Proceedings of
The Third Asian-Pacific Conference on
Computational Mechanics

VOLUME 3

Edited by
Chang-Koon Choi
Korea Advanced Institute of Science & Technology, Korea

Dong-Geun Lee
Sungkyunkwan University, Korea

Chung-Bang Yun
Korea Advanced Institute of Science & Technology, Korea

Sponsored by
The Korean Government under the International Conference Support Schemes
The Samsung Corporation
LG Construction Company
Sunkyong Engineering and Construction Company
Korean Air
The Advanced Structural Research Station (STRESS)

16-18 September 1996, Seoul, Korea
Table of contents

FLUID MECHANICS

Numerical Conformal Mapping and the Two-Dimensional Potential Flow Analysis 1655
K. AMANO, Y. SHIBUYA, M. TSUCHIE and T. MURATA

2.5D and 3D Finite Element Models for Groundwater Flow Analysis 1661
in 3D Fractured System
T. TANIGUCHI, H. KASPER, O. KOLDITZ and G. KOSAKOWSKI

Numerical and Experimental Flow Visualization of the Secondary Flow 1667
due to Multibody Oscillation
S. K. KIM

An Agent Oriented Computing Model and Its Applications to Optimal 1673
Mesh Generation Method for Fluid Flow Simulation
M. HATAKEYAMA, M. NAOI and D. MIYAZAKI

Application of High-Level Language for Efficient Monitoring of Highly 1679
Dynamic Receiving Water Loadings
A. WAGNER and W. F. GEIGER

3-D Numerical Simulation of Multiple Impinging Jets in a Water Cushion Pool 1685
G. Q. DAI, Y. Q. YANG and C. G. WU

Object-Based, Flexible Navier-Stokes Numerical Simulation System 1691
M. HATAKEYAMA, M. WATANABE and T. SUZUKI

Entrance Region Flow Heat Transfer in Concentric Annuli for a Bingham Fluid 1697
A. KANDASAMY

Surface Heat Dispersion Simulation Using Two-Dimensional Finite Element Models 1703
S. W. SUH

Approximate Solutions for Confined Flow Problems 1709
A. A. AL-RAWAS, M. Y. AL-AGHBARI and N. SIVAKUGAN

Numerical Simulation of Flow in ‘T’-Shaped Tidal River 1715
H. S. JIN, S. EGASHIRA, Y. M. ZHENG and G. B. YUAN

Estimation of Roughness Coefficients and Service Reservoir Heads of Distribution 1721
Pipe Networks Using Least Squares-Finite Element Method
M. KANOH, Y. KUGA and T. KUROKI

Vibration Mitigation for the A-Type Offshore Template Structures 1727
H. H. LEE

A Comparison of Some Stabilized Finite Element Formulations 1733
for Incompressible Viscous Fluid Flow
W. INOMATA and K. KASHIYAMA

Unsteady Coordinate Transformations and Adaptive Grid Techniques 1739
for Movable Boundary Flows
W. M. WU

COASTAL ENGINEERING

*Typhoon Wave Fields Simulation for the Northeast Asian Seas 1865
B. H. CHOI and Y. H. HEO

On the Simulation of the Oceanographic Conditions in the Northwestern Pacific 1871

Transoceanic Propagation of Tsunami Revisited 1877
B. H. CHOI and Y. K. KIM

Wave Height and Current Distribution behind an Offshore Breakwater 1889
J. JOSE and V. SUNDAR

Simulation of Drifter Tracks in the East Sea 1895
B. H. CHOI, D. H. KIM and K. I. CHANG

OCEAN ENGINEERING

*Time-Mean Hydrodynamic Forces on a Two Dimensional Half Immersed Body 1893
in the Presence of Wave and Current
D. C. HONG

An Efficient Calculation Method in Vibration Analysis for the Added Mass Matrix 1911
on Floating Structures
T. FUNAKI and S. HAYASHI

Computations of Viscous Flow Field around a 2D Hydrofoil 1917
K. N. CHUNG

Numerical Simulation of Moored Ship Motions in Long Period Waves 1923
S. SHIRAISHI and T. HIRAISHI

