Tubular Structures VII

Edited by
JÓZSEF FARKAS & KÁROLY JÁRMAI
University of Miskolc, Hungary
# Table of contents

Preface XI  
Acknowledgements XIII  

## 1 Applications

- **Design and fabrication of the reticulated tubular dome structure of a sports hall in Budapest**  
  *L. Kollár & J. Turmezei*  
  3

- **CIDECT research and development in the use of hollow steel sections and their impact on Eurocodes and other national and international standards**  
  *D. Dutta & K. Hoffmann*  
  9

- **Delta – A tubular structure with a new connection**  
  *R. Grube & O. Einsiedler*  
  17

- **Evaluation of load tests for tubular structures**  
  *M. Iványi*  
  25

- **Tubular look-out tower of the form of a hyperboloid of revolution**  
  *C. Kegyes & I. Benke*  
  29

- **General approach of plastic hinges formed on thin-walled tubes in the design of a bus frame**  
  *M. Matolcsy*  
  37

- **Steel tubular structures: From history to present at the TU of Brno**  
  *J. J. Melcher, M. Karmazínová, I. Tutko & M. Šmak*  
  45

- **Design of tubular towers for wind power units**  
  *M. Mikitarenko & A. Perelmuter*  
  53

- **Design of light steel joists with use of Hollow Structural Sections**  
  *P. K. Ostrowski & C. Lukasiak*  
  59

- **Behaviour to corrosion of some steel works sited in heavy aggressive environment**  
  *P. Strateanu*  
  67

- **Tubular trusses of a Hungarian church**  
  *P. Tomka*  
  71
Water pipeline bridge over the river Ibar in Yugoslavia
D. Tošić & N. Tošić

Structural behaviour of Oktalok space frame
X.-L. Zhao, G. Mckinlay, P. Lim, P. Joseph & Y.-L. Pi

Project and execution of a roof space structure of $39 \times 39$ m
J. Ziółko & E. Supernak

2. Static behaviour of circular and rectangular hollow sections joints

Shear capacity of blind bolted connections for RHS steel structural elements
M. Ballerini, M. Piazza, E. Bozzo & F. Occhi

Prying action in bolted circular flange joints in tubular structures
J. J. Cao & A. J. Bell

Regression formulation for the static strength of multiplanar CHS double X-joints subjected to axial loads under different load ratio
T. Chen & D. Wang

Effect of angle on the strength of overlapped RHS K- and X-joints
G. Davies, R. Kelly & P. Crockett

Effects of chord can length and overlap on the strength of K-joints in CHS tubular members
E. M. Dexter & M. M. K. Lee

The behaviour of stiffened and unstiffened RHS joints in half-through (U-frame) footbridges
D. C. Iles & G. Davies

Load-displacement relationship of bolted end-plate joints in tubular section structures
A. Kołowski & L. Śleczka

Strength of multiplanar tubular KK-joints under anti-symmetrical axial loading
M. M. K. Lee & S. R. Wilmshurst

Introduction to unstiffened CHS tubular joint database
Y. Makino, Y. Kurobane, K. Ochi, G. J. van der Vegte & S. R. Wilmshurst

A new ultimate capacity formula for unstiffened CHS joints under compression – Continuous formula between T, TT and X-joints
M. Morita, Y. Makino, Y. Kurobane & G. J. van der Vegte

A comparison of the behaviour of RHS bird beak T-joints with normal RHS and CHS systems
J. S. Owen, G. Davies & R. B. Kelly

The static behaviour of multiplanar tubular XX-joints loaded by in-plane bending moments on the in-plane and out-of-plane braces
G. J. van der Vegte & J. Wardenier

Tests on CHS planar KK-joints under anti-symmetrical loads
H. Yonemura, Y. Makino, Y. Kurobane & G. J. van der Vegte
Analytical and numerical investigations on the static strength of full width rectangular hollow section X-joints under different load cases
Y.Yu & J.Wardenier

Influence of chord bending moments on the ultimate load capacity of X-joints in rectangular hollow sections
Y.Yu & J.Wardenier

Verification of the deformation limit for T-joints in cold-formed RHS sections
X.-L.Zhao

3 Beam-to-column connections

Prediction of the non-linear behaviour of beam-to-column connections with rectangular hollow sections
M.Broniewicz & J.Szlendak

Parametric study on the static behaviour of uniplanar I-beam-to-tubular column connections loaded with in-plane bending moments combined with pre-stressed columns
G.D.de Winkel & J.Wardenier

