VOLUME 1
Table of contents

Preface XV
Acknowledgements XVIII
Organization of the Symposium XIX

Keynote presentations

Rock engineering for underground civil construction
*P. P. Nelson*

AECL’s Mine-by Experiment: A test tunnel in brittle rock
*C. D. Martin & R. S. Read*

Rock mechanics and the future of underground mining
*D. M. Morrison*

Rock mechanics aspects of water injection
*F. J. Santarelli*

Salt rock mechanics

Damaging salt by thermal loading: Experimental and computational results
*J. Bergues, L. Londe, J. Shao & M. Terrien*

Structural phase transition in CaCl$_2$MgCl$_2$ $\times$ 12 H$_2$O
*A. Sinclair, R. Holly, H. Peemoeller, B. Davidson, M. Dusseault, M. Geilikman & M. M. Pintar*

Influence of backfilling on rock mass movement in the salt mine ‘Wieliczka’
*J. Palarski*

Laboratory tests with hollow cylinders for the dimensioning of gas caverns in rock salt
*R. B. Rokahr & K. Staudtmeister*

The effect of brine dissolution on the strength behaviour of evaporites
*R. Lee & E. De Souza*

A viscoelastic analysis to model a Spanish potash mine and to predict the surface subsidence
*L. R. Alejano & P. R. Oyanguren*
Evaluation of a mining panel in Taquari-Vassouras potash mine
D.Z. Mraz, L. Rothenburg, A.A. Valente & R.E. Frank 85

Dynamic system stability of mining structures in salt mining
W. Minkley & W. Menzel 93

Stability of large underground caverns in rock salt
N.D. Cristescu 101

The migration of the zero strain boundary around an underground excavation in rock salt
S. Kwon & H. Miller 109

Three dimensional finite element simulations of room and pillar mines in rock salt
E.L. Hoffman & B.L. Ehgartner 117

Modelling the viscoplastic behaviour of rocks
R.G. Wan 125

Computational implementation of the multi-mechanism deformation coupled fracture model for salt
J.R. Koteras & D.E. Munson 131

Time dependent modelling of fill and cable bolts in soft rock mines
M.K. Rizkalla & H.S. Mitri 139

Experimental determination of dynamic elastic properties of rock from quasistatic measurements

Stabilization of a large, shallow, potentially unstable underground opening
J.C. Zelanko, T.P. Mucho, A.T. Iannacchione & T.M. Barczak 155

Ground support
A decision support system for the selection of ground support at the Sullivan Mine
D. Roberts, L. Clark & J. Ritcey 165

Shotcrete as a primary support system for cut-and-fill mining
G. Swan, L.K.W. Ng & R.K. Brummer 173

Highwall control at Homestake’s Open Cut Mine
D. Berger, M. Stahl & J. Goris 181

Bolt load simulation and its practical application
P.G. Fuller, B.G. Hume & R.G. Hume 187

Investigation on the load transfer of cement grouted cable bolts and their instrumentation
R. Benmokrane & M. Chekired 195

Rock bolting – A practical review
D. Gagnon 203

A comprehensive laboratory test program to study the behavior of modified geometry cable bolt support
M. Moosavi, W.F. Bawden & A.J. Hyett 209
Ground motion determination for rock support design

P.K. Kaiser & S.M. Maloney

Terminology in rock reinforcement practice

C.R. Windsor & A.G. Thompson

In situ testing of composite bolt in mining excavation

F. Hassani, K. Fotoohi & M. Molavi

Choosing a ground support system for mobile ground

A. Girard

Mine design and ground control

Key issues in rock mechanics from the point of view of health and safety

J. E. Udd

Geotechnical assessment of block cave mining in Northparkes Mines, NSW, Australia

