Sixteenth International Symposium on Capillary Chromatography

volume I

Palazzo dei Congressi, Riva del Garda, Italy.

Organization I.O.P.M.S. vzw

Edited by

P. Sandra
University of Gent, Belgium,
Eindhoven University of Technology, The Netherlands,

and

G. Devos
I.O.P.M.S. vzw, Kortrijk, Belgium.
CONTENTS

M.J.E. Golay Award Presentation.

Microcolumn Separations.

On-Line Normal Phase LC-GC. Methods Used for Routine Applications.  
K. Grob.  

Chemical Analysis in Single Human Erythrocytes Using Capillary Electrophoresis.  
Q. Li and E.S. Yeung

General - Theory

The Calculation of Linear Programmed Temperature GC Retention Indices of Components in Complex Mixtures.  
D.N. Grigoryeva, R.V. Golovnya and L.A. Syomina.

A Computational Study of The Chromatographic Separation of Racemic Mixtures.  
A.M. Edge, K.D. Bartle, A.A. Clifford and P. Myers.

An Improved Method for Computing Temperature Programmed Retention Indices from Isothermal Data.  
L.J. Eveleigh and P.J. Arpino.

I.G. Zenkevich and A.V. Vasilyev.

Precalculation of GC Retention Indices from Physico-Chemical Constants within Various Taxonomic Groups of Organic Compounds.  
I.G. Zenkevich.

A.A. Chupalov, I.G. Zenkevich and A.P. Molchanov.

Intermolecular Interactions Between Molecules of Aromatic Compounds and Solvents at Interface Eluent-Stationary Phase.  
N.A. Ellekova.

V.G. Berezkin and A.A. Korolev.

Practical Advantages and Applications for a Fast GC Accessory.  
D. Coe and H. Kern.
J. Glastrup.

A New Approach to the Monitoring of the Calorific Value, Density, Relative Density and the Wobbe Index Based on Future Gas Chromatographic Technology.
H. Cornet and V. van Hese.

Gas Chromatography of Amides of Polyfluorocarboxylic Acids.

Identification of Halobenzenes and Substituted Phenols by Correlation Between Boiling Points and Gas Chromatographic Retention Values on Capillary Columns.
T.C. Gerbino and G. Castello.

Determination of Thermodynamic Functions by Capillary Gas Chromatography.
G. Castello, S. Vezzani and P. Moretti.

Comparison of the Use of Methane and of Some Common Solvents for the Determination of Dead Times in Capillary Gas Chromatography.

Dependence of Linear Retention Indices in Capillary Gas Chromatography on Carrier Gas Flow Rate and Column Temperature Program Rate.
E. Sippola, F. Davd and P. Sandra.

Application of AFC (Advanced Flow Control) in Capillary GC.
G. Braun, Y. Nishikawa and M. Shioji.

A Novel Method for Peak Number Estimation in a GC Peak Cluster.
J. Hrouzek, S. Hatrik, J. Krupcik and M. Ceppan.

Capillary GC Analysis of Copper (II) and Chromium (III) as Trifluoracetylethacetates.

Maximizing Chromatographic Performance and Usability Through Electronic Control of Gases.
M.S. Klee, V. Giarrocco, H. Fatumhi, R. Firor and F. David.

Simplifying Gas Chromatographic Separation and Detection.
R. Leibrand, K. Felt and R. Schill.

Quantitative GC Analysis of Complex Mixtures Without Calibration.

The Flow of the Carrier Gas in Open-Tubular Capillary Columns in Temperature Programmed Gas Chromatography.
T. Hevesi and J. Krupcik.
Automatic Carrier Gas Control with Self Calibrating Capabilities.

