</tbody>
</table>
A Nonlinear Adaptive Least Mean Squares (NLMS) Algorithm For Target Detection in Infrared (IR) Imagery
Mohammad Y. Abu-Tahnat, Colorado State University, USA

Simple Nullformer for Adaptive Interference Tracking and Cancellation in Broadband Applications Using Linear Antenna Array
Francois P.S. Chin and Chin-Der Wann, National University of Singapore, REPUBLIC OF SINGAPORE

Adaptive Linearization Scheme for Wiener Systems
Hyun Woo Kang and Dae Hee Youn, Yonsei University, KOREA; Yong Soo Cho, Chung-Ang University, KOREA

Adaptive DSP Implementation
Analog Adaptive Filter Implementations
Yu-Jung Huang, Jy-Ming Kuo, and Yu-Shin Tseng, Kaoshing Polytechnic Institute, P.R. CHINA; Yao-Chin Tseng, Industrial Technology Research Institute, TAIWAN R.O.C.

Adaptive Filter Techniques Applied to Automatic Test Equipment Measurement Path Characterization and Path Loss Compensation
Lloyd E. Johnson and Doug W. Lingenbrink, The Boeing Company, USA

Realization of a Real-Time Adaptive Acoustic Echo Canceller on ADSP-2101
Sung-Hoon Kim, Ki-Doo Kim, and Young-Wook Kim, Kook-Min University, KOREA; Youn-Hee Lee, Hyundai Motor Company, KOREA

Acoustic Echo Cancellation Using a Multidelay Block Hartley Domain Adaptive Filter
Kenneth Chow, Coherent Communication Systems Corp., USA; A.B. Sesay, Telecommunications Research Laboratories, CANADA

Design of Echo Canceller for CDMA Digital Cellular Systems
Hochong Park, Samsung Electronics Co., KOREA

Hen-Geul Yeh, California State University, Long Beach, USA; Chuan Hsueh, Multi DSP Inc., USA

Advanced TV Technology
Analysis of an OFDM Access Scheme for the Return Channel on Interactive Services
Ana Garcia, Miguel Calvino, and Leandro de Haro Ciudad Universitaria Madrid, SPAIN

An Advanced TV Service Software
Scott Medawar, and Tim Tully, Thomson Consumer Electronics, USA; Mohamed El-Sharkawy, Mehmet Aras, Miklos Kara, and Waleed Eshmawy, Purdue School of Engineering and Technology, USA

A Rate Controller Based on Multiple DSP Chips for an HDTV Encoder Systems with Parallel Processing Architecture
Sanggyu Park and Hyunsik Chang, Electronics and Telecommunications Research Institute, KOREA

A VLSI on PALplus VCR for Wide Screen Signalling En/Decoding and System Control
Kwangseog Bae, Hyeonjung Park, Jumhan Bae, Yeunchae Jeung, and Yongserk Kim, Samsung Electronics Co. Ltd., KOREA

Compression of Stereoscopic Video by Using MPEG-2 Main Profile
Do-Nyeon Kim and Myoung Ho Lee, Electronics and Telecommunications Research Institute, KOREA
Design of a Jitter-Free Transport Stream Multiplexer for DTV/HDTV Simulcast ................................................ 122
Jae-Gon Kim and Jinwoong Kim, Electronics and Telecommunications Research Institute, KOREA

Embedded Algorithms for MPEG2 Satellite Receiver .......................................................... 127
Branko Kovacevic, Tee-Comm Electronics, CANADA

Algorithm Implementation
Implementation of 2-D IDCT with a 16-Bit Fixed-Point Vector Processor ........................................ 132
Jaemin Kim, Samsung Semiconductor Inc., KOREA; Hye-Jeong Kim, DSP Micro Devices SEC, KOREA

Partial FFT Application .................................................. 137
Julio Cezar David de Melo, Escola de Engenharia da UFMG, BRAZIL

