

142/38

PROCEEDINGS OF THE NINTH
INTERNATIONAL CONFERENCE ON
COSMIC RAYS

LONDON

September 1965

VOLUME 2

Published by

THE INSTITUTE OF PHYSICS AND
THE PHYSICAL SOCIETY

47 Belgrave Square, London, S. W. 1.

Editorial Office: 1 Lowther Gardens,
Prince Consort Road, London, S. W. 7.

[1966]

Contents of Volume 2

Page Paper

CHAPTER 7 INVITED PAPERS

- 609 Highlights in air shower studies, 1965.
K. Greisen
- 616 Considerations about high energy interactions.
G. Cocconi

CHAPTER 8 EXTENSIVE AIR SHOWERS

- 621 EAS 1 Some properties of muon showers observed underground.
J. C. Barton
- 624 EAS 2 Structure of the central part and the core of a muon shower at a depth of 40 m w.e.
S. N. Vernov, Yu. A. Netchin, D. A. Stoyanova, B. A. Khrenov,
Yu. A. Fomin and G. B. Khristiansen
- 627 EAS 3 Ultra-high energy muons (> 200 GeV) in extensive air showers.
B. K. Chatterjee, S. Lal, T. Matano, G. T. Murthy, S. Naranan,
K. Sivaprasad, B. V. Sreekantan, M. V. Srinavasa Rao and
P. R. Vishwanath
- 632 EAS 4 Observation of muon air showers.
Y. Sekido, I. Kondo, T. Murayama, H. Okuda, S. Sakakibara and
K. Fujimoto
- 635 EAS 5 Properties of extensive air showers rich in muons.
B. K. Chatterjee, G. T. Murthy, S. Naranan, B. V. Sreekantan,
M. V. Srinivasa Rao and S. C. Tonwar
- 637 EAS 6 Arrival direction of muon-rich extensive air showers.
T. Matano, I. Miura, M. Nagano, S. Shibata, K. Suga and H. Hasegawa
- 639 EAS 7 Some properties of mu-poor EAS.
J. Gawin, J. Hibner, J. Wdowczyk, A. Zawadzki and R. Maze
- 642 EAS 8 High energy nuclear active particles in extensive air showers at 5200 m altitude.
H. Hasegawa, M. Noma, K. Suga and Y. Toyoda
- 646 EAS 9 New data about the nuclear active component of 'young' atmospheric showers.
Kh. Babajan, N. L. Grigorov, E. A. Mamidjanian and
V. Ya. Shestoperov
- 649 EAS 10 Discussion of one model of the formation of extensive atmospheric showers.
N. L. Grigorov, V. Ya. Shestoperov, R. A. Nimmik, Kh. P. Babajan
and N. G. Boyadjan
- 651 EAS 11 A Monte Carlo simulation of the nuclear active cascade in EAS (analysis of Bolivian air shower joint experiment).
H. Bradt, M. La Pointe and S. Rappaport
- 656 EAS 12 High energy nuclear active and muonic components in extensive air showers.
R. Cowsik
- 660 EAS 13 Low energy nuclear active particles in EAS.
T. V. Danilova
- 662 EAS 14 A new method of solving the nuclear cascade equation.
L. G. Dedenko
- 664 EAS 15 Observation of the character of EAS cores.
S. Miyake, K. Hinotani, N. Ito, S. Kino, H. Sasaki and H. Yoshii
- 668 EAS 16 Studies of the cores of extensive air showers.
A. D. Bray, D. F. Crawford, D. L. Jauncey, C. B. A. McCusker,
D. Melley, D. Nelson, P. C. Poole, M. H. Rathgeber, S. H. Seet,
J. Ulrichs, R. H. Wand and M. M. Winn
- 672 EAS 17 Fine structure of air shower cores observed with 20 m² spark chamber.
S. Shibata, M. Nagano, T. Matano, K. Suga and H. Hasegawa
- 676 EAS 18 Studies on high energy cascades using a neon hodoscope.
M. Samorski, C. Schrier and J. Trümper

