Proceedings
Volume 1

1996 IEEE Conference
on Emerging Technologies
and Factory Automation

ETFA '96
Kauai, Hawaii
November 18-21, 1996

Sponsored by
The IEEE Industrial Electronics Society

In Technical Cooperation with
Society of Instrument and Control Engineers of Japan
CONTENTS

PLENARY SESSION I
Intelligent Human-Machine Systems in a Modern Communication Infrastructure ........................................ 1
   Martin Buss (Technical University of Munich, Germany), Hideki Hashimoto and Fumio Harashima
   (University of Tokyo, Japan)

PLENARY SESSION II
Virtual Reality in Robotics .......................................................................................................................... 7
   Antal K. Bejczy (Jet Propulsion Laboratory, California Institute of Technology)

SESSION Tu4A—Scheduling
Design of a Method for Scheduling in Process Industry ........................................................................... 16
   Chair: B. Hochst (Aachen University of Technology, Germany)

   Single Machine Scheduling with Deadlines, Release and Due Dates ............................................. 22
   V. Gordon, E. Potapneva, F. Werner (Cybernetics of the Byelorussian Academy of Sciences, Belarus)

   Priority Inversion in Dynamic Priority Driven Scheduling Algorithms due to Imperfect Clock
   Synchronization .................................................................................................................................. 27
   L. Ruiz, J. D. Decotignie (Swiss Federal Institute of Technology, Switzerland)

   Rescheduling Method based on Distributed Cooperative Problem Solving Model ...................... 35
   O. Nobuyuki, M. Akatsu, T. Murata (Hitachi, Japan)

SESSION Tu4B—Discrete-Event Control Issues in Factory Automation
Deadlock Avoidance Policies for Resource Allocation Systems with applications to FMS ..................... 42
   P. M. Ferreira, M. A. Lawley, S. A. Reveliotis (University of Illinois, USA)

Generalizing Parallel and Sequential Mutual Exclusions for Petri Net Synthesis of Manufacturing
   Systems ................................................................................................................................................. 49
   M. Zhou (New Jersey Institute Technology, USA)

A Two-phase Approach for Design of Supervisory Controllers for Robot Cells:
Model Checking and Markov Decision Models ......................................................................................... 56
   T. Lee, J. Lee (Korea Advanced Institute of Science and Technology, Korea)

Petri Net Simulation of a Fieldbus Communication Application .............................................................. 63
   G. Marschall (University of the Federal Armed Forces Hamburg, Germany)

SESSION Tu4C—Sensing and Recognition
Grinding Mode Classification of Ground Ceramics using 2-Dimensional Wavelet Transform .............. 70
   N. Kasashima, K. Mori, C. Tsutsumi, C. Troy (Mechanical Engineering Laboratory, Japan)

Development of the High Resolution Angle Sensing Apparatus by using the Sub-micro Displacement
   Servo Action ...................................................................................................................................... 76
   W. Yoo, T. Sekiguchi, N. Kobayashi, T. Haga (Yokohama National University, Japan)

Simultaneous Transmission of Vibration Sensor Position Control Data and Measured Vibration Data
   in Opposite Directions Through Single Plastic Optical Fiber .............................................................. 82
   M. Kamiya, H. Ikeda (Hamamatsu Industrial Research Institute, Japan)

An Automated Matching Technique for Fingerprint Identification ...................................................... 87
   D. P. Mital, E. K. Teoh (Nanyang Technological University, Singapore)
SESSION Tu4D—Factory Communications I

Real-Time Decentralized Control with CAN .......................... 93
K. M. Zuberi and K. G. Shin (University of Michigan, USA)

On The Use of Modifiers for Real-Time Execution in MMS .................. 100
P. Castori (Swiss Federal Institute of Technology, Switzerland)

Integration of Time Constraints in MMS: Towards a Real-Time MAP Profile 109
Z. Mammeri and J. Akazan (CRIN, France)

Requirements for Wireless Extensions of a FIP Fieldbus .................. 116
Ph. Morel, A. Croisier, J.-D. Decotignie (Swiss Federal Institute of Technology, Switzerland)

SESSION Tu5A—Planning and Scheduling

U. Bilge, M. Kalay, O. Turkay (Bogazici University, Turkey)

Iterative Learning for Multiple Phases Planning: Phased-REPLE .................. 130
Y. Ikkai, T. Ohkawa, N. Komoda (Osaka University, Japan)

A Distributed Architecture for Planning and Scheduling that Learns through Negotiation Cases .................. 136
K. Miyashita (Electrotechnical Laboratory, Japan), M. Hori (IBM Japan, Japan)

A Two-Level Heuristic for Machine Loading and Assembly Routing in a Flexible Assembly System .......................... 143
T. Sawik (University of Mining & Metallurgy, Poland)