Estimation of Hydrodynamic Forces Acting on Tension Leg Platform 1929
S. H. CHANG, W. S. LEE and I. K. PARK

Shallow Water Waves Generated by Underwater Moving Objects 1935
D. H. ZHANG and A. T. CHWANG

COMPUTATIONAL WIND ENGINEERING

Recent Progress in LES and Its Application to Turbulent Vortex Shedding Flows 1943
Past 2D Bluff Body
S. KATO, S. MURAKAMI, A. MOCHIDA and Y. TOMINAGA

*Finite Element Analysis of Wind over Mountainous Area 1949
T. NOMURA

Aerodynamic Characteristics of Rectangular Cylinder Computed 1955
by DS and LES Methods
A. OKAJIMA and D. YI

of Tandem Circular Cylinders
H. HIRANO, A. MARUOKA and K. I. HAYASHI

Numerical Analysis on Aerodynamic Characteristics of Bluff Cylinders 1967
T. TAMURA

Numerical Prediction of Vortex-Excited Oscillations of Bridge Structures 1973
J. S. LEE and J. D. KIM

Numerical Simulation on Ground Effect Using the Boundary Element Method 1979
K. KIKUCHI, F. MOTOE and M. YANAGIZAWA

* Invited Paper
GEOMECHANICS

• Numerical Simulation of the Down-Hole and Cross-Hole Methods
  S. M. KIM, S. T. LIAO and J. M. ROESSET 1987

A Detailed Numerical Study on Dynamic Sub-Soil Coupling Effects between Flexible Foundations
  Y. K. CHEUNG, L. G. THAM and J. QIAN 1993

Three Dimensional Analysis of Geotechnical Footing Problems
  A. E. GROEN, R. D. BORST and P. VAN DEN BERG 1999

Investigation of the Group Factor of Bearing Pile Groups
  Y. S. KIM 2005

• Sequential Analysis of Earth Retaining Structures by Using p-y Curves for Subgrade Reaction
  S. I. KIM, B. S. CHANG, H. KIM and S. S. JEONG 2011

Inverse Analysis for Identifying Soil Properties in Excavation Analysis by Elasto-Plastic Soil Spring Model
  H. S. LEE and C. K. CHUNG 2017

Nonlinear Finite Element Analysis of Excavation by Anisotropic Hardening Elasto-Plastic Constitutive Model
  S. B. OH and S. R. LEE 2023

A Numerical Approach for Trench Design as a Vibration Barrier
  K. H. YOU, M. R. OH and S. H. YOO 2029

Expert System Applied in Geotechnical Design Works
  B. I. KIM, C. S. LEE, S. W. LEE and M. M. KIM 2035

Empirical Estimation of Stress-History of Ground for an Elasto-Plastic Analysis Based on SPT Results
  S. SAKAO and T. HATTORI 2041

Analysis of Conical Foundation with Undermining Soil Ground
  A. ZHUSUPBEKOV, B. UNAIBAEV and D. ALEXANDER 2047

Deformation Analysis for Ertan Underground Powerhouse
  Z. K. LI, A. M. WANG and S. C. LI 2053

Analysis of Strain Localisation of Rock-Like Material Using Homogenisation Technique
  J. S. LEE and G. N. PANDE 2059

The Analysis on Stability of Powerhouse in Shi Sanling Pumped Storage Plant
  H. B. LIANG and Z. Q. GU 2069

Development of BEM for Multilayered Elastic Half Planes Using Numerical Fundamental Solutions
  M. K. KIM, K. H. OH and J. S. PARK 2075

Evaluation of Negative Friction Property of Long Friction Piles
  J. OTANI and F. TOUYAMA 2081

Three Dimensional Dynamic Analysis of a Underground Tunnel due to Passing High Speed Trains by Coupling of Finite and Boundary Elements
  C. W. LEE, M. K. KIM and H. J. HWANG 2087

On Effects of Discontinuous Changes of the Design Variables in Analysis of Laterally Loaded Piles
  B. B. BUDKOWSKA and E. CEAN 2097

Analysis of Large Lateral Deflections during Pile Installation
  R. J. EARL and A. J. DEEKS 2103

A Discrete Pasternak Model for Soil-Structure Interaction
  R. S. JEEVAN and N. P. KURIAN 2109