<i>Page</i>	<i>Paper</i>	
678	EAS 19	Experiments on the pulse spectrum observed from scintillation and Cerenkov detectors at sea level. H. R. Allan, P. R. Blake, J. K. Jones, S. C. Lillicrap, J. K. Pidcock, R. J. O. Reid and K. E. Turver
681	EAS 20	Nuclear active particles in extensive air showers near sea level. T. Kameda, T. Maeda, H. Oda and T. Sugihara
685	EAS 21	Response of plastic scintillators to cosmic ray air showers. A. D. Bray, D. F. Crawford, D. L. Jauncey, C. B. A. McCusker, D. Melley, D. Nelson, P. C. Poole, M. H. Rathgeber, S. H. Seet, J. Ulrichs, R. H. Wand and M. M. Winn
689	EAS 22	Comparative response of Cerenkov and scintillator detectors to large air showers. R. Dufresne, E. W. Kellermann and L. Towers
691	EAS 23	Lateral distribution, energy spectrum and fluctuations of the muon component in electromagnetic cascades. J. Wdowczyk
694	EAS 24	Attenuation of the mu component of EAS determined by the barometric effect. R. Firkowski, J. Wdowczyk and A. Zawadzki
696	EAS 25	Semi-empirical determination of the fluctuation of the EAS mu component. R. Firkowski, J. Gawin, J. Hioner, J. Wdowczyk, A. Zawadzki and H. Maze
698	EAS 26	Theoretical considerations of the radiofrequency emission from extensive air showers. J. V. Jelley
701	EAS 27	The detection of radio pulses of wavelength 6.8 m, in coincidence with extensive air showers, in the energy region 10^{16} - 10^{17} eV. F. G. Smith, N. A. Porter and J. V. Jelley
706	EAS 28	A radio system for the detection of air showers. N. A. Porter, C. D. Long, B. McBreen, D. J. B. Murnaghan and T. C. Weekes
708	EAS 29	Studies of primary cosmic rays in the energy region 10^{14} to 10^{17} eV (Bolivian Air Shower Joint Experiment). Y. Toyoda, K. Suga, K. Murakami, H. Hasegawa, S. Shibata, V. Domingo, I. Escobar, K. Kamata, H. Bradt, G. Clark and M. La Pointe
712	EAS 30	The composition of photon initiated showers at high energies. O. Braun and K. Sitte
715	EAS 31	The primary energy spectrum from 8×10^{14} - 4×10^{17} eV. H. Bradt, G. Clark, M. La. Pointe, V. Domingo, I. Escobar, K. Kamata, K. Murakami, K. Suga and Y. Toyoda
718	EAS 32	BASJE angle correlation. P. Barker, W. Hazen and A. Hendel
720	EAS 33	The density spectrum of extensive air showers at 2285 m. J. B. T. McCaughan, C. B. A. McCusker, S. H. Seet, R. H. Wand, B. O'Donnell, J. R. Prescott and B. G. Wilson
721	EAS 34	The altitude variation of the extensive air shower density spectrum. D. B. Swinson and J. R. Prescott
724	EAS 35	Shower front structure and the properties of extensive air showers. A. J. Baxter, A. A. Watson and J. G. Wilson
727	EAS 36	Arrival time distributions of heavy particles in air showers. Y. Pal and S. N. Tandon
731	EAS 37	The installation for study of EAS and nuclear interactions of cosmic ray particles with energies 10^{12} - 10^{16} eV. A. D. Erlykin, N. M. Nesterova, S. I. Nikolsky, V. I. Sokolovsky, E. I. Tukish, E. P. Yudin and V. I. Yakovlev
734	EAS 38	Correlations between the electron, muon and N components in extensive air showers. B. K. Chatterjee, G. T. Murthy, S. Naranan, B. V. Sreekantan, M. V. Srinivasa Rao, S. C. Tonwar and R. H. Vatcha
738	EAS 39	The extensive air shower experiment at Kiel. E. Bagge, E. Böhm, R. Fritze, U. J. Roose, M. Samorski, C. Schnier, R. Staubert, K. O. Thielheim, J. Trümper, L. Wiedecke and W. Wolter
742	EAS 40	Air showers at high altitude. K. Kamata, K. Murakami and S. Kawasaki
744	EAS 43	Extensive air showers observed in the emulsion chamber. Japanese and Brazilian Emulsion Groups
751	EAS 44	Variation of the characteristics of EAS with atmospheric depth. A. N. Suri