SESSION Tu5B—Supervisory Control and Discrete Event Systems

Extension of the Supervision Concept to the Monitoring of Discrete Event Systems .................. 150
N. Rezg and E. Niel (Laboratoire d'Automatique Industrielle, France)

On the Use of Macroactions in Supervisory Control Theory For Monitoring Purpose .......................... 157
M. Nourelfath and E. Niel (Laboratoire d'Automatique Industrielle, France)

Specification Method based on Temporal SADT and Deterministic/Stochastic Petri Nets—
Application to Safety Assessment .......................... 163
G. Nowak, E. Niel, A. Jutard (Laboratoire d'Automatique Industrielle, France)

Virtual Machining Environment—GMPS .......................... 167
T. Xiao, X. Han, G. Yang (Tsinghua University, China)

SESSION Tu5C—Object-Oriented Techniques

Towards a Reactive Object Design for Real-Time Control Structures .................. 172
H. Chebeane, F. Echalier, G. Vitry (ECL, France)

HSCS—The Design of a Holonic Shopfloor Control System .......................... 179
A. H. C. Ng, W. H. Yeung, E. H. M. Cheung (City University of Hong Kong, Hong Kong)

Object Oriented Resource Allocation for Flexible Manufacturing Systems .......................... 186
S. S. Erdogan, K. H. Teo (Nanyang Technological University, Singapore)

SESSION Tu5D—Applications of Mechatronics

On the Use of Mechatronics for Intelligent Screw Insertions .......................... 193
L. Senneviratne (King's College London, UK)

Performing a 6-D.O.F Robotic Assembly Task by Using a Static Chain of 3-D.O.F C-spaces .......................... 199
M. Tsuda, H. Ogata, T. Naruse (NTT, Japan)

Force Control of Power Shovel for Construction of Subterrain Line .......................... 205
K. Kosuge and K. Takeo (Tohoku University, Japan), H. Ishida (Chubu Electric Power Co., Japan),

Force-Information Based Control of Robots for Handling an Object .......................... 210
K. Kosuge and T. Oosumi (Tohoku University, Japan)
SESSION W1A — Manufacturing Control and Scheduling
A Branch and Bound Approach to Minimize the Total Completion Time in a k-stage Hybrid Flowshop ............................................. 215
A. Vignier, D. Dardilhac, D. Dezalay, C. Proust (Université de Tours, France)
Machine Repairing Models for Manufacturing Systems ............................................. 221
W. K. Ching and X. Y. Zhou (Hong Kong Polytechnic University, Hong Kong)
Optimization Issues in Automated Production of Printed Circuit Boards:
Operations Sequencing, Feeder Configuration and Load Balancing Problems .................... 227
I. Or and E. Duman (Bogazici University, Turkey)
Modelling The Input Sequencing Problem for Assembly Facilities ..................................... 233
R. Macchiaroli and S. Molè (Università di Napoli Federico II, Italy)
Visiting the Traveling Salesman Problem with Petri Nets and Application in the Glass Industry ............................................. 238
P. Richard, M. Falcon-Chang, N. Monmarché, C. Proust (Laboratoire d’Informatique, France)

SESSION W1B — Failure Detection and Diagnosis
Method for Detecting Faults in FFUs Using SDP based on Audio Signal Analysis ................. 243
T. Shirai, K. Shibata, A. Takahashi, K. Mori, N. Kasashima, Y. Ueno
(Research & Development Center, Japan)
An Inspection Strategy for Randomly Failing Machine to Guarantee Robust Schedules .................... 248
A. Chelbi, D. Ait-Kadi, A. Ramudhin (Laval University, Canada)
A Model-Based Approach to Fault Diagnosis of FMS ............................................. 254
A. Cheng-Leong and K. Li-Pheng (Nanyang Technological University, Singapore)

SESSION W1C — Self-Tuning PID
On-line Frequency Domain Identification and Genetic Tuning of PID Controllers .................... 261
A. H. Jones, N. Ajlouni, M. Uzam (University of Salford, UK)
Genetic Design of Robust PID Plus Feedforward Controllers ............................................. 267
A. H. Jones, N. Ajlouni, P. B. Olivera, S. B. Kenway, M. Uzam (University of Salford, UK)
Tuning of the PID Control Gains by GA ............................................. 272
T. Ota and S. Omatu (Osaoka Prefecture University, Japan)
A Self-Tuning PID Controller and Its Application for an Ethylene Cracking Furnace .................... 275
T. Yamamoto, K. Fujii, M. Kameda (Okayama Prefectural University, Japan)
Stabilization of Inverted Pendulum by the Genetic Algorithm ............................................. 282
S. Omatu and S. Deris (Osaoka Prefecture University, Japan)

