ADVANCES IN HYDRO-SCIENCE AND ENGINEERING

Volume II
Part A

Proceedings of the Second International Conference on Hydro-Science and Engineering
March 22-26, 1995, Beijing, China

Edited by
Chinese Hydraulic Engineering Society (CHES)
International Research and Training Center on Erosion and Sedimentation (IRTCES)

Tsinghua University Press
Beijing
TABLE OF CONTENTS

PREFACE

COMMITTEES

ACKNOWLEDGEMENTS

KEYNOTE ADDRESS
Multiobjective, Interdisciplinary and Transnational Waters (Invited)
T. Carstens, President, IAHR and Technical University of Norway

PART A

I. PLANNING AND MANAGEMENT OF WATER CONSERVANCY WORKS

* Planning and Management

Some Experiences on Compilation of River Basin Planning in China
He Xiaoqiu, CHINA

Planning and Management of Water Conservancy Works
P.B. Ullagaddi and D.S. Hundiwala, INDIA

Integrated Water Resources Planning of Quality and Quantity in Taiwan
Chian Min Wu, CHINA

Hydropower Potential of the North Eastern Region of India
R.K. Barman, INDIA

The Roll of Local Plans in the Process of Developing Hydro Power
Hans Lonegren, SWEDEN

Application of DEA to Decision Evaluation of Hydraulic and Hydroelectric Planning
Xun Houping, CHINA

Significant Function of Promoting the Economic Development in Northwest China
for West Route Water Transfer
Tan Yingwu, CHINA
Study on the Benefit of East Route First Stage Project of South-to-North Water Transfer in China
Pan Minhua and Xie Jinrong, CHINA

Permissible Flow Withdrawal in Interbasin Water Transfer
A.L. Velikanov, RUSSIA

Effect of Hydraulic Structures Alignment on Flow Behavior Using a 2-D Mathematical Model
S.A.S. Ibrahim, E.H. Habib and M.T.K. Gaweesh, EGYPT

An Analysis of Suspended Load Flushing by Vortex Tube
Liu Huanfang and Zhang Kaiquan, CHINA

Decision-Making and CAD of Headwork with Bottom Grating
Zhang Kaiping, Li Duanyou and Li Feibi, CHINA

A Study on Sediment-Prevention for the Headwork of Tianshenqiao Hydropower Station
Fuan Luo, Yongnian Xu, Zhiyong Liang, Fangwu Yang, Zhiwei Yang and Chongyi He, CHINA

A Computational Method of Sediment Settling Basin for Diversion and Silting up Embankment on the Lower Yellow River
Peng Ruishan, Chen Jianwu, Li Huimei and Liu Yuzhong, CHINA

Application of Remote-Sensing in the Improvement Planning of Lingdingyang Bay
Xu Xiangxiang, Chen Wenbiao, Lai Faye and Yang Qinglin, CHINA

Numerical Prediction for a Stability of Rock Mass for the Abutment of an Arch Dam
Jia Lifang, CHINA

On the Design of Sustainable Cost Bank Protection for Morphologically Highly Active Alluvial Rivers
Hartmut Bruhl, GERMANY

Training of the Lihe River for Transferring Water from the Luanhe River into Tianjin City
Zhang xiangfeng and Wan Zhaohui, CHINA

*Irrigation Engineering

A Multi-Objective Irrigation Scheduling Procedure Maximizing Economic Return and Minimizing Environmental Impact
Y. Chang, M. Vanclooster, P. Viaene and J. Feyen, BELGIUM
Water Resources Utilization and Management Against Soil Salinization in Irrigation District

Dong Zengchuan and Cai Jianyuan, CHINA

Sediment Treatment in Irrigation Districts along the Lower Yellow River

Zhaohui Wan, Anmin Zheng, Ximing Wei, Jingtai Wang and Sufang Cui, CHINA

Studies of the Problems Existing in Applying the Underground Irrigation Pipeline System in the Yellow River

Puqing Wang and Hongqi Shang, CHINA

Low Pressure Pipe Irrigation Planning Model under the Condition of Surge Flow Irrigation

Zhang Zhanyu and Fang Kuanhou, CHINA

A Rational Sampling Number and Monte-Carlo Simulation Test in Information Management of Soil Water Resources in Irrigated Area

Shi Haibin and Chen Yaxin, CHINA

* Navigation and Port

Comprehensive Approach to modeling the New York Bight and Harbor Complex (Invited)

H. Lee Butler, USA

Some Hydraulic and Sediment Problems in Planning of Waigaoqiao Excavated Port Basin (Invited)

Hong Guozhen and Chen Changqing, CHINA

Mathematical Model Study on the Sedimentation Problem of Huanghua Harbour

DONG Fengwu, DOU Xiping, LI Tilai and DOU Guoren, CHINA

Sedimentation Research for the Shanghai Baoshan Terminal

Guan Feng and Lu Xinhua, CHINA

Study on the Sea-Going Channel of Zhongshan Port

Yan Yixin, Zeng Xiaochuan and Chen Jian, CHINA

The Movable Bed Study on the Improvement Project at Lanshan Shoal

Zeng Xiaochuan, Yan Yixin and Jian Chen, CHINA

Modeling the Impact of Channel Deepening in Delaware Bay (Invited)

