The First European Congress
on Chemical Engineering

in occasion of ICheAP-3
The third Italian Conference
on Chemical and Process Engineering

Florence, Italy May 4-7, 1997

Promoted by EFCE:
The European Federation of Chemical Engineering
Event Number 601

Organised by AIDIC:
The Italian Association of Chemical Engineering

Proceedings
Vol. 3
**Papers Index**

*(Volume 3)*

**FLUID MECHANICS**

Turbulent flow in complex geometries. pag. 1659
V. De Angelis, P. Lombardi, S. Banerjee

Distortion and coupling of turbulence across a zero mean-shear flat gas-liquid interface. 1663
A. Rossodivita, D. Stretch, S. Belcher

Numerical simulation of hydrodynamics of laminar annular swirling decaying flow induced by means of a tangential inlet. 1667
S.R. Farias-Neto, P. Legentilhomme, J. Legrand

Computation of flow fields generated by a Rushton turbine in an unbaffled mixing vessel. 1671
J. Naude, C. Xuereb, J. Bertrand

Prediction of main features of forward and backward flow in turbulent confined diffusion jets. 1675
G. Bozzano, M. Dente, G. Pieri

Effects of fluid dynamics on thermal transfer in a fluorine electrolyzer. 1679
H. Roustan, J.P. Caire, F. Nicolas, P. Pham

Circulating Fluidised Bed with Internals: Pressure Drop Analysis. 1683
N. Balasubramanian, C.S. Srinivasa Kaman

Experimental heat transfer measurements in a batch pulsed-baffled reactor. 1685
X. Ni, Y. Zhang, I. Mustafa

Shear flow of a non-newtonian fluid with a constitutive instability: prediction of shear banding. 1689
F. Greco, G. Marrucci

Bubble Coalescence in Non-Newtonian Fluids: a Chaotic Approach. 1693
H.Z. Li, Y. Mouline, L. Choplin, N. Midoux

Bubble formation in non-newtonian fluids. 1697
H.Z. Li, Y. Mouline, L. Choplin, N. Midoux

Deformation and binary collisions of drops under shear flow. 1701
S. Guido, V. Simeone, M. Villone

Experimental Investigation of Dissipation and Heat Transfer in a Co-Rotating Twin Screw Extruder. 1705
S. Tenge, D. Mewes

Prediction of Critical Taylor Number in Couette Flow for Non-Newtonian Fluids. 1709
S.S.Y. Samson, N. Titchener-Hooker, P.A. Shamjou

A new rheological approach for low temperature measurements. 1713
M. Vanelli, A. Belloni, P. De Cindio, P. D'Antona

Characterization of viscous fluid mixing in a stirred tank by three-dimensional trajectography. 1715
P. Pitiot, H. Vivier, L. Falk, J. Villiermaux

Analysis of interfaces and isosurfaces for identification of mixing regimes in 2D flows. 1719
A. Cavaliere, G. De Felice, F. Denaro, C. Meola
On the simulation of solid particle distribution in multiple impeller agitated tanks via computational fluid dynamics.
A. Brucato, M. Ciofalo, F. Grisafi, F. Magelli, F. Torretta

Drop size and size distribution studies in two-liquid phase dispersions in a vibrating disk agitated vessel.
M.Y.A. Lo, P.A. Shamloo

Fluid mixing analysis of chemical process CFD results.
C.D. Andreasen, R.D. La Roche, M. Liu, L.C. Zullo

Expansion Discontinuities in Slugging Fluidised Beds.
Y. Sergeev, L. Gibilaro, P.U. Foscolo

Mass transfer in the riser of a small circulating fluidized bed reactor.
R.H. Venderbosch, W. Prins.., W.P.M. Van Swaaij

Radial solid flow distribution in circulating fluidised beds.
A. Delebarre, L. Letizia, R. Ocone

Fluidization phenomena in pyroclastic flow.
A. Marzocchella, P. Salatino, V. Di Pastena, L. Lirer

Considerations on the circulating fluidized bed design.
L. Manno, G. Di Bartolo, G. Rovero, L. Manna

A unified approach to "dense" phase backmixing in "fluidized" multiphase reactors.
R. Krishna, J. Ellenberger, C. Maretto

Evaluation of the elasticity modulus of fluidized particles by elastic wave propagation velocity measurements.
D. Musmarra, S. Vaccaro

Inverse solid-liquid fluidization of low density solid particles.
B. Kawalec Pietrenko

Darwin's concept of drift, and its application to selected problems in multiphase flow.
I. Eames, J.C.R. Hunt

The sedimentation velocity of dilute suspensions of nearly monosized spheres.
R. Di Felice, A. Govi

