Fifth
International Conference
on
Concrete Pavement
Design and Rehabilitation

April 20-22, 1993
Purdue University
West Lafayette, Indiana 47907 USA

Volume 2

<thead>
<tr>
<th>Title</th>
<th>Authors/Institutions</th>
</tr>
</thead>
<tbody>
<tr>
<td>Non-Linear Dynamic Analysis of Concrete Pavements</td>
<td>Sameh Zaghloul and Thomas D. White, School of Civil Engineering, Purdue University</td>
</tr>
<tr>
<td>Concrete Pavement Design and Construction Practices by the Texas DOT</td>
<td>Andrew J. Wilmsatt, Pavement Section, Division of Highway Design, Texas Department of Transportation</td>
</tr>
<tr>
<td>Analysis of Structural Response of Concrete Pavements Under Critical Thermal-Loading Conditions</td>
<td>Chung-Lung Wu, Construction Technology Laboratories, Inc.; Mang Tia, Department of Civil Engineering, University of Florida; Torbjorn J. Larsen, Florida Department of Transportation</td>
</tr>
<tr>
<td>The Revision of the Concrete Pavement Thickness Design Procedure of China</td>
<td>Zukang Yao, Denyon Zhou and Zhilmang Tan, Tongji University, Shanghai, China (Publish Only)</td>
</tr>
<tr>
<td>The Pasternak Foundation: An Attractive Alternative for the Winkler Foundation</td>
<td>A. C. Pronk, Road and Hydraulic Engineering Division, The Netherlands (Publish Only)</td>
</tr>
<tr>
<td>A Nonlinear Mechanistic Model for Dowel Looseness in PCC Pavements</td>
<td>Hua Guo, Galaxy Scientific Corporation, Roger M. Larson, Federal Highway Administration, and Mark B. Snyder, Michigan State University (Publish Only)</td>
</tr>
<tr>
<td>Non Destructive Tests Procedure for Field Evaluation of Transverse Joints in Concrete Pavements</td>
<td>J. Prozzi, M. DeBeer, Division of Roads and Transport Technology, Pretoria, and P. Balmaceda, City Council of Johannesburg, Braamfontein, South Africa</td>
</tr>
<tr>
<td>Evaluation Method for Joint Load Transfer Efficiency in Concrete Pavements</td>
<td>Kazuyuki Kawamura and Shinichi Nakagawa, Civil Engineering Research Institute, Hokkaido Development Bureau; Tatsuo Nishizawa, Ishikawa National College of Technology; Atsushi Kasahara, Hokkaido Institute of Technology</td>
</tr>
<tr>
<td>Development of Load Transfer Coefficients for Use with the AASHTO Guide Based on Field Measurements</td>
<td>B. Frank McCullough and Eric D. Moody, University of Texas at Austin</td>
</tr>
<tr>
<td>Prediction of Faulting of Joints in Concrete Pavements</td>
<td>Chung-Lung Wu, James W. Mack, Paul A. Okamoto, Robert G. Packard</td>
</tr>
<tr>
<td>Calibrated Mechanistic Design Procedure to Prevent Transverse Cracking of Jointed Plain Concrete Pavements</td>
<td>Ricardo A. Salsilli, University of Chile; Ernest J. Barenberg and Michael I. Darter, University of Illinois at Urbana-Champaign</td>
</tr>

Volume 2

WEDNESDAY MORNING: JOINTS
WEDNESDAY MORNING: NOISE AND MATERIALS

Noise-Reducing Concrete Pavements — G. Descornet and F. Fuchs, Belgian Road Research Centre; R. Buys, Robuco Ltd. ................................................................. 93

Australian Developments to Reduce Road Traffic Noise on Concrete Pavements — John Nichols, Cement and Concrete Association of Australia; David Dash, Northern Region Roads & Traffic Authority, New South Wales, Australia .......................... 99

The Road and the Environment, a Marriage of Convenience: Thick Porous Pavements — Jean-Pierre Christory, Laboratoire Régional de l'Ouest Parisien; Gilles Plapien, Direction Départementale de l'Équipement du Rhône, Bernard Souleau, Mairie de Paris - Direction de la Voirie, Jean Chauchot, Syndicat des Entrepreneurs de Chaussées en Béton et Equipements annexes, France .................................................. 107