SESSION W1D — Intelligent Robots and Systems
Multi-agent Reinforcement Learning with Adaptive Mimetism ............................................. 288
T. Yamaguchi, M. Miura, M. Yachida (Osaka University, Japan)
Assigning Symbolic Goals to Autonomous Robots ............................................. 295
C. Namkiu and Y. Anzai (Keio University, Japan)
Self-organization of a Task-oriented Visuo-Motor Map for a Redundant Arm .................... 302
M. Katayama, K. Asada, X.-Z. Zheng, M. Yamakita, K. Ito (Toyoohashi University of Technology, Japan)
A Robotic Dynamic Manipulation System with Trajectory Planning and Control .................... 309
X.-Z. Zheng, K. Ono, M. Yamakita, M. Katayuma, K. Ito (Tokyo Institute of Technology, Japan)
Potential Field Representation of Environment Model and Its Application to Robot’s Force/Position Hybrid Control ............................................. 316
M. Yamakita, Z. Luo, K. Ito (Tokyo Institute of Technology, Japan)

SESSION W2A — Simulated Annealing and Genetic Algorithm
Organic Molecular Structure Optimization with Simulated Annealing Method .................... 322
T. Ohkawa, Y. Yamasaki, Y. Ikkai, N. Komoda (Osaka University, Japan)
Genetic Algorithm Based Identification of Nonlinear Systems by Sparse Volterra Filters .................... 327
L. Yao (National Taipei Institute of Technology, Taiwan)
A Simple Genetic Algorithm for the Digit-guess Problem .................................................. 334
J.-S. Liu, L.-F. Chen, F.-C. Hsiao, S.-H. Jou
(Institute of Information Science Academia Sinica, Taiwan)

SESSION W2B—Discrete Event Systems Control and Planing
Synthesis of Forcing/Locking Controllers based on Net Condition/Event Systems .................. 341
A. Luder, H.-M. Hanisch, M. Rausch (Otto-von-Guericke-University Magdeburg, Germany)
A Formalism for the Synthesis of Efficient Controllers for Discrete Event Systems .................. 348
A. Camurri and A. Coglio (University of Genova, Italy)
Hierarchies of Place/Transition Refinements in Petri Nets ............................................. 355
W. M. Zuberek, I. Bluemke (Memorial University of Newfoundland, Canada)
Minimum Average-Cost Production Plan in a Multi-Product Stochastic Manufacturing System .... 361
S. P. Sethi, W. Suo, M. I. Taksar, and H. Yan (University of Toronto, Canada)

SESSION W2C—Architecture and Strategy
A Simulation Approach for Improving the Strategic Planning of Overhaul Industries .................. 366
A. Gharbi, R. Pellerin, L. Villeneuve (Ecole de Technologie Superieure, Canada)
Feature in CIM: What are Problems? ................................................................. 372
P.-J. Erard, A. Belhi, Y. Gardan, B. Van Der Donck (Institutt d’Informatique, Switzerland)
Measurement of Information Flow for Enterprise Model Building ...................................... 378
J. Sitte (Queensland University of Technology, Australia) and P. Winzer (Technische Universitat, Cottbus, Germany)
A Cost Model for Multi-Life Cycle Engineering Design ................................................ 385
M. Zhou, B. Zhang, R. J. Caudill, D. Sebastian (New Jersey Institute Technology, USA)

Volume 2

SESSION W2D—Micromirrors
Surface Micromachined Deformable Mirrors ................................................................. 393
T. G. Bifano, R. Krishnamoorthy (Boston University, USA)
Statistical Position Repeatability of Surface Micromachined Electrostatic Actuators ............. 400
R. Krishnamoorthy, T. Bifano, G. Sandri (Boston University, U.S.A)
A Bulk-Micromachined Silicon Micromirror for Tunable Optical Switch Applications ............. 404
K.-S. Seo, Y.-H. Cho, S.-K. Youn (Korea Advanced Institute of Science and Technology, South Korea)
Fabrication of Micro Mirror Array with Vertical Spring Structure ..................................... 408
J.-W. Shin, H.-S. Kim, Y.-K. Kim, B.-G. Choi (Seoul National University, Korea)

SESSION W3A—Emerging Technologies in Avionics
A Solid State Attitude Heading Reference System for General Aviation .................................. 413
M. Greene (Auburn University, USA)
Viewing Difficulties with Head-Mounted Aids for Mechanical Assembly Using Nearby Virtual Objects ......................................................... 418
S. R. Ellis, F. Bréant, B. Menges, R. Jacoby, B. D. Adelstein (Auburn University, USA)
GPS-based Attitude and Guidance Displays for General Aviation ....................................... 423
A. K. Bowles, D. Gebre-Egziabher, R. Hayward, R. Xia, J. D. Powell (Auburn University, USA)
An EFIS EICAS for General Aviation .............................................................................. 429
M. Greene and K. Greene (Auburn University, USA)