The Gas Chromatographic Investigation of Alkyl Substituted Pyrrolizidines.
D.N. Grigoryeva, R.V. Golovnya, A.L. Samusenko and I.M. Skvorsov. 163

Retention on Mixed Cyclodextrin / Polysiloxane Phases.
Evidence for the Interaction of Cyclodextrin and Polysiloxane.
W. Buda, K. Jaques, A. Venema and P. Sandra. 164

Column Technology - Stationary Phases

The Theory and Application of Packing for the Preparation of Packed Capillary Columns for Chromatography.
D. Tong, K.D. Bartle and A.A. Clifford. 172

Fullerenes in Liquid Chromatography.
N.A. Eltekova and Yu. A. Eltekov. 185

Immobilization by Chemical Reaction of the Stationary Phase in Open Tubular Capillary GC.
V.P. Mukhina, V.G. Berezkin, Ya.A. Levin and R.M. Mukhamadeeva. 186

V.G. Berezkin and A.A. Korolev. 193

Host-Guest Interaction in GC Separation of Enantiomers with Derivatized Cyclodextrins in Gas Chromatography. Interpretation on the Basis of Molecular Modelling Calculations.
F. Kobor and G. Schomburg. 201

Cyclodextrin Derivatives in GC Separation of Racemic Mixtures of Volatiles.
Part VIII: 2,6-di-O-methyl-3-O-pentyl-g-cyclodextrin and 2-oxo-pentyl as substituent in position 3 for 2,6-di-O-methyl and 2,6-di-O-pentyl-8 and -y-Cyclodextrins.
C. Bicchi, A. D'Amato, V. Manzin, A. Galli and M. Galli. 202

Grafted Polymers. The New Type of Stationary Phases for Gas Chromatography.
I. Yudina, K. Sakodynskii and L. Kruzhalova. 213

Low Bleed and Highly Inert Fused Silica Capillary Columns Coated with a Polymethylsiloxane for GC-MS Application.
J. de Zeeuw, D. Zwiep and J. Buyten. 218

Metal Capillary PLOT Columns Coated with Al2O3, Molsieve and Porous Polymer Adsorbents.
J. de Zeeuw, J.C. Buyten, J. Peene and M. Mohrke. 219

Recent Developments in High Temperature Semi-Polar Phases for Capillary Gas Chromatography.
D.M. Crowshaw, M. Cumbers, P. Scourides and P. Dawes. 231
New Cyclodextrin-Containing Polysiloxane Stationary Phases for Enantiomer Separations in Capillary Chromatography.

On the Use of Interconversion Energy Barrier for Prediction of GC Separation of Atropisomers of Polychlorinated Biphenyls (PCBs) on Modified Cyclodextrin Stationary Phases.

J. Krupcik, P. Malý, M. Májeková, J. Hrouzek, E. Benická, P. Sandra and J. de Zeeuw.

The Investigation of Ring Packed Glass Capillary Columns (RPGCC) with an Electric Resistance Wire.

H. Yang, Z. Zhang and W. Lu.

Tert-Butyldimethylsilylated Cyclodextrins as Chiral Stationary Phases in GC.

B. Maas, A. Dietrich and A. Mosandl.

Diluted Modified Cyclodextrins as Chiral Stationary Phases in GC.

The Influence of the Polysiloxane Solvent.

A. Dietrich, B. Maas and A. Mosandl.

BPX 35: A New Medium Polarity High Temperature Stationary Phase for Gas Chromatography.

P. Scourides, M. Cumbers and P. Dawes.

Comparison of Selectivities for a Series of Cyanobiphenyl Stationary Phases.

Improved Selectivity of Alumina PLOT Columns for Hydrocarbon Analysis.

Z. Ji and I. Chang.

Comparison of PEG & PAG Capillary Columns for FAME Analysis.

L.M. Sidisky.

Comparisons of SCOT, WCOT & CLOT Capillary Columns.

L.M. Sidisky.

High Efficiency Chemically Modified Silica Porous Layer Open Tubular Capillary Columns.

R.M.A. Lautama and T.L. Patterson.

Evaluation of Graphite Layer Open Tubular (GLOT) Columns by Means of a Polarity Parameter such as ΔC.

Methoxynaphylpolysiloxanes.

Polarizable Stationary Phases for Capillary Chromatography.

M. Monzione, S.G. Claude and R. Tabacchi.

New Polymers and Columns for the Analysis of Volatile Organics.

