CONTENTS

Preface v

PLENARY SESSIONS

Vector Potential, Gauge Field and Connection on a Fiber Bundle 2
Chen Ning Yang

*Vibrational Spectroscopy of Ion Cluster
Yuan T. Lee

*The Path of Zero Resistance: Past, Present and Future
Paul C. W. Chu

Progress of Physics Research in China 11
Duan Feng

τ-Charm Physics from the BES at the BEPC 14
Changchun Zhang

Progresses in Physics Research at Heavy Ion Research Facility of Lanzhou (HIRFL) 19
Y. X. Luo

Symmetries and Nuclei 25
Ernest M. Henley

Beijing Synchrotron Radiation Facility and Scientific Activities 38
Dazhao Ding

Construction and Applications of the Taiwan Light Source 48
Yuen-Chung Liu & Poh-Kun Tseng

*Low Energy Phenomenology and Unification
Guang-Zhao Zhou

*Manuscript not received.
* A Magnetic Spectrometer in Space for Extraterrestrial Study of Antimatter and Missing Matter on the International Space Station Alpha

  Samuel C. C. Ting

Wu Li: From Past to Future

  T. D. Lee

PARALLEL SESSIONS

Applied and Interdisciplinary Physics

Nonclassical Translational Motion of Cooled Atoms

  Lin Fucheng and Zeng Heping

The Field-Induced Polymerization of Styrene and Ordered Reconstruction of Polystyrene Surfaces

  W. Xu, L. Cai and Z. Y. Hua

Orthokinetic Mechanism in Acoustic Agglomeration and Fractal Dynamics

  Charles Chiu, James A. Edwards and O. A. Ezekoye

* Advances in Biomedical Optics, Spectroscopy, Photonics and Tomography

  Guichen Tang

Application of the New Technology of LSAMD in the Research of Ecological and Environmental Problem

  Chen Dieyan

The Best Value of Avogadro Constant

  Liu Fengchao

Analysis Au Content in Geogas Using SAD Technique

  W. Y. Ma, Q. Hui, M. Xue, W. X. Ji and D. Y. Chen
The Capillary X-ray Focusing System — A New Breakthrough of X-ray Optics in Nineteen Nineties — Some Research Achievements in China

Yiming Yan, Andong Liu, Dachun Wang, Xunliang Ding, Shengji Zhang, Yejun He, Baozhen Chen, Fuzhong Wei, Weiliang, Jun Chen, and Yicheng Liu

Observation of Berry's Phase at Single-Photon Level by Use of an Optical Fiber

Jiandong Huang, Qu Li, Yajun Zhu, Lifu Gong, and Yingli Chen

Some Inverse Problems in Condensed Matter Physics

Chen Nan-Xian

*Neutron Scattering Applications in the Petroleum Industry

M. Y. Lin

*Feasibility Study of NIR Medical Imaging for Brain Hematoma and Breast Tumor Detection

Shechao Charles Feng

Excitonic Optical Bistability in ZnSe-CdZnSe MQWs Optical Bistable Device on Reflection at RT

Fentosecond Studies on Optical Nonlinearities of PAN–PMMA Blend

Wei-Zhu Lin, Hui Wang, Tian-Shu Lai, and Dang Mo

Thermal Lens Effect Coupled Magneto-Optical Effects in a Ferrofluid

Sui Hua Yuan, Xiaowei Chen and Jinping Yuan

The Physics of Life Evolution — The Evolution of Genetic Code and Gene Sequences

Luo Liaofu

A Study of Mechanism of Biological Effect on Plants Caused by Ion Implantation

Lu Ting
Biological Photochrome Bacteriorhodopsin Film Based Photon Transistor and Photonic Application

Chun-ping Zhang, Li-qun Gu, An-Fu Niu, Guang-Yin Zhang, Yong-Mei Wang, Ming-Rong Tong, Ji-Lun Pan, Q. Wang Song, B. G. Gross, and R. R. Birge

The Effect of Low Dose Fast Neutrons Irradiation on the Growth of Tilapia Nilotica and Chicken

Wu Shan, Jia Luowu, Wang Jiaxin, and Wang Jiajun

Effects of Physical Factors on Growing Processes of Plants

Xiong Yuqing, Xiong Jianwen and Zhou Chisheng

An Optimization Method for Designing Diffractive Phase Elements

Guo-Zhen Yang, Bi-Zhen Dong and Ben-Yuan Gu

Nuclear Microscopy Research at National University of Singapore

S. M. Tang

Application of Physics and Neural Networks in Financial Industry

Daxi Li

*Experimental Investigation on the Inversionless Light Amplification in Sodium

Jin-yue Gao

Nonequilibrium Statistical Theory of Fracture

Xing Xiu-San

Astrophysics and Gravity

*An Introduction to the LAMOS Project

Zhu Yao-quan et al.