<i>Page</i>	<i>Paper</i>	
754	EAS 45	Theoretical studies of the muon component of EAS. B. Holyoak, M. G. Thompson and J. Widowczyk
758	EAS 46	Calculations on the propagation of mesons in extensive air showers. A. M. Hillas
762	EAS 47	Direct measurement of attenuation length of extensive air showers. S. Miyake, K. Hinotani, N. Ito, H. Sasaki, H. Yoshii and S. Kino
765	EAS 48	The differential momentum spectrum and charge ratio of muons in extensive air showers. G. D. Rochester, A. J. Somogyi, K. E. Turver and A. B. Walton
769	EAS 49	Study of the extensive air showers with fixed mu meson number and with fixed electron number. S. N. Vernov, G. B. Khristiansen, A. T. Abrosimov, V. B. Atrashkevitch, I. F. Belyaeva, O. V. Vedeneev, G. V. Kulikov, Yu. A. Netchin, V. I. Solovieva, Yu. A. Fomin and B. A. Khrenov
772	EAS 50	The muon component of air showers. H. R. Allan, P. R. Blake and J. K. Pidcock
774	EAS 51	Comparison of various models of EAS development with experimental data and the prospects of cosmological and nuclear aspects of EAS investigation. G. B. Khristiansen, V. B. Atrashkevitch, N. N. Kalmykov and Yu. A. Fomin
779	EAS 52	Monte Carlo studies on extensive air shower development. K. O. Thielheim and S. Karius
783	EAS 53	Mean square angular and lateral spreads of electrons and photons in a cascade shower. A. Misaki
787	EAS 54	The measurement of the time variations of small air showers. J. K. Jones
789	EAS 55	Inverse problem in the cascade theory of showers. V. A. Astafiev and I. P. Ivanenko
792	EAS 56 A	Cascade theory of showers for light and heavy substances taking into account the polarization of the medium. A. K. Bakhtadze, I. P. Ivanenko and B. E. Samosudov
796	EAS 56 B	The process of bremsstrahlung and pair production as they are regarded in the cascade theory of showers. V. V. Guzhavin and I. P. Ivanenko
799	EAS 57	Energy spectrum, possible chemical composition and anisotropy of the ultra-high energy primary cosmic radiation. G. B. Khristiansen, A. T. Abrosimov, V. B. Atrashkevitch, G. V. Kulikov, V. I. Solovieva, Yu. A. Fomin and B. A. Khrenov
802	EAS 58 A	Time lags of nuclear interacting particles in extensive air showers. B. K. Chatterjee, G. T. Murthy, S. Naranan, B. V. Sreekantan, M. V. Srinivasa Rao and S. C. Tonwar
805	EAS 58 B	Search for heavy mass particles in air showers. B. K. Chatterjee, G. T. Murthy, S. Naranan, B. V. Sreekantan, M. V. Srinivasa Rao and S. C. Tonwar
808	EAS 59	A search for heavy particles in the cosmic radiation. G. Damgaard, P. Grieder, K. H. Hansen, C. Iversen, E. Lohse, B. Peters, T. Rengarajan, A. Klovning and E. Lillethun
810		Extensive air showers (Rapporteur paper). C. B. A. McCusker