Enantioselective Separations by Capillary GC on Derivatized Cyclodextrins. Part 4: Enantioselective Interaction Model of 2,2-Dialkyl-4-Alkoxyacylonyl-
1,3-Dioxalane Derivatives on Permethyl-, 2,3-Di-O-Methyl-6-O-TBDMS- and 2,3-Di-O-Acetyl-6-O-TBDMS Cyclodextrins.
K. Jaques, W.M. Buda, A. Venema and P. Sandra.

Preparation of Small Diameter Thick Film Capillary Columns for Microcolumn Separations.
D. Steenackers and P. Sandra.

Gas Chromatographic Performance Characteristics of Carboxen - 1006 PLOT Columns and Carboxen - 1004 Micropacked Columns.

Capillary GC

Theoretical Aspects Associated with High-Temperature Operation of Thermal Gradient Programmed Gas Chromatography (TGPGC).
W.A. Rubey.

Rational Synthesis of High Performance Substituted Polysiloxane Stationary Phases for Capillary Chromatography.
J.S. Bradshaw, M.L. Lee, A. Malik, G.-L. Yi, W.-B. Li and K.E. Markides.

Chiral Recognition Mechanisms of Cyclodextrins.
J. Krupcik, P. Majek, J. Hrouzek, I. Skacani, I. Spánik and P. Sandra.

Environmental Analysis

Trace-Level Determination of Aromatic Sulfonates in the Aquatic Environment by a Fully Automatic On-Line HPLC Method.

Extraction and Analysis of Pesticides in Environmental Water Samples with SPME / GC / MS.

Volatile Organic Compounds in the Urban Atmosphere.

Headspace Solid Phase Microextraction as a Solvent-Free Sample Preparation Method for the Analysis of Complex Environmental Samples.
Z. Zhang and J. Pawliszyn.

P.A. Clausen and P. Wolkoff.
Determination of Fatty Acids and Fatty Acid Salts in Office Floor Dust Quantified as the Methyl Esters by On-Column Capillary Gas Chromatography.

P.A. Clausen, K. Wilkins and P. Jeppesen.

Separation and Analysis of PAHs Nitroderivatives (Nitro-Arenes) from Airborne Particulate Organic Matter by HPLC and Capillary GC-MS.

L. Wartzeba.

Gas Chromatographic Head Space Analysis of Phenol and Cresols in Soils by Direct Acetylation.

M.P. Llompart, R.A. Lorenzo-Ferreira and R. Cela-Torrijos.

Experiences with the Computer Aided Interpretation of Gas Chromatographic Measuring Data in Organic Trace Analysis of Environmental Samples.

H. Lepper.

Analysis of Aliphatic and Polyaromatic Hydrocarbons in Sediments of the Barents Sea.

Comparative Evaluation of HRGC-MS-Ion-Trap Mass Detector and Other Chromatographic Techniques in Determination of Polynuclear Aromatic Hydrocarbons in Environmental Samples.

Trace Analysis of PAHs and PCBs in Soil Through On-Line Direct Thermal Desorption.

H. Wörmann and A. Hoffmann.

M. Benzo, M. Bergna and S. Valzacchi.

The Distribution and Potential Sources of Nitro Musk and Other Nitroaromatic Compounds in the North Sea.

Analysis and Bioaccumulation of Nitro Musk in Aquatic and Marine Biota.

G. Rimkus and M. Wolf.

The Isolation and Concentration of Chlorinated Organics from Waters Using Sorbents with Low Specific Area Surfaces.

HRGC Study of Sorption and Desorption of Atrazine on Brazilian Soils.

M.E.C. Queiroz and F.M. Lanças.

Analysis of Acidic Herbicides in Soil by Capillary Gas Chromatography.

C. Sanchez-Brunete, A. Garcia-Valcarcel and J.L. Tadeo.

Application of an Automatic Trace Gas Analyzer Using GC and MS Detectors for the Determination of Pollutants in Air.

G. Mapelli, D. Kotzias, M. Duane and F. Munari.
Sampling and Gas Chromatographic Analysis of Volatile Organic Compounds (VOCs) in Hot and Extremely Humid Emissions. 

