

EMC'96 ROMA

International Symposium on Electromagnetic Compatibility

September 17-20, 1996 - Rome - Italy

Faculty of Engineering - University of Rome "La Sapienza"

University of Rome "La Sapienza". Faculty of Engineering: The Cloister (Paul Letarouilly, 1820)

VOLUME II

UB/TIB Hannover
115 861 157

89

L1 - Antennas & Communication Systems

- L1-1 Optimum antenna placement on a mobile board with registration of EMC** **423**
E. A. Ibatoulline, *Kazan State University, RUSSIA*
- L1-2 The influence of finite ground conductivity on characteristics of a vertical mast (monopole) antenna with elevated feeding** **427**
P. D. Rancic, M. I. Kitanovic, *University of Nis, YUGOSLAVIA*
J. V. Surutka, *University of Beograd, YUGOSLAVIA*
- L1-3 A new approach to robust adaptive antenna array design** **433**
L. A. Marchuk, E. I. Glushankov, A. V. Kolinko, *Military Telecommunication Acad., RUSSIA*
- L1-4 Optimization of radioelectronic means signals for providing electromagnetic compatibility** **438**
A. A. Batenkov, E. I. Glushankov, *Military Telecommunication Academy, RUSSIA*
V. Ja. Kontorovich, *CINVESTAV - IPN, MEXICO*
A. I. Shirko, *Military Official Communication Institute, RUSSIA*
- L1-5 Peculiarities of nonlinear wave scattering by the system of a linear and nonlinear scatterers** **441**
A. A. Gorbachev, T. M. Zaboronkova, A. A. Vasenkov, *Radiophysical Research Institute, RUSSIA*
- L1-6 Impact of radiated emission standards on digital radio receiver performance** **445**
P. F. Stenumgaard, *National Defence Research Establishment, SWEDEN*
- L1-7 Polarity superposition method of signal detection in impulsive noise** **450**
T. Hashimoto, K. Yamauchi, M. Maeda
Himeji Institute of Technology, JAPAN
H. Maruyama, *Himeji College of Hyogo, JAPAN*
H. Higuchi, *Takamatsu National College of Technology, JAPAN*

L1-8	2nd order interference in TV receivers W. Kowal, M. Pietranik, <i>Institute of Telecommunications, Wroclaw, POLAND</i> R. Zarko, <i>Technical University of Wroclaw, POLAND</i>	456
L1-9	Measurement and calculation of propagation losses in a concrete building at 1.5 GHz J.-C. Wang, H.-Y. Chen, <i>Yuan-Ze Institute of Technology, TAIWAN</i>	461
L1-10	Time domain analysis of electromagnetic monocycle signals for communication in seawater R. N. Boules, <i>Towson State University, USA</i>	466
L1-11	Analysis of AM-PM conversion in a communication link H. L. Vazquez, H. A. Jardón, <i>CINVESTAV - IPN, MEXICO</i>	471
L1-12	Nonlinear behavior of amplifiers with active feedback R. Gomez, H. A. Jardón, <i>CINVESTAV - IPN, MEXICO</i> O. Golovin, <i>MTUSI, RUSSIA</i>	477
L1-13	Non-linear behaviour in commonly used non-polar dielectrics at microwave frequencies T. Khattab, A. D. Rawlins, <i>University of Kent, UK</i>	481
L1-14	Experimental investigations of multifrequent narrow band emission in the Schumann resonance frequency range V. V. Kabanov, V. Yu. Belashov, I. S. Shevchenko <i>Far East Div. of Russian Acad. of Sciences, RUSSIA</i>	487
L1-15	Improving channel isolation of the microwave diplexers B. Milovanovic, A. Vukovic, <i>University of Nis, YUGOSLAVIA</i>	491

L2 - Electronic Devices

L2-1	On the model extraction of microwave transistor's and MMIC's packages from experimental data E. Calandra, <i>University of Palermo, ITALY</i>	496
L2-2	On the effects of RF interferences on bipolar integrated circuits F. Fiori, V. Pozzolo, <i>Polytechnic of Turin, ITALY</i>	502
L2-3	RCS reduction of finite strip array due to chiral materials L. Vegni, A. Toscano, <i>Third University of Rome, ITALY</i> B. Popovski, <i>University of Skopje, REPUBLIC OF MACEDONIA</i>	506
L2-4	Implementation of a three dimensional computation for the analysis of microwave monolithic integrated circuits R. Makri, M. Gargalagos, D. I. Kaklamani, N. K. Uzunoglu <i>National Technical University of Athens, GREECE</i>	510

