The 1994 Petroleum Hydrocarbons Conference/Expo was sponsored by the National Ground Water Association and the American Petroleum Institute, and was comprised of 3 days of technical presentations which covered the following topic areas:

- Application of Risk Assessment to Remediation
- MTBE and Ground Water Remediation: A Challenge
- Investigation of Subsurface Contamination
- Air Sparging: An Interesting Remediation Tool
- A New Application of a Proven Remediation Tool: Bioventing
- Natural Bioremediation: A Reasonable Alternative
- Soil Vapor Extraction
- Use of Ground Water Modeling for Remediation
- Use of Biofilters for Offgas Treatment
- Free Phase and Dissolved Phase Hydrocarbon Recovery

In addition, more than 100 leading companies in the ground water and petroleum industries participated in the Conference Exposition in which a variety of equipment and services for preventing, detecting, and remediating ground water contaminated by petroleum hydrocarbons and other organic chemicals were showcased.

This bound volume is a compilation of papers that were presented at the Conference. Materials appearing in the publication are indexed to Ground Water On-Line, the data base of the National Ground Water Information Center at (614) 761-3222

Responsibility: The National Ground Water Association is not responsible for statements and opinions advanced in its meeting or printed in publications.

TABLE OF CONTENTS

TECHNICAL PRESENTERS:

SESSION 2: Applications of Intrinsic Bioremediation & Natural Attenuation

An Evaluation of Field Methods for Intrinsic Bioremediation Measurements -
Keith Piontek, Tom Sale and Tim Maloney, CH2M Hill .................................................. 3
An Evaluation of Field Methods for Measuring Indicators of Intrinsic
Bioremediation of Petroleum Hydrocarbons in Groundwater - R. Edward
Payne and Norman J. Novick, Mobil Oil Corp.; Timothy L. Douthit, Jeffrey A.
Brown and Donald N. Anderson, Land Tech Remedial, Inc. ........................................... 19
Modeling Intrinsic Remediation with Multiple Electron Acceptors: Results
from Seven Sites - Charles J. Newell and J.A. Winters, Groundwater Services, Inc.;
Hanadi S. Rifai, Rice University; R.N. Miller, J. Gonzales, Air Force Center for
Environmental Excellence; and T.H. Wiedemeier, Parsons Engineering Science .................. 33
Significance of Anaerobic Processes for the Intrinsic Bioremediation of Fuel
Hydrocarbons - Todd H. Wiedemeier, Parsons Engineering Science; John T.
Wilson and Donald H. Kampbell, US EPA Natl Risk Mgmt Rsch Laboratory; and
Ross N. Miller, Air Force Center For Environmental Excellence ........................................ 49

SESSION 3: Site Risk Assessment & Closure

Perspectives on Implementation of RBCA in the State of Texas - Chet Clark,
Texas Natural Resource Conservation Commission .............................................................. 65
Fate and Transport Modeling with API's Decision Support System Applied in a
Site Assessment for Residual Crude Oil in Unconsolidated Sediments: Case Study
in Kern County, California - Leslie A. Klinchuch, Chevron Information Technology
Company; and James M. Waldron, Chevron USA Production Company ............................. 71
Remediation and Clean Site-Closure of a Contaminated Aquifer at the Wexford
CPF - C.Y. Chiang, P.D. Petkovsky and E.Y. Chai, Shell Oil Product Company; and
S.J. Rouse, Shell Western E&P Inc. ................................................................. 87
A Transient Methodology for Assessing Risk: Development and Comparison with
the Conventional Approach - Karen L. Evans, The Shell Company of Australia; and
Philip B. Bedient, Rice University .................................................................................. 111