Joints behaviour in the middle scale tests of steel frames with RHS columns
J.Szlendak

Classification system for I beam-to-RHS column connections
J.Szlendak

Experimental study on end-plate to SHS column connections reinforced by increasing wall thickness with one side bolts
T.Tanaka, M.Tabuchi, K.Furumi, T.Morita, K.Usami, M.Murayama & Y.Matsubara

4 Fatigue and repeated loading

Remaining fatigue life of cracked tubular joints
D.Bowness & M.M.K.Lee

Multiaxial ratchetting for 2014-T6 aluminium alloy tube
X.Chen & A.Abel

Kobe Earthquake damage to high-rise Ashiyahama apartment buildings: Brittle tensile failures of box section columns
Y.Kurobane, K.Ogawa & C.Ueda

Fatigue crack growth in tubular T-joints under in-plane bending
S.J.Maddox

Incremental collapse of KT-joints under variable repeated loading
N.K.Milani & P.Grundy

Prediction of stress concentration factors in K-joints under balanced axial loading
M.R.Morgan & M.M.K.Lee

Fatigue resistance predictions for RHS K-joints, using two alternative methods
E.J.Niemi
Fatigue behaviour of non-90° square hollow section X-connections  
A.M.van Wingerde, J.A.Packer, L.Strauch, B.Selvitella & J.Wardenier  

Stress concentration factors for K-connections between square hollow sections  
A.M.van Wingerde, J.A.Packer & J.Wardenier  

5 Concrete-filled steel tubes  

Experimental testing of flowdrill connectors with concrete-filled SHS columns  
J.E.France, J.B.Davison & P.A.Kirby  

Projects in hollow concrete-filled steel tubular structures  
A.Kvedaras, D.Mykolaitis & A.Šapalas  

Fatigue behaviour and ultimate capacity of grouted tubular joints  
M.Lalani, D.J.Morahan, R.J.van Foeken & J.Wardenier  

Feasibility of concrete-filled HSS trusses  
N.Noor & J.A.Packer  

Behaviour of asymmetrically loaded concrete-filled tubular columns  
H.Shakir-Khalil & A.Al-Rawdan  

6 Behaviour and testing of tubular members  

Static and dynamic tests on aluminium square hollow section members combined with fiber reinforced plastic and rubber layers  
N.Bakk, J.Farkas & K.Jármai  

A new J_{lc} measurement method for tubular structures  
A.Ben Dhia, J.B.Bai, D.François, V.Grigoriev & B.Josefsson  

Rotation capacity of rectangular hollow section beams  
V.Gioncu, L.Tirca & D.Petcu  

Stub column test of high-strength CHS steel column with small diameter-to-thickness ratio  
T.Kamba  

Beam column test of high-strength CHS steel column with small diameter-to-thickness ratio  
M.Kuruta & T.Kamba  

7 Offshore structures and pipelines  

Analysis problems of tubular offshore structures  
A.Catarig, L.Kopenetz & P.Alexa  

Ekofisk 2/4 X wellhead platform – Design for the effect of subsidence  
M.Lefranc  

New types of pipes of a prestressed structure for main pipelines  
E.V.Chechin & G.S.Pisarenko  

A finite strain shell model for the analysis of moderately thick-walled tubes and pipe bends  
L.J.Ernst, G.van den Berg & F.J.Klever
The effect of geometrical imperfections on the stress state of pipe structures
V. Ivančo, K. Kubín & K. Kostolný

441

A FEM based expert system for planning optimal elements of pipelines
K. Jezső & I. Kerekes

447

Residual stress measurement and analysis of welded tubes of oil pipeline
N. Li, W. D. Zhu, C. Y. Huo & H. L. Li

453

Residual stress variation and redistribution of SSAW tube before and after hydrostatic testing
W. D. Zhu, N. Li, C. Y. Huo & H. L. Li

457

8 Optimum design

Minimum cost design of Vierendeel square hollow section trusses
J. Farkas & K. Jármai

463

Optimum design and imperfection-sensitivity of centrally compressed SHS and CHS
aluminium struts
K. Jármai & J. Farkas

469

Optimization of tubular columns prestressed by tension ties
S. Kmet‘, J. Farkas & K. Jármai

475

A knowledge based system to support joint fabrication decision making at the design stage
Case studies for CHS trusses
W. M. K. Tizani, K. O. Yusuf, G. Davies & N. J. Smith
