international conference on wood drying

VACUUM DRYING
OF WOOD '95

SLOVAK REPUBLIC
High Tatras
October 8 –12, 1995
CONTENTS

PERRÉ, P., JOYET, P. and ALÉON, D.
Vacuum drying: physical requirements and practical solutions 7

MILITZER, K.-E.
External conditions in vacuum drying 35

CHEN, Z. and LAMB, F.M.
The internal conditions in vacuum drying of wood 45

BABIAK, M., HUDEC, J. and KURJATKO, S.
Nonsteady-state permeability of wood to gases 54

DEKRÉT, A. and VACEK, V.
On moisture content distribution in drying board 62

DEKRÉT, A. and VACEK, V.
Another method of the estimation of internal stresses in drying wood 66

KÚDELA, J.
The possibility of using reflection polariscope for examination of stress states in wood 73

LONGAUER, J. and TREBULA, P.
Influence of circulation intensity on homogeneity of wood drying monitored at outlet of stack 80

BAHÝL, V. and MARČOK, M.
The thermal conductivity of the frigichip for using in the heat flow measurements in the vacuum drier 84
LONGAUER, J. and ŠAFARÍK, P.
Optimization of flux profiles for vacuum drying of wood 93

BAHÝL, V. and TREBULA, P.
On the vacuum modelling in the beech wood II. 99

CHEN, Z. and LAMB, F.M.
The concept of boiling front in vacuum drying 110

REINPRECHT, L.
Suggestion of the outflow model for specific stages of wood drying and impregnating 119

BAIXERAS, O. and JOMAA, W.
Modelling discontinuous vacuum drying of oak wood 131

KOŠÍKOVÁ, B. and BUČKO, J.
Effect of pretreatment on the structural changes of beech wood upon vacuum drying 139

VIDELOV, C. and RAICHEV, A.
Possibilities for vacuum drying of beech wood 147

BEHNKE, C., MILITZER, K.-E. and KOVÁČIK, I.
Monitoring the drying process in vacuum kiln 152

TREBULA, P. and JOŠČÁK, P.
Some mechanical properties of beech and poplar wood after vacuum and convection drying 160

AKISHENKOV, S.I. and VAENSKAYA, A.P.
On the problem of vacuum convective drying of wood quality 168
MAHUT, J. and REH, R.
Introduction of total quality management tools in vacuum drying of veneer 172

ANANIAS, R.A., NOVOA, M., GARAY, M., RIVAS, O. and STEINHAGEN, H.P.
Vacuum drying and convetional predrying (for comparison) of Eucalyptus globulus sawnwood (poster) 182

VIKTORIN, Z,
Energetic demands of vacuum drying of wood 183

ŚWIGOŃ, J. and KURASIĄK, T.
Influence of vacuum on time of convective drying of wood 191

GUILMAIN, C., JOMAA, W. and JOYET, P.
Drying of oak under vacuum with superheated steam Part 1: Heat and mass transfer modelling 199

DEMANET, A., MORLIER, P. and JOYET, P.
Drying of oak under vacuum with superheated steam Part 2: Processes of damage during oak drying 207

FERNANDEZ-GOLFIN, J.I. and NOVES, H.A.
Vacuum and kiln drying of Eucalyptus globulus 27 and 50 mm thick boards 215

CIVIDINI, R. - PAGNOZZI, V.
Vacuum-press plus dryer - recent practical experiments of a new leap ahead in high temperature wood drying 223

CIVIDINI, R.
Timber straightening and shrinkage tests in vacuum-press plus dryer 231
DZURENDA, L.
Vacuum - radiating drying of beech dimension timber 237

DZURENDA, L. and TREBULA, P.
Drying of beech and oak dimension timber in vacuum drier with radiating heating 244

PERRÉ, P. and MOSNIER, S.
Vacuum drying with radiative heating: experiment on different species (fir, spruce and beech) and simulation with a simple analytical model 251

HAYASHI, K., NAGASE, Y. and KANAGAWA, Y.
Experimental evidence of an importance of permeability in the RF/vacuum drying 261

Nam-Ho LEE, HAYASHI, K. and Hee-Suk JUNG
Possibility of drying of walnut disk for wooden arts in radio-frequency/vacuum dryer with mechanical pressure system 270

TREBULA, P. and KLEMENT, I.
Vacuum drying with contact and microwave heating 280

ROZSA, A.
Moisture movement in eucalypt timbers during microwave vacuum drying 289

BUČKO, J. and SAMEŠOVÁ, D.
Disposal of the leaking compounds during vacuum drying of the wood 295

BEHNKE, C. and MILITZER, K.-E.
Vacuum kiln model 301