SESSION 4: Air Sparging

The Air Flow Behavior of Soils During Air Sparging - Wilson S. Clayton, Ground-
water Technology, Inc. .................................................................................... 669
Interfacial Mass Transfer Rates During In Situ Air Sparging - Effects of Process
Control Changes and Lithology - Kyle Rutherford and Paul C. Johnson, Arizona
State University ............................................................................................. 129
Performance of Air Sparging Systems - A Review of Case Studies - David H.
Bass and Richard A. Brown, Groundwater Technology, Inc. .............................................. 621
In Situ Air Sparging - Technology Demonstration for Remediating Groundwater
Contaminated with Dissolved-Phase Constituents at Hill Air Force Base - Whitney
Wheeless, Carrie Beitler, Jim Rowe and Mark A. Robbins, Radian Corporation; Steve
SESSION 6A: Fate and Transport / Modeling

Comparative Evaluation of Groundwater Biodegradation Models: Summary of the API Workshop - Barry H. Lester and James W. Mercer, GeoTrans, Inc. ........................................... 161
Calculation of Risk-Based Threshold Levels for Soil Using a One-Dimensional Analytical Method - Lisa L. Lewis, State of Georgia Dept. of Natural Resources Environmental Protection Division ................................................................. 189
Air Sparging: A Case Study in Characterization, Field Testing, and Modeling Design - G.D. Beckett, AQUI-VER, Inc.; David Huntley, San Diego State University; and Sorab Panday, HydroGeoLogic, Inc. ................................................................. 207
High Resolution, Two- and Three-Dimensional Simulation of Air Sparging - Richard E. Hinkley, May-Ru Chen, and John E. Killough, University of Houston ........................... 223

SESSION 6B: Site Characterization / Fate & Transport of MTBE

TPH Detections in Groundwater: Identification and Elimination of Positive Interferences - Dawn A. Zemo, Geomatrix Consultants, Inc.; and Karen A. Synowiec, Chevron Research and Technology Company ........................................... 257
In-Situ Sludge Characterization Using Laser-Induced Fluorescence in a Refinery Storm Water Impoundment - H. Roland Clubb and Robert E. Robinson, ERM-Southwest, Inc.; and David R. Keasey ................................................................. 273
Fate and Transport of MTBE - The Latest Data - James M. Davidson, Alpine Environmental, Inc. ................................................................. 285

SESSION 7A: Alternative Technologies

Results of a Multi-Site Field Treatability Test for Bioslurping: A Comparison of LNAPL Recovery Rates using Vacuum Enhanced Recovery (Bioslurping), Passive Skimming, and Pump Drawdown Recovery Techniques - J.A. Kittel and Andrea Leeson, Battelle Memorial Institute; R.E. Hinchee, Parsons Engineering Science; R.E. Miller and P.E. Haas, Air Force Center for Environmental Excellence ........................................... 305
Horizontal Well Performance in Vacuum Enhanced Pumping - Carl E. Flint and Brent F. Chaffee, UNOCAL CERT ................................................................. 339
SESSION 7B: Improving Cleanup Efficiency & Effectiveness

Beyond Risk-Based Cleanups: The Cost-Benefit Paradigm - Mark Malander, Mobil Oil Corp.; and Viru Raparthi, Applied Earth Sciences, Inc. ......................................................... 751

Perimeter Approach for Corrective Action at Operating Petroleum Refineries - Tess Byler and David Price, CH2M Hill; Kathryn Minter, Chevron USA Products Company ......................................................... 391

Analysis of Turnkey Petroleum Cleanup Costs - Cortland S. Hill, Foster Wheeler Environmental Corporation, Inc.; Rebecca S. Lockenbach, Florida Department of Environmental Regulation ................................. 407

SESSION 8: Free Product Evaluation and Recovery

A Modified Approach to Free Product Volume Estimation - Paul D. Lundegard and Brett Mudford, UNOCAL Corporation ................................................................. 423

Effects of Soil Type on Separate Phase Hydrocarbon Recovery Under Fluctuating Water Conditions - Mary Ann Parcher, Jeffrey A. Johnson, and Jack C. Parker, Environmental Systems and Technologies, Inc. ................................................................. 439

Mass Based Corrective Action - M.N. Gallagher, R.E. Payne and E.J. Perez, Mobil Oil Corporation ................................................................. 453

