Proceedings of an International Symposium

Field Screening Methods for Hazardous Wastes and Toxic Chemicals

Volume 2

Sponsored by

Air & Waste Management Association

Pittsburgh, Pennsylvania
Volume II

Session 7: Recent Technology Advances
Daniel J. Ehntholt, Chair

Miniature Ion Mobility Spectrometer Detector
A. Peter Snyder, Charles S. Harden, Donald B. Shoff, Lionel Katzoff, Robert Ewing, Robert B. Turner, John H. Adams, Steve J. Taylor, John FitzGerald, and Robert Bradshaw

Remote Electrode for Monitoring Metal Contaminants
Joseph Wang, Nancy Foster, Jianmin Lu, David Larson, Khris Olsen, and Alberto Zirino

Development and Evaluation of an Optimized Multiplex Array Detector Raman System for Field Environmental Analysis
M. Bonner Denton and Daniel A. Gilmore

Session 8: Case Studies in Field Screening
Roger Jenkins, Chair

Above-Ground and In Situ Field Screening of VOCs Using Portable Acoustic Wave Sensor (PAWS) Systems
Gregory C. Frye, Don W. Gilbert, Chris Colburn, Richard W. Cernosek, and Terry D. Steinfort

A Combined Technologies Approach to Multilevel Groundwater Screening
Anthony R. Tingle, Lorie Baker, Delmar D. Long, and Mike Miracle

Field Analytical Support During Superfund Site Remediation
William L. Goldschmidt and David R. Catherman

Integrated Technologies to Evaluate the Impact of Air Emissions at a Petroleum Recovery Superfund Site
Gregory M. Zarus, Scott A. Wagaman, Miguel J. Trespalacios, Rodney D. Turpin, Tina Forrester, Lynn Wilder, John Meyer, and Mark Hansen
Session 9: New Developments in Monitoring and Measurement Methods
J. Gareth Pearson, Chair

Environmental and Atmospheric Measurements and Data Collection from a Hot Air Balloon
Abstract only

Micellar Electrokinetic Chromatography: A New Tool for Field-Screening of Semivolatile
William C. Brumley

Field Applications of Flow Cytometry
Peter J. Stopa, Lavon Harbor, Gary J. Herman, and Stephanie Ann Sincock
Abstract only

Session 10: Expedited Site Investigations and Rapid Turnaround Methods
Caroline Purdy, Chair

Expedited Site Characterization (ESC) Using the M³ Approach
M³ = Massive, Moderate, Minimum
S. Tindall
Abstract only

Accelerated Site Investigation Using Field Screening Methods:
A Case Study of a Team Approach
Michael E. Barber and Brian Abraham

The Use of Rapid Turnaround Heated Headspace/Gas Chromatography to Support Regulatory Soil Cleanup Standards
James Atwell, Chris Evans, Thomas L. Francoeur, and Richard Guerra

Tandem Level II and Level III Field Analyses for In-Field Decision Making
David E. Gallis and Jeffrey Christenson
Session 11: Field Screening Issues
John Moore, Jr., Chair

The Diffusion of Innovations in the Environmental Marketplace
John Moore, Jr.
Abstract only

Field Screening v. Field Analysis: Data Quality Objectives in the Age of Advanced On-Site Instrumentation
Eric D. Winegar, Marie J. Yates, and David B. Curtis

A Summary of Methods for Field Analysis of Hydrocarbon Contaminated Soil and Groundwater
Roy Chaudet, Dom DeAngelis, Jeff Brown, Ned Tillman, and Roger Claff

Field Implementation Complexities of EPA Developmental Methods During Remediation at Hazardous Waste Sites: Case Study
Elizabeth L. Green, Elizabeth A. Cunningham, and Carl Grabinski

Session 12: Use of Laser-Based Technologies
Tuan Vo-Dinh, Chair

Laser-Induced Fluorescence Spectroscopy of Polynuclear Aromatic Compounds and Model Oils in Humic Acid- and Soil-Containing Compartments

Laser Induced Breakdown Spectroscopy for Rapid Delineation of Metals in Soils Gregory A. Theriault, Stephen H. Lieberman, and David S. Knowles