CHAPTER 9 HIGH ENERGY INTERACTIONS

817	HE 1	The Tien-Shan high altitude installation for studying strong interactions at 100-1000 GeV (preliminary results). N. A. Dobrotin, E. V. Denisov, S. A. Dubrovina, D. V. Emeljanov, I. N. Fetisov, V. V. Guseva, N. E. Hromich, V. G. Ignatjeva, V. M. Kim, K. A. Kotelnikov, A. M. Lebedev, V. M. Maximenko, A. E. Morosov, A. G. Novikov, O. F. Ogurзов, V. S. Puchkov, D. F. Rakitin, S. A. Slavatskiy, V. V. Sokolovskiy, V. I. Titov and N. G. Zelevinskaya
821	HE 2	Ballon experiment using spark chambers and an ionization spectrometer. K. Pinkau, U. Pollvogt, W. Schmidt and R. W. Huggett
824	HE 3	The nuclear cascade process in the ionization calorimeter. E. V. Denisov, L. G. Dedenko, S. A. Dubrovina, R. Z. Denikaev, Yu. A. Emeljanov, I. N. Fetisov, Yu. T. Lukin, A. E. Morosov, O. F. Ogurзов, V. V. Sokolovskiy, S. A. Slavatskiy and J. S. Takibayev

<i>Page</i>	<i>Paper</i>	
827	HE 4	Investigation of the nucleon interactions at energies above 10^{13} eV. Yu. A. Smorodin, M. V. Solovyev, R. A. Antonov, L. T. Baradzei, V. V. Rykov, E. A. Kanevskaya, A. V. Apanasenko, S. I. Tulinova and O. W. Sorokin
830	HE 5	An investigation of the nuclear active component of cosmic rays. D. T. Vardumian, G. A. Marikian and K. A. Matevosian
831	HE 6	Four-momentum transferred in high energy interactions. I. N. Erofeeva, L. G. Mitshenko, V. S. Murzin, I. D. Rapoport, A. P. Rotshin and L. I. Saricheva
833	HE 7	The distribution of the energy portion transferred to π^0 mesons. I. N. Erofeeva, L. G. Mitshenko, V. S. Murzin, I. D. Rapoport and L. I. Saricheva
835	HE 8, 9	Observation of extremely high energy nuclear events by emulsion chamber. Japanese and Brazilian Emulsion Groups
840	HE 10	A study of high energy interactions in graphite. P. K. Malholtra, P. G. Shukla, S. A. Stephens, B. Vijayalakshmi, J. Boulton, M. G. Bowler, V. M. Clapham, P. H. Fowler, H. L. Hackforth, J. Keereetaveep and S. N. Tovey
844	HE 11	High energy jets produced by heavy primary nuclei of cosmic origin and their fragmentation products. F. Abraham, R. Levi Setti, C. H. Tsao, J. Gierula, K. Rybicki, W. Wolter, R. L. Fricken and R. W. Huggett
849	HE 12	High energy cosmic ray jet research at Krakow. Krakow Emulsion Group
851	HE 13	On the generation mechanism of high energy pions in cosmic rays. N. L. Grigorov, V. Ya. Shestoporov, S. I. Brikker, A. V. Podgurskaya, L. M. Poperyekova, A. I. Plekhova, A. I. Savelyeva, and V. A. Sobinyakov
854	HE 14	Azimuthal angular distributions of secondary particles in cosmic jets. M. P. Mishakova and B. A. Nikolsky
857	HE 15	Elastic and electromagnetic proton interactions at 3 TeV. C. B. A. McCusker, L. S. Peak and R. L. S. Woolcott
860	HE 16	Interaction path of high energy nucleons ($10^{11} - 10^{13}$ eV) in the atmosphere. N. L. Grigorov, V. A. Sobinyakov, Ch. A. Tretyakova, V. Ya. Shestoporov, Kh. P. Babalian and G. G. Dulyan
863	HE 17	Inelastic neutron cross section measurements near 100 GeV. V. N. Bolotov, M. I. Devishev, L. F. Klimanova and A. P. Shmeleva
865	HE 18	Shower production by pions and protons with momenta 0.1 and 20 GeV/c in thin layers of matter. A. V. Khrimian, V. V. Avakian, M. P. Pleshko and T. G. Vartanian
870	HE 19	Inelastic n-p cross section at 60 GeV. G. Bozoki, E. Fenyves, C. Christov, N. Ahababian, B. Betev and S. T. Kavlakov
872	HE 20	An analysis of methods of measurements of the characteristics of elemen- tary interactions. V. S. Murzin
875	HE 22	The energy spectra of cascades observed at balloon altitudes and the flux of primary protons. P. K. Malholtra, P. G. Shukla, S. A. Stephens, B. Vijayalakshmi, J. Boulton, M. G. Bowler, V. M. Clapham, P. H. Fowler, H. L. Hackforth, J. Keereetaveep and S. N. Tovey
878	HE 23, EAS 42	Nuclear interactions produced in the emulsion chamber. Japanese and Brazilian Emulsion Groups
883	HE 24	The spectrum of the nuclear active components of cosmic rays. E. W. Kellerman and M. G. Silk
885	HE 26	Certain aspects of nucleon isobar production in nucleon interactions at energies 10^3 and 25 GeV. D. A. Galstyan, G. B. Zhdanov, M. I. Tretyakova, M. M. Chernavsky and M. N. Schcherbakova
887	HE 27	An experiment to determine the primary intensity and the primary spectrum at energies of 10^{12} to 10^{13} eV. K. Sitte
890	HE 28	Secondary spectra for truncated spectra for the primary cosmic rays. Y. Pal and S. N. Tandon
893	HE 29	Composite model and particle production at superhigh energies. Z. Koba