Implementation of the Greville Algorithm on a Motorola DSP96002 Application to Least-Squares Problems ......................... 142
O. Caspary and P. Nus, Université H. Poincaré, Nancy 1, FRANCE

A DSP Algorithm for On-Line Determination of Internal Signal Parameters ........................................ 146
Erich Griesmayer, Fachhochschule Wiener Neustadt, AUSTRIA

DSP-Based Sliding Hartley Transform for Real-Time Spectral Analysis with Zoom Effect ......................... 151
Patrice Nus, Olivier Caspary, and Francois Devillard, Université H. Poincaré, Nancy 1, FRANCE

Algorithms and Filters
Extending Decentralized Kalman Filtering (KF) to 2-D for Real-Time Multisensor Image Fusion and/or Restoration: Optimality of Some Decentralized KF Architectures ......................................................... 155
Thomas H. Kerr, TeK Associates, USA

Final-Matrix Based and Fast Implementation for Recurrent DSP Scheduling ........................................ 171
Daniel Y. Chao, National Cheng Chi University, TAIWAN R.O.C.

MUSIC and Pencil-Based Sinusoidal Estimation Methods Using Fourth Order Cumulants ......................... 176
Mohammed A. Hasan and Ali A. Hasan, Colorado State University, USA;

A Practical Piecewise Polynomials Approximation Based on Biorthonormal Expansion ............................... 181
Kazuki Katagishi, KDD Co. Ltd., JAPAN; Mamoru Iwaki, Japan Advanced Institute of Science and Technology, JAPAN; Kazuo Toraichi and Masao Yanyu, University of Tsukuba, JAPAN

Optimum Detection of Synchronization Codes ........................................................................ 186
Peter Eck, Xie Changsong, and Rolf Matzner, Federal Armed Forces University, Munich, GERMANY

A Numerical Method of Accurate Symbol Timing Estimation for the Measurement of Waveform Quality .............................................................................................................. 191
Shinsuke Tajiri, ADVANTEST America R & D Center Inc., USA

Signal Recovery Technique Using Third Order Cumulants .................................................................. 195
Adnan Al-Smadi, Tennessee State University, USA; D. Mitchell Wilkes, Vanderbilt University, USA

Adaptive Identification of the Parameters of Nonlinear Systems Using Higher Order Statistics .............. 200
Dr. Ganapati Panda, Sanjay Maharatha, and Rashi Rekha Mishra, Regional Engineering College, Rourkela, INDIA

Notch Filter Implementation Using TMS320 Code for ECG .................................................................. 205
B. Psenicka, F. Garcia-Ugalde, J. Savage, and V. Garcia-Garduno, UNAM, MEXICO

Hierarchical VHDL Libraries for DSP ASIC Design .................................................. 289

Module Generators for Hard-Wired Digital Filters in ASICs .......................................... 294
Stefan Sattler and Erwin Ofner, Austria Mikro Systemte International AG, AUSTRIA

The ABC Chip: Single Chip DECT Baseband Controller Based on EPICS DSP Core .................. 299

HIO824/HIO816—The New Flexible Host Interface for DSP from Motorola
DSP563xx and DSP566xx .................................................................................. 303
Yuval Itkin, Shai Kowal, and Zvi Rozenshein, Motorola Semiconductor Israel Ltd., ISRAEL

DSP 56305- Motorola New Optimized Single-Chip DSP for GSM Basestation Applications ........... 307
Eytan Engel, Moshe Tarrab, Yossi Amon, Leonid Belotserkovsky, Eli Borowitz, Dan Kuzman, David Moshe, Eran Pisek, and Motorola Semiconductor Israel Ltd., ISRAEL

Texas Instruments Chipset Optimizes Performance for FLEX™ Protocol Pagers ...................... 312
Eric Soenen, Mahmoud Yazdani, and Thomas R. Lahutsky, Texas Instruments, USA