L3 - Biological Interactions

L3-1	The total bioelectrical activity of various structures of brain in condition of low-level microwave irradiation Yu. G. Grigoriev, <i>Centre of Bioelectromagnetic Compatibility, RUSSIA</i> S. N. Lukianova, V. H. Makarov, V. V. Rynskov, <i>Center Institute of Biofisics, RUSSIA</i>	514
-------------	--	------------

L3-2	Sensitivity of humans to low-frequency magnetic fields H.-D. Betz, R. Schandry, Ch. Leopold, W. P. Oettinger, H. Berg, R. Kulzer <i>University of Munich, GERMANY</i> J. Tritschler, <i>MEDIS, GERMANY</i>	517
L3-3	Effect of 450 mT static magnetic field on the infectious activity of Herpes Simplex virus to Vero cells K. Kimura, J. Arisawa, <i>Hokkaido Institute of Technology, JAPAN</i>	523
L3-4	Effect of static magnetic field on bacterial infection to HeLa cells A. Saito, K. Kimura, K. Misawa, J. Arisawa, <i>Hokkaido Institute of Technology, JAPAN</i>	527

M - Cables

M-1	Electromagnetic field coupling to shielded cables: methodology and experimental validation D. Orzan, F. Rachidi, M. Ianoz, <i>Swiss Federal Institute of Technology SWITZERLAND</i> P. Baraton, F. Audran, <i>Electricité de France, FRANCE</i>	532
M-2	The influence of the line parameters on the coupling to shielded multiconductor transmission lines T. Kasdepke, J. L. ter Haseborg, <i>Technical University Hamburg-Harburg, GERMANY</i>	538
M-3	Coupling of short circuit power system to underground multiconductor cables using ETLEs F. Han, <i>NOKIA Research Center, FINLAND</i> W. T. Smith, <i>University of Kentucky, USA</i>	544
M-4	Models of a cable bunch which consists of twisted two-wire cables M. Ehrich, J. Kuhlmann, D. Netzler, C. Stöhr, <i>Universität der Bundeswehr Hamburg, GERMANY</i>	550
M-5	Modeling of some non-standard coaxial cables by the charge simulation method V. Markovic, D. Krstic, <i>University of Nis, YUGOSLAVIA</i>	556

N - Shielding Measurements / ESD

N-1	Measuring methods and measuring setups for the characterisation of shielding materials under different conditions J. A. Catrysse, <i>KHBO Ostend, BELGIUM</i> C. P. J. H. Borgmans, <i>DSM Polymers, THE NETHERLANDS</i>	562
N-2	Comparative study of different combinations of metallised non-woven shielding materials and an insulating substrate, for use as shielding envelopes and small shielding boxes J. A. Catrysse, <i>KHBO Ostend, BELGIUM</i>	569
N-3	Characterisation of the shielding effectiveness of equipment cabinets containing apertures J. D. Turner, T. M. Benson, C. Christopoulos, D. W. P. Thomas, <i>University of Nottingham, UK</i> M. P. Robinson, J. F. Dawson, M. D. Ganley, A. C. Marvin, S. J. Porter, <i>University of York, UK</i>	574

N-4	Electrically conductive metal silicides for EMI/RFI shielding E. Savrun, <i>QUEST Integrated Inc., USA</i> H. Del Aguila, <i>USAF Phillips Laboratory, USA</i>	579
N-5	A theoretical model for thin shield effectiveness against ESD problems A. Aiello, R. De Leo, M. Righetti, G. Tribellini, <i>University of Ancona, ITALY</i>	584
N-6	A test point dependent statistical method for ESD G. Cancellieri, F. Chiaraluce, R. De Leo, E. Gambi, <i>University of Ancona, ITALY</i>	590