D. Chen

Mining under backfill – Field measurements and numerical modelling

R. K. Brummer, R. Gustas, D. A. Landriault & C. M. Steed

On the relationship between stability prediction and observed stope overbreak

P. Germain, J. Hadjigeorgiou & J. F. Lessard

Some observations on the time dependency of collapse of surface crown pillars

T. G. Carter & R. I. Miller

Rockburst control in the South African deep level gold mining industry

Dilution aspects of a sublevel retreat stope at Detour Lake Mine

K. Dunne & R. Pakalnis

Surface geometry assessment for open stope design

D. Milne, R. C. Pakalnis & M. Felderer

Evaluation tridimensionnelle des monteries avec un laser

F. Miller & D. Jacob

Regional support strategies on South African gold mines

D. A. Selfe, R. Johnson, M. Maccelari, F. Vieira & G. York

Characteristics of a complex serpentinized ultramafic rock mass at the Birchtree Mine, Manitoba

M. Paventi, M. Scoble & D. Stead

Characteristics of different types of support systems in rockburst conditions

X. Yi
Application of rock mechanics at great depth

Mining at ultra-depth: Evaluation of alternatives
R.A. Johnson & J.K. Schweitzer 359

Impact tests on shotcrete and implications for design for dynamic loads
D.D. Tannant, D.R. McCreath & P.K. Kaiser 367

A pillar preconditioning experiment on a deep-level South African gold mine
D.H. Kullmann, R.D. Stewart & M. Grodner 375

Analysis of deep supported tunnels under non-isotropic geostatic stress
C. Guo & D. Nguyen-Minh 381

Seismic excitation of the rock mass surrounding an excavation in highly stressed ground
R.J. Durrheim, D.H. Kullmann, R.D. Stewart & A. Cichowicz 389

Coal mining

Seismic tomography for longwall stress analysis
E.C. Westman, K.Y. Haramy & A.D. Rock 397

A new look at the uniaxial compressive strength of coal
C. Mark & T.M. Barton 405

Rating the strength of coal mine roof rocks
G.M. Molinda & C. Mark 413

Mining-induced stress redistribution and roof hazardous characteristics of the channel-filled sandstone roof: A physical modeling study
S. Peng 423

Integrated coal specimen strength formula
A.W. Khair 431

Predicting gob cave by rock movement at the Quinsam Coal Mine
M. Cullen, R.C. Pakalnis & D. Payne 443

Development of a stiff pack compaction measuring set up
S. Istanbulluoğlu & C. Karpuz 449

An introspection to design guidelines for multi seam mining with thin parting – An Indian case study
A.K. Sinha, T.K. Mozumdar & V. Mahajan 455

Rock mechanics in dynamic environment

Estimation of intrinsic and effective elastic properties of cracked media from seismic testing
G.J. Hesler, N.G.W. Cook & L. Myer 467

Practical benefits of seismic monitoring at Western Deep Levels North Mine
A.G. Butler 475

The role of resisting stress on the failure process of microseismic events
T.I. Urbancic & C.-I. Trifu 483
Listening to a mine relax for over a year at 10 to 1000 meter scale
R.L.Kranz & L.H.Estey

The influence of deep mine stopes on seismic waves
M.F.Handley, M.W.Hildyard & S.M.Spottiswoode

Rock slope/open pit geomechanics
In-situ block size distributions as tools for the study of rock avalanche mechanics
J.Hadjigeorgiou, R.Couture & J.Locat

Studies into the influence of underground workings on open pit slope stability
D.P.Stewart, M.A.Coulthard & C.F.Swindells

Applications of limit analysis to stability problems of rock masses
L.G.Araujo, E.Vargas, Jr & L.E.Vaz

Maximum safe slope angles for proposed permanent shiplock slopes of the Three Gorges dam site in China based on application of block theory to major discontinuities
J.Um & P.H.S.W.Kulatilake

Rock slope stability analyses for a proposed intake tower access road at Seven Oaks Dam
J.L.Wibowo & G.A.Nicholson