Session 13: Laboratory Platforms and Vehicles
J. Richard Jadamec, Chair

Portable Air Monitoring Laboratories
Daniel J. Ehntholt, Kevin J. Beltis, John E. McCullough, and James R. Valentine
RTAP: A Mobile Real Time Analytical Platform for Assessment of Airborne Contaminants
Uday J. Mehta and Donald G. Paul

Geophysical Surveying Approach Using a Remotely Controlled Vehicle
A. J. Harlick, D. J. Green, and P. A. Franzen

A Vehicle Mounted Multi-Sensor Array for Waste Site Characterization
Chris W. Baumgart, Christopher A. Ciarcia, and Tom W. Tunnell

Poster Session: Field Mobile GC/MS

On-Site Analysis of Landfill Gas by GC/MS
Paul M. Williamson

Field Evaluation of a Prototype Man-Portable GC/MS

Analysis of Volatile Organic Compounds Using a Mobile GC/MS
Birgit Nölke and Gökhan Baykut

Field-Proven Transportable GC/MS: Real-World Case Studies and Success Stories
J. Christenson, B. Eckenrode, and D. Gallis
Abstract only
Note: Paper was resubmitted and appears out of order at end of Volume

Comparison of Direct Sampling Ion Trap Mass Spectrometry to GC/MS for Monitoring VOCs in Groundwater
Marcus B. Wise, Roosevelt Merriweather, Michael Guerin, and Cyril V. Thompson
Abstract only

Poster Session: Field Test Kits

A New Field Test Kit for the Rapid Determination of Diesel Fuel in Soil
J. F. Schabron, N. D. Niss, B. K. Hart, and J. K. Hart

Use of Field Screening Test Kits to Delineate Hydrocarbon Contamination of an Abandoned Fuel Distribution System
Richard N. Molsbee and David W. Bunn
Development of a Field Method for Ammonium Picrate/Picric Acid in Soil and Water
Philip G. Thorne and Thomas F. Jenkins

Photoactivated Luminescence Spot Test for Rapid Screening of Polychlorinated Biphenyls
T. Vo-Dinh, A. Pal, and T. Pal
Abstract only

Poster Session: Gas Chromatography

Field Determination of VOCs at Hazardous Waste Sites
Daniel R. Coleman, Timothy M. Brice, Gary D. Sides, and Sandra T. Macon
Abstract only

Field Screening of Volatile and Semi-Volatile Organic Pollutants Using a Heated, Portable Micro Gas Chromatograph
Mark W. Bruns and Debra L. Gonzalez
Abstract only

An In Situ Sparging Sampler for Volatile Organic Hydrocarbon Analysis
Clayton R. Morlock

Thermal Soil Desorption for Total Petroleum Hydrocarbon Testing on Gas Chromatographs
Jack Mott
Abstract only

Poster Session: Immunochemical-Based Methods

On-Site Soil and Water Analysis Using D TECH™ Immunoassays for RDX and TNT
George B. Teaney, Robert T. Hudak, and James M. Melby
Abstract only

Simplifying Site Assessment of PAH Using Immunoassay Directed Field Screening
Michael C. Mullenix, Robert T. Hudak, James M. Melby, and James W. Stave
Abstract only
PCB Detection by Immunoassay – A Wipe Test for Surface Contamination
Joseph X. Dautlick, George B. Teaney, Robert T. Hudak, and James M. Melby
Abstract only

Detection of Petroleum Hydrocarbons in Soil and Water by Immunoassay
Michele Y. Selisker, Craig R. McCaffrey, David P. Herzog, and Jeanne A. Itak

Determination of Polynuclear Aromatic Hydrocarbons (PAHs) in Soil and Water
by a Magnetic Particle-Based Enzyme Immunoassay System
Fernando M. Rubio, Timothy S. Lawruk, Charles E. Lachman, David P. Herzog,
and James R. Fleeker

A Quartz Crystal Microbalance Biosensor for Measurement of 2,4-D in Water
K. R. Rogers, E. J. Poziomek, and M. Yu

Detection of Small Molecules by an Evanescent Wave Fiber Optic Biosensor
Lisa C. Shriver-Lake and Frances S. Ligler
Abstract only