*Recent Developments in Numerical Relativity

Wai-Mo Suen

The Mechanism of Energy Transport and Instability in Electroweak Phase Transition

Baolian Cheng
Neutron Stars and Strange Stars
Tan Lu

Effect of Carbon and Oxygen Burning Rate on Supernova Explosion
Peng Qiu-He

The Clustering of Quasars
Xingfen Zhu

*Numerical Solution of Relativistic Equation for Fast Rotating Objects
Wu Xue-jun

A Search for Abnormally Large Solar-Neutrino Coherent Scattering in Crystals
Luo Jun, Chen Xiao, Fan Shuhua, and Li Fangyu

Gravitational Waves Detection Research at Zhongshan University
Hu Enke

*Gravitational and Particle Radiation from Cosmic Strings
Anzhong Wang and Nilton O. Santos

Atomic and Laser Physics

*The Elimination of Intramolecular Vibrational Energy Transfer by Strong CW Laser Field
Qingshi Zhu

*Picosecond Optical Parametric Oscillator Pumped by a Passively Mode Locked Ti: Sapphire Laser
Fu-Jen Kao, J. H. Hsu and Wunshain Fann

*Some Interesting Processes Using Highly Relativistic Particles in Crystals
Nelson Cue

*Fractal and Chaotic Behavior in Atoms and Molecules
Jian-Min Yuan

*Emission Line Width of Laser Action in Random Gain Media
Chen Hong Pei Alpha, Nelson Cue and K. M. Yoo
Laser Induced Ionization of Macro Molecules
Ding Dai-Jun

Mechanics in Molecular Dimension
Li Wenchong

Scaling of Cross Sections in Cq+ Ions Collisions with Hydrogen
Qiu Yu-Bo and Long Yan-Qiu

Experimental Measurement of the Natural Radiative Life-Times of the 3d104snp1P1 Series in Sn Atoms
Jiang Zhan-kui, R. Zene, Luo Caiyan, J. Larsson and S. Svanberg

The Energy Spectrum of Electron in the Wiggler
Ma Ben-Kun, Liu Shao-Jun and Huang Zhong-Bing

Photoexcitation of Transition Ions of Unusual Valence in Laser Materials
Weiyi Jia, Huimin Liu and William M. Yen

Atomic Physics

Basic Studies on Atoms, Molecules and Clusters
Jia-Ming Li

Photoionization, Photoelectron, and Photodissociation Studies of Clusters and Radicals
Cheuk-Yin Ng

Atomic Photoionization Dominated by Doubly Excited Resonances
T. N. Chang

Advanced Soft-X-ray Spectroscopies and Condensed Matter Physics Research
C. T. Chen

From Free Cluster to Cluster Assemblies
Wang Guang Hou
Structure and Magnetism of Rhodium Clusters
   Yang Jinlong, Deng Kaiming, Wang Kelin, and Flavio Toigo

*Interference Effect and Coulomb Cluster Formation of Ion Motion in Ion Traps
   Zhu Xi-wen

Investigation on Double Rydberg States of Complicated Atom
   Xu Xiangyuan, Huang Wen, Xu Chengbin, Xue Ping, and Chen Dieyan

Development of Electron Momentum Spectrometer in China
   Qian Qing, Chen Xuejun and Liying

Distorted Wave Calculations of the Electron Impact Ionization Cross Sections of Si$^{4+}$
   Chen Chongyang, Hu Wei, Fang Dufei, and Wang Yansen

*An Atom Model Regarding to Spin–Spin Interaction
   Sun Fang

Condensed Matter and New Material

Fractional Dimension of Solids Studied by Optical Spectroscopy
   Mo Dang, Yu Zhaoxian, Lin Yongyao, Huang Xiuqing, and He Xing-Fei

