AVEC’96
International Symposium on Advanced Vehicle Control

24th - 28th of June 1996
Institute of Automotive Engineering
Aachen University of Technology

Volume 1

- Keynote Speeches
- Active & Semi-active Suspension Systems
- Advanced Steering Control
- Integrated Motion Control

General Chairman:
Prof. Dr.-Ing. Henning Wallentowitz

Organizing Manager:
Dipl.-Ing. Peter Holdmann
Content

Volume 1

Keynote Speeches

On Advanced Chassis Control Technology for Vehicle Handling and Active Safety
M. Abe

Active & Semi-Active Suspension Systems

Vehicle Mobility Enhancement for Various Driving Situations: Application of Variable Vehicle Height Control
H. Fujii, K. Ishikawa, K. Isoda, M. Takada

A New State Space Description to Control Active Suspension of Ground Vehicles
M. Oya, Y. Araki, H. Harada

Sliding Mode Controller for Semi-Active Suspension System for Commercial Vehicles
O. Isobe, T. Kawabe, Y. Watanabe, Y. Miyasato, S. Hanba

An Investigation into the Control and Performance of Vehicle Semi-active Suspension
K. Yi, J.-Y. Seo, K.-R. Choi

A General Criterion Controller with Preview for a Semi-Active Truck Suspension
J. H. E. A. Muijderman, F. E. Veldpaus, J. G. A. M. van Heck, J. J. Kok

Design of Active Suspension Controller for Commercial Vehicles
H.-Y. Roh, Y. Park

Electronic Damping Control with Continously working damping valves (EDCC) - system description and functional improvements
The Application of Interconnected Stochastic Learning Automata to Controller Design for Semi-Active Automobile Suspensions
M. N. Howell, G. P. Frost, T. J. Gordon 105

Impact of Different Tyres and Adaptive Suspension Control on Vertical Dynamics of Commercial Vehicles

A New Concept of Semi-Active Control of Truck’s Suspension
M. Novak, M. Valasek 141

The Development of a Heavy Vehicle Vehicle Semi-Active Damper
K. J. Kitching, D. J. Cole, B. Cebon 153

Active Suspension Concept for a Large Multi-Axled Off-Road Vehicle
W. Breuer 163

Ride and Handling Control of a Road Vehicle Employing an Active Suspension System
S. A. Edwards, D. A. Wilson, D. A. Crolla 179

Experiences in Semi-active Damping with State Estimators
S. Irmscher, E. Hees 193

Active Actuator for Vehicle Suspension
J. Dafeng, H. Xinghui 207

Design of Active Suspensions with H∞ Preview Control
A. Moran, M. Nagai, M. Hayase 215

Development of semi-active control system with PUDLIS
T. Nakayama, M. Morita, H. Kamimae, A. Nishihara, K. Tuda 233

An intelligent Suspension System Based on a Continuously Variable Shock Absorber
C. F. Nicolas, J. Landaluze, X. Sabalza, M. Gaston, R. Reyero 241

Active Control of Vehicle Suspension By Sliding Mode Control
H.-S. Park, J.-S. Park, H.-J. Kim, H.-S. Yang, Y.-P. Park 255

Worst-Case Evaluation of an Active Suspension Control System
H. Peng, W.-H. Ma 267
Advanced Steering Control

Control Effects of Active Rear Wheel Steering on Driver-Vehicle System
H. Harada, Y. Araki, M. Oya 281

A Study on Desirable Steering Responses and Steering Torque for Driver’s Feeling
Y. Hisaoka, M. Yamamoto, H. Fujinami 295

An Advanced Vehicle Control method using Independent Four-Wheel-Steering System
I. Kageyama, H. Jo 307

A Robust Active Front Wheel Steering System Considering the Limits of Vehicle Lateral Force
Y. Tagawa, K. Morita, M. Nagai 315

Adaptive Yaw Rate Feedback 4WS with Friction Coefficient Estimator between Tire and Road Surface
K. Wakamatsu, Y. Akuta, M. Ikegaya, N. Asanuma 333

An Advanced Steering System with Active Kinesthetic Feedback for Handling Qualities Improvement
N. Yuhara, S. Horiuchi, T. Iijima, K. Shimizu 345

Development of Robust Active Rear Steering Control
Y. Hirano, K. Fukatani 359

Driving Safety by Robust Steering Control
J. Ackermann, T. Bünte, W. Sienel, H. Jeebe, K. Naab 377

Stability Analysis of Articulated Vehicles With All-Wheel Steering
S. Chikamori, S. Kawasawa 395

Integrated Motion Control

Achievable Roll Response of Automotive Suspensions
R. J. Dorling, D. Cebon 409

Analysis of Aerodynamic Effects on the Vehicle Stability in High Speed Running
K. Maeda, H. Sakai, M. Tomiyama 427
A Feasibility Study on Anti-Roll Control System for Passenger Cars

Integrated Control Law of Active Rear Wheel Steering and Direct Yaw Moment Control
M. Nagai, Y. Hirano, S. Yamanaka 451

Modelling and Simulation of an Automotive Vehicle for integrated motion control
T. E. C. Potter, A. S. Cherry, R. P. Jones 471

A Comparison of Alternative Intervention Strategies for Unintended Roadway Departure (URD) Control
A. Alleyne 485

On-Board-Tire-Model Reference Control for Cooperation of 4WS and Direct Yaw Moment Control for Improving Active Safety of Vehicle Handling
Y. Furukawa, M. Abe 507

The Use of Braking for Controlling the Lateral Motion of Full-Trailers
P. Fancher, H. Zhang, C. Winkler 527

DSC (Dynamic Stability Control) in BMW 7 Series Cars
A. Straub 547

FADYS Handling Simulations used in a real-time Hardware-in-the-Loop Application with the ESP-Controller
L. Dragon 559

Control Aspects of the BOSCH-VDC
A. T. van Zanten, R. Erhardt, G. Pfaff, F. Kost, U. Hartmann, T. Ehret 573

Electronic driving aids
H.-M. Gass, H. Glaser, B. Heißing, B. Mäusbacher 609

Determination of Lateral Force Axle Data for use in Active Handling Control Systems
N.-G. Vagstedt 629

Aerodynamic Vehicle Ride Control with Active Spoilers
A. R. Savkoor, H. Happel 647

Autonomous Support, Safety and Intervention
M. J. Richardson, N. Clarke, P. Barber 683
