The Seventh IEEE International Symposium on Personal, Indoor and Mobile Radio Communications

PIMRC'96

Taipei International Convention Center, Taipei, Taiwan, ROC
October 15-18, 1996

Sponsored by:

IEEE Communications Society
Chinese Institute of Electrical Engineering
Ministry of Education
National Science Council
Ministry of Economic Affairs
Industrial Technology Research Institute
Directorate General of Telecommunications
Chunghwa Telecommunication Co., Ltd.
National Taiwan University
National Chiao Tung University
National Tsing Hua University
National Cheng Kung University
National Central University
National Chung Cheng University
National Taiwan Institute of Technology
Institute of Information Science, Academia Sinica

Co-sponsored by:

ACM SIG Mobile
IEEE (UK)
IEICE (Japan)
IEEE Taipei Section
ACM Taipei Chapter
IEEE Communications Taipei Chapter
IEEE Computers Taipei Chapter
IEEE Vehicular Technology Taipei Chapter
IEEE Information Theory Taipei Chapter
IEEE Microwave Theory and Techniques Taipei Chapter
IEEE Circuits and Systems Taipei Chapter
IEEE Electrical and Electronic Manufacturers' Association (TEEMA)
China External Trade Development Council (CETRA)

UB/TIB Hannover 115 310 398
Lin-Lang Yang and Robert A. Scholtz
Qualcomm Incorporated, and University of Southern California, USA

F1a.4 InP HBT For Portable Wireless Radio Technologies ................................................................. 233
R. C. Malkemes and Hossein Izadpanah
Bellcore, USA

F1a.5 A Transponder IC for Wireless Identification Systems ............................................................... 238
Sau-Mou Wu, Jeng-Rern Yang and Tzen-Yi Liu
Yuan-Ze Institute of Technology, Taiwan, ROC

F1b  IR Communication
Organizer: J. Kahn

F1b.1 A Proposal of Multi-Beam Transmitter for Non-Directed Diffuse Indoor Optical Wireless Communication System ........................................................................................................ 242
Kaoru Nishida, Shinichi Miyamoto, Katsutoshi Tsukamoto and Norihiko Morinaga
Osaka University, Japan

F1b.2 Performance Analysis and Channel Capacity for Multiple-Pulse Position Modulation on Multipath Channels ...... 247
Hyuncheol Park and John R. Barry
Georgia Institute of Technology, USA

F1b.3 Experimental Results of a Pulse Position Modulation Infrared Transceiver ........................................ 252
Rui Valadas, Adriano Moreira, Carlos Oliveira, Luís Moreira, Cipriano Lomba, António Tavares and A. M. de Oliveira Duarte
University of Aveiro, Portugal

F1b.4 Interference Modelling for the Simulation of IEEE 802.11 Infrared Local Area Networks .................... 257
Rui Valadas
University of Aveiro, Portugal

F1b.5 Improved PPM Modulations for High Spectral Efficiency IR-WLAN ................................................. 262
Rafel Pérez-Jiménez, José A. Rabadán, Victor M. Melián and Manuel J. Betancor
Universidad de Las Palmas de Gran Canaria, Spain

A2  Antenna and Radio System Design
Organizer: J. Shapira

A2.1 Predistort-Linearisation Method for Future Basestation Amplifiers of Cellular Radio ................................ 267
Osama W. Ata
Victoria University of Technology, Australia

A2.2 A Switching CMA/Diversity Antenna for Canceling Echoes with Fading in an FM Broadcasting Receiver ........ 272
Fangwei Tong, Takuya Otani and Yoshihiko Akaiwa
Kyushu Institute of Technology, and Kyushu University, Japan

A2.3 A Varactor-Tuned Oscillator Used in the Mobile Radio Communication System .................................. 277
Jwo-Shiun Sun
National Taipei Institute of Technology, Taiwan, ROC

A2.4 A Low IF GMSK Modem Architecture with Joint Symbol Timing Recovery and Frequency Offset Compensation ........................................................................................................ 281
Yung-Liang Huang and Chia-Chi Huang
National Chiao Tung University, Taiwan, ROC