Solids motion and concentration profiles in slurry bubble columns.
B.H. Sannaes, M.P. Dudukovic, H.F. Svendsen

The effect of drag formulation and boundary conditions on bubble column flow prediction.
S. Grevskott, H.F. Svendsen

Rapid separation of water from crude oil in the dense packed dispersion using the gamma-ray density profile apparatus.
K. Panoussopoulos, K. May.., S. Hartland

CFD-modelling of bubbly flow reactors: air-lifts, aeration and bubble columns.
A. Cockx, A. Linè, M. Roustan.., Z. Do Quang

Experimental investigation of coalescence efficiency prediction in laminar flows.
J. Zaborsky, B. Lismonde

Measurements of Particle Behavior near the Wall of Circulating Fluidized Beds.
A. Blomster, H. Kojola

Determination of Flooding Limits for Countercurrent Gas-Liquid Flow in Internally Finned Monolithic Channels.
P.J.M. Lebens, R. Edvinsson. S.T. Sie, J.A. Moulijn
Rheological behavior of fiber suspensions in viscoelastic matrices: experiments and model predictions.  
A. Ait-Kadi, P. Marchal., A. Ramazani, A. Mongruel, L. Choplin, M. Grmela  
Analysis of the effect of anisotropic dispersion on turbulent particle transport under steady drift via Lagrangian simulation.  
A. Soldati, P. Andreussi

The consideration of cross effects in non-local equations of heat and mass transfer.  
L. Kim, A.M. Brener, G.A. Berdalieva

Drying kinetics evaluation in continuous production of long pasta.  
V.M. Nikitin, V.M. Sidelkin, G.A. Savrasov, P.A. Trefilov

The mathematical modeling of processes into tubular pyrolysis reactors with account of inner radiative heat transfer effect.  
O.Y. Kuleshov, V.M. Sidelkin

Method for numerical investigation of complex problem of burning and outer heat radiating of open gaseous jets.  
V.M. Sidelkin, O.Y. Kuleshov

Pattern Classification of Two-Phase Non-Newtonian Liquid-Gas Flow Using Fuzzy Clustering with Partial Supervision.  
W. Pedrycz, A. Kraslowski, M. Dziubinski, E. Rzyski, L. Nystrom

Power consumption in aerated mechanical agitated contactors containing highly viscous liquids.  
A. Arellano-Huacuja, A.S. Khare, K. Niranjan

Flow Pattern and Mixing Mechanism in a Sulzer SMX Static Mixer.  
H.Z. Li, C. Fasol, L. Choplin

Experimental Study of Mixing Performance in Liquid Tanks by Jets.  

An in situ turbidimetric sensor for measuring solid concentration profiles in a stirred tank.  
P. Sessiecq, F. Gruy, M. Cournil

A computational study on solid suspension in a stirred vessel.  
H. Barrue, C. Xuereb, J. Bertrand

Interaction between two parts of the L valve and effect of the flow law on vertical line.  
K. Daoud, Y.K. Benkahla, F. Bentahar

Effect of solids circulation between slug and emulsion phases in gas fluidized bed.  
H.L. Garcia, K. Tannous

Hydrodynamics of a gas jet immersed in a particles bed under non isotherm conditions.  
F. Bentahar, F. Kaci, F. Mahi, K. Daoud, Y.K. Benkahla

Flow Regime Transition in Bubble Columns.  
R. Krishna, J. Ellenberger, C. Maretto

Limit of Darcy's Law Validity in Packed Beds.  
J. Comiti, N. Sabiri

Experimental Study of the Local Bubbling Parameters in an External-Loop Airlift Reactor.  
C. Bentifraouine, C. Xuereb, J. Riba

Prediction of kL coefficients in capillaries operated in Taylor flow regime.  
G. Bercic

Two phase choked flow.  
P. Verlicchi, P. Leonelli, G. Spadoni

</table>

**COMPUTER AIDED PROCESS ENGINEERING**
Identification of chemical processes by relay tests for control purposes. 1951
D. Semino, C. Scali

On the identifiability of parametric models based on residence time distribution analysis. 1955
C. Laquerbe, P. Floquet, J.C. Laborde, L. Pibouleau, S. Domenech

Control loop decoupling in an industrial sidestream distillation column. 1959
A. Bettoni, M. Bravi, A. Chianese

Coupling Control in Solid Phase Peptide Synthesis Using an Artificial Neural Network. 1963
A. Bagno, S. Bicciato, C. Di Bello

Development of a special genetic algorithm for the selection of the energy best available technologies and their optimal operating conditions. 1967
D.A. Manolas, T.P. Gialamas, D. Tsahalis

Reduced Hessian Interior Point SQP for Large-Scale Process Optimization. 1969
D. Kyriakopoulou, B. Kalitventzef