Slope stability analysis in wet ground
M.M.Mohammed & H.S.Mitri

Slope stability using micropolar plasticity
E.M.Dawson & P.A.Cundall

Rock blasting
Dynamics of blast-induced rock fragments based on physical modeling at 1-g
K.Bakhtar

Dynamic fracture and damage of rock during impact
H.P.Rossmann, R.E.Knasmillner & K.Uenishi

On the derivation and implementation of improvements to drilling and blasting practices in cut-and-fill mining
G.Swan & J.Heilig

The role of rock-bit interaction in blasthole deviation
S.P.Singh

Rockmass rating systems and the assessment of blasting efficiency
Y.C.Lizotte & C.Doucet

The mechanisms of rock damage in blasthole open stope mining: Blast induced versus stress induced
Q.Liu & R.Proulx

Fragmentation and rock mass damage assessment – Sunburst excavator and drill and blast
T.Meyer & P.G.Dunn
Dynamic fracture propagation due to blast-induced high pressure gas loading 619
A.Daehnke, H.P.Rossmanith & N.Kouzniak

Fractal and digital image analysis for rock fragments 627
E.Widzyk-Capehart & D.S.Young

The calculating of crack propagation velocity driven by explosion gas 635
W.Lu & Z.Tao

Experience of prediction and prevention of rock bursts in the Khibiny apatite mines, Russia 639
A.A.Kozyrev, V.I.Panin, V.A.Maltsev & V.V.Timofeyev

Mechanical breakage of rock
DIANA modelling of a rolling disc cutter and rock indentation 647

A mechanism of size effect in fracture toughness measurements 655
A.V.Dyskin & A.N.Galybin

Simulation of tensile failure in disk using random lattice network model 663
C.Yao & K.Kim

Performance of rock cutting trenchers at different sites 669
H.J.R.Deketh, M.Giezen, M.Alvarez Grima & M.H.den Hartog

Prediction of tool force and twist action on TBM gauge cutters 677
K.Sato, K.Itakura & F.Gong

Simulation of rock fragmentation by indenters using DDM and fracture mechanics 685
X.C.Tan, S.Q.Kou & P.-A.Lindqvist

State-of-the-art review of rock models for disc roller cutters 693
H.Alehossein & M.Hood

Searching for the damage threshold in intact rock 701
E.Z.Lajtai & E.J.Dzik

The significance of rock ductility for mechanical rock cutting 709
P.N.W.Verhoef, J.J.Ockeloen & W.G.M.van Kesteren

Kerf effects in spherical indentation 717
L.Chen & H.Alehossein

New rock-fracturing excavation method for hard rock tunneling 725
T.Noma, T.Tsuchiya, S.Sakai & S.Nakayama

Rock mechanics in dam and hydro projects
Geotechnical instrumentation at Zimapán Dam 733
F.González-Valencia & E.Mena-Sandoval

The case of a small private powerhouse: Thibaudeau-Ricard, City of Shawinigan, Québec 741
L.Boyer
Application of anchors for structural protection and rock stabilization in the construction of a powerplant
M.Claissé & C.Vissa

A complete 3D stress determination for the design of an underground power station
F.H.Cornet

Underground powerhouses: A review of different rock support systems for overhead cranes
Z.Aziz, D.Nguyen & J.Levay

Tunnelling in rock

Strainburst risk analysis in the Lötschberg base line tunnel – A case history
A.-P.Bois, J.Robert & F.Vuilleumier

Tools for stability analysis of tunnels and boreholes
P.A.Nawrocki, Y.Wang & M.B.Dusseault

Utilizing failure characteristics to create stable underground opening
Z.Zheng & M.Khodaverdian

A proposed design methodology for tunnel support in a high stress environment
A.T.Haile & A.J.Jager

Design and performance of tunnel support in squeezing rock at Yacambú
N.Feknous, G.Ambrosii, I.Henneberg & R.Simard

Characterizing failure around a model tunnel with acoustic emission
T.Ishida, J.F.Labuz, K.Shah & S.Dai