Audio and Speech Processing
A Transcription System based on Synchronous Addition and Subtraction Processing .................. 316
Yoshiaki Tadokoro and Miori Ozawa, Toyohashi University of Technology, JAPAN; Miho Wadamori, Matsue National College, JAPAN; Tsutomu Saito, Toyota National College of Technology, JAPAN

Study of Loudspeaker Electromechanical Nonlinearities and Their Compensation ....................... 321
Vitor Teixeira, Jorge Ribeiro, Francisco Restivo, and Diamantino Silva Freitas, Universidade do Porto, BRAZIL

Minimal Word-Width Implementation of Dolby AC-3 and ISO-MPEG Audio Decompression Standards ................................................................. 326
Clifford Parris, Danny Wong, and Steven Roberts, Ensimga Ltd., U.K.

A DSP Based Equalizer and Sound Level Control System: The Ecudap ................................. 331
Pedro Reviriego Vasauro, J.M. Santos Suarez, and Ramon Garcia Gomez, E.T.S.I. Telecomunicacion, SPAIN; Jose Elias Arias, Proceso Digital de Audio Inc., SPAIN

Determination of the Instant of Glottal Closure from Speech Wave Using Wavelet Transform ........ 336
Limin Du and Ziqiang Hou, Chinese Academy of Sciences, P.R. CHINA

Real-Time Implementation of a Multi-Channel Audio Codec Using a Flexible Multi-DSP System .... 341
Jin-Woo Hong and Dae-Young Jang, Electronics and Telecommunications Research Institute, KOREA

Multi-Resolution Array Processing for Speech Source Tracking in Voice Communication Systems ......................................................... 346
Djamila Mahmoudi, Swiss Federal Institute of Technology, SWITZERLAND

Finite Wordlength Effects Evaluation of the MPEG-2 Audio Decoder .................................. 351
Min-seop Jeong, Seehyun Kim, Ji-Yang Kang, Won Yong Sung, and Jong Seo Sohn, Samsung Electronics, KOREA

An Implementation of New Audiotex for Information Retrieval Services ............................. 356
Siong Hun Yi and You Hyeon Jeong, Electronics and Telecommunications Research Institute, KOREA
Separation of the Noisy Component in the Musical Sounds in the Time-Frequency Domain ............................................. 360
Sandro Mariuz, Università di Padua, ITALY

Speech Enhancement Using Wiener Filtering ........................................................................................................ 365
S. Chinmay and M. Taheznezhadi, Northern Illinois University, USA

Development of Speech Training and Hearing Aid System for the Deaf Using DSP ....................................................... 370
Takefumi Kitayama, Hiroyuki Kamata, and Yoshihisa Ishida, Meiji University, JAPAN

Biomedical

Spectral Analysis Methods Applied to Sleep Spindles ................................................................................................. 374
O. Caspary, P. Nus, and F. Devillard, Université Henri Poincaré, Nancy 1, FRANCE

Design of a Programmable Digital Hearing Aid ....................................................................................................... 379
Keith Mullins, USA; Francis C. Wang, Henry Cogswell College, USA

A Computer System for Assessment of Heart Rate Dynamics ................................................................................. 384
Sokol Saliu, Gulmira Kudaiberdieva, and Ahmet Birand, Cukurova University, TURKEY

Communications and Telephony

CommonTalk™: An Innovative Modem Add-On Device for Digital Simultaneous Voice over Data Communications ........................................................................................................ 389
Cheung-Fat Chan and C.K. Chan, City University of Hong Kong, HONG KONG; K.H. Ho and C.K. Ma, Signal Communication Ltd., HONG KONG

A Frequency Domain Adaptive Echo Canceller with Post-Processing Residual Echo Suppression by Decorrelation ......................................................................................................................... 394
Tomas Gänslaer, Peter Eneroth, and Göran Salomonsson, Lund University, SWEDEN

Implementation of CDMA on a Multi-TMS320C40 System ....................................................................................... 399
Deuk-Su Lyu, Jong-Min Kim, Nam-Jin Park, and Myoung-Jin Kim, Electronics and Telecommunications Research Institute, KOREA

