### Small Watershed Modeling and Assessment Using GIS
F. Charles Baird, Gary K. Westmoreland, and Woody Frossard ...... 297

### Comprehensive Watershed Studies Through Geographic Information Systems
Michael J. Colgan and Mow-Soung Cheng ......................... 303

#### Part Eight: Water Quality, Erosion, and Sediment

**Water Quality Effects of Power Boating on the Fox Chain O'Lakes**
Philip B. Moy ..................................................... 311

**Mississippi Tragedy: It Didn't Have to Happen**
John R. Sheaffer .................................................. 315

**Diagnostic Study of Newkirk Lake Through Section 314 of the Clean Water Act**
Paul Koenig, Baxter Vieux, and Daphne Nickish .................... 320

**Characterization of Shoreline Erodibility and Recreational Boat-Generated Wave Erosivity on the Fox River Chain O' Lakes**
Leslie C. Tacon .................................................... 326

**FEMA: LOMR (ABQ) = Q_{100} + Q_{5} (In Albuquerque, FEMA Includes Sediment in the Flood Equation)**
Clifford E. Anderson and Robert A. Mussetter ...................... 331

**Sediment Management and Regulation in Washington State**
Philip A. Noppe and A.M. (Tony) Melone .......................... 338

#### Part Nine: Policies and Programs for Flood Hazard Mitigation

**Operation of New South Wales Flood Policy**
M.G. Geary and I.R.P. White ...................................... 347

#### Part Ten: Funding Strategies and Measures of Cost-Effectiveness

**"The Patchwork Quilt": Creative Strategies for Relocation, Acquisition, and Buy-Out**
Edward A. Thomas and Barbara Yagerman ........................ 377

**Cost-Effectiveness and Hazard Mitigation: A Marriage Made in the U.S. Congress**
Gary L. Sepulvado .................................................. 384

**Innovative Procedures for Funding Floodplain Studies: Cost, Time, and Resource Sharing**
Lawrence Basich .................................................... 389

**Stormwater Utility Fee Credit Computations Based on Best Management Practices Effectiveness**
Stephen R. Sands, Joseph A. Aug, Andrew J. Reese, and James W. Schumacher ................................................... 393

**Value Engineering Cost Control for Flood Control**
John L. Robinson ..................................................... 400
Contents

Part Eleven: Remembering James E. Goddard

A Tribute to James E. Goddard (1906-1994)
James M. Wright ........................................ 407

Further Tribute to James E. Goddard
Gilbert F. White ........................................ 410

Part Twelve: A Vision of the Future

Learning from the Flood of 1993: Floodplain Management into the 21st Century
Gerald E. Galloway, Jr. .................................. 415

Where Do We Go From Here?
Jimmy Bates ............................................. 422

Building Off of Today: Floodplain Disaster Lessons
Larry A. Larson .......................................... 426

Making the Case for Greenways
Christopher N. Brown ................................ 433

Challenges for the Floodplain Manager of Tomorrow
Mary Fran Myers ......................................... 440

The Local Official’s Role
Fred R. Brusso, Jr. ...................................... 446

Floodplain Management in the 1990s
Phillip M. Demery .................................... 451

PART ONE

LOCAL AND REGIONAL APPROACHES TO FLOODPLAIN MANAGEMENT