A2.5 Microcell Prediction Enhancement for Terrain ..................................................................................... 286
William C. Y. Lee and David J. Y. Lee
AirTouch Communications, Inc., USA

A2.6 Shadow Fading in Mobile Radio Channel
Mahmood M. Zonoozi and Prem Dassanayake
Victoria University of Technology, Australia

A2.7 Modeling of Packet Cellular Networks with Log-Normal Shadowing
M. Ruggieri, F. Graziosi and F. Santucci
University of Roma “Tor Vergata” and University of L'Aquila, Italy

A2.8 Estimation and Reduction of Power Absorbed in Head From Handheld Terminals
Rodney Vaughan
New Zealand Institute for Industrial Research, New Zealand

B2 Wireless Transmission Techniques I
Organizer T. Mathiopoulos

B2.1 Nonlinear-symbol Continuous Phase Frequency Shift Keying
Yonsei University, Korea

B2.2 The Effect of Heuristic Information on the Soft-Decision Decoding for Linear Block Codes
Yunghsiang S. Han
Hua Fan College of Humanities and Technology, Taiwan, ROC

B2.3 Two Symbols/Branch MBCM Scheme Under Fading Channels
Huan-Bang Li and Tetsushi Ikegami
Communications Research Laboratory, MPT, Japan

B2.4 To Bite or Not to Bite - A Study of Tail Bits versus Tail-Biting
Yi-Pin Eric Wang and R. Ramesh
Ericsson Inc., USA

B2.5 Randomness of Frequency Hopping Sequences Generated by Hermitean Codes
Francisco M. de Assis
Federal University of Paraiba, Brazil

B2.6 A New Asynchronous Group Demodulator with Complex Multi-Rate Filter Bank
Ryohei Tanaka, Minoru Okada, Shinsuke Hara and Norihiko Morinaga
Osaka University, Japan

B2.7 A Compact Pattern with Maximized Channel Borrowing Strategy for Mobile Cellular Networks
Lauro Ortigoza Guerrero and Domingo Lara-Rodriguez
CINVESTAV-IPN, Mexico

B2.8 Combined Channel Estimation and Frequency Correction for Packet Oriented Mobile Communication Systems
Uwe Dettmar
ASCOM Technology, Switzerland

C2 Modulation and Coding
Organizer I. Sasase

C2.1 On Multilevel Coded MPSK for the Rayleigh Fading Channel
Ruey-Yi Wei and Mao-Chao Lin
National Taiwan University, Taiwan, ROC
C2.2 Performance of a Fade-Compensated 16QAM with Diversity Reception in Mobile Radio Channels
Hing-Keung Lau and Sing-Wai Cheung
The University of Hong Kong, Hong Kong

C2.3 Trellis-Coded Pulse-Position Modulation for Indoor Wireless Infrared Communications
David C. M. Lee, Joseph M. Kahn and Malik D. Audeh
University of California at Berkeley, USA

C2.4 Turbo-Code Termination Schemes and a Novel Alternative for Short Frames
Mark C. Reed and Steven S. Pietrobon
University of South Australia, Australia

C2.5 Adaptive Error Coding Using Channel Prediction
R. Chen, K. C. Chua, B. T. Tan and C. S. Ng
National University of Singapore, Singapore

C2.6 Performance of Multidimensional TCM DS/SSMA System in Urban Multipath Fading Channel
Fengfang Yang and Guangguo Bi
Southeast University, China

C2.7 A Low-Complexity Superorthogonal Turbo-Code for CDMA Applications
P. Komulainen and K. Pehkonen
Nokia Mobile Phones R&D, Finland

C2.8 Narrowband Nonlinear Continuous Phase Frequency Shift Keying
Tom R. Mao
Ericsson Inc., USA

D2 Wireless Access Technologies
Organizer L. Fratta

D2.1 The Performance of an "Imbedded" Aloha Protocol in Wireless Networks
Jeong G. Lee and M. Scott Corson
ETRI, Korea, and University of Maryland, USA