<i>Page</i>	<i>Paper</i>	
895	HE 30	Multiplicity of high energy interactions. K. Pinkau
898	HE 31	The two-fireball and the CKP models of ultra-high energy interactions. R. W. Huggett
901	HE 32	New kinematical approach for analyses of high energy cosmic ray jets. S. Hasegawa, T. Kobayashi, A. Ohsawa, T. Shibata and N. Yajima
905	HE 33	Investigation of high energy nuclear interactions using a quartile energy estimator. L. S. Peak and R. L. S. Woolcott
909	HE 34	Interactions of nucleons with complex nuclei at high energies. V. V. Guseva, A. M. Lebedev and V. V. Sokolovsky
911	HE 35	On the angular distribution of secondary particles in multiple production at high energies. V. M. Maximenko, S. A. Slavatskiy, V. V. Sokolovsky and N. G. Zelevinskaya
914	HE 36	On one of the features in the jets generated in the hydrodynamical Landau process. N. M. Gerasimova
916	HE 37	Tskhra-Tskaro installation for the study of interactions of high energy particles of cosmic rays with matter. E. L. Andronikashvili, G. E. Chikovani, Z. Sh. Mandjavidze and N. N. Roinishvili
918	HE 38	High energy successive interactions. E. L. Feinberg
920	HE 39	The relationship of neutral and charged particles among nuclear active particles with energies above 100 GeV at mountain altitude. N. L. Grigorov, I. N. Erofeeva, L. G. Mitsenko, V. S. Murzin, I. D. Rapoport, L. I. Saricheva and G. L. Bashindjagian
922		High energy interactions (Rapporteur paper). B. Peters

CHAPTER 10 MUONS AND NEUTRINOS

931	MU-NU 1	A study of the μ meson charge ratio at sea level. B. C. Rastin, S. R. Baber, R. M. Bull and W. F. Nash
935	MU-NU 2	On the positive excess of cosmic ray muons at sea level. L. N. Volkova and G. T. Zatsepin
937	MU-NU 3	The charge ratio of cosmic ray muons at large zenith angles. P. K. MacKeown, S. S. Said, J. Wdowczyk and A. W. Wolfendale
941	MU-NU 4	Further observation of the positive excess of cosmic ray muons. S. Kawaguchi, T. Sakai, H. Oda, H. Ueno and Y. Kamiya
944	MU-NU 5	Derivation of the pion multiplicity in nuclear collisions from sea-level positive excess and total muon spectra. A. Melkman, I. Meroz and Y. Yeivin
946	MU-NU 6	Average charge distributions in systems of nucleons and pions. Y. Frishman and Y. Yeivin
950	MU-NU 7	On high energy single meson production. A. D. Crossland and G. N. Fowler
952	MU-NU 8	Underground investigation of the penetrating component of high energy cosmic radiation. S. N. Vernov, G. B. Khristiansen, Yu. A. Netchin, O. V. Vedenev and B. A. Khrenov
956	MU-NU 11	Study of properties of μ mesons by a spark calorimeter at the depth of 200 m w.e. underground. M. F. Bibilashvili, T. T. Barnaveli, G. A. Grubelashvili and N. A. Muradova
959	MU-NU 12	Burst production by near horizontal cosmic ray muons at sea level. F. Ashton and R. B. Coats
962	MU-NU 13	Angular distribution and energy spectrum of the cosmic particle showers at energies of about 10^{12} eV at large zenith angles. V. V. Borog, V. G. Kirillov-Ugryumov, A. A. Petrukhin, I. L. Rosental and V. V. Shestakov
964	MU-NU 14	The momentum spectrum of cosmic ray muons in the zenith angle range 82.5° - 90° . P. K. MacKeown, S. S. Said, J. Wdowczyk and A. W. Wolfendale

