VOLUME 2

INVITED LECTURE
Chair: A. Hertz - EDF/DER (Clamart, F)

- Knowledge and software engineering
  W. Van de Velde - Vrije Universiteit Brussels (B)  p. 455

SESSION 16: DIAGNOSIS - 4: SUBSTATIONS
Chair: A. Germond - EPFL (Lausanne, CH)

- ASTRA: a knowledge-based system for state assessment, preventive diagnosis, and intervention planning of power transformers
  P. Baroni - Università di Brescia (I), F. Cremonesi - CESI (Milan, I), G. Guida - Università di Brescia (I), S. Mussi - Università di Brescia (I) & Cilea (Segrate, I) & S. Yakov - CESI (Milan, I)  p. 463

- An intelligent instrument for high-voltage equipment insulation evaluation
  R. Levi, M. Rivers & K. Hickey - Doble Engineering Company (Watertown, USA)  p. 471

- Fault location estimation via associative memories

SESSION 17: TECHNIQUES AND MODELING - 1
Chair: M. Gondran - EDF/DER (Clamart, F)

- Knowledge acquisition and configuration for electrical power systems
  L. Perrot - Airial (Puteaux, F), O. Tache - EDF/DER (Clamart, F) & P. Brézillon - Université Pierre & Marie Curie/Laforia (Paris, F)  p. 487

- Dynamic analysis of a real-time object-oriented symbolic-connectionist system using state controlled Petri nets
  R. Khosla & T. S. Dillon - La Trobe University (Melbourne, AUS)  p. 495

- EXPRESS, a knowledge-based system for automating reliability studies of thermohydraulic systems in power plants
  N. Villatte - EDF/DER (Clamart, F) & M. Bannelier - Alsoft (Paris, F)  p. 503

SESSION 18: DYNAMIC SECURITY & VOLTAGE STABILITY MONITORING
Chair: R. Fischl - Drexel University (Philadelphia, USA)

- Pattern recognition versus decision tree methods - a case study on fast dynamic security assessment of autonomous power systems with a large penetration from renewables
  N. D. Hatzigiargioul, S. A. Papanthanassiou - National Technical University (Athens, GR), J. A. Pecas-Lopez & V. Van Acker - University of Porto (P) & INESC (Porto, P)  p. 513

- Machine learning, neural networks and statistical pattern recognition for voltage security: a comparative study
  L. Wehenkel, T. Van Cutsem, M. Pavella - University of Liège (B), B. Heilbronn & P. Pruvot - EDF-DER (Clamart, F)  p. 521
• Towards a neural network-based voltage stability assessment
   B. J. Cory, U. G. Knight - Imperial College (London, GB), R. Sbrizzai & M. Trovato - Politecnico di Bari (I)

INVITED LECTURE
Chair: C. C. Liu - University of Washington (Seattle, USA)

• A computational intelligence approach to intelligent systems: interrelationships between neural net computing, evolutionary programming, fuzzy sets and expert systems
   Y.-H. Pao - Case Western Reserve University (Cleveland, USA)

SESSION 19: ALARMS
Chair: M. A. Laughton - University of London (GB)

• A system monitoring expert system

• Knowledge-based applications in control centers: key issues in development and integration
   Z. A. Vale, A. Machado e Moura - University of Porto (P), M. F. Fernandes & C. Rosado - Electricity of Portugal (Sacavém, P)

• Fault location in electrical energy systems using artificial neural networks
   E. Handschin, W. Hoffmann & D. Kuhlmann - University of Dortmund (D)

SESSION 20: SCHEDULING
Chair: S. L. Muchlinski - Puget Sound Power & Light Company (Washington, USA)

• Large-scale generator maintenance scheduling using simulated evolution
   T. Sutoh, H. Suzuki & N. Nagai - Mitsubishi Electric Corp. (Tokyo, J)

• Linguistic evaluation for power system generation planning based on fuzzy multi-attribute decision making
   M. Zhao, T. Tanabe, K. Yasuda & R. Yokoyama - Tokyo Metropolitan University (Tokyo, J)

• Genetic algorithm approach to the unit commitment problem
   H. Saitoh - Tohoku University (Sendai, J), K. Inoue - Kansai Electric Power Company (Kansai, J) & J. Toyoda - Tohoku University (Sendai, J)

