Adhesives in Electronics '96

Second International Conference on Adhesive Joining and Coating Technology in Electronics Manufacturing

June 3–5, 1996 in Stockholm, Sweden
Foreword
Programme 7
Organizing, Program and Technical Committees 11
Adhesives in Electronics '98, First Announcement 12

Session 1
Characterization of Conductive Adhesives
Investigation of Isotropically Conductive Adhesives filled 14
with Aggregates of Nano-Sized Ag-Particles
Stefan Kotthaus, Robert Bosch, Germany
The Electrical and Mechanical Properties of Electrically Conductive 18
Adhesives in Pin-Through-Hole Applications
James E Moms, State University of New York, USA
Factors that Influence the Electrical Contact Resistance of Isotropic 30
Conductive Adhesive Joints during Climate Chamber Testing
Erik Botter, TNO Metaalinstiut, The Netherlands

Session 2
Materials Development, Part I
UV Cure Options for Conductive Resin Systems 38
Wilhelm Hekele, Siemens, Germany
Photo-Initiated Adhesives – Optimal Systems in Electronics 43
Patrick Marx, DELO, Germany
Enhancing Thermal Conductivity in Organic Adhesives 47
Ray Dietz, Diemot Inc, USA
Porous Metal Powders for Conductive Adhesives 55
Bernd Günscher, Fraunhofer-Institut für Angewandte Materialforschung, Germany
Material Development for Direct Chip Attach 60
(Interconnection and Protection) Applications
M Holloway, Loctite International, Ireland

Session 3
Processing Techniques, Properties and Applications
A Batch Curing Process for the Assembly of Flip Chip Interconnections 68
with Anisotropically Conductive Adhesive Pastes
Alan M Lyons, Bell Laboratories, USA
Application of Electrically Conductive Adhesives in SMT 76
Rolf Luchs, FAPS, German
Electrical Sensing of Shelf-Cure Properties of Polymeric Prepeg Materials 84
Barry M Lunt, Brigham Young University, USA
Miniaturisation of Opto-Electronic Modules using Conductive Adhesives 102
– user’s experience
Z M Matraszek, Philips, The Netherlands
Microapplication of Adhesives for precision assembly in Microsystems 108
Manufacturing
Andreas Bauer, CEM, Germany

Invited speaker: K Otsuka, Meisei University, Japan
High Frequency characterization of Conductive Adhesives 114
and its Interconnection Technology Trend in Japan
Session 4

Failure Mechanisms and Modelling

Electrical Conduction Models for Isotropically Conductive Adhesives 126
James E Morris, State University of New York, USA
and Li Li, Motorola Semiconductor Products Sector, USA

Process Induced Residual Stresses in Isotropically Conductive Adhesive Joints 133
Sean X Wu, Motorola, USA

Surface Characteristics, Reliability and Failure Mechanisms of Tin, Copper and Gold Metallisations
Katrin Gustafsson, Johan Liu and Zonghe Lai, IVF, Sweden

Session 5

Materials Development, Part II

Novel Uniaxial Conductive Adhesives Comprising Polymerisable Ferrofluids and Conductive Magnetic Holes
Ciaran Mc Ardle, Loctite Research, Ireland

Conductive Adhesives: A Feasible Challenge? 160
Ann Van Den Bosch, Grace Specialty Polymers, Belgium

Cationic UV Resins for the protection of the Electronic Components 167
Laurent Laffon, Protex, France

Session 6

Die Attach and Underfilling Materials

Development of a Thermally Conductive Fiber-Filled Elastomer 188
William J Fischer, State University of New York, USA

Low Thermal Resistivity Adhesive Bonding of Ceramic Substrates to High Performance Coolers for the Fabrication of Power MCM's
R Hahn, Technical University Berlin, Germany

Experience of Working with Thermosetting and Thermoplastic Conductive Adhesives
Outi Rusanen, VTT Electronics, Finland

Determination and Achievement of Fluid Mass Dispensing Specifications for the Underfill Process and Case Studies 211
Alan R Lewis, Asymtek USA

Session 7

Adhesion issues

Adhesion Issues in Epoxy-Based Chip Attach Adhesives 224
R A Pearson, Lehigh University, USA

Polypyrrol as Interlayer for Bonding Conductive Adhesives to Activated Aluminium Bondpads
F Küchenmeister, Dresden University of Technology, Germany

Adhesion Improvement in Packaging through Pretreatment 242
A Neu, Siemens, Germany

Invited speaker: C P Wong, Georgia Institute of Technology, USA

Recent Advances on Encapsulants and Adhesives for Microelectronic Packaging 250

Session 8

Packaging and Interconnecting Technology

Flip Chip Interconnection to Glass Substrates using Anisotropic Adhesives and Electroless Nickel Bumps
R Aschenbrenner, Fraunhofer-Institut für Zuverlässigkeit und Mikrointegration (IZM), Germany
Assembly of Planar Array Components using Anisotropic Conducting Adhesives
- A Benchmark Study
A O Ogunjimi, Loughborough University, U K

Bonding Flexible Circuits and Flip Chips with Solder-Filled Z-Adhesives.
Non-Conductive Adhesives and Fusible Coatings
Kimmo Puhakka, Helsinki University of Technology, Finland

Electrical and Mechanical Properties of Flip Chip Connections
Using Isotropic Conductive Adhesive
F Kriebel, Technische Universität Dresden, Germany

Large Flip Chip modules on FR-4 Substrate using Conductive Adhesive
Joining technology
Bela Rösnér, Deutsche Thomson-Brandt, Germany

Session 9
Reliability Issues
Influence of Chemistry and Processing of Flip Chip Underfills on Reliability
H Bressers, Philips, Netherlands

Reliability of Smart Card/IC Modules Assembled Using Polymer Flip Chip
(PFC®) Packaging
Richard H Estes, Epoxy, USA

Electrically Conductive Adhesives for Surface Mount Solder Replacement
Michael Zwolinski, Delphi Packard Electric, USA

Flip Chip on Flexible Substrates using Anisotropic Conductive Adhesives
H M van Noort, Philips, The Netherlands

Evaluation of Adhesive Based Flip-Chip Interconnect Techniques
Roger Nagle, NMRC Cork, Ireland

Session 10
Coatings
Conductive Adhesive Joints with Non-filled Adhesives for Surface Mount Technology
Helmut Schäfer, Fraunhofer-Institut für Angewandte Materialforschung, Germany

Chip Shrouding with Ultra-violet Hardening
Achim Battemann, Panacol-Elosol, Germany

Mechanical Failure in COB-Technology using Glob Top Encapsulation
R Dudek, Fraunhofer-Institut für Zuverlässigkeit und Mikrointegration (IZM), Germany

A new Approach to Encapsulate Microelectronic Devices
Thomas Oehmichen, DYMAX Europe, Germany

Process Requirements for Solvent-Free UV Conformal Coatings
B Ritchie, Loctite Corporation, USA

Poster sessions
Moisture Sorption in some Popular Conductive Adhesives: What Really Happens?
Cynthia G L Khoo, IVF, Sweden

The Mechanical Strength of Smart Cards made by Isotropic
Adhesive Bonded Flip Chip
Virpi Pennanen and Outi Rusanen, VTT Electronics, Finland

Aluminium-based Multi-layer printed Wiring Board
using Thermally Conductive Adhesive Film
Dr Kazunori Yamamoto, Yasushi Shimoda and Teiichi Inada, Hitachi Chemical CO, Ltd, Japan

First International Symposium on Polymeric Electronics
Packaging (PEP '97), call for papers
