Contents

Opening of the Symposium	O. v. Lindequist	P. VI
Welcoming address	W. Vollmer	P. VII
1. Introductory Papers		
Long-term availability of aluminium	H.-G. Seebauer	1
The importance of aluminium for the automotive industry	D. Ernst	2
Aluminium in the motor car, the energy balance	M. Wintenberger	3
The "research car" project	J. Bandel	4
Future prospects of aluminium recycling in the vehicle industry	L. Hamm	5
Criteria for substituting steel through aluminium in commercial vehicles	P. Strifler	6
Substituting steel through aluminium in passenger cars	U. Seiffert and H.-D. Beckmann	7
2. Technical Papers		
2.1 Aluminium for Body Parts and Accessories		
Use of aluminium body sheet in American automobiles	W. C. Weltman, Jr.	8
Examples for the use of aluminium in the car body construction	K. Siegert	9
Experiences with aluminium components in the Porsche 928 car body	U. Steuer H. P. Bäuerle W. Kling and K. H. Lüpfer	10
Bi-metallic assemblies aluminium/steel for automotive use	J. Wallace and F. W. Joachim	11
Mixed aluminium old scrap, a material for the aluminium sheet fabrication	W. Gruhl and E. Lossack	12
Aluminium sliding roofs	P. Schäfer	13
Use of aluminium in window lifter mechanisms, problems and findings	F. Szerdahelyi	14

Aluminium jacks	D. Weisser and F. Hafner	15
Clear protective coating for aluminium in automobiles	L. Vandamme	16
Aluminium parts in the auto- mobile with electroplated and chemically treated surfaces	G. Lausmann	17

2.2 Aluminium for Chassis Components

The aluminium wheel in its various versions	H.-J. Boßmeyer	18
The aluminium sheet wheel, not only a weight advantage	A. Wimmer	19
The status of light alloy disc wheels in Japan	Light Metal Wheel Committee of the Japan Light Metal Association	20
Light disc brakes using aluminium components	D. Schröder	21
Steering cardan shaft made from aluminium	H. Gerhold	22
Technical and economical aspects of the use of aluminium in a steering wheel	R. Heyartz and K. H. von Zengen	23

2.3 Aluminium in Engines and Transmissions

Aluminium engines – development experiences	W. Dahm and R. G. Pütter	24
Aluminum cylinder blocks	H.-H. Hofmann	25
Air-cooled 2-cylinder all- aluminium motor car engine	J. Dupin	26
Aluminium cylinder block with cast-in "dry" iron sleeves	T. R. Atkinson	27
Aluminium Diesel engine for passenger cars with removable "wet" cast iron sleeves	J. J. His and J. le Gal	28
Engine sleeves made from an aluminium alloy with graphite and high silicone content after a P/M-process	J. L. Mazodier	29

Technical demands on aluminium alloys for cylinder heads	J. Wahnschaffe	30
Aluminium heat exchangers for automobiles	G. Kreuzer	31
Development of an air filter housing made from aluminium sheet	H. Alf	32
Sintered aluminium parts for automotive use	W. J. Huppmann H. Kirschsieper W. Häde and G. Schlieper	33
Aluminium cardan shafts in the drive train	W. Krude	34
Summary	G. Brenken	35
List of Participants		36