Solving trim-loss problems with MINLP methods. 1973
I. Harjunkoski, T. Westerlund, R. Porn, H. Skrifvars

Modified Cooling Schedule for the Simulated Annealing Method. 1977

On the use of new technologies in existing chemical plants. 1981
G.P.J. Dijkema, C.P. Luteijn, J. Grievink, M.P.C. Weijnen

Intelligent data management system for detailed process design. 1983
M. Hurme

Deterministic model and hybrid model with neural network to simulate a fluid regeneration system. 1987
L.M.F. Lona Batista, R. Maciel Filho

Strategy for Generating Start-Up Procedures Based on Qualitative Models. 1993
R.F. Vianna, C. McGreavy

Fuzzy synthesis, design and analysis of separation sequences. 1997
P. Floquet, S. Domenech, L. Pibouleau

Dynamic modeling of chemical reaction system with neural networks and hybrid models. 2001
J. Wagenhuber, H.J. Zander, R. Dittmeyer

The combination of deterministic optimization and surface response analysis as a tool for high performance reactor design. 2005
A.O. Stinghen, R. Maciel Filho

Increasing the robustness of the SQP algorithms. 2009
M. Turzska' de Gouvea, Dara' Odloop

The new computer package "PIGASOS" on simulation and optimisation of gas sweetening plants. 2013
S. Lattas

A practical application of GMC for pH control. 2017
J.T. Manzi, O.U. Langer, D. Odlook

Snowball effect analysis for recycle processes. 2021
D. Semino, G. Giuliani

WATERSOFT: an effective analytical tool in water management and system design in industry. 2025
E. Sigon, C. Zagano, M. Rovaglio
Optimal Mix of Passive and Active Control: the Genesis of the L2 / Loo Reactor.
J. Harmand, R.E. Skelton, J.P. Steyer, P. Buffère

An Alternative to Estimate Concentrations for Stirred Tank Reactors.
F. Celle - Couenne, A.M. Gibon-Fargeot, H. Hammouri

Model predictive control for optimal solid oxide fuel cell plant operations.
M. Bistolfi, A. Malandrino, M. Rovaglio

On-Line Reconciliation of Sulphur Plants
M. Chiari, S. Pierucci, G. Bussani, M. Grottoli

Intelligent Consulting System for Design of Static Gasket Joints.
F. Babinec, P. Schneider, J. Lukavsky

Method of thermodynamic analysis of energy intensive systems on graphs.
V. Nikulshin, J. Klemes, M. Vengerovich

A hybrid neural network-basic equations approach to chemical reactor modeling.
R. Maciel Filho, P.L. De Santana

PRODUCTION DESIGN AND PROPERTIES OF MATERIALS

On the existence of multiple steady states in immiscible polymer blends.
M. Minale, P. Moldenaers, J. Mewis

Morphology evolution of immiscible polymer blends in shear flow.
N. Grizzuti

Modeling nematic polymers in shear flows.
V. Simeone, P. Maffettone, S. Crescitelli, G. Marrucci

Constitutive equations for concentrated polymeric liquids inspired to the Doi-Edwards theory.
G. Ianniruberto, P. Maffettone

Numerical simulation of rheological effects in fiber spinning.
E. Mitsoulis, D. Kim., H.J. Park, K.J. Lee

Modeling of the filling stage in injection molding of fluoropolymers.
F. Di Muzio, G. Besana, M. Morbidelli, A. Servida

Shrinkage development of PS injection moulded samples.

Surface fracture in paste extrusion.
A. Domanti, J. Bridgwater

Sorption isotherms of cyclohexane in styrene-butadiene copolymers.
F. Bacchelli, F. Montanari

Drug release from polymeric matrices with different degree of swelling.
M. Grassi, R. Lapasin, S. Pricl

Influence of recycling process on the structure and properties of PP.
L. Incarnato, L. Di Maio, P. Scarfato, D. Acieno

Design for recycling: the contribution of the polyolefinic-based advanced materials.
A. Addeo

Characterization of glass fibers: improvement of the dispersion of fibers in water and its effect on mat uniformity.
G. Depres, D. Chaussy., J.F. Le Nest, E. Mauret, P. Blanckaert, M. Bouche

A predictive finite element model for mechanical properties of rodlike particulate composites.
E. Ghassemieh
Investigation of La-Ni-Co oxide films applied by flame-spraying technique.
O. Fruhwirth, B. Trummer, K. Reichmann

Sipos deposition in an annular reactor.
H. Vergnes, C. Cordier, J.P. Couderc

Design of porous polymer/ceramic-composites as solid acid catalysts.
U. Kunz, U. Hoffmann

Relining of Refractories at Minimum Cost.
A. Gerrard

Comparison between two and three dimensional models for heat and mass transfer in the hot-pressing process for MDF production.
L.M.H. Carvalho, C.A.V. Costa.