A Nonlinear Processing Technique for Removing Residual Echo in Communication Networks ...................... 404
Cliff Sui and Patrick Velardo Jr., AT&T Laboratories, USA

SAW Devices for Broadband Signal Processing in Mobile Communication Systems .................................................. 409
Clemens Ruppel and Leonhard Reindl, Siemens Corporate Research and Development, GERMANY

Performance Improvement of Blind Channel Identification Based on Second-Order Statistics ...................... 414
YoungKi Yoon and HwangSoo Lee, Korea Advanced Institute of Science and Technology, KOREA

16-Channel Dual Tone Multifrequency Signaling Receivers and Senders Using Single 10 MIPS Analog Devices ADSP2105 DSP and Improvement on Speech Immunity Performance ...... 419
Fatih M. Erdin, NETAS, TURKEY

Two-Channel Line Echo Control (Cancellation and Suppression) and Other DSP Functions in a Single ADSP2115 DSP for a DECT Application .......................................................... 424
Fatih M. Erdin, NETAS, TURKEY

Generating VSB with FIR Filters ............................................................................................................................. 429
Fu-Nian Ku, Mitsubishi Electric Information, USA

Echo Canceller Combined With a Speech Coder in the CDMA Mobile System ............................................................ 434
Won-Myong Lee, Byungsik Yoon, and Songin Choi, Electronics and Telecommunications Research Institute, KOREA
Analog Echo Canceller for Long-Distance Telephone System .......................................................... 438
Laura Ortiz-Balbuena Alejandro, Martínez-González, Héctor Pérez-Meana, Mariko Nakano-Miyatake, and Juan Carlos Sánchez-García, Universidad Autonoma Metropolitana, MEXICO

Comparison of Performance of Analog and Digital Simultaneous Voice and Data Over Impaired Channels .......................................................... 442
Sasan Ardalan and Ali Sadri, IBM Microelectronics, USA

A Low Complexity Standalone Voice Activity Detector and Comfort Noise Generator for Fixed Point Processors .......................................................... 447
Simon Brewer and Scott Andrew, Signal Processing Associates Pty. Ltd., AUSTRALIA

A Dual Tone Multi-Frequency (DTMF) Decoder Using Motorola’s DSP56002 .......................................................... 451
Guoliang Zeng and Xiao Meng, Arizona State University, USA

Implementation of the ITU-T G.723.1 Speech Coding Algorithm on the Hitachi SH-DSP .......................................................... 456
Steve Ammon and Jianxin Liu, Analogical Systems, USA

A Low Complexity Standalone Voice Activity Detector and Comfort Noise Generator for Fixed Point Processors .......................................................... 447
Simon Brewer and Scott Andrew, Signal Processing Associates Pty. Ltd., AUSTRALIA

LSP-Based Acoustic Echo Cancellation and Noise Reduction .......................................................... 461
M. Tavernezhadi and Z. Zhongwei, Northern Illinois University, USA

Implementation of Convolutional Encoder and Viterbi Decoder for Wideband CDMA PCS Baseband Processing Unit Using Multiple TMS320C40s .......................................................... 466
Jong Min Kim, and NamJin Park, Electronics and Telecommunications Research Institute, KOREA

Consumer Applications

PineDSPCore™ Implementation of a Digital Telephone Answering Device Combining A Full-Duplex SpeakerPhone with Voice Recognition .......................................................... 471
Alberto D. Berstein and Irving Gold, DSP Group Inc., USA

Encoding a Hidden Digital Signature onto an Audio Signal Using Psychoacoustic Masking .......................................................... 476
John F. Tilki and A. A. Beex, Virginia Tech, USA

Data Acquisition

Low Power 16 Bit Resolution Audio Sigma-Delta A/D Converter .......................................................... 481
Marco Angelici, Marco Bianchessi, Sandro Dalle-Feste, and Nadia Serina, SGS Thomson Microelectronics; ITALY; David Chesneau and Martial Commininges, Thomson Consumer Electyronic Components, FRANCE