Immunoassay Panel Profile for Detecting Total PCB Content
Stephen Friedman, Randy Allen, John Gui, Elizabeth Barren, and Donald Berdahl
Abstract only

PCB Detection by Continuous Flow Immunosensor
Paul T. Charles, David W. Conrad, Anne W. Kusterbeck, Meagan S. Jacobs,
and Frances S. Ligler

Liposome-Enhanced Immunomigration Strips for Field Screening of Toxic Chemicals
Matthew A. Roberts, Stuart G. Reeves, Sui Ti Siebert, and Richard A. Durst

Rapid Dioxin Screening by Enzyme Immunoassay
Robert O. Harrison, Robert E. Carlson, Hamid Shirkhan, and Theresa Keimig
Abstract only

Development of an Enzyme Immunoassay for the Detection of Trinitrotoluene (TNT) in Soil and Water
Karen A. Larkin, Bruce S. Ferguson, Jonathan J. Matt, and Titan S. Fan
Abstract only

Evaluation of Immunoassay-Based Field Test Kits for the Detection of Petroleum Fuel Hydrocarbons in Soil
L. C. Waters, M. A. Palausky, R. W. Counts, and R. A. Jenkins
Abstract only
Poster Session: Ion Mobility Spectrometry

Determination of Vinyl Chloride in Soil-Gas Samples by Gas Chromatography Coupled with Ion Mobility Spectrometry
T. L. Jones, Herbert Hill, Greg Simpson, Maren Klasmeier, Viorica Lopez-Avila, and Gil Radolovich
Abstract only

Application of Ion Mobility Spectrometry to Drug Detection in Marine Environments
J. Richard Jadamec, Chih-Wu Su, Steve Rigdon, and LaVan Norwood
Abstract only

Ion Mobility Spectrometry (IMS) Field Screening Methods and Analysis of Explosives in Contaminated Soils
J. Avolio, R. DeBono, and P. Radwanski
Abstract only

Challenges of Developing a GC/IMS Based Personal Chemical Hazard Detector
Neil S. Arnold, Jacek P. Dworzanski, Henk L. C. Meuzelaar, and William H. McClennen

Field Screening of Volatile Organochlorine Compounds Using Ion Mobility Spectrometry
J. Stach, J. Flachowsky, M. Brodacki, H. -R. Döring

On-Site Analysis of Old Deposited Chemical Warfare Agents by Combined Use of Ion Mobility Spectrometry and Mass Spectrometry

Poster Session: Non Invasive Technologies

UXO Detection at the Jefferson Proving Grounds, Madison, IN
John Mathes, Michael Johnson, Steven Cave, and Jim Creager

Preliminary Results From a Field Survey Conducted With the Automated Subsurface Characterization System (ASCS)
Steven P. Cave, James D. Creager, and Chris W. Baumgart
Abstract only
Poster Session: Quality Assurance

A Database for Evaluating Field-Portable XRF Performance Information From Hazardous Waste Sites
Mark B. Bernick, Dennis J. Kalnicky, Lawrence P. Kaelin, Rajeshmal Singhvi, and George Prince

Poster Session: Radionuclides

Assays and Screening of Alpha Contaminated Soils Using Low-Resolution Alpha Spectroscopy of Thick Soil Samples
K. E. Meyer, A. C. Lucas, and S. Padovan

New Field-Deployable Image Processing System for Same-Day Analysis of Nuclear Track Detectors
M. A. Buckner, K. E. Meyer, and C. S. Dudney
Abstract only

Poster Session: Sampling and Sample Handling

An Analytical Program for Determination and Confirmation of Airborne Levels of Chemical Agent in the Event of a Suspected Release
Donald G. Paul and Edward M. Jakubowski
Abstract only

Thermal Sampling Head and System for Concrete Walls
E. Barren, D. R. Berdahl, S. B. Dorn, S. F. Feldman, A. L. Ortiz, Jr., C. M. Penney, and P. R. Staver

Preparation of Tedlar® Bag Whole Air Standard with a SUMMA® Canister for Field VOC Analysis
Elizabeth Denly and Hui Wang
Abstract only
Poster Session: X-Ray Fluorescence Spectrometry

Optimization of Fundamental Parameter Methods for Analysis of Hazardous Materials with Field Portable XRF Analyzers