On Physical “Fractals”
   Huang Zu-Qia

Pattern Formation in Electrochemical Deposition
   Mu Wang and Nai-ben Ming

Determination of Micro-Structure and Lattice Vibration for Molecular System with Laser Spectroscopy of Probe Rare Earth Ions
   J. Y. Zhou, R. H. Li, Q. Luo, D. J. Zhou, J. X. Meng, and Y. S. Yang
Photoelectron Holography Studies of Surfaces

T.-C. Chiang

Evidence for a Novel Stable Crystalline Structures of Water at Room Temperature and Normal Atmospheric Pressure

Shui-Yin Lo, Angela K. K. Lo, Li Wen-Chung, and Xu Geng

MR Imaging Using $^{129}$Xe or $^3$He Gas of Laser-Enhanced Nuclear Spin Polarization

Xizhi Zeng and Xianping Sun

Theoretical Model of NMR Line-breadth of Strong Paramagnetic Ions in Solution

Lin Qiaoyuan

On Cross-Sectional Transmission Electron Microscopy Study of Carbon Nanotubules

G. Hu, X. F. Zhang and Z. Zhang

Evidence of Grain Refinement in Highly Undercooled Ni$_{70}$Cu$_{30}$ Alloy

J. Z. Xiao, K. K. Leung and H. W. Kui

Nonlocal Effects on the Optical Response of a Surface with Roughness

Shu Wang and Jesus Siqueiros

Photonic Gaps and Photonic Crystals

C. T. Chan

Studies of the Amorphisation Reaction and the Structure Properties of Some Alloys

Meiya Li, S. Enzo, J. A. Hunt, I. Soletta, N. Cowlam, and G. Cocco

*Hierarchical Mobility Edges in a Class of One-Dimensional Generalized Quasi-Lattice

Liu you-yan and Fu Xiu-yang

The Electronic Localizations of Ni–Cr Quasilattices

Zhenhong Zhou and Xiangbo Yang
Structure and Magnetic Properties $R_2Fe_{17-x}Ga_xCy$ Compounds
*Bao-gen Shen and Zhao-hua Cheng

The Magnetic Properties of Granular Films
Y. W. Du, H. Sang, Z. S. Jiang, J. T. Ji,
W. N. Wang, and S. Y. Zhang

Specific Heat Anomaly in Very Weak Itinerant Ferromagnet Fe$_2$N
*Guan-mian Chen, Jian-zhen Liang, Yu-peng Wang,
and Jian-lin Luo

*Frequency Resonance of Electrolyte and Nonlinear Dielectric
Properties
Chen Kun-quan et al.

Critical Behavior of the Frenkel-Kontorova Model with Various
Potentials
*Bambi Hu

Structural Modes in the Frenkel-Kontorova Model
W. K. Koo, W. S. Chew and B. S. Lee

Practical and Algorithmical Manifestations of Quantum Chaos
*Baowen Li and Marko Robnik

The Cavity Method: A New Approach to Neural Network Analysis
K. Y. Michael Wong

Evolution of Solitary Modes in Anharmonic Molecular Lattice Models
W. K. Koo, B. S. Lee and T. L. Lim

*Novel Results from the Monte Carlo Simulation of a Coupled XY
Model
L. M. Jiang and C. C. Huang

*Theory of Visco-Elastic Internal Friction and Its Application to
Phase Transitions
Zhang Jin-xiu

The Local Sine-Gordon Model
*Bo-Wei Xu and Yu-Mei Zhang
The Critical Exponents of the 1D Continuum Heisenberg-Ising Model 352
Yu-Mei Zhang and Bo-Wei Xu

Studies on the Structure of Nanocrystalline Tin Oxides 356
Zheng Yufang, Yu Zhengfang, Tong Xingwu, Lin Guangming, Liu Wenhao, Zhou Qifa, and Su Aiguo

Laser-Based Mild-Infrared Generation by Optical Parametric Frequency Down-Conversion 362
Chen Weidong, Jean Burie and Daniel Boucher

Hydrogen Adsorption Induced Phase Transitions on Si(100)-C(8×8) Studied by Leed 368
Xiaoming Hu and Zhangda Lin

Free Electron Laser and Synchrotron Radiation 374

Free Electron Radiation and Beijing Free Electron Laser Xie Jialin

SR-TXRT Experiments at BSRF 380
Y. R. Wu, J. X. Pan, Y. A. Xiao, and Z. Y. Chao

*Diffuse X-Ray Scattering Station of Beijing Synchrotron and Its Applications to X-Ray Scattering of Amorphous Multilayers Jiang Xiao-Ming et al.