A Wide Band, High Precision Opto-electronic Analog-to-Digital Converter .......................................................... 486
Warren Marwood, A. Peter Willis, Petar Atanackovic, Ken Grant, and Ian Fuss, Defence Science and Technology Organisation, AUSTRALIA

The NYNEX T1-Speech Data Collection System .......................................................... 491
Shanmugalingam Easwaran and George Vysotsky, NYNEX Science and Technology, USA

16-Bit Integrating Analog to Digital Converter for Sample Rates Up to 100 kHz .......................................................... 496
Christoph Gebauer and Olaf Heyme, University of the Federal Armed Forces of Germany, GERMANY

Breaking the Nyquist Barrier: A New Signal Processing Technique .......................................................... 500
Gerard Fonte, The Pak Engineers, USA

3D Positioning Acquisition System with Application in Real-Time Processing .......................................................... 505
V. Auer, M. M. Maes, M.J.C. Bonfim, M.M. Wanderley, and M.V. Lamar, Centro de Instrumentação Electônica, BRAZIL

David Walsh, Advanced RISC Machines Ltd. (ARM), U.K.

LISA—Machine Description Language and Generic Machine Model
Vojin Zivojnovic, Stefan Pees, Christian Schlager, and Heinrich Meyr, Aachen University of Technology, GERMANY

Enhanced Adaptive Video Processing - A SHARC DSP Application
Tony D’Agostino, Northrup Grumman Norden Systems Inc., USA

A Multiprocessor Signal Processor Based on ADSP 2101
C.A. Jalaudeen, Mohan P. Mathew, and R. C. Agarwal, Defence Research & Development Organisation, INDIA

DSP Software for Parallel Processing

PAS—A Parallel Application System for Signal Processing Applications
Myra Jean Prelle, Jon Greene, and Carol Nowacki, Mercury Computer Systems Inc., USA

Using NSP in PC-Based NSP-Based Real-Time Control and Instrumentation Systems
David W. Dart, Spectron Microsystems, USA

The Single System Model Software Environment for a Heterogeneous Multicomputer
Rick Drohan, Arlan Pool, and Jim Kulp, Mercury Computer Systems Inc., USA

John Edwards, Loughborough Sound Images plc., U.K.

Support for DSP Applications in Ada 95 ......................................................................................... 811
Joyce L. Tokar, Texas Instruments, USA

Strategies for Program Code and Data Overlays in DSP Systems .............................................. 816
Noam Levine, Analog Devices Inc., USA

Using Embedded Flash Memory in DSP Applications ................................................................. 821
Sy Tran and Lawrence Wong, Texas Instruments Inc., USA

The Technique of High-Level Optimization of DSP Algorithms Implementation .................. 826
Alexander L. Andreyev, Dmitry I. Balyakhov, and Vladimir P. Russakov, SoftJoys Corp., RUSSIA

Modem, Fax and Telephony Software ......................................................................................... 831
Frank Gao and Alan Marion, GAO Research and Consulting Ltd., USA

DSP Software Tools
A CAD Tool for Network Simulation Based on a Protocol Design CAD Tool ...................... 836
Daniel Yuh Chao, National Cheng Chi University, TAIWAN R.O.C.

V. Benedetto, G. D’Aria, and L. Scarabosio, CSELT, ITALY

Fact™: A C++ Environment for Accurately Modeling Fixed-Point Digital Signal Processors ...... 846
Anastasios Maurudis, DSP Software Engineering Inc., USA

IDEA—Interactive Deinterleaver for ELINT Analysis ................................................................. 852
Michael Balin, Cooperative Reasearch Centre for Robust and Adaptive Systems, AUSTRALIA

An Architecture for Debugging Graphically Programmed Applications ............................... 857
Mike Wilder, Lucent Technologies, USA