*Dennis J. Kalnicky, Mark Bernick, Lawrence P. Kaelin, Rajeshmal Singhvi, and George Prince*

Lead in Soil Analysis Using the NITON XL

*Stephen Shefsky*

A New XRF Method for Measuring Lead in Paint

*Lee Grodzins, Charles Parsons, Don Sackett, Stephen Shefsky, and Bridget Tannian*

Applicability of XRF as an In-Situ Environmental Sensor

*W. T. Elam, R. R. Whitlock, and J. V. Gilfrich*

Abstract only

Session 14: Information Processing

Steve Leffler, Chair

E-SMART™ – A Standard Approach to Real-Time, In Situ, Environmental Monitoring and Process Control Networks

*J. Steve Leffler, Tom Hofmann, Denise Osborne, and Bruce J. Nielsen*

Enhancing the Sampling Procedure Through a Geostatistical Analysis

*Karen M. Boomer and Richard A. Brazier*

Use of Edge Detection and FFT Filtering Techniques to Reject Fluorescence in Raman Spectra

*P. A. Mosier-Boss, S. H. Lieberman, and R. Newbery*

Expert Air Monitoring System (EXAMS): An Expert System to Use FT-IR for Air Monitoring

*James B. D'Arcy and Steven P. Levine*

Session 15: Radionuclides

Richard B. Gammage, Chair

Assessment of Radiation Contamination at an Abandoned Tin Smelter Facility in Galveston County, Texas

*Joe M. Cornelius, Thomas P. Laiche, and Warren B. Zehner*
Field Tests of Passive Alpha Detectors at the Nevada Test Site for Screening of Radiologically Contaminated Soils
K. E. Meyer, R. B. Gammage, and C. S. Dudney

Use of Passive Alpha Detectors to Screen for Uranium Contamination in a Field at Fernald, Ohio

Non-Conventional Passive Sensors for Monitoring Tritium on Surfaces
R. B. Gammage, J. L. Brock, and K. E. Meyer

Session 16: Methods Comparison
Howard Fribush, Chair

Interlaboratory Evaluation of Volatile Organic Compound Determinations in Soils Prepared by Vapor Fortification
Alan D. Hewitt and Clarence L. Grant

Comparison of Field Screening Techniques with Fuel-Contaminated Soils
Chris Klopp and David Turriff

Intercomparison of In Situ Measurements of Petroleum Hydrocarbons Using a Cone Penetrometer Deployed Laser Induced Fluorescence (LIF) Sensor with Conventional Laboratory-Based Measurements
Stephen H. Lieberman, David S. Knowles, William C. McGinnis, Michele Davey, Peter M. Stang, and Don McHugh

Comparison of Soil Preservation and Analysis Methods for VOC Analytes
David E. Turriff and Chris Klopp

Session 17: Data Management and Visualization
Bruce Nielsen, Chair

Proper Use of Statistical Analysis for Evaluating and Maximizing the Utility of Field Analytical Data
Thomas L. Francoeur, Stephen A. Turner, and Matthew V. Hnatov

Assessing the Usability of X-Ray Fluorescence Data
Richard W. Chappell and Roger L. Olsen
Three-Dimensional Computer Visualization of Field Screening Information: Examples and Applications
*Lorie A. Baker and Wayne Hammons*

The Preparation of Graphics Concurrent with Field Data Collection
*William L. Wilder*

**Session 18: X-Ray Fluorescence Spectrometry**
*Thomas Spittler, Chair*

Assessment of Lead in Soil and Housedust Using Portable XRF Instruments
*Thomas M. Spittler*

Multiphased Use of an X-MET 880 XRF to Survey Lead in Soil at the Idaho National Engineering Laboratory
*David F. Gianotto and Isabel R. Anderson*

Portable X-Ray Fluorescence Spectrometry in Support of a Superfund Accelerated Clean-Up Model (SACM) – A Case Study
*Lawrence P. Kaelin, George Prince, Greg Powell, Alan Humphrey, and Steven Hawthorn*

Screening for Metals by Portable XRF Using Fundamental Parameter Analysis and Single Reference Standard Calibration
*Alan D. Hewitt*