Study on the Structures Under High Pressure with Synchrotron Radiation at BSRF 386
Che Rongzheng, Xiu Lisong and Zhou Lei

An EXAFS Study on Local Structure of Liquid Germanium 389
Wang Yuren, Lu Kunquan and Kozaburo Tamura

Status of the Hefei Light Source (HLS) 392
Yuming Jin
The Progress of SRPES Studies on the Surface and Interface of Semiconductor at NSRL

P. S. Xu, S. H. Xu, E. D. Lu, X. J. Yu, F. P. Zhang, and X. Y. Zhang

Scientific Activities at National Synchrotron Radiation Laboratory

Zhang Xinyi

X-ray Laser Experimental Investigation

Chunyu Shutai

Synchrotron Radiation X-ray Lithography at IHEP

Wu Shuxin

A New Perturbative Approach to Atomic Processes in Strong Laser Fields

Chen Baozhen and Chen Peng

High-T_c Superconductivity

*Recent Developments in High-T_c Superconductivity

Zhao Zhong-xian

Harmonic Frequency Mixing at Millimeter Waveband Using High T_c Josephson Junction

*High-Temperature Superconductors Electronic Structure and Superconducting Gap Probed by Angle-Resolved Photoelectron Spectroscopy

Z.-X. Shen

The Origin of Superconductivity: A New Pairing Mechanism

J. D. Fan and Y. M. Malozovsky

The Momentum Distribution Functions in the Hubbard Model at Half-filling: Some Rigorous Results

Guang-Shan Tian
Fermion-Spin Approach to Study the t-J Model

Shiping Feng

*Microscopy Theory of the Vortex-Lattice State for D-Wave Superconductors

Yong Wang

**Liquid Crystals and Polymers**

*Shape Problem in Biomembranes and Smectic Liquid Crystals: Renewal of Poisson’s Theory of Surface Elasticity

Ou-Yang Zhong-can

*Phase Transitions in Thin Liquid-Crystal Films

John T. Ho

Theory and Simulation of Strongly Interacting Dipolar Fluids: Ferroelectric Liquid Crystals, Ferrofluids and Electrorheological Fluids

Dongqing Wei

*Electroclinic Effects Near the $S_A - S^*_C$ Transition in a Homogeneously Aligned $S_A$ Cell

Lizhen Ruan and J. R. Sambles

*A Study of Homeotropically Aligned Ferroelectric Liquid Crystals by Means of Half-Leaky Guided Modes

Fuzi Yang, G. W. Bradberry and J. R. Sambles

Studies of Polymer-Stabilized Cholesteric Liquid Crystal Texture Films

Andy Y.-G. Fuh

Conformation of Randomly Branched Polymers

Zheng Yu Chen and Shi-Min Cui

Growth Properties of Cubic Boron Nitride Films Deposited by Chemical Vapor Deposition

Chen Guang-hua, Guo Yong-ping, Li Gong-chuan, and Song Zhi-zhong
Mathematical and Applied Physics

Symbolic Dynamics and Knot Theory
   Hao Bai-lin

The Role of Quasinormal Modes in Open Systems
   E. S. C. Ching, P. T. Leung, W. M. Suen, and K. Young

The Full Solution of Independent Oscillator Model and the Properties of the Environment
   Gu Jian-Zhong, Wu Xi-Zhen and Zhuo Yi-Zhong

Gauge Structure of Quantal System under Berry’s Connection
   S. W. Chan and P. C. W. Fung

The Interpretation and the Supplement of T. D. Lee’s Discrete Quantum Mechanics
   B. K. Cheng

Direct Quantization from the Lagrangian of a Classical System is Made Possible by Finding a Schrodingerian Real Wave Equation
   Robert L. W. Chen

*An Investigation of the Magnetic Artificial Structures
   Z. Q. Qiu

Colossal Low Field Magnetoresistance in La-Ca-Mn-O Ceramic Thin Films
   X. T. Zeng, Z. S. Li, J. H. Hao, W. K. Chao, and H. K. Wong