A Common Application Development Platform for DoD Signal Processing .......................... 862
Richard Blanchard and Lezlie Fort, Lucent Technologies, USA

On The Integration of DSP Hardware into a Microkernel-Based Operating System ............. 867
Robert Baumgartl and Hermann Härting, GERMANY

CapCASE: A Graphical Development Tool Supporting Scalable, Heterogeneous Multicomputers ... 873
Alain Clouard, Patrick Tessier, and Olivier Debon, Matra Cap Systemes Inc., FRANCE; Arlan Pool and Jim Kulp, Mercury Computer Systems, USA

A Methodology for Implementation of Modular Digital Signal Processors ............................. 880

A Graphical User Interactive Interface for Digital Filter Design and DSP Implementation ........ 885
Mário Sarcinelli Filho, Hansjörg Andreas Schneebeli, and Arnaldo Cordeiro Machado, Federal University of Espirito Santo, BRAZIL

Abstract Simulator: A DSP Software Timing Analysis Tool ....................................................... 890
Dae-Hyun Lee and Seung Ho Hwang, Korea Advanced Institute of Science and Technology, KOREA
FPGAs in DSP

Large FFT’s in a Single FPGA ............................................. 895
Les Mintzer, Momentum Data Systems, USA

Real-Time MPEG 1 Audio Encoder and Decoder Implemented on a 16-Bit Fixed Point DSP .......... 900
Seonjoo Kim, Yi Li, Heesu Kim, Hanmook Choi, and Youngbum Jang, SOUTH KOREA

Constant Coefficient Multipliers ....................................... 905
Ken Chapman, Xilinx Inc., USA

Adaptive Filters in FPGAs ................................................ 909
Bill Allaire and Bud Fischer, Xilinx Inc., USA

VLSI Architectures for Field Programmable Gate Arrays: A Case Study .............................................. 914
R. Woods and A. Cassidy, Institute of Advanced Microelectronics, IRELAND; J. Gray, Xilinx Development Co-Operation, SCOTLAND

Automated FFT Processor Design ..................................... 919
Martin Langhammer, Kaytronics Inc., CANADA; Caleb Crome, Altera Corporation, USA

High Speed and Very Compact Two’s Complement Serial/Parallel Multipliers Using Xilinx’s FPGA ................................................................. 924
Abdelkrim K. Oudjida, CDTA/Microelectronics Laboratory, ALGERIA

Reconfigurable Hardware Accelerator for Embedded DSP ................................................................. 929
Keith Reeves, Pentek Inc., USA; Ken Sienski and Calvin Field, Red River Engineering, USA

Advanced DSP on FPGAs and CPLDs ................................... 934
D. J. Ridge, S.A. Farson, R.W. Craig, and R. Hamill, Integrated Silicon Systems, NORTHERN IRELAND; JV McCanny, The Queen’s University of Belfast, NORTHERN IRELAND

Design and FPGA—Implementation of a Neural Network ................................................................. 939
Henriette Ossoinig and Christian Steger, Graz University of Technology, AUSTRIA; Erwin Reisinger, Reinhold Weiss, and Peter Schultz, Institute for Electronics System Design, Joanneum Research, AUSTRIA

High-Speed Filtering Functions in Programmable Logic ................................................................. 944
David Greenfield and Caleb Crome, Altera Corporation, USA

Embedding DSPs into FPGA-based Structures of Interconnection ..................................................... 949
Peter Schulz, University of the Federal Armed Forces at Hamburg, GERMANY

Geophysical

P and S Waves Detection Using Time-Frequency Representations ..................................................... 953
Trina Adrián de Pérez, Francisco D’Alvano, Orlando Sucre, Merly Abondano, and Aquiles Viloria, Universidad Simón Bolivar, VENEZUELA

Application of Adaptive Noise-Cancelling Methods Applied to Ground-Penetrating Radar Data .......... 958
Gary Placzek and John Lane Jr., U.S. Geological Survey; Gerry Coutu, The Hartford Graduate Center, USA

Image Analysis and Coding

H.261 & H.263 Decoders on DSP56301 .................................... 963
Uma Seetharaman, Motorola India Electronics Ltd., INDIA

Multiresolution Fractal Coding of Still Images ................................................................. 968
Frederique C. Cesbron and Francois J. Malassenet, Georgia Tech Lorraine, FRANCE
Design and Implementation of a Software-only H.261 Video Codec ................................................. 973
Pao-Chi Chang and Chia-Yuan Yan, National Central University, TAIWAN R.O.