O - PCBs I

O-1	Coupling effects on a multilayer printed circuit board F. B. M. van Horck, A. P. J. van Deursen, P. C. T. van der Laan <i>Eindhoven University of Technology, THE NETHERLANDS</i>	596
O-2	Guiding and radiation characteristics of planar interconnecting lines in gridded ground structures P. Bernardi, R. Cicchetti, A. Faraone, <i>University of Rome "La Sapienza", ITALY</i>	602
O-3	Numerical calculation of the current distribution on PCBs by use of a nearfield scanning method W. Spreitzer, G. Fässler, F. M. Landstorfer, <i>University of Stuttgart, GERMANY</i>	607
O-4	Structure compensation for reduction of the interline crosstalk on high-speed, high-density PCB W.-P. Liao, F.-L. Chu, <i>Tatung Institute of Technology, TAIWAN</i>	612
O-5	Differential-mode voltage to common-mode current conversion in balanced transmission system interconnections F. Silva, R. Pallas-Areny, <i>Universitat Politècnica de Catalunya, SPAIN</i>	617
O-6	A probabilistic model for the prediction of crosstalk in PCB's R. Linares y M., <i>ESIME-SEPI-IPN-CINVESTAV, MEXICO</i> V. Ya. Kontorovich, H. Jardón A., <i>CINVESTAV-IPN, MEXICO</i>	621

P - Railway Systems / Power Electronics

P-1	Electromagnetic compatibility in railway systems: standard and application A. Amendolara, F. Vitrano, <i>Ansaldo Trasporti, ITALY</i> F. Cavaliere, <i>Ferrovie dello Stato S.p.A., ITALY</i> A. Ventura, <i>Italferr-SIS. T.A.V., ITALY</i>	627
P-2	An experimental method to describe railways radio electric environment G. A. Antonacci, <i>Ferrovie dello Stato S.p.A., ITALY</i>	633
P-3	A useful simulation tool for the study of electromagnetic interaction in the traction system A. Montù, M. Riva, <i>Polytechnic of Milan, ITALY</i>	639

P-4	Electromagnetic interference caused by a.c. traction systems on telecommunication systems: laboratory and field tests G. Baroncelli, <i>TELECOM Italia, ITALY</i> R. Chiesa, <i>SIRTI, ITALY</i> M. Giunta, <i>CSELT, ITALY</i> R. Litardi, <i>Ferrovie dello Stato S.p.A., ITALY</i> M. Romano, <i>Italferr-SIS TAV, ITALY</i>	645
P-5	Reduction of conducted EMI in power converters using decoupling capacitors W. Teulings, J. L. Schanen, J. Roudet, <i>INPG - LEG - ENSIEG, FRANCE</i>	650
P-6	EMI modeling and measurements for power drive systems G. Antonini, S. Cristina, <i>University of Rome "La Sapienza", ITALY</i> A. Orlandi, <i>University of L'Aquila, ITALY</i>	656

Q - PCBs II

Q-1	Evaluation of radiated emissions from printed circuit boards and cables at post-layout level E. Leroux, <i>High Design Technology, ITALY</i> S. Caniggia, <i>ITALTEL, ITALY</i> F. G. Canavero, <i>Polytechnic of Turin, ITALY</i> B. Demoulin, <i>University of Lille, FRANCE</i>	662
Q-2	Some common errors in 4-layer and multilayer PCB design J. A. Catrysse, G. Vandecasteele, <i>KHBO Ostend, BELGIUM</i>	668
Q-3	A more efficient adapted finite-difference method applied to modelling crosstalk problems between printed circuit board tracks J. Kelly, T. Sorensen, <i>University of Limerick, IRELAND</i>	672
Q-4	Interconnect models for commercial simulators I. Maio, F. G. Canavero, <i>Polytechnic of Turin, ITALY</i> F. Muzio, B. Dilecce, <i>Centro Ricerche FIAT, ITALY</i>	678
Q-5	A new system for the evaluation of telecom hardware robustness P. Belforte, G. Guaschino, F. Maggioni, <i>CSELT, ITALY</i> G. Morelli, <i>TELECOM Italia, ITALY</i>	684

R - Lightning

R-1	Importance of losses in the determination of lightning-induced voltages on overhead lines F. Rachidi, M. Ianoz, <i>Swiss Federal Institute of Technology, SWITZERLAND</i> C. A. Nucci, <i>University of Bologna, ITALY</i> C. Mazzetti, <i>University of Rome "La Sapienza", ITALY</i>	690
R-2	Lightning induced voltage calculation in lossy transmission lines using the EMTP J. O. S. Paulino, A. E. A. Araujo, G. C. Miranda, <i>Universidade Federal de Minas Gerais, BRAZIL</i>	695