*Composition Dependence of Giant Magnetoresistance in
   \((La_{1-x}Y_x)_{2/3}Ca_{1/3}MnO_3\) (0 ≤ x ≤ 1)
   Zisen Li, X. T. Zeng and H. K. Wong

The Interactions of NdFeB Magnet and Al at Elevated Temperatures
   C-D. Qin and D. H. L. Ng

Theory of GMR of Magnetic Trilayer
   Guo-Lin Yang, Bo-Zang Li, Lie-Ming Li, and Fu-Cho Pu
Mathematical and Computational Physics

Computer-Aided Materials Design and Solid State Theory

Ding-sheng Wang

A Finite Element Approach to the Two-Skyrmion Problem

S. S. M. Wong

Viscous Boundary Layer Measurements in Rayleigh-Bénard Convection

Ke-Qing Xia, Yong-Bao Xin and Penger Tong

Incoherent Photon-Correlation Velocimetry and Its Applications in Turbulent Convection

Y.-B. Xin and K.-Q. Xia

Hypertranscendental Physics

C. H. Chin

TSPIXEIII — A New Program for PIXE and μ-PIXE Spectra Simulation of Inhomogeneous Thick Target Analysis

Zhongning Dai, Chigang Ren and Fujia Yang

Electronic Structures and Band Offsets of Wurtzite Compound Strained-Layer Superlattice Interface GaN/AlN

San-huang Ke, Mei-chun Huang and Ren-zhi Wang

The Effective Thermal Conductivities of Fibrous Composites Using the Local Fractal Technique

Boming Yu, Duanming Zhang and Kailun Yao

Radiation Principle, Generalized Functions and Assumed Damping

Zhen-Qiu Lu

Mathematical and Nonlinear Physics

The Mass Term of a Non-linear Gauge Field Lagrangian

Qi-Keng Lu
Double-Chain Localization in the Presence of Random Flux
   W. L. Chan, X. R. Wang and X. C. Xie

Electronic Configurations of Atomic Elements
   K. U. Lu

Tranverse Spatial Modulation of a Gaussian Beam in Photorefractive BaTiO₃:Ce
   Ping Xie, Jian-Hua Dai, Peng-Ye Wang, and Hong-Jun Zhang

Solitary Excitations in Two-Dimensional Quantum Antiferromagnets
   Wu-Ming Liu and Fu-Cho Pu

*Crystallization of Non-Crystalline Silicon and Fractal Structure
   Wang Yue et al.

On-off Intermittency in Random Map Lattices
   H. L. Yang and E. J. Ding

A Nonlinear Dynamical Model of Ion Channel in Cell Membrane
   Liu Bingzheng and Bai Dongxue

The Elementary Report of Experimental Research on Nonlinear Behaviour of Heart System
   Naiwen He, Yuquan He, Gang Yao, Yongjian Gu, Xingyuan Wang, Zhiyao Zhang, Huaxin Zhang, Xuequan E, and Zhifa Dong

*Numerical Solution of Time-Delayed Dynamic Systems
   Zhao Hong and Wang Ying-hai

Unified Mathematical Model for Physics Realizing Thought of Leibniz and Mach
   Sze Kui Ng

Nanostructure

A Study of Atom Dynamics of Solid Surfaces and Manipulation of Atoms
   Tien T. Tsong
From Amorphous Solids to Nanocrystalline Materials 608
   K. Lu

*Electronic and Structural Properties of Nanotubes
   Steven G. Louie

*Thermal Degradation of Patterned Surfaces
   Lei-Han Tang

Silver Clusters on SnO₂ Thin Film Surfaces and Their Application
to Gas Sensors 611
   Jianping Zhang and Konrad Colbow

Statistics of Scattering States in Quantum Dots 620
   Yongjiang Wang, Ningjia Zhu, Jian Wang, and Hong Guo

Microstructure Properties of Nanocrystalline Silicon Films 626
   Hongyi Lin, Qiuqun Qi, Yunchen Jiang Xiusan Xing,
   Yue Wang, and Yingxue Li

*Effect of High Pressure on the Properties of Several Nanoscale Solids
   Su Wen-hui et al.