- 967 MU-NU 15 Investigation of the electromagnetic cascades in iron and lead at an energy of 100 GeV.
Zh. S. Takbaev, Yu. T. Lukin and Yu. A. Emelyanov
- 970 MU-NU 16 Study of the electromagnetic interactions of high energy muons using a large scintillator stack.
J. C. Barton, I. W. Rogers and M. G. Thompson
- 973 MU-NU 17 A study of cascade showers in lead.
J. C. Barton
- 976 MU-NU 19 On the energy loss of fast charged particles in dielectric media.
G. N. Fowler and A. G. Hall
- 980 MU-NU 20 Muon interactions far underground.
D. R. Creed, J. B. M. Pattison, A. W. Wolfendale, C. V. Achar, V. S. Narasimham and P. V. Ramana Murthy
- 984 MU-NU 22 The photonuclear interactions of μ mesons.
R. M. Bull, S. R. Baber, W. F. Nash and B. C. Rastin
- 987 MU-NU 23 Depth-intensity curve of nuclear events induced by muons.
O. G. Ryajskaya and G. T. Zatsepin
- 989 MU-NU 25 The intensity and angular distribution of cosmic rays far underground.
C. V. Achar, V. S. Narasimham, P. V. Ramana Murthy, D. R. Creed, J. B. M. Pattison and A. W. Wolfendale
- 992 MU-NU 26 A scintillation counter study of cosmic rays deep underground.
J. C. Barton, C. T. Stockel and D. A. Tanfield
- 997 MU-NU 28 The depth-intensity curve of muons and their energy spectrum.
E. D. Mikhailchi and G. T. Zatsepin
- 999 MU-NU 29 Energy losses of relativistic muons in electromagnetic interactions.
A. D. Erlykin
- 1003 MU-NU 30 The effect of the logarithmic increase of ionization loss on the range fluctuation of high energy μ mesons.
J. Nishimura
- 1006 MU-NU 31 The intensity of stopping pions at sea level and underground.
J. C. Barton and M. Slade
- 1009 MU-NU 32 Fast neutron production by muons underground.
A. M. Short
- 1012 MU-NU 33, 34 The Kolar Gold Field neutrino experiment.
C. V. Achar, M. G. K. Menon, V. S. Narasimham, P. V. Ramana Murthy, B. V. Sreekantan, K. Hinotani, S. Miyake, D. R. Creed, J. L. Osborne, J. B. M. Pattison and A. W. Wolfendale
- 1020 MU-NU 35 Solar neutrinos.
G. E. Kocharov
- 1023 MU-NU 36 On the neutrino spectroscopy of the Sun.
V. A. Kuzmin and G. T. Zatsepin
- 1025 MU-NU 37 Solar neutrino interaction with electrons.
G. V. Domogatsky and G. T. Zatsepin
- 1028 MU-NU 38 On the solar neutrino detection by the registration of electrons in reaction $\nu + Z = (Z + 1) + e^-$.
G. V. Domogatsky, G. T. Zatsepin and R. A. Eramjan
- 1030 MU-NU 39 On the experimental possibilities of the observation of neutrinos from collapsing stars.
G. V. Domogatsky, and G. T. Zatsepin
- 1032 MU-NU 40 On the thermometry of the solar interior by neutrino experiments.
V. A. Kuzmin
- 1034 MU-NU 41 On the cross section of the reaction $\nu + {}^{37}\text{Cl} \rightarrow {}^{37}\text{Ar} + e^-$.
G. V. Domogatsky, V. N. Gavrin and R. A. Eramjan
- 1037 MU-NU 42 The interaction between ultra-high energy cosmic rays and neutrinos in the Universe.
B. P. Konstantinov and G. E. Kocharov
- 1039 MU-NU 43 The energy spectra of muons and neutrinos generated by cosmic rays in different substances.
L. V. Volkova and G. T. Zatsepin
- 1041 MU-NU 44 Muon decays from neutral primaries.
C. Cowan, D. Ryan and G. Buckwalter
- 1045 MU-NU 45 Possible nuclear interaction of a muon of energy above 3×10^{14} eV.
T. Matano, M. Nagano, S. Shibata, K. Suga, T. Kameda, Y. Toyoda, T. Maeda and H. Hasegawa