*Th. Knobloch and W. Engewald.*

**Natural Products and Food Research**

Composition of Green Coffee Water - Insoluble Fractions and Identification of Volatiles formed during Roasting. 

Use of CGC / Sensory Analysis as an Additional Tool for Sampling Technique Comparison in Peach Aroma Analysis. 

*A. Rizzolo, M. Vanoli, P. Lombardi and S. Polesello.*

Solid Phase Extraction Coupled with Capillary GC Applied to the Determination of Mono- and Di-Glycerides of Vegetable Oils and Fermented Foods. 

*O. Koprivnjak, G. Bertacco, R. Bortolomeazzi, L.S. Conte and O. Boschelle.*

*V. Vidrich, M. Franci, M. Michelozzi, G. Paradiso and P. Fusi.*

Characterization of Flavulinate Residues in Honey. 

*J.J. Jiménez, J. Atienza and J.L. Bernal.*

Characterization of Roasted Coffee Through the Chlorogenic Acid Fraction by HPLC-UV and Principal Component Analysis (PCA). 

*C. Bicchi, A. Binello, G. Pellegrino and A. Vanni.*

Chemical Characterization of Eucalyptus Pyrolytic Oils by Capillary Gas Chromatography. 

*A. Bodalo, E. Gomez and G. Léon.*

Determination of PAHs in Olive Oils by Chromatographic Techniques. 

*S. Morel, B. Piani, R. Bortolomeazzi and L.S. Conte.*

Characterization of Volatile Components of Unifloral Honeys by Capillary GC-MS with Reversal of Carrier Gas in the Sampling Step. 

Differentiation of Strawberry Varieties through Purge-and-Trap HRGC of Natural Aroma. 

*M.D.R. Gomes da Silva and H.J. Chaves das Neves.*

Evaluation of the Fatty Acid Composition of Easter Eggs. 

*V.P.R. Minim, H.M. Cecchi and M.R.B. Franco.*

Finger Print of Apple Juices by Purge and Trap GC-MS. 

*V. Pinnel, P. Rosseels and J. Vandegans.*

Study of the Profile of Gherkin by Purge and Trap Followed by GC-MS. 

*V. Pinnel and J. Vandegans.*
GC-MS Headspace Analysis of the Volatile Compounds of Soya Oil Without Heating the Sample.
V. Pinnel and J. Vandegans.

The Study of Lipids by Capillary GC.

Capability of Dual-Channel Capillary Gas Chromatography to Identify Organophosphorus Pesticides in Animal Feeds.
A. Ubaldi, F. Fiorucci, L. De Santis and R. Cozzani.

Headspace Capillary Gas Chromatography of Monoterpenes of Cedrus Atlantica, Cedrus Libani and Abies Alba Seeds.
R. Tognetti, M. Michelozzi, A. Giovannelli and G. Boscherini.

Gas Chromatographic Determination of Isoprene Production from Oak Leaves Growing Under High CO2.
J. D. Johnson, M. Michelozzi, R. Tognetti and A. Giovannelli.

Hydrocarbons and Sterols in Jelly-Fish of the Adriatic Sea.
G.P. Serrazanetti, C. Pagnucco and L.S. Conte.

A Chromatographic Study on Triacylglycerol Composition of Fish Oils.

Research on the Terpenic Composition of Galician Musts and Wines by GC-MS.

Influence of Certain Volatile Components on the Chemometric Differentiation of Rias Baixas Wines from other Galician White Wines.

Analysis of Herbicides in Sugar Cane Derivatives Through Gas Chromatography.
R.M.B. de Andrade and F.M. Lamas.

Study on Position and Geometric Configuration of Methyl Linoleate Hydroperoxides Isomers Obtained by Thermo-Oxidation: Chromatographic Analyses of Their Corresponding Hydroxy-Derivatives.

Solid-Phase Micro-Extraction of VOCs from Fungi.

Catalytic Transformation of Anise Oil (Pimpinella anisum L.) over Zeolite Y.

The Optimization of Purge and Trap Isolation and Cryogenic Focusing of Some Sulphur Compounds for Chromatographic Analysis.
GC and GC/MS Analyses of Ester Fraction from Epicuticular Waxes of Festuca Arundinacea Schreb.