*Nanomicrostructure of Sn Oxide
   Zhen Yu-fang et al.

*Quantum Dot Effect of Nanocrystals in Nano-Silicon Film
   Ge Yu-liang et al.

Interface Effects in Hydrogenated Nanocrystalline Silicon
Films Prepared by PECVD 629
   Liao Xianbo, Yun Feng, Wang Yan, Diao Hongwei,
   and Kong Guanglin

Nuclear Physics

*Search for Quark Matter with PHENIX at RHIC
   Shew-Kuey Mark
Particle Production Measurements by E802/E859/E866 and Recent Results from NMA in $^{197}$Au + $^{197}$Au Collisions at 11.6 A.GeV/c

Sun-Yiu Fung for the E-802 Collaboration

Recent Results of E866 on Hadron Production in Au + Au Reaction at AGS Energies

Ziping Chen

Exclusive Charged Pion Photo-Production in $^{12}$C

Comparison of High-Spin Band Structures in $^{184}$Hg and Other Nuclei

First Observation of Mass Dependence of Reaction Time in $^{19}$F + $^{51}$V Reaction

Lu Jun, Wang Qi, Xu Hushan, Li Songlin, Yin Xu, Fan Enjie, Zhang Yuhu, Zhu Yongtai, Li Zhichang, Zhao Kui, Lu Xiuqin, and Hu Xiaqing

Dynamic Realization of Statistical State in Finite System

Xizhen Wu, F. Sakata, Yizhong Zhuo, Zhuxia Li and Jian-Zhong Gu

The Multi-Fragmentation in Hot Nuclei at IMP

G. X. Dai

The Level Structure of Transitional Neutron-Deficient Nuclei

S. Wen, X. A. Liu, H. Zhang, G. S. Li, S. G. Li, G. J. Yuan, P. K. Weng, C. X. Yang, S. Sun, Y. Guo, and X. Lei
The Production and Mass Measurement of Nuclei Far from Stability Via Exotic Transfer Reaction 670
Zhao Kui, Lu Xiuqin, Guo Jiyu, Cheng Yehao, Huang Xiaolin, Ma Yong, Li Zhichang, Li Shuyuan, Ruan Ming, and Jiang Chenglie

The Collective Excitations in Nuclear Matter 672
Liang-Gang Liu

The Neutron Shell Structure Study by Means of $^96\text{Zr}(d,t)^{95}\text{Zr}$ Reaction 675
Wen Chenlin

Experiment of Neutron Multiplication in LEAD 679
Jiang Wenmian, Chen Yuan, Liu Long, Yuan Jiaming, Guo Haiping, Shen Jian, Tian Dongfeng, and Liu Chengan

A Library of Nuclear Basic Data and Nuclear Model Parameters 682
Su Zongdi, Ge Zhigang, Zhang Limin, Sun Zhengjun, Huang Zhongfu, Dong Liaoyuan, Liu Jianfeng, Zuo Yixin, Yu Ziqiang, Ma Gonggui, Chen Zhenpeng, Zhu Yaoyin, Zhang Yujun, and Wu Shan

Particle and Nuclear Physics

*Physics Goals of a $\mu^+\mu^-$ Collider
T. Han et al.

*Test of CP, T and CVC in Tau Decay Using the Tau-Charm Factory Proposed in Beijing
Yung Su Tsai

Strange-Beauty Meson Production by Fragmentation in Proton-Antiproton Collisions 688
Robert J. Oakes

The Instrumental Charge Asymmetry of Tracking Detectors in Strong Magnetic Field 693
Sijin Qian
Orbiting Valence Quarks and Spin Asymmetry in High Energy Collisions  
Liang Zuo-tang  

*The Way of Perturbative QCD  
Xiandong Ji  

*Measurements of the Diboson Productions at Tevatron, Fermilab, with DØ  
Liang-Ping Chen  

A More Possible Dibaryon  
F. Wang, J. L. Ping, G. H. Wu, L. J. Teng, and T. Goldman  

The Study of GDR at HI-13 Tandem  
Huang Zhengde, Zhu Lihua, Hou Long, and Ding Dazhao  

Antiproton-Nucleus Scattering  
Li Yang-guo  

Particle Experiments  

Synchrotron Radiation Sources and Research  
L. C. Teng
