CONTENTS

SPE 36138  Well Completions in the Middle East Using 3½-Inch OD Coiled Tubing: Case Study Evaluation .................................................. 11
Thomas Sherwin, Bruce Conrad, and R.W. Taylor, Halliburton Oman

SPE 36950  Multi-Zone Gravel Pack Techniques: Case Studies From the South China Sea Xijiang Development ........................................... 23

SPE 36963  Production Optimizing With Coiled Tubing and Other Rigless Techniques ................................................................. 35
Vincenius Soetedja and D.L. Hunter, VICO Indonesia

SPE 36964  Gas Pipeline to Japan: A Realistic Gas Export Opportunity? ..................................................................................... 51
L.B. Crockett, Kværner RJ Brown Pty. Ltd., and D.P. Wilson, PT Bakrie Kværner Engineering

SPE 36965  Wandoo Field Horizontal Completions—Phased Development of a Shallow, Highly Permeable Reservoir, With a Thin Oil Column ......................................................... 57
J. Goodacre, G. Wilson, J.S. Ure, and I.S. Clyne, Ampolex Ltd.

SPE 36966  Development and Testing of a Novel Subsea Production System and Control Buoy for the East Spar Field Development, Offshore Western Australia ........................................ 69
M.D. Casey and C.D.F. Lawlor, Kværner RJ Brown Pty. Ltd.

SPE 36967  Improving Reservoir Development With 3-D Seismic Data ...................................................................................... 81
J.A. McDonald and B.J. Evans, Curtin U., and D.A. Ebrom and K.K. Sekharan, U. of Houston

SPE 36968  Coupling Seismic Data With Simulated Annealing Method Improves Reservoir Characterization ......................................................... 87
D. Abdassah, L. Mucharam, and I. Soengkowo, Bandung Inst. of Technology, and H. Trikoranto and R. Sumantri, Pertamina

SPE 36969  Improved Reservoir Geology Model Using Seismic 3D and Well Data: A Case Study Rantau Field, Indonesia ........................................................................................................... 95
M.F. Mairuf and A. Arsyad, Pertamina; G. Crouzet and S. Handoko, CGG Petrosystems; and F. Langitan, Elnusa

SPE 36971  Managing Physico-Chemical Wellbore Instability in Shales With the Chemical Potential Mechanism ......................... 107

SPE 36972  Wellbore Stability Analysis Guidelines for Practical Well Design .................................................................................. 117
X. Chen, CSIRO Petroleum and Monash U.; C.P. Tan, CSIRO Petroleum; and C.M. Haberfield, Monash U.

SPE 36973  New Technology Improves Cement Slurry Design ...................................................................................... 127
J.W. Anderson, A.I. Buchanan, and A. Susanto, PT. BJ Services Indonesia

SPE 36975  Fluid Inclusion Data for Rw in Reserves Estimation ................................................................................. 137
F.W. Krieger, P.J. Eadington, and M. Lisk, CSIRO Petroleum

SPE 36978  Saturation Exponents Derived From Fractal Modeling of Thin-Sections .................................................. 143
D. Abdassah and P. Permadi, Bandung Inst. of Technology; Y. Sumantri, UPN “Veteran”; and R. Sumantri, Pertamina

SPE 36979  Quantitative EPT Interpretation in Australian Reservoirs .................................................................................. 151
R.K. Penney, Santos Ltd.; A.P. Calcraft, Consultant; and A.P. Pietsch, Santos Ltd.

SPE 36980  Comparison of Palaeo Oil Charges With Currently Reservoired Hydrocarbons Using the Geochemistry of Oil-Bearing Fluid Inclusions .................................................................................. 159

SPE 36981  Influence of Effective Stress on the Acoustic Velocity and Log Derived Porosity .................................................. 173
A. Khaksar and C.M. Griffiths, U. of Adelaide
SPE 36982  A Stimulation and Production Experiment in a Vertical Coal Seam
Gas Drainage Well ................................................................. 183

SPE 36983  New Developments in Testing Procedures for Coalbed Methane
Wells in Australia ................................................................. 191
M. Badri, Halliburton Australia Pty. Ltd., and R. Clare, Consultant

SPE 36984  Anisotropic Seam Response to Two-Phase Fluid Injections Into a Coalbed Methane Reservoir—Measurement and Simulation ......................................................... 207

SPE 36985  Strategies in Developing Coalbed Methane Prospects in Australia: An Example From the Galilee Basin of Central Queensland ......................................................... 217

SPE 36986  Relative Permeability in Coal ........................................ 231
Kevin Meaney and Lincoln Paterson, CSIRO Petroleum

SPE 36987  Application of an Integrated Single Well Model to Drawdown and Buildup Analysis of Production From Commingled Zones ......................................................... 237
R.A. Almehaideb, UAE U.

SPE 36988  Statistical Analysis of Well Productivity in Heterogeneous Reservoirs ......................................................... 251
K.S. Lee, Kumho R&D Center, and M.A. Miller and K. Sepehrnoori, U. of Texas at Austin

SPE 36989  Further Advancements in Extended Reach Drilling in Bass Strait ......................................................... 259
A.N. Krepp, M.G. Mims, and V. Santostefano, Esso Australia Ltd.

SPE 36990  Ream While Drilling Technology Applied Successfully Offshore Australia ......................................................... 271
G. Csonka, Western Mining Corp.; M.W. Tweedy, Chevron; S. Cornel and M. Anderson, Hughes Christensen

SPE 36991  Meeting the Challenges of Deepwater Subsea Completion Design ......................................................... 279
Don Aldridge, Baker Oil Tools, and Paul Dodd, Independent Consultant

SPE 36992  Optimization of Marginal and Partially Depleted Oil Fields ......................................................... 285
J.R. Nelson

SPE 36993  Three Methods of Achieving a True Hydraulic Seal/Control Across a Junction in a Multi-Lateral Well ......................................................... 291
Bob Ross, Baker Oil Tools (U.K.)

SPE 36994  Development, Testing, and Field Case Histories of Multilateral Well Completion Systems ......................................................... 299
J.R. Longbottom, Dana Dale, Kevin Waddell, and Scott Bruha, Halliburton Energy Services, and John Roberts, Weatherford Enterra

SPE 36995  Electronically Enhanced Remote Actuation Systems Improve Deepwater Completions Capabilities, Economics ......................................................... 315
Mark Hopmann, Baker Oil Tools, and Paul Dodd, Independent Consultant

SPE 36997  Maximising Well Potential: An Integrated Approach ......................................................... 321
N.S. Walters, Woodside Offshore Petroleum Pty. Ltd.

SPE 36998  Organizing Around Work Processes to Add Value for Large Single Field Assets ......................................................... 335
G.R. Pastor and Humayunbosha, PT Caltex Pacific Indonesia

SPE 36999  Improve Compressor Performance and Gas Conservation for Bardegg Fields in the Baram Delta Operations ......................................................... 353

SPE 37000  Successful Integrated Engineering Service Contract in South China Sea ......................................................... 357

SPE 37001  Tubing Size Optimization in Gas Depletion Drive Reservoirs ......................................................... 367
Ronald Gunawan and G.R. Dyer, Vico Indonesia