SESSION 21: SECURITY ASPECTS
Chair: H. S. Chandrasekaraiah - Indian Institute of Science (Bangalore, IN)

• Contingency-constrained generation scheduling based on line security index extracted by neural networks
   M. R. Aghamohammadi, H. Saitoh & J. Toyoda - Tohoku University (Sendai, J)

• Neural network application to bad data detection using an autoregressive filter in the power systems
• The new concept of an artificial intelligence based “smart relay”  
K. Yabe, K. Yoshida - Tokyo Electric Power Company (J), N. Rostamkolai - Rose Hulman Institute of Technology (Terre Haute, Indiana), P. E. Nielsen - University of Michigan (Ann Arbor, USA) & D. J. Leonard - General Electric Company (Schenectady, USA)

SESSION 22: TRAINING AND CAI  
Chair: T. Sakaguchi - Mitsubishi Electric Corp. (Hyogo, J)

• Kytken - a multimedia training system for power system operators  
J. Eklund - Imatran Voima Oy (Vantaa, SF), M. Tukiainen & J. Noronen - IVO Transmission Services Ltd (Helsinki, SF)

• Computer-based learning of expert systems in power system training  
M. Sobierajski - The Technical University of Wroclaw (PL)

• An expert system in training power system restoration at the Stadtwerke Duisburg AG  
S. König, L. Mohr - Stadtwerke Duisburg AG (D), G. Krost, D. Rumpel & U. Spanel - Duisburg University (D)

• Computer simulation for training purposes: Diapason and power system control  
J. Moustafadès - EDF/DER (Clamart, F), C. Moinard - Université Pierre & Marie Curie (Paris, F) & J. Courtois - ISEP (Paris, F)

SESSION 23: RELAYS  
Chair: H. E. Dijk - N. V. Kema (Arnhem, NL)

• An expert system for automatic relay settings on transmission line protection  
K. Kawahara - Fukuyama University (J), H. Sasaki - Hiroshima University (J), H. Sugihara & M. Kitagawa - Chugoku Electric Power Company (Hiroshima, J)

• An expert system applied to the back-up protection of a transmission network  
T. Saengsuwan, C. Fernandez & P. A. Crossley - UMIST (Manchester, GB)

• An artificial neural networks approach to power system protection  
B. Kasztenny - Technical University of Wroclaw (PL)

• A neural network classifier for the analysis of power transformer differential current  
P. Bastard, M. Meunier - Ecole Supérieure d'Electricité (Gif-sur-Yvette, F) & H. Regal - Merlin-Gerin (Grenoble, F)

SESSION 24: EMS & DMS  
Chair: J. Ypsilantis - Consultant (Sydney, AUS)

• Intelligent data  
D. Rumpel - Universität Duisburg (D) & N. M. Nagdy - Al-Azhar University (Cairo, ET)

• Neural network load-flow for on-line static security assessments  
T. T. Nguyen - The University of Western Australia (Perth, AUS)

• An intelligent support system for distribution management  
P. Verho, P. Järventausa, M. Kärenlampi - Tampere University of Technology (Tampere, SF) & J. Partanen - Lappeenranta University of Technology (SF)
• Genetic algorithm approach to environment-constrained optimal economic dispatch
K. S. Swarup - Mitsubishi Electric Corp. (Amagasaki, J), M. Yoshimi - Kansai Electric
Power Company (Amagasaki, J), Y. Izui - Mitsubishi Electric Corp. (Amagasaki, J)
& N. Nagai - Mitsubishi Electric Corp. (Kobe, J)

SESSION 25: RESTORATION & CORRECTIVE SWITCHING
Chair: H. Brugger - Siemens (Vienna, A)

• The development of a restoration support system for application to large-scale bulk
power networks
M. Miyazaki, H. Ishige, H. Yoshida - Tokyo Electric Power Co. (Tokyo, J), T. Asano,
T. Soyama & M. Kato - Toshiba Corp. (Tokyo, J)

• Fuzzy inference application to the planning of distribution network switching
Y. Imamura, M. Kanoi, C. Fukui, H. Inoue & J. Kawakami - Hitachi Ltd (Ibaraki, J)

• Development of the advanced intelligent restoration guidance system for a control center
S. Higashi, J. Sogawa & K. Nakata - Kansai Electric Power Co. (Osaka, J), A. Maruyama,
A. Hibi & C. Fukui - Hitachi Ltd (Ibaraki, J)