D2.2 Performance Comparisons of STDD and FDD Schemes for TDMA Systems Using NC-PRMA Protocol
Jee-Wey Wang and Jyh-Horng Wen
National Chung Cheng University, Taiwan, ROC

D2.3 Comparative Evaluation of CDMA and FD-TDMA Cellular System Capacities with Respect to Radio Link Capacity
Charles L. Despins, Gaingar Djelassem and Vincent Roy
Université du Québec, and Microcell Labs., Canada

D2.4 Performance Evaluation and Enhancement of the CSMA/CA MAC Protocol for 802.11 Wireless LANs
Giuseppe Bianchi, Luigi Fratta and Matteo Oliveri
Politecnico di Milano, Italy

D2.5 Throughput of a Wireless LAN Access Point in Presence of Natural Hidden Terminals and Capture Effects
A. Zahedi and K. Pahlavan
Worcester Polytechnic Institute, USA

D2.6 Performance Analysis of a Priority Oriented Multiple Access Mechanism for Wireless PCS
Farooq Khan, Djamel Zeghlache
Institute National des Télécommunications, France

D2.7 Performance Analysis of IEEE 802.11 CSMA/CA Medium Access Control Protocol
Tien-Shin Ho and Kwang-Cheng Chen
Mobile Personal Satellite Communication

Organizer T. Ikegami

E2.1 Coded Spread Slotted Aloha Performance in a LEO Satellite Communication Channel
Mqhele E. Dlodlo and Ramjee Prasad
Delft University of Technology, the Netherlands

E2.2 The Performance of a DLL Based Code Tracking Algorithm in a Realistic CDMA Land Mobile Satellite Channel
Timo Kumpumaki, Torsti Poutanen and Jaakko Talvitie
University of Oulu, Finland

E2.3 A Dynamic Channel Assignment Strategy for the On-Board Processor in the Mobile Satellite Communications System
Shinichi Taira, Osamu Takeda, Teruki Okamoto and Yuichi Otsu
Advance Space Communications Research Laboratory (ASC), Japan

E2.4 Blocking Analysis and Simulation Studies in Satellite-Augmented Cellular Networks
D. Ayyagari and A. Ephremides
University of Maryland, USA

E2.5 Nonstationary Traffic Models for Mobile Satellite Communications Systems
Edward Chlebus
Motorola, Inc., USA

E2.6 Inmarsat's mini-M Service Evolution Using Inmarsat-3 Satellites
D.V. Ramana, M. Nohara, H.S. Wong, R. Hammersla, N. Kawai and J. Andaneas
Inmarsat-M Evolution Engineering, Inmarsat, United Kingdom

E2.7 Modified TCM Decoding Algorithm for Satellite Communications
Ji-Won Jung
Korea Maritime University, Korea

E2.8 Jitter and Error Performance Analysis of QPR-TCM and Neural Network Equivalent Systems over Mobile Satellite Channels
Osman Nuri Ucan
Istanbul Technical University, Turkey

E2.9 Carrier Recovery and Tracking Performance for CDMA Land Mobile Satellite Links
Markku Tolonen and Jaakko Talvitie
Elektrobit Ltd. And University of Oulu, Finland

Wireless Transmission Theory

Organizer D. Taylor

F2.1 Channel Capacities of Fading Radio Channels
T. Huschka, M. Reinhardt and J. Lindner
F2.2 ML Sequence Estimation for Data Signals Corrupted by Intersymbol Interference and Colored Noise
Krzysztof Wesolowski
Poznan University of Technology and Institute of Electronics & Communications, Poland
472

F2.3 Signal Limiting in Envelope Correlations for Diversity Channel Evaluation: A Statistical Approach
Rodney Vaughan
New Zealand Institute for Industrial Research Limited, New Zealand
477