Assessing the Practicability of LNAPL Recovery from Low Permeability Soil - Kirk Brandt, Tom Sale and Bryce McKee, CH2M HILL; and Marty Evans, Chevron Research and Technology Company ................................................................. 467

SESSION 9: Applications of Intrinsic Bioremediation & Natural Attenuation (cont'd)

Intrinsic Bioremediation of Petroleum Hydrocarbon in Ground Water at the Phoenix Pipeline Terminal, Arizona - Todd H. Wiedemeier and Matthew A. Swanson, Parsons Engineering Science, Inc.; Chris C. Neaville, Shell Development Co. ................................................................. 479

A Tiered Approach to Demonstrate Intrinsic Bioremediation of Petroleum Hydrocarbons in Groundwater - Norman J. Novick, R. Edward Payne and J. Gregory Hill, Mobil Oil Corporation; and Timothy L. Douthit, Land Tech Remedial, Inc. ................................................................. 493

Evidence for Natural Attenuation of BTEX After Termination of a Groundwater Pump-and-Treat System - A Case Study - Vincent S. Maresco, Annmarie Kearns, Thomas R. Byrnes and Marleen A. Troy, Groundwater and Environmental Services, Inc.; and David J. Bender, Sun Company, Inc. ................................................................. 509

SESSION 10: SVE / Bioventing

Fate and Transport of Volatile Hydrocarbons in the Vadose Zone - G. Todd Ririe, UNOCAL Corporate Env. Remediation Technology; and Robert E. Sweeney, UNOCAL Worldwide Exploration ................................................................. 529

Air-Based Remediation Systems Targeting the Smear Zone - Tom R. Peargin, Chevron Research and Technology Company; Erin A. Ireland and April A. Stephenson, Chevron USA Products Company 563

High Vacuum Soil Vapor Extraction as a Means of Enhancing Contaminant Mass Recovery from Ground Water Zones of Low Transmissivity - J.R.C. Farrow and A. Brown, Komex-H2O Science Inc.; W. Burgess, University College London; and R.E. Payne, Mobil Oil Corporation 579

Vapor Extraction of a Contaminated Fractured Clay - Diane E. Grady and Richard L. Johnson, Oregon Graduate Institute 593

Theory and Application of High-Vacuum Technology to Remediate Hydrocarbon-Impacted Soils and Groundwater in Low Permeability Formations (Including Case Histories) - Steven P. Sittler, Michael A. Hansen and Michael M. Gates, Geraghty & Miller, Inc. 605

POSTER PRESENTERS:

A Procedure for Achieving Clean Closure - Hamid G. Bojd and Martin O. Klein, Delta Environmental Consultants, Inc. 637

Evaluation of Intrinsic Bioremediation at a Site in Wyoming - Lisa R. Buchanan and Gary Shaughnessey, Camp Dresser & McKee 651

Risk Assessment at Sites Contaminated with Lubricating Oils: Implications from the Toxicologic Literature - James M. Lavelle and Brigitte Howe, Camp Dresser & McKee Inc. 687

Design Data Development Test for Two Phase Extraction Remediation System - Ira S. Merin, Torsten Rothman, Mike Grotenhuis and Pat Campbell, Radian Corporation; and Jill Troman, Chevron USA Products Company 703

Hydrocarbon Recovery at Remote Sites - Power Using Windmills - Samuel J. Senn, BASCOR Environmental, Inc.; and Cynthia J. Matthews, Amoco Petroleum Products 719

HDTMA-Silica as an Effective Adsorbent of Water Soluble Aromatic Hydrocarbons - Chuangen Zheng and John E. Killough, University of Houston 735
AUTHOR INDEX

Brandt, Kirk, Tom Sale and Bryce McKee, CH2M HILL; and Marty Evans, Chevron Research and Technology Company - Assessing the Practicability of LNAPL Recovery from Low Permeability Soil .......................................................... 467

Byler, Tess, and David Price, CH2M HILL; Kathryn Minter, Chevron USA Products Co. - Perimeter Approach for Corrective Action at Operating Petroleum Refineries ........................................ 391