SESSION 26: MONITORING AND PROTECTION
Chair: J. Bigeon - LEG/INPG (Saint-Martin d’Hères, F)

• An expert system for the monitoring and diagnosing of a boiler steam-water subsystem
in a thermoelectric power plant
J. Belo Lopes Filipe - ESTIPS (Lisbon, P)

• Neural networks for real-time estimation of signal parameters in power systems
A. Cichocki - Technical University of Warsaw (PL), P. Kostyla, T. Lobos & Z. Waclawek -
Technical University of Wroclaw (PL)

• A novel technique for phase selection based on fault generated high frequency noise
using neural networks
R. Aggarwal, A. Johns, Z. Q. Bo - University of Bath (GB) & Y.-H. Song - Liverpool John
Moores University (GB)

SESSION 27: LOAD FORECASTING - 2
Chair: D. Niebur - EPFL (Lausanne, CH)

• District heating forecast using artificial neural networks
S. Canu - LIAC (Compiègne, F) & UTC (Compiègne, F), M. Duran - Cylergie (Nanterre, F)
& X. Ding - LIAC (Compiègne, F)

• A fuzzy neural net for short-term load forecasting
H. Mori - Cornell University (Ithaca, USA) & H. Kobayashi - Meiji University (Kawasaki, J)

• Long-term maximum load forecasting using a modified neural network approach
M. Kanda, Y. Hayashi, S. Iwamoto - Waseda University (Tokyo, J), & S. Furuya - Tokyo
Electric Power Co. (Tokyo, J)
INVITED LECTURE
Chair: A. T. Holen - Norwegian Institute of Technology (Trondheim, N)

• PSAD, an integrated architecture for intelligent monitoring and diagnosis of EDF power plants
  A. Jousselin, B. Ricard, J. Morel - EDF/DER (Chatou, F), B. Chevalier - EDF/DER (Clamart, F) & B. Monnier - EDF/DEPT (Paris-La Défense, F)
  p. 793

SESSION 28: TECHNIQUES & MODELING - 2
Chair: D. Pellegrin - Schneider Electrique (Grenoble, F)

• Intelligent tools for supporting operator decisions on interconnection restoration after a major disturbance
  N. I. Voropai, A. M. Krol & V. V. Novorussky - Russian Academy of Sciences (Irkutsk, Russia)
  p. 801

• An interval-based approach to fault diagnosis of power systems
  G. Tornielli - Cise (Milan, I), L. Capetta - ENEL (Cologno Monzese, I), S. Cermignani, A. S. Fabiano - Cise (Milan, I) & R. Schinco - ENEL (Sesto San Giovanni, I)
  p. 809

• The importance of cases and domain models in explanation
  E. Georgin, J. R. McDonald - University of Strathclyde (Glasgow, GB), B. Ricard & J.-P. Jacquot - EDF (Chatou, F)
  p. 817

SESSION 29: STABILITY & SYSTEM CONTROL
Chair: L. Wehenkel - Université de Liège (B)

• A new approach for self organization of fuzzy logic controller
  Y.-M. Park, U. C. Moon - Seoul National University (KR) & K. Y. Lee - The Pennsylvania State University (University Park, USA)
  p. 827

• Alternative approach to secondary voltage control by means of fuzzy sets using local information
  F. Gubina & J. Curk - University of Ljubljana (Slovenia)
  p. 833

• Fuzzy control of SMES for stabilization of power system
  H. Miyaochi & T. Hiyama - Kumamoto University (J)
  p. 841

SESSION 30: LOAD FORECASTING - 3
Chair: W. Bergstrom - Elkraft Power Co (Ballerup, DK)

• Short-term load forecasting using an artificial neural network of locally active units
  K. Makino, T. Shimada, R. Ichikawa, M. Ono & T. Endo - Toshiba Corp. (J)
  p. 849

• Neural network predicting system for electrical load data in West Bohemia
  V. Böhm, V. Posseltová - West Bohemian Power Co. (Pilsen, CS), M. Novák & E. Pelikán - Czech Academy of Sciences (Prague, CS)
  p. 857

• A comparative study of load forecasting models using fuzzy neural networks
  P. K. Dash, A. C. Liew - National University of Singapore (SGP) & S. Rahman - Virginia Polytechnic Institute and State University (Blacksburg, USA)
  p. 865