A. Tava, C. Cunico, R. Cremona and E. Piccinini.

E.E. Staslienko, W. Torres and J.R. Martínez Morales.

The Development and Use of a System to Analyse Isoprene and Its Reaction Products in the Rural Troposphere.

Determination of Volatiles in Spirits Using a Combination of Stationary Phases in Capillary GC.

A. Antonelli and M. Motta.

Rapid Analysis of Environmental Samples Using Solid Phase Microextraction (SPME) and Narrow Bore Capillary Columns.

R.E. Shirey.

Analysis of Terpene Variations by CGC Methods of Pinus Silvestris L. in Bulgaria.

Characterization and Identification of the Mucilage Extracted from Orchid Bulbs (Bletia Campanulata) by High Temperature Capillary Gas Chromatography (HT-CGC).

A. Peña, S. Capella and C. González.

HT-CGC Analysis of Phytopreparations of "Espinheira Santa" (Maytenus ilicifolia M. or M. aquifolium M. - Celastraceae), a Brazilian Antiulcer Plant.

Analysis of Terpene Variations by CGC Methods of Pinus Nigra Arn. in Bulgaria.

Analysis of Volatile Sulfur Compounds in Wine Using Gas Chromatography with a Sulfur Chemiluminescent Detector.

D. Rauhut and H. Kürbel.

Application of CGC in the Development of an Analytical System for Identification of Vegetable Oils and Fact and Degree of Falsification.

A.V. Hanin and Y.A. Sultanovich.

The Use of the Purge and Trap Injector for the Analysis of Green and Roasted Coffee Aroma.

A.M.P. Vasconcelos and A.I. Mosca.

Identification of New Ketosterols in an Extract from Wheat Straw by HRGC-MS and HPLC-MS.

H.J. Chaves das Neves and E.M.M.S. Gaspar.

CGC-MS Separation and Characterisation of Some Natural Fruit Extracts.

A. Medvedovici, V. David, F. Tache, G.-E. Baiulescu and P. Sandra.
Key Note Lectures 1

Comparison of Different Mass Spectrometers in Combination with High-Speed Narrow-Bore Capillary Gas Chromatography.

J.J. Vreuls, F.D. Rinkema and U.A.Th. Brinkman. 797

Evaluation of β-cyclodextrin Based Chiral Stationary Phases for Capillary Column Supercritical Fluid Chromatography.
P. Petersson, S.L. Reese, G. Yi, H. Yun, A. Malik, J.S. Bradshaw, B.E. Rossiter, M.L. Lee and K.E. Markides. 798

Rapid Determination of Butyl, Phenyl and Cyclohexyltin Compounds in Aqueous Samples Using Solid-Phase Microextraction and Capillary Gas Chromatography Following In-Situ Derivatization with Sodium Tetraethylborate.
Y. Morcillo, Y. Cai, C. Porte and J.M. Bayona. 804

GC-MS Identification of Nitroaromatic Compounds with a New Selective and Highly Sensitive Detection Method for Ion Trap GC-MS Systems.

Sampling, Trace Analysis

New Sampling / Sample Preparation Techniques Based on Fibre and Polymer Technologies.
Z. Zhang, M. Yang, B. Mac Gillivray, M. Chai, T. Gorecki, A. Boyd-Bollard, I. Pan, M. Orion and J. Pawliszyn. 821

Microwave Extraction in Analytical Chemistry of Pollutants.
F.I. Onuska and K.A. Terry 830

Trace Analysis of Semi-Volatile Organic Air Pollutants Using Thick Film Silicone Rubber Traps with Capillary Gas Chromatography.
E.K. Orner and E.R. Rohwer. 842

The Effect of Regulatory Influences on the Growth of SFE and An Analytical Sample Preparation Technique in the United States.
W. Pipkin and D.R. Gere. 854

Biomedical and Pharmaceutical Applications

Quantification of Neutral Sterols in Rat Faeces after Oral Administration of LF 07-0165.
P. Padovani, B. Boubia and C. Guffroy. 857

XIV
The Determination of Ifosfamide and Seven Metabolites in Blood Plasma as Stable Trifluoroacetyl Derivatives by Electron Capture Chemical Ionization GC-MS.