R-3	Extension of two return stroke models to consider the influence of elevated strike objects on the lightning return stroke current and the radiated electromagnetic field: comparison with experimental results	701
	S. Guerrieri, C. A. Nucci, <i>University of Bologna, ITALY</i> F. Heidler, <i>Federal Armed Forces Univ. Munich, GERMANY</i> F. Rachidi, <i>Swiss Federal Institute of Technology, SWITZERLAND</i> M. Rubinstein, <i>Swiss Telecom, SWITZERLAND</i>	
R-4	Overvoltages in telecommunications equipment grounding wires induced by direct lightning strikes	707
	M. Sato, <i>NTT Technical Assistance & Support Center, JAPAN</i> T. Ideguchi, <i>Kyushyu Tokai University, JAPAN</i>	
R-5	Hazards of touch voltages due to lightning at SLC40/41, CCAS, USA	713
	J. C. Chai, <i>The Aerospace Corporation, USA</i>	
R-6	Lightning channel's EM effects on large earth electrodes by moments method	719
	V. Amoruse, F. Lattarulo, <i>Polytechnic of Bari, ITALY</i> G. Ala, P. Buccheri, <i>University of Palermo, ITALY</i>	

S1 - Measurements & Instrumentation

S1-1	New high performance electromagnetic compatibility measurement facility at INTA	725
	D. Hernandez Gomez, R. De Juan, <i>INTA, SPAIN</i> C. Abella, <i>IRSA, SPAIN</i>	
S1-2	Digital measurements to power filter design	729
	F. Filira, <i>University of Padua, ITALY</i>	
S1-3	Simple measurement of the transfer impedance of a connector	733
	F. B. M. van Horck, A. P. J. van Deursen, P. C. T. van der Laan <i>Eindhoven University of Technology, THE NETHERLANDS</i> B. L. F. Paagman, <i>Berg Electronics B. V., THE NETHERLANDS</i>	

S2 - Lightning & EMP

S2-1	Efficiency of lightning protection system as a screening measure against LEMP	738
	Z. Flisowski, <i>Warsaw University of Technology, POLAND</i> C. Mazzetti, <i>University of Rome "La Sapienza", ITALY</i>	
S2-2	First remote determination of energy release and current in intracloud lightnings by means of radar and electromagnetic field measurements	743
	E. I. Dubovoy, V. I. Pryazhinsky, <i>Mintz Radiotechnical Institute, RUSSIA</i>	
S2-3	Theoretical representation of the electromagnetic field produced by cloud lightnings	748
	V. Amoruso, F. Lattarulo, <i>Polytechnic of Bari, ITALY</i>	
S2-4	Lightning electromagnetic field computation using the EMTP	754
	G. C. Miranda, <i>Universidade Federal de Minas Gerais, BRAZIL</i>	
S2-5	A development on the application of superminiature insulating and neutralizing devices for lightning protection	759
	S. Feng, <i>Jiangsu Provincial Electric Power Bureau, CHINA</i>	

S2-6	Geomagnetic variations caused by camouflet explosions: theoretical model and experimental data analysis	763
	L. P. Gorbachev, T. A. Semyonova, <i>Moscow Engineering Physics Institute, RUSSIA</i> Yu. B. Kotov, <i>Russian Academy of Sciences, RUSSIA</i>	
S2-7	Numerical modelling of the processes of high altitude nuclear explosion MHD-EMP formation and propagation	769
	V. N. Gritsai, V. M. Kondratiev, E. L. Stupitsky, <i>Russian Federation Ministry of Defense, RUSSIA</i>	
S2-8	Impact of ionizers on the high frequency content of the radiated field from a lightning attachment	772
	C. D. Taylor, S. Grzybowski, <i>Mississippi State University, USA</i>	

S3 - EM Coupling - Transients

S3-1	Overvoltages induced by lightning on overhead power and distribution lines with sag	775
	J. L. Bermudez, F. Rachidi, M. Ianoz, <i>Swiss Federal Institute of Technology, SWITZERLAND</i> M. Rubinstein, <i>Swiss Telecom PTT, SWITZERLAND</i>	
S3-2	On the limits and applicability of the MTL theory in predicting field to wire coupling phenomena	781
	A. Andreotti, U. De Martinis, <i>University of Naples, ITALY</i> M. Raugi, A. Tellini, <i>University of Pisa, ITALY</i>	
S3-3	Voltage between sheath and cable conductor due to conductive effects on underground cable	786
	W. Machczynski, <i>Poznan University of Technology, POLAND</i>	
S3-4	Calculation of internal inductance and AC resistance for finite thickness flat conductors	790
	G. Antonini, <i>University of Rome "La Sapienza", ITALY</i> A. Orlandi, <i>University of L'Aquila, ITALY</i> C. R. Paul, <i>University of Kentucky, USA</i>	
S3-5	An electromagnetic scattering model for studying the effects of higher-order modes on the coupling of an incident electromagnetic wave with an automobile harness	796
	R. Azaro, G. L. Gragnani, <i>University of Genoa, ITALY</i> S. Caorsi, <i>University of Pavia, ITALY</i> P. Franco, <i>Cavis S.r.l., ITALY</i>	
S3-6	Simulation of transient protector co-ordination in a low voltage power installation network using ATP-EMTP	802
	H. Tang, A. Larsson, R. Hoegberg, V. Scuka, <i>Uppsala University, SWEDEN</i>	
S3-7	Optimization of an increased safety blowing up system	808
	N. V. Korovkin, E. E. Selina, E. A. Oshe, <i>St. Petersburg State Technical University, RUSSIA</i>	
S3-8	The use of experimental frequency responses for transients calculation in the EMC nonlinear problems	812
	N. V. Korovkin, <i>St. Petersburg State Technical University, RUSSIA</i>	