A Modification of the H-261 Norm to Achieve Moving Image Coding and Transmission on Very Low Cost Equipment ........................................................................................................................................ 978
Xulio Fernández Hermida, Francisco Castineiras Martínez, Fernando Martín Rodríguez, and Vicente Goyanes de Miguel, E.T.S.I.T. Universidad de Vigo, SPAIN

Image Compression Using JPEG with Vector Quantization ................................................................. 982
Zhizhong Hu, Hitachi Micro Systems Inc., USA; Guoliang Zeng, Arizona State University, USA; Xudong Song
David Sarnoff Research Center, USA

Image Analysis with Moment Descriptor .......................................................................................... 987
Simon X. Liao, The University of Winnipeg, CANADA; Miroslaw Pawlak, The University of Manitoba, CANADA

Entropy-Based Visual Pattern Image Coding .................................................................................... 992
Kai-Kuang Ma, Yee-Koon Low, and Wung-Hwee Lok, Nanyang Technological University, REPUBLIC OF SINGAPORE

Computationally Efficient Fuzzy Class Learning Vector Quantizer in Image Compression ................. 997
Hamed Parsiani, Eastman Kodak Company, USA; Oscar Misla, University of Puerto Rico, PUERTO RICO

A Lossy Data Compressor Based on the LZW Algorithm .................................................................. 1002
V.G. Ruiz and I. Garcia, Universidad de Almeria, SPAIN

Fourier Descriptors for Characterizing Object Contour ..................................................................... 1007
Ben Pinkowski, Western Michigan University, USA

An Edge and Texture Preserving Vector Quantization Scheme ......................................................... 1012
Hung-Kai Cliff Choi, Chi-Fai Cheung, and Chok-Ki Chan, City University of Hong Kong, HONG KONG

Contribution To Contours Restoration By A Markovian Approach .................................................. 1017
K. Achour, M. Benkhelif, and M. Seddini, Advanced Technology Development Center, ALGERIA

Implementing the 2-D Discrete Cosine Transform Using Commercial Quad-Processor DSP Boards .......................................................................................................................... 1022
Clay Gloster, Peter Meyer, and Winser Alexander, North Carolina State University, USA

Efficient Video Coding Using Three-Dimensional Discrete Cosine Transform .................................. 1027
Takehiko Tsuchiya, Kiyoshi Kirisawa, and Hidehaaru Wakui Seikei University, JAPAN

Efficient Filtering of Image Data Corrupted by Impulse Noise ......................................................... 1032
Ganapati Panda and Sanjay Kumaar Maharatha, Regional Engineering College Rourkela, INDIA

Adaptive Pattern Based Image Data Compression .............................................................................. 1036
Jeong-Jin Lee, Electronics and Telecommunications Research Institute, KOREA

Study on Multiprocessor Implementation of MPEG2 Encoding ......................................................... 1041
Ning Zhang and Chwan-Hwa Wu, Auburn University, USA

A Method for Region Segmentation with a Genetic Algorithm ......................................................... 1046
Miki Haseyama, Toshihiro Miyamoto, and Hideo Kitajima, Hokkaido University, JAPAN

Color Certification of Digital Images .............................................................................................. 1050
A. Abrardo, V. Cappellini, and A. Mecocci, Università di Firenze ITALY
Texture Segmentation Using Walsh Spectrum and Modified ART2

Donyun Kim and Dongsub Cho, Ewha Woman's University, KOREA