A Method for the Detection, Confirmation and Determination of Codeine, Morphine and Monoacetylmorphine in Urine by GC-NPD and GC-MSD.

C. Gabiola, N. Ortega, I. Eguileor and B. del Castillo.

Determination of Lactulose and Mannitol in Urine by HRGC.

A Method for L-2-Hydroxyglutaric Acid Assay in Biological Samples by Chiral HRGC.

Gas Chromatographic Analysis of Methadone in Urine Samples after Solid Phase Micro Extraction (SPME).

M. Chiarotti and R. Marsili.

Residue Analysis of Clenbuterol in Animal Urine and Tissues by HRGC-MS.

Δ9-Tetrahydrocannabinol and 11-Nor-Δ9-Tetrahydrocannabinol-9-Carboxylic Acid in Serum and Urine Sample. Correlation with Subjective Condition and Driving Capacity in Drivers.

F. Centini, A. Masti and I. Barni Comparini.

Identification of Furan Fatty Acids as Minor Components of Human Lipids by Multidimensional GC-MSD.

Quantitative Determination of Solvent Residues in Bulk Pharmaceuticals.

M. Morval-Vitanyi, A. Toth and Z. Szeverényi.

Identification of Furan Fatty Acids in Nutritional Oils and Fats by Multidimensional GC-MSD.

The Use of A Multipurpose Sampler for Headspace GC-MS Analysis of Volatile Organic Compounds in Human Urine.

HRGC-MS Analysis of Chemical Constituents from Brazilian Medicinal Plants of Dorstenia Genus (Moraceae).

Industrial Applications

Capillary Gas Chromatography of Alkylpolyoxyethylene Glycols. Influence of the Type of Derivatizing Agent, the Alcohol Chain Length and the Oxyethylene Chain Length on the Retention Index.

K. Komdrek.
Simulated Distillation by Supercritical Fluid Chromatography on Packed Capillary Columns.
K.D. Bartle and S. Mohd Shariff

Analysis of Fragrances in Cosmetics by Gas Chromatography - Mass Spectrometry.
S.C. Rastogi.

Performing Rapid Simulated Distillations Using Thermal Gradient Programmed Gas Chromatography (TGP/GC).
W.A. Rubey and R.C. Striebich.

High Speed Analysis of H₂S and COS Impurities in Coal Gas by Capillary Gas Chromatography
J.B. Laurens and E.R. Rohwer.

Analysis of Oxygenates at Sub-ppm Levels in C1 - C10 Hydrocarbon Streams.
J. Curvers, J. de Zeeuw and M. Mohnke.

Flocculation-Extraction Methods for VOC Analysis in Latex.
M. Sarraf.

Comparison of Two Sample-Preparation Techniques for the Gas Chromatographic Analysis of Irganox 1076 in Poly-Vinyl-Chloride (PVC).
Supercritical-Fluid Extraction and Size-Exclusion Chromatography.
Z.M. Kolder, P.J. Schoenmakers and J. Blomberg.

Performance of Various Universal and Selective Detectors for Sulphur Determination in Natural Gas.

The Analysis and Occurrence of the PCB Substitute Ugilec 141 in Waste Mineral Oils Using GC-MS.

Analysis of Oxygenated Components in Naphtha Streams at ppm Level on a Two Dimensional Capillary Gas Chromatographic System.
C. Bolier and G. Schaatsbergen.

An Improved Boiling Point Distribution Curve of Crude Oils by Combining the Results of High Temperature Simulated Distillation with Detailed Front End Analysis.
P.R. Collé.

A System with Two Porous Polymer Capillary Columns that Combines ASTM Methods D 2163 for LPG Analysis and D 2712 for Trace Impurities in Propylene in One Gas-Chromatograph.
G.F. de Jonge and I. Haasdijk.

HRGC/AED Characterization of Mixtures of Organic Products Coming from the Pyrolysis of Plastics.

A. Hoffmann and W.R. Sponholz.