Numerical Analysis of Propagation of Thaw around Pile Embedded in Multilayered Soil
  B. B. BUDKOWSKA and I. KREJA 2115

* Invited Paper
A Development of Bearing Capacity Equations for Footings Underlain by Underground Cavities
C. S. YOO

The FEM Analysis of Stability against Sliding for a Dam and Its Powerhouse
Z. Q. GU, S. Z. PENG and J. J. GUO

Transient Time Domain BEM Analysis of Vertically Loaded Single Pile
in Parallel Computing Environment
L. G. THAM, C. K. CHU, P. K. K. LEE and J. QIAN

Elastoplastic Finite Element Analysis of Retaining Wall with Passive Modes
T. TANAKA and H. MORI

Refinement of a Numerical Technique for Solution of Geotechnical Problems
H. B. POOROOOSHAB, N. MIURA and M. ALAMGIR

Adaptive Finite Element Approach to Nonlinear Geomechanical Problems
W. WUNDERLICH, H. CRAMER and M. RUDOLPH

Numerical Analysis of Fracture Process in Particle Composites
J. B. XING and L. Q. YU

Discontinue Gradients Method in the Inverse Analysis of Rock Engineering
W. Q. LIU, G. Y. HUANG, Y. K. MU and X. J. LIU

Rockbolting in China's Coal Mines
X. A. YANG and H. W. HUANG

GRANULAR MATERIALS

• Computer Simulation in Mechanics of Granular Materials
  M. SATAKE

Deformation Mechanism of Granular Material by Elliptic Microstructure Mode
K. MAEDA, K. MIURA and S. TOKI

Distinct Element Method with the Effect of Moment Transfer at the Contacts
K. IWASHITA and M. ODA

Mechanism of Liquefaction Failure on Niwaikumine Dam
T. SHIOMI and M. YOSHIZAWA

On the Rigid-Plastic Granular Materials
T. TAMURA and Y. YAMADA

An Elastoplastic Homogenization Theory for Geomaterials
Y. ICHIKAWA and J. G. WANG

ROCK MECHANICS

• Fractal Analysis of Fracture Process Zone in Concrete-Rock Materials
  W. Y. ZHOU and G. R. YAN

Creep Rupture of Fissured Rocks Mass
G. D. ZHANG and W. Y. ZHOU

Analysis of Discontinuous Rock Masses Based on the Variational Principle
R. HAMAJIMA, S. HAN, T. SUZUKI, Z. WU and Y. SONG

Micro-Structure Models for Porous Rocks to Jointed Rock Mass
O. AYDAN, N. TOKASHIKI and T. SEIKI

Surrounding Rock Stability Analysis of the Underground Powerhouse
in Xiaolangdi Power Station
S. Z. PENG, Z. Q. GU and J. J. GUO

* Invited Paper
TUNNEL & UNDERGROUND UTILIZATION

Parameter Identification of Three Dimensional Tunnel Models
G. SWOBODA and Q. DONG 2251

Numerical Analysis of Multi-Stage Excavation of Tunnel
Y. C. CHEN and M. S. LU 2257

Stochastic Inverse Back Analysis of Stability Around a Tunnel Opening
H. W. HUANG 2263

Safety Analysis of NATM Tunnels
A. MOUSSA and H. WAGNER 2269

Stability Analysis of Underground Cold Storage Openings Excavated in Shallow Jointed Rocks
H. Y. KIM and Y. J. PARK 2275

Remediation Technique for Microbiological Clogging in the Water Curtain System of Underground LPG Storage Cavern
I. Y. HAN, S. M. CHO, T. S. KANG and J. H. LEE 2281

GROUNDWATER & SEEPAGE

An Optimal Control of Groundwater Level
K. MIYATA, Y. KITANO, N. KANEKO, K. KOJIMA and M. KAWAHARA 2289

Investigation of Parameters Influencing Seepage Problems
M. AL-AGHIBARI, A. A. AL-RAWAS and N. SIVAKUGAN 2295

Back-Analysis of Seepage through an Earth Dam Using the Finite Element Method
M. A. CHOWDHURY, H. OCATA, H. INAGAKI, M. KUNITAKE and F. KONDO 2301