Chiang, C.Y., P.D. Petkovsky and E.Y. Chai, Shell Oil Product Company; and S.J. Rouse, Shell Western E&P Inc. - Remediation and Clean Site-Closure of a Contaminated Aquifer at the Wexford CPF ........................................ 87

Clark, Chet, Texas Natural Resource Conservation Commission - Perspectives on Implementation of RBCA in the State of Texas .............................................. 65

Clubb, H. Roland, and Robert E. Robinson, ERM-Southwest, Inc.; and David R. Keasey - In-Situ Sludge Characterization Using Laser-Induced Fluorescence in a Refinery Storm Water Impoundment ........................................ 273

Davidson, James M., Alpine Environmental, Inc. - Fate and Transport of MTBE - The Latest Data ......................................................... 285

Evans, Karen L., The Shell Company of Australia; and Philip B. Bedient, Rice University - A Transient Methodology for Assessing Risk: Development and Comparison with the Conventional Approach ........................................ 111

Farrow, J.R.C., and A. Brown, Komex-H2O Science Inc.; W. Burgess, University College London; and R.E. Payne, Mobil Oil Corporation - High Vacuum Soil Vapor Extraction as a Means of Enhancing Contaminant Mass Recovery from Ground Water Zones of Low Transmissivity ................................................................. 579

Flint, Carl E., and Brent F. Chaffee, UNOCAL CERT - Horizontal Well Performance in Vacuum Enhanced Pumping .................................................. 339

Gallagher, M.N., R.E. Payne and E.J. Perez, Mobil Oil Corporation - Mass Based Corrective Action ................................................................. 453

Grady, Diane E., and Richard L. Johnson, Oregon Graduate Institute - Vapor Extraction of a Contaminated Fractured Clay ........................................ 593

Hill, Cortland S., Foster Wheeler Environmental Corporation, Inc.; Rebecca S. Lockenbach, Florida Department of Environmental Regulation - Analysis of Turnkey Petroleum Cleanup Costs ................................................................. 407

Hinkley, Richard E., May-Ru Chen, and John E. Killough, University of Houston - High Resolution, Two- and Three-Dimensional Simulation of Air Sparging .................................................. 223
Johnson, Paul C. and Kyle Rutherford, Arizona State University - Interfacial Mass Transfer Rates During In Situ Air Sparging - Effects of Process Control Changes and Lithology ................................................................. 129

Klinchuch, Leslie A., Chevron Information Technology Company; and James M. Waldron, Chevron USA Production Company - Fate and Transport Modeling with API's Decision Support System Applied in a Site Assessment for Residual Crude Oil in Unconsolidated Sediments: Case Study in Kern County, California ......................................................... 71

Lewis, Lisa L., State of Georgia Dept. of Natural Resources Environmental Protection Division - Calculation of Risk-Based Threshold Levels for Soil Using a One-Dimensional Analytical Method .......................................................... 189

Lundegard, Paul D., and Brett Mudford, UNOCAL Corporation - A Modified Approach to Free Product Volume Estimation .................................................. 423

Malander, Mark, Mobil Oil Corp.; and Viru Raparthi, Applied Earth Sciences, Inc. - Beyond Risk-Based Cleanups: The Cost Benefit Paradigm ........................................... 751

Mercer, James W. and Barry H. Lester, GeoTrans, Inc. - Comparative Evaluation of Groundwater Biodegradation Models: Summary of the API Workshop ........................................... 161

Neaville, Chris C., Shell Development Co.; Todd H. Wiedemeier and Matthew A. Swanson, Parsons Engineering Science, Inc. - Intrinsic Bioremediation of Petroleum Hydrocarbon in Ground Water at the Phoenix Pipeline Terminal, Arizona ........................................... 479

Newell, Charles J., and J.A. Winters, Groundwater Services, Inc.; Hanadi S. Rifai, Rice University; R.N. Miller, J. Gonzales, Air Force Center for Environmental Excellence; and T.H. Wiedemeier, Parsons Engineering Science - Modeling Intrinsic Remediation with Multiple Electron Acceptors: Results from Seven Sites ........................................... 33