F2.4 The Reverse Jacket Matrix of Weighted Hadamard Transform for Multidimensional Signal Processing
Moon Ho Lee, Ju Yong Park, Myong Won Kwon and Seung-Rae Lee
Chonbuk National University, Korea
482

F2.5 A Blind Equalization Strategy for the Short Burst TDMA System
Yue Chen and Justin C.-J. Chuang
The Hong Kong University of Science & Technology, Hong Kong, and AT&T Research, USA
487

F2.6 The Performance of CDMA System Using π/4-shift QPSK and π/2-shift BPSK with the Nonlinearity of HPA
Kumud Kashyap, Tadahiro Wada, Masaaki Katayama, Takaya Yamazato and Akira Ogawa
Nagoya University, Japan
492

F2.7 Adaptive Modulation in a Slow Rayleigh Fading Channel
J. M. Torrance and Lajos Hanzo
University of Southampton, United Kingdom
497

F2.8 Capacity Bounds for a Hierarchical CDMA Cellular Network
P. Whiting
University of South Australia, Australia
502

F2.9 Decision Feedback Differential Detection Using Weighted Phase References
Ruey-Yi Wei and Mao-Chao Lin
National Taiwan University, Taiwan, ROC
507

A3 Adaptive Array Antenna for Personal Mobile Radio Communication
Organizer R. Kohno

A3.1 Co-channel Interference Reduction Method Using CMA Adaptive Array Antenna
Hiroshi Furukawa, Yukiyoshi Kamio and Hideichi Sasaoka
Communications Research Lab., MPT, and National Police Agency, Japan
512

A3.2 A Simulation Study of A Distributed Antenna-based CDMA System
Guan-Hong Chen, Chih-Min Yu and Chia-Chi Huang
National Chiao Tung University, Taiwan, ROC
517

A3.3 A Tracking Antenna Based on a Parallel DSP Architecture
T.B Vu, N. Lam, H. Chen, G. Jonas and T. Millett
University of New South Wales, Australia
522

A3.4 Dual-Polarized Bidirectional Rod Antenna for Diversity Reception at Street Microcell Base Stations
Toshikazu Hori, Keizo Cho and Kenichi Kagoshima
NTT Wireless Systems Laboratories, Japan
526

A3.5 The Generalised Maximum SINR Array Processor for Personal Communication Systems in a Multipath
Environment
D. J. Moelker, Y. Bar-Ness and A. Shah
Delft University of Technology, the Netherlands, and New Jersey Institute of Technology, USA
531
A3.6 A Downlink Beam Steering Technique for GSM/DCS1800/PCS1900
Per Zetterberg and Paul Leth Espensen
Aalborg University, Denmark

A3.7 A Hardware Testbed for Evaluation of Adaptive Antennas in GSM/UMTS
Preben E. Mogensen, Frank Frederiksen, Henrik Dam, Kim Olesen and Sten Leth-Larsen
Aalborg University, Denmark

A3.8 Performance of Switched Beam Smart Antennas for Cellular Radio Systems
Ming-Ju Ho, Gordon L. Stuber and Mark D. Austin
Georgia Institute of Technology, and Bellsouth Cellular Corp., USA

B3 Multiuser Communication
Organizer Y. BarNess

B3.1 Bounds for Optimum Multiuser DS-CDMA Systems
Rittwik Jana and Lei Wei
The Australian National University, Australia

B3.2 Multiuser Equalization Using Partial Response Based on Adaptive Array Antenna for DS/CDMA
Naoto Ishii and Ryuji Kohno
Yokohama National University, Japan

B3.3 Performance of Linear Detectors for DS/CDMA in Impulsive Noise Channel
Ho-Chi Hwang and Che-Ho Wei
National Chiao Tung University, Taiwan, ROC

B3.4 Blind Iterative Multiuser Delay Estimator for CDMA
Jorma Lilleberg, Esko Nieminen and Matti Latva-aho
Nokia Mobil Phones and University of Oulu, Finland

B3.5 Performance Analysis of Interference Cancellation Schemes for a DS/CDMA System Under Delay Constraint
Sun H. Hwang, Chung G. Kang and Soo W. Kim
Korea University, Korea