S4 - Computational Electromagnetics

S4-1	Electromagnetic penetration of an incident wave through conducting screens with displaced rectangular apertures	816
	D. I. Kaklamani, N. K. Uzunoglu, <i>National Technical University of Athens, GREECE</i>	

S4-2	Optimization of magnetostatic shield's shape by Lagrange method V. L. Chechurin, A. E. Plaks, Y. V. Varlamov, <i>St. Petersburg State Technical University, RUSSIA</i>	821
S4-3	Electromagnetic radiation from a video output amplifier inside a monitor H.-Y. Chen, I.-Y. Tam, <i>Yuan-Ze Institute of Technology, TAIWAN</i>	824
S4-4	Shielding of a coil by a ferromagnetic disc M. Ehrich, J. Kuhlmann, D. Netzler, C. Stöhr, <i>Universität der Bundeswehr Hamburg, GERMANY</i>	828

T - Power Systems

T-1	The magnetic field from twisted three-phase arrangements P. Petterson, N. Schoenborg, <i>Vattenfall Utveckling AB, SWEDEN</i>	834
T-2	Large scale measurements of low frequency electromagnetic fields in Berlin and field reducing activities in power stations M. Henschel, <i>BEWAG Berlin, GERMANY</i> E. Zemann, <i>Technical University of Berlin, GERMANY</i>	840
T-3	Electromagnetic interference from high-voltage insulators: a comparison of hydrophobic and hydrophilic cases D. A. Swift, <i>University of Natal, SOUTH AFRICA</i> A. C. Britten, <i>ESKOM Technology Group, SOUTH AFRICA</i>	846
T-4	Calculating a transient electromagnetic field emitted by a grounding system B. Nekhoul, <i>Ecole Normale Supérieure de Jijel, ALGERIE</i> R. Feuillet, <i>INPG - LEG - ENSIEG, FRANCE</i>	852
T-5	Analysis of two coupled grounding systems: linear grounding system and plate ground electrode P. D. Rancic, M. O. Veselinovic, Z. P. Stajic, Dj. R. Djordjevic, <i>University of Nis, YUGOSLAVIA</i>	856
T-6	Estimation of the zone of influence of earth potential rise on telecommunication installations in urban environment L. Grcev, V. Filipovski, <i>University of Skopje, REP. OF MACEDONIA</i>	862

U - Rooms & Cells

U-1	Optimal phase reflection gratings and the effect on fields in a mode stirred chamber J. Clegg, A. C. Marvin, J. A. S. Angus, J. F. Dawson, <i>University of York, UK</i>	867
U-2	A novel technique for damping screened room resonance N. Izzat, G. S. Hilton, C. J. Railton, I. J. Craddock, R. J. Butler, <i>University of Bristol, UK</i>	873
U-3	Investigation of resonance effects in GTEM-cell 1750 D. Ristau, D. Hansen, <i>EURO-EMC-Service, GERMANY</i> H. P. Geromiller, S. Weiss, A. Kost, <i>Technical University of Cottbus, GERMANY</i>	879
U-4	The use of synthetic anechoic chambers in EMC measurements B. Audone, F. Bresciani, <i>GF-Sistemi Avionici, ITALY</i>	884
U-5	The management of pre-compliance testing by the GTEM cell F. Filira, <i>University of Padua, ITALY</i> M. Cappio Borlino, M. Giunta, R. Pomponi, <i>CSELT, ITALY</i> G. Pierucci, <i>TELECOM Italia, ITALY</i>	890