- 1048 MU-NU 46 The University of Utah neutrino detector.
**H. E. Bergeson, L. K. Hilton, J. W. Keuffel, M. Morris, J. L. Parker,
R. O. Stenerson and C. J. Wolfson**
- 1051 MU-NU 47 Evidence for high energy cosmic ray neutrino interactions.
**R. Reines, M. F. Crouch, T. L. Jenkins, W. R. Kropp, H. S. Gurr,
G. R. Smith, H. W. Sobel, J. P. F. Sellschop and B. Meyer**
- 1055 Muons and neutrinos (Rapporteur paper).
A. W. Wolfendale

CHAPTER 11 TECHNIQUES

- 1063 TECH 1 A laboratory technique for simulating cosmic ray threshold effects.
P. C. Hedgecock
- 1066 TECH 2 The potentialities of operating Cerenkov light receivers in the middle ultra-violet regions of the spectrum.
W. N. Charman
- 1070 TECH 3 An experimental study of some of the basic properties of spark chambers.
M. A. Meyer and J. J. Retief
- 1075 TECH 4 A theoretical analysis of the performance of high resolution magnetic hodoscopes.
D. F. Bacon and W. F. Nash
- 1079 TECH 4A Liquid scintillation counters.
F. Ashton, R. B. Coats and D. A. Simpson
- 1082 TECH 5 A large Wilson cloud chamber and its application to ionization calorimetry work.
A. L. Hodson, T. C. Bacon and B. R. Pullan
- 1085 TECH 8 The parallel plate gas amplification counter.
S. Miyamoto and T. Takahashi
- 1086 TECH 9 Particle tracks in solids and the isotopic composition of contemporary and ancient cosmic rays.
R. M. Walker, R. L. Fleischer and P. B. Price
- 1087 TECH 12 Current splitting in divided electrode spark chambers.
D. F. Bacon and W. F. Nash
- 1090 TECH 13 A multiwire spark chamber with magnetostrictive delay line as a read-out and memory system.
S. Miyamoto
- 1091 TECH 14 Ionization measurement in a streamer chamber.
**T. L. Asatiani, K. A. Gazarian, V. N. Jmirov, E. M. Matevosian,
A. A. Nazarian and R. O. Sharkahtunian**
- 1094 TECH 15 The use of pulse shape discrimination with scintillation counters for cosmic ray studies.
J. C. Barton and A. O. Sanni
- 1097 TECH 16 The development of scintillation counters based on medicinal paraffin.
J. C. Barton and A. Crispin
- 1099 TECH 17 Chemically inagressive liquid scintillators.
M. A. Meyer and P. J. van der Westhuizen
- 1105 TECH 18 Particle counting in locally produced showers using vidicon television techniques.
D. A. Briggs and A. L. Hodson
- 1108 TECH 19 Feasibility of detecting quarks in cosmic rays.
F. Ashton
- 1111 TECH 20 Possible flux of heavy triplets and similar particles in cosmic radiation and their detection.
Y. Pal and S. N. Tandon
