Pyrometallurgy of Copper

Edited by:

W.J. (Pete) Chen
Phelps Dodge Hidalgo, Inc.
New Mexico, U.S.A.

C. Diaz
Inco Limited
Mississauga, Ontario, Canada

A. Luraschi
Cade-Idepe
Santiago, Chile

P.J. Mackey
Noranda Technology Centre
Pointe Claire, Québec, Canada

International conference organized by the Chilean Institute of Mining Engineers, The Metallurgical Society of the Canadian Institute of Mining, Metallurgy and Petroleum, and The Minerals, Metals and Materials Society of the AIME
Table of Contents

VOLUME IV: PYROMETALLURGY OF COPPER

Preface vii
Foreword ix

Smelting Operations

The Changing Landscape of Copper Smelting in the Americas
C. Díaz, H. Schwarze, and J.C. Taylor 3

Magma Metals Company Smelter Expansion
T.W. Gonzalez and D.M. Jones 29

Modernization of Kennecott Utah Copper Smelter
D.B. George, R.J. Gottling and C.J. Newman 41

Recent Operation at the Sumitomo Toyo Smelter
K. Moriyama, N. Kemori and H. Kurokawa 53

Improvements at the Philippine Associated Smelting and Refining Corporation
A.F. San Miguel Jr., C.C. Conde Jr., and A. Belcín 67

Recent Development in the Teniente Converter
R. Alvarado, B. Lértora, F. Hernández and C. Moya 83

High Intensity Use of Oxygen in the Teniente Converter at ENAMI Las Ventanas Smelter
H. Schwarze, E. Correa, K. Baraona and G. Sánchez 103

Cyprus Isasmelt Start-Up and Operating Experience
A.H. Binegar 117

Asarco Shaft Melting and Casting Technologies ’95
J.R. Hugens and M. DeBord 133

New Development at the Gaspé Smelter: Lengthening of the Peirce-Smith Converters for Increasing Throughput
B. Langlois, J.F. Leroux, D. Bedard and P.J. Mackey 147

Optimizing the Vanyukov Process and Furnace for Treatment of Complex Copper Charges
V.P. Bystrov, A.A. Komkov, and L.A. Smirnov 167
Smelter Design and Quality Management

The Feasibility of a Small Copper Smelter
   M.A. Cocquerel
181

Economic and Technical Evaluation of Ausmelt Process Systems for Copper Bearing Materials
   E.N. Mounsey
189

Development of the Rönnskär-Smelter: Slim, Quality, Quantity and Management
   T. Lehner and A. Vikdahl
205

Flowsheet Analysis and Productivity in Metallurgical Plants
   C.A. Landolt, S. Ellor and I. Aavisto
213

Model of Production Planning at Hernán Videla Lira Copper Smelter
   L.B. González, J.C. Vargas and J.M. Palacios
225

Process Improvement

Gaseous Injection Phenomenology in Peirce-Smith Converters
   M.I. Devia, R.H. Fuentes and F.J. Guevara
239

High Oxygen Enrichment at UM-Hoboken Converters
   A. Bustos, M. Cardoen and D. Janssens
255

Use of Oxygen Probes in Copper Converting at INCO's Copper Cliff Smelter
   S.W. Marcuson, S. Tessier, A. Vahed, A. Fritz, and C. Díaz
271

Use of a Predictive Model for Impurity Behaviour at the Chuquicamata Smelter
   H. Mendoza, A.A. Luraschi, G.A. Riveros and M.H. Cerna
281

An Analytical Study of Air Cooled Waffle Panel Converter Hoods
   R. Vos, A. McKim and D. Purdie
299

Latest Developments in Gas Cooling in Copper Smelters
   H. Holopainen, S. Kemppinen, K. Myöhänen and R. Peippo
313

Development of MgO-TiO₂ Refractory for Calcium-Ferrite Slag of the Continuous Copper Matte Converting (Abstract Only)
   S. Okabe, K. Yamaguchi, F. Ogino and E. Kimura
333

Process Development

Continuous Converting of Matte in the Noranda Converter — Part I
Overview and Metallurgical Background
   P.J. Mackey, C. Harris, and C. Levac
337

Continuous Converting of Matte in the Noranda Converter — Part II
Pilot Testing and Plant Evaluation
   C. Levac, P.J. Mackey, C. Harris and P. Barbe
351
Direct Converting of Copper Concentrate in Sirosmelt Reactor
S. Jahanshahi, M. Somerville, and R.G. Hollis 367

Smelting of Sulfide Copper Concentrates in a Combined Bubbling Furnace
A.V. Tarasov and P.A. Kovgan 383

Converting of High Grade Matte by Lime Fluxing
C. Acuña and J. Zúñiga 389

Pyrometallurgical Recovery of Copper from Lubumbashi Smelter and Converter Slags
M.D. Mwema and D.K. Nyembwe 401

Treatment of Copper-Arsenic Bearing Raw Materials
V.A. Luganov, E.N. Sajin and G.A. Plakhin 409

Process Fundamentals

Density and Viscosity of Copper/Nickel Sulphide Smelting and Converting Slags
T.A. Utigard and A. Warczok 423

Densities and Surface Tensions in Calcium Ferrite Slag Containing Silica
T. Nakamura, H. Itou, F. Noguchi and T. Okamoto 439

Behaviour of Cobalt in Copper Smelting Process
M.D. Mwema, L. Segers and R. Winand 451

Component Activities in the Cu-Fe-S-O Mattes
V.A. Kaplan, V.V. Galushchenko, A.V. Višlanzeva and T.A. Bagrova 463

Reductive Smelting of Partially Roasted Ni-Cu Concentrates
M. Zamalloa and T.A. Utigard 473

Dissolution Equilibria of Copper Oxide in Slag
A. Yazawa and J. Hino 489

Oxidation Characteristics of Solid Copper Matte Particles
M. Pérez-Tello, H.Y. Sohn, and J. Löttiger 499

Single Stage Blister Copper Production — Olympic Dam Metal/Slag Equilibrium
F.R.A. Jorgensen and D.N. Collins 515

Sulfur in Copper Smelting Slags
J.W. Matousek 531