Novick, Norman J., R. Edward Payne and J. Gregory Hill, Mobil Oil Corporation; and Timothy L. Douthit, Land Tech Remedial, Inc. - A Tiered Approach to Demonstrate Intrinsic Bioremediation of Petroleum Hydrocarbons in Groundwater ........................................... 493

Parcher, Mary Ann, Jeffrey A. Johnson, and Jack C. Parker, Environmental Systems and Technologies, Inc. - Effects of Soil Type on Separate Phase Hydrocarbon Recovery under Fluctuating Water Conditions ........................................... 439

Peargin, Tom R., Chevron Research and Technology Company; Erin A. Ireland and April A. Stephenson, Chevron USA Products Company - Air-Based Remediation Systems Targeting the Smear Zone ........................................... 563

Piontek, Keith, Tom Sale and Tim Maloney, CH2M Hill - An Evaluation of Field Methods for Intrinsic Bioremediation Measurements ........................................... 3

Ratz, John, and Steven Archabal, Parsons Engineering Science, Inc. - Integrated
Remediation for Groundwater Quality Protection Upgradient of a Major Production Facility ................................................................. 373

Ririe, G. Todd, UNOCAL Corporate Env. Remediation Technology; and Robert E. Sweeney, UNOCAL Worldwide Exploration - Fate and Transport of Volatile Hydrocarbons in the Vadose Zone ................................................................. 529

Sittler, Steven P., Michael A. Hansen and Michael M. Gates, Geraghty & Miller, Inc. - Theory and Application of High-Vacuum Technology to Remediate Hydrocarbon-Impacted Soils and Groundwater in Low Permeability Formations (Including Case Histories) ................................................................. 605

Wiedemeier, Todd H., Parsons Engineering Science; John T. Wilson and Donald H. Kampbell, US EPA Natl Risk Mgmt Rsch Laboratory; and Ross N. Miller, Air Force Center For Environmental Excellence - Significance of Anaerobic Processes for the Intrinsic Bioremediation of Fuel Hydrocarbons ................................................................. 49

Wheeless, Whitney, Carrie Beitler, Jim Rowe and Mark A. Robbins, Radian Corp.; Steve Hicken, Hill Air Force Base; Robert E. Hinchee, Parsons Engineering Science; Paul C. Johnson, Arizona State University; Richard L. Johnson, Oregon Graduate Institute of Science and Technology; and David B. McWhorter, Colorado State University - In Situ Air Sparging - Technology Demonstration for Remediating Groundwater Contaminated with Dissolved-Phase Constituents at Hill Air Force Base ................................. 145

POSTER PRESENTERS:

Bojd, Hamid G., and Martin O. Klein, Delta Environmental Consultants, Inc. - A Procedure for Achieving Clean Closure ................................................................. 637

Buchanan, Lisa R., and Gary Shaughnessey, Camp Dresser & McKee - Evaluation of Intrinsic Bioremediation at a Site in Wyoming ................................................................. 651

Lavelle, James M., and Brigitte Howe, Camp Dresser & McKee Inc. - Risk Assessment at Sites Contaminated with Lubricating Oils: Implications from the Toxicologic Literature ................................................................. 687

Merin, Ira S., Torsten Rothman, Mike Grotenhuis and Pat Campbell, Radian Corp.; and Jill Troman, Chevron USA Products Company - Design Data Development Test for Two Phase Extraction Remediation System ................................................................. 703

Senn, Samuel J., BASCOR Environmental, Inc.; and Cynthia J. Matthews, Amoco Petroleum Products - Hydrocarbon Recovery at Remote Sites - Power Using Windmills ................................................................. 719

Zheng, Chuangen, and John E. Killough, University of Houston - HDTMA-Silica as an Effective Adsorbent of Water Soluble Aromatic Hydrocarbons ................................................................. 735