B3.6 A New Scheme for Multiuser Detection in DS-CDMA System
Minglu Jin and Kyung S. Kwak
Inha University, Korea

B3.7 Linear Multiuser Detectors for Synchronous CDMA Communication over Rayleigh Fading Channels
Wei-Chiang Wu and Kwang-Cheng Chen
National Tsing-Hua University, Taiwan, ROC

B3.8 Adaptive Algorithms for Asynchronous DS-CDMA Receivers
Graeme Woodward, Predrag Rapajic and Branka S. Vucetic
University of Sydney, Australia

C3 Broadband Personal Communication
Organizer D. Raychaudhry

C3.1 Performance Evaluation of a DS/CDMA Cellular System with Voice and Data Services
Wei Huang and Vijay K. Bhargava
University of Victoria, Canada

C3.2 A Hashing Scheme for Phone Number Portability in PCS Systems with ATM Backbones
Ravi Jain, Subhashini Rajagopalan and Li-Fung Chang
Belcore Communications Research, USA
C3.3 Proposal of Radio Modulation Level Controlled VPC in ATM Networks and its Call Blocking Improvement
Masahiro Nishi, Katsutoshi Tsukamoto, Minoru Okada and Sho zo Komaki
Osaka University, Japan

C3.4 An Architecture of Broadband Personal Communication Network
Duk Kyung Kim, Seung Joon Lee, Dae Woo Choi and Dan Keun Sung
KAIST, Korea

C3.5 ABR Message Transfer Schemes in Wireless ATM Networks
M. Inoue, H. Morikawa, M. Hatori and M. Mizumichi
The University of Tokyo, Japan

C3.6 Impact of Cell Recovery Coding on MPEG Video Over Wireless ATM
George Thomas
University of Southwestern Louisiana, USA

C3.7 Design of a Cellular Wireless ATM Access Network
K.C. Chua, T. C. Wong and J. W. Mark
National University of Singapore, Singapore, and University of Waterloo, Canada

C3.8 QOS-Based Call Admission Control for Integrated Voice and Data in CDMA Systems
Rong-Fong Chang and Shiunn-Wen Wang
National Cheng-Kung University, Taiwan, ROC

C3.9 A Proposal of Reserved Channel Dynamic Channel Assignment Algorithm for Multimedia Mobile Communication Systems
Tsuyoshi Tamaki, Hitoshi Aida and Tadao Saito
The University of Tokyo, Japan

D3 Hybrid Multiple Access Protocols
Organizer R. Prasad

D3.1 Spread Spectrum PRMA and Minimum Reservation Capacity Spread Spectrum PRMA for Microcellular Networks
Xiao Feng Dong and Le-min Li
Optical Fiber Comm., University of Electronic Science and Technology, China

D3.2 Hybrid Contention/Reservation Channel-Access Schemes for Integrated Voice/Data Wireless Networks
Akira Sugihara, Kei Enomoto and Iwao Sasase
Keio University, Japan

D3.3 Evaluation of Variable Data Rate CDMA for Multimedia Personal Satellite Communications with ETS-VI and COMETS Satellites
Tetsushi Ikegami, Takashi Takahashi, Huan-Bang Li, Eihisa Morikawa and Chicharu Ohuchi
Communications Research Laboratory, MPT, Japan

D3.4 Frequency and Interference Diversity in Slow Frequency Hopping Multiple Access Systems
M. Chiani, E. Agrati, M. Mezzetti and O. Andrisano
DEIS, University of Bologna and ITALTEL S.P.A., Italy

D3.5 Fairness of a Decentralized RLAN Based on Asynchronous DS/CDMA
Hans-Christian Perle and Bruno Rechberger
Swiss Federal Institute of Technology, Switzerland

D3.6 Performance Evaluation of R-ALOHA for Inter-Vehicle Communications at Millimeter Waves
Roberto Verdone
University of Bologna, DEIS, Italy