Three-Dimensional Finite Strain Consolidation Theory
Y. P. CHIN and G. Y. SHEU 2307

Coupled Flow-Consolidation Analysis during Filtration Process
- A Numerical Solution
Y. SUKIRMAN, S. MUSTAPHA and N. OTHMAN 2313

Three-Dimensional Two-Phase Code for Dynamic Analysis of Saturated Porous Media
S. H. KIM, J. W. KIM and K. J. KIM 2319

Experimental Investigation of Soil Water Content Effect on In-Situ Soil-Gas Radon Testing Prior to Construction
E. SALIMITARI, F. T. NAJAFI and K. K. AL-AHMADY 2325

COMPUTATIONAL TECHNOLOGY

Automatic Adaptive Refinement Analysis in Three Dimensions
S. H. LO 2333

Consistent Infinitesimal Finite-Element Cell Method
- a Boundary Finite-Element Procedure
J. P. WOLF and C. M. SONG 2339

Mesh Generation over Curved Surfaces
S. H. LO 2345

The Negative Exponential Corrector for the Mixed Differential-Algebra Equations of the Large Deployable Antenna of Satellite
Z. QIN and S. T. CHEN 2351

Super Finite Element Method in Analysis of Shear Wall
S. J. WU, Z. R. WU and Y. M. ZHANG 2357

* Invited Paper
The Differential Quadrature Element Method (DQEM) for Axisymmetric Bending of Thick Circular Plates
J. B. HAN and K. M. LIEW

Finite Element Flux-Corrected Transport Technique for Fast Transient Dynamic Analysis of Structures
S. V. POTAPOV

PARALLEL COMPUTING
Parallel Computation for Transcendental Structural Eigenproblems
F. W. WILLIAMS and D. KENNEDY

Computer-Aided Parallel Structural Dynamic Simulations in a Workstation Network
S. H. HSIEH and J. F. ABEL

Gear Tooth Bending Stress and Deformation Calculation by Boundary Element Method Integrated with a Special Pre- and Post-Processor
Q. FAN, D. M. NI, D. H. JIAN, Q. H. LUO and S. Y. CUN

Three-Dimensional Nonlinear Finite Element Analysis of Foundation Problems by Parallel Processors
T. TANAKA

Parallel Finite Element Method for Incompressible Viscous Fluid Flow
T. TAMAI and K. KASHIYAMA

CAD / CAE
Computer-Aided Analysis and Design of Reinforced Concrete Viaducts
M. N. B HOSSAIN and J. R. CHOUDHURY

Computer Graphics Animation for Highway Reconstruction after Great Hanshin Earthquake
Y. FUKUCHI, A. NAKAUE, R. D. LOGCHER and I. KOBAYASHI

Development of Pre-Processor Program for the Multi-Layered Pavement System
B. W. JO and G. S. LEE

An Innovative Design of Steel Frame Using Advanced Analysis
S. E. KIM and W. F. CHEN

Bridge Erection with Simultaneous Eigenfrequency Monitoring
A. STRUKELJ and M. SKRINAR

Customized Approach to Computer Aided Antenna Design Using NISA Macros
B. S. MUNJAL and M. KAMIL

Simulating Construction Operations in Real-Time Object-Oriented Virtual Environments: a PC-Based Approach
K. K. NAJI and F. T. NAJAFI

AI & EXPERT SYSTEMS
An Object Oriented Finite Element System for Two-Dimensional Problems
A. J. DEEKS

Development of an Intelligent System for Selection of Process Parameters in the Welding Process
I. S. KIM, A. BASU and W. H. KWON

Role of Hidden-Layer in Neural Network Analysis for Spectral Analysis of Structural Vibration
H. SHIBATA and A. MATSUMURA
Expert System for Pavement Maintenance and Rehabilitation Strategy in the State of Ohio (ESPRESSO)

S. D. WEE

An Investigation into the Proposed Consequences of Customer–Supplier Partner Relationships and Their Joint Use of TQM Tools

S. H. JUNG

Object-Based Simulation World Development System

M. HATAKEYAMA, K. KATOUGI, H. KOBAYASHI and H. NISHINO