Empirical design of tunnels in young and soft rocks of Himalayas: A modified approach
G.S.Saini & J.L.Jethwa

Parameter study in rocks around an opening using a VSP inverse technique
C.X.Wu & M.B.Dusseault

Geophysical techniques

Laboratory study of acoustic emission and particle size distributions during linear cutting of coal
H.R.Hardy, Jr & H.W.Shen

Experimental and numerical investigation of fracture interface waves
J.Fan, B.Gu, K.T.Nihei, N.G.W.Cook & L.R.Myer

Subsurface stress field determination using multiplets in downhole three-component microseismic measurement
H.Moriya, J.T.Rutledge, H.Kaieda & H.Niitsuma

Grain fracturing and comminution in porous materials
K.R.Shah & T.-F.Wong
Sonic tomography: A mean for monitoring ground efficiency of a masonry wall
Y.Kharrat, J.Rhazi & G.Ballivy

Application of MSR for evaluation of excavated tunnel and shaft concrete linings
F.P.Hassani, A.Sadri & M.Momayez

Stress measurement
Quantifying lithospheric stress from the shape of oval fractures in a borehole
R.Morin & R.Flamand

A study for in-situ stress measurements from circumferential deformation of borehole wall
due to pressurization
T.Ito & K.Hayashi

The IAM - A down-the-hole conditioner/data logger for the modified doorstopper technique
M.H.Leite, R.Corthésy, D.E.Gill, M.St-Onge & N.Don

Evaluation of initial rock stress by the orthotropic spherical shell model
K.Sugawara & H.K.Jang

Estimating the state of stress at the underground research laboratory from hydraulic fracturing
tests in three test holes of different plunges
B.C.Haimson, M.Y.Lee & N.Chandler

Field application of the RPR in situ stress calculation method
M.H.Leite, R.Corthésy & D.E.Gill

In situ stress measurement for nuclear fuel waste repository design
N.A.Chandler, R.S.Read & C.D.Martin

Petroleum rock mechanics
Laboratory simulation of cavity completion process
B.Wu, M.B.Wold, N.S.Smith & R.H.T.Cox

Assessment of the degree of water saturation in shales
M.E.Chenevert & Md.Amanullah

Investigation of the effects of sample handling procedures on shale properties
H.M.R.dos Santos, A.Diek, J.-C.Roegiers & S.A.B.da Fontoura

Mechano-chemical corrosion of shales in borehole-mud contact
M.B.Geilikman & M.B.Dusseault

Incremental response and bifurcation of pressure sensitive geomaterials
P.Papanastasiou & D.Durban

Effect of drilling fluids on shear strength properties of Fernie shales

A three-dimensional poroelastic hydraulic fracture simulator using the displacement
discontinuity method
A.Ghassemi & J.-C.Roegiers
Simulations of hydrodynamic dispersions in network of discrete fracture
H.Mo, D.Lin & J.-C.Roegiers

3 dimensional modelling of a hydraulic fracture
J.Desroches & B.J.Carter

Reconstruction of pore structure of reservoir rock
P.Huang, G.Yang, L.Myer & N.Cook

Permeability measurements under different stress paths for a weakly cemented sandstone
G.R.Krishnan, M.M.Zaman & J.-C.Roegiers

A PKN model with pressure dependent leakoff – Part 1: Homogeneous poroelastic media
Y.Aboussleiman, M.Bai & A.H.-D.Cheng

A PKN model with pressure dependent leakoff – Part 2: Fractured poroelastic media
M.Bai, Y.Aboussleiman & J.-C.Roegiers

Geomechanics and stress regimes in the Norwegian North Sea
N.A.Yassir, J.S.Bell & R.Bratli

A method for estimating hydraulic fracturing breakdown pressure
X.Weng

Azimuth control of hydraulic fractures in weakly cemented sediments
G.Hocking