Laboratory Study of Porous Concrete for its Use as Top-Layer of Concrete Pavements — Erik Onstenk, Intron, Institute for Materials and Environmental Research; Antonio Aguado, Technical University of Catalonia; Eberhard Eickschen, Research Institute of the German Cement Association; Alejandro Josa, Technical University of Catalonia .................................................. 125

Early Opening of PCC Pavements to Traffic — Paul A. Okamoto, Chung-Lung Wu, Scott M. Tarr, CTL, Inc.; Lawrence W. Cole, American Concrete Pavement Association, Skokie, Illinois ........................................ 141

WEDNESDAY AFTERNOON: AIRPORT

New Developments in the Construction of Concrete Pavements on the Brussels-National Airport — Lambert Hendrikx, Belgian Cement Association; Jozef Denayer and Patrick De Puysseleyr, Brussels Airport Authority, Belgium ........................................ 155

Design Strategies for Concrete Pavement on Soft Ground - Case Study for Tokyo International Airport — Yoshitaka Hachiya, Port and Harbour Research Institute, Ministry of Transport, Shuichi Soda, Second Port Construction Bureau, Ministry of Transport, and Katsuhisa Sato, Nagasaki Institute of Technology, Japan ................................................ 165

The Loss of Load-Transfer Capacity at Joints of Airfield Concrete Pavements Under Repetitive Load — Deng Xue Jun, Huang Xiao Ming, Zhao Jia Jun, Transportation Engineering Institute, Southeast University, Nanjing, China, and Wang Yide, China Airport Construction Company, Guangzhou Branch .......................................... 183

WEDNESDAY AFTERNOON: FIBERS & MATERIALS

Durability of Pavement Repairs: Point of View About the Role of Fibers — F. Grandhaie, Laboratoire Matériaux et Durabilité des Constructions, Centre de Recherches de Pont à Mousson, J.L. Granju, E. Ringot, Laboratoire Matériaux et Durabilité des Constructions, France .......................................................... 195

Thin Steel Fiber Reinforced Concrete Overlays and Inlays on Old Pavements - A Ten Year Belgian Experience — K. Verhoeven, Belgian Cement Industry Collective Research Center; Y. Vancraeynest, Bekaert N.V., Zwevegem, Belgium .................................. 203

The Concrete Mixture: The Key to Pavement Durability — James M. Shilstone, Sr., Shilstone & Associates, Inc., Dallas, Texas ........................................ 211

Identification of Coarse Aggregates Prone to Surface Deterioration and D-Cracking in Concrete Pavements — Marco Salcedo, William L. Dolch and Charles F. Scholer .................................................. 217
THURSDAY MORNING: OVERLAY

Improved Design of Unbonded Concrete Overlays — Kathleen T. Hall and Michael I. Darter, University of Illinois; Wayne J. Seiler, ERES Consultants, Inc. ...................... 225

Thin Concrete Overlays on Old Asphalt Roads — Örjan Petersson and Johan Silfwerbrand, Swedish Cement and Concrete Research Institute, Stockholm .................... 239

Ultra-Thin Concrete Overlays on Existing Asphalt Pavement — Robert J. Risser, S.P. LaHue, and Gerald F. Volgt, American Concrete Pavement Association; James W. Mack, Portland Cement Association ............................ 245

Thin Concrete Inlays on Old Concrete Roads — Johan Silfwerbrand and Örjan Petersson, Swedish Cement and Concrete Research Institute, Stockholm .................... 253

THURSDAY MORNING: RCC

The Performance of RCC Pavements in Australia — D.M. Brett, Thompson & Brett Pty. Ltd; R. Edwin Petrie and Scott Matthews, Cement and Concrete Association of Australia ............................................................................. 261

Studies on Compactibility and its Test Method of Extremely Dry Concrete Used for Roller Compacted Concrete Pavements — Katsuro Kokubu, Atsushi Ueno, Tokyo Metropolitan University, Takuya Kondoh, Shimizu Corporation, Tokyo .................. 269

An Investigation of the Use of Roller Compacted Concrete in a Heavily-Trafficked, High-Speed Application in Australia — Geoffrey W. Jameson, VIC ROADS, Australia; Kieran G. Sharp, Australian Road Research Board, Ltd., and Raymond S. Rollings, USAE Waterways Experiment Station, Vicksburg, Mississippi .................. 279