Generation of ultrafine particles by condensation.
C. Kerber, R. Weichert

On textural properties of porous styrene-divinylbenzene methylmethacrylate terpolymers.
Z. Bencheikh, F. Iayadene, H. Guettaf, A. Saggou, I. Rabia

Morphological changes and dye uptake of semi-crystalline polymers immersed in supercritical carbon dioxide.
P. Beltrame, L. Villani

Study of the Thermal Decomposition of Bioabsorbable Polymers in Different Media.
R.D. Assente e l’ 863, C. Albano, D. Urrutia, J. Feijoo, L. Marquez

Linear viscoelasticity of synthetic binders.
F.J. Martinez-Boza, P. Partal, B. Conde, C. Gallegos

T. Volkov Husovic, R.M. Jancic, Z.V. Popovic, K.T. Raic

Extrusion of TiO2-based ceramic catalysts.
C. Orsenigo, E. Cocchi, N. Dal Maso, P. Forzatti, F. Berti

On powders formation during LPCDV silane pyrolysis.
H. Gris, B. Caussat, J.P. Couderc

Synthesis and colloidal-chemical properties of titania, zirconia and alumina sols as precursors for sol-gel process.
N.G. Medvedkova, V.V. Nazarov, E.K. Valesjan

Physicochemical foundations of alternative technology of polymeric composite materials.
M. Kardash, S. Artemenko, O.E. Taraskina

Polymeric composite materials with ion-exchange properties.
S. Artemenko, M. Kardash, O.E. Taraskina

Rubber and cord tie durability blocked isocyanate raising.
A.P. Puchkov, A.V. Reva

PROCESS ENGINEERING AND INDUSTRIES

Dynamic Processes at Catalyst Surfaces: from Molecular aspects to Chemical Engineering Models
B. Delmon

Kinetics of hydroformylation of ethylene using homogeneous Rh complex catalysts in organic and aqueous media.
R.M. Deshpande, B.M. Bhanage, S.S. Divekar, S. Kanagasabapathy, R.V. Chaudhari
The effect of the addition of ceria to Cu/Al2O3 catalyst on the oxidation of ethanol.
H. Grigoropoulou, C. Philippopulos, A. Kallinikos, S. Poulopoulos

Radiosotope methods in chemical engineering research.
Z. Kolar

Wet Oxidation of Phenol by Manganese-Cerium Oxide: Inhibition of the Catalyst by Carbon Deposition.
P. Oekler, A. Bernier, P. Ruiz, B. Delmon

Sorbitol powder production: continuous high pressure dextrose hydrogenation, purification and crystallization.
A. Venturelli, A. Liati

The formation of volatile hydrocarbons, benzene and polycyclic aromatic hydrocarbons in the fuel-rich combustion of ethylene.
A. Ciajolo, A. D'Anna, R. Barbella, A. Tregrossi

Project financing: a new role for engineers in financial and strategic departments.
S. Valerio

Fine chemicals development and chemical engineering.
P. Marchal, F. Puel

Case study concerning the opportunity of installing cogeneration system in an existing industrial site.
M. Dumont, F. Marechal, B. Kalitventzeff

Concurrent engineering in chemical process design - A better way to deal with external factors?
P. Herder, J. Venselaar, M.P.C. Weijnen

Petrochemical Synthesis from Natural Gas
D. Sanfilippo

IGCC Power Plants - An Important Challenge for Chemical Engineers.
G. Haupt

SMART H2 - A new KTI process for H2 production
C. Bonventre, F. Giacobbe, O. Loiacono

Catalytic conversion of low octane gasoline fractions to high octane engine fuels.
B. Adnadjevic, D. Karaulic, P. Putanov

Experimental study of the higher alcohols synthesis in a lab-scale adiabatic reactor.
G.B. Antonelli, E. Micheli, L. Tagliabue

Etherification of FCC light cracked naphtha.
R. Trotta, M. Brianti, M. Di Girolamo, M. Marchionna, E. Pescarollo

The FBD technology: development and industrial experience.
F. Buonomo, R. Comiotto, G. Fusco, I. Miracca

Oxidative dehydrogenation of ethylbenzene on modified carbon catalysts.

The dehydrogenation of propane using a packed bed catalytic membrane reactor.
H. Weyten, K. Keizer, J. Luyten, R. Leysen

Modeling of fluid catalytic cracking units and comparison with industrial scale data.
M.L. Pilia, A. Viola, G. Cao, A.M. Gregu, A. Melis, V. Guerrini

Fluidized bed combustion of a biomass fuel.
R. Chirone, G. Greco, P. Salatino, F. Scala