B.H. Johnson, K.W. Kim and J. Gebert, USA
Numerical Calculation of Resistance to a Ship Travelling in a Narrow Channel

Xu Weilin and Liao Huasheng, CHINA

Solving the Navigation Problem at Selwa Using a Two Dimensional Mathematical Model

S.A. Saad, E.H. Habib and A.F. Ahmed, EGYPT

Experiment Study on Navigation Structure with Inclined Shiplift

Zhang Genguang and Li Guiqi, CHINA

Study on Comprehensive Harnessing Schemes for the Jiepai Reach in the Middle Yangtze River

Shen Huishu and Cao Hongji, CHINA

A Study for Harnessing of Yichang Stretch on the Yangtze River

Rao Guansheng, CHINA

* Engineering Hydraulics

Stochastic Control of Water Gate of Dam Applied to Water Quantity Control (Invited)

Mutsuto KAWAHARA and Kenichi SASAKI, JAPAN

Improvement of Hydraulic Calculation on Sluice and Weir

Liang Bin and Chen Xianpu, CHINA

Experimental Investigation of Flow over Side Weirs along 90° Curved Channel

H. Agaccioglu and Y. Yuksel, TURKEY

Characteristics of Combined Flow over Weirs and below Gates with Unequal Contractions

Abdel-Azim Mohamed Negm, EGYPT

Free and Submerged Flow below Sluice Gate with Sill

Abdel-Azim Mohamed Negm, EGYPT

Numerical Model of Stepped Spillway Overflow

Liao Huasheng, Tang Chaoyang, Ru Shuxun and Wu Chigong, CHINA

Aeration Influence on the Pressure Characteristics of Plunge Pool by Impinging Jet

Liao Huasheng, Yang Yongquan, Xu Weilin and Wu Chigong, CHINA

A Study on Jet into a Plunge Pool

Xu Weilin, Liao Huasheng and Yang Yongquan, CHINA
Hydraulic Characteristics in Bucket of Outlet Structure .................................................. 322
L.Z. Ning, X.Q. Zhang and J.Z. Li, CHINA

An Arbitrary Lagrangian-Eulerian Finite Element Method for Fluid-Structure Interaction Problem ........................................................................................................ 330
Hirokazu HIRANO, Akira MARUOKA and Mutsuto KAWAHARA, JAPAN

Numerical Computations of the Two- and Three Dimensional Flows around Stationary and Oscillating Cylinders (Invited) ..................................................... 338
Atsushi Okajima, JAPAN

Creeping Rotating Flows and Their Applications of Non-Newtonian Fluids in Eccentric Annuli ................................................................. 346
Y.G. Zheng and D. Fang, CHINA

Analytic Expressions for Turbulence Intensities of Open Channel Flows ...................... 354
Donghuo Zhou, USA, and J.R. Ni, CHINA

Numerical Simulation of Supercritical Shock Wave in Channel Contraction (Invited) .......... 362
Ming-Hsi Hsu, Fu-Chun Wu and Wei-Hsien Teng, CHINA

A Numerical Model in Cartesian Coordinate System for Unsteady Flow in Curved Channels (Invited) ............................................................. 370
Chang-Tai Tsai, Kae-Yau Chang and Chih-Heng Tsai, CHINA

Compact Differencing for Stratified Free Surface Flow (Invited) ..................................... 378
Guus S. Stelling, THE NETHERLANDS

Evaluation on Water Surface Oscillation Downstream from Reservoirs ......................... 387
Zheng Guohua, Li Qiang and Su Ping, CHINA

A Boundary Condition Technique of Moving Boundary Simulation for Broken Dam Problem by Three-step Explicit Finite Element Method .................. 394
Tsuyoshi UMETSU, JAPAN

Adaptive Models of Transient Flow in Rubble Mound Breakwaters (Invited) ................. 400
U. Meissner and H. Wibbeler, GERMANY

Geometrical and Hydrodynamical Factors Affecting the Hydraulic Efficiency of Chlorine Contact Units ................................................................. 408
Edmilson Costa Teixeira, BRAZIL

The Experimental Study of Solid-Liquid Flow in a Horizontal Pipe by Laser Velocimetry ................................................................. 416
YUAN Xinming, CHINA, and O. Scrivener and H. Reitzer, FRANCE
Use of Machine Vision in the Study of Local Scour ................................................. 424
Wenxue Li, CHINA, and Peter A. Mantz, USA

II. WATER-RELATED ENVIRONMENTAL PROBLEMS

* Benefit and Impact of Large-Scaled Projects

Three Gorges Project and the Environment (Invited) ........................................... 435
YOUME LU and RUSHU WANG, CHINA

Sanmenxia Multipurpose Hydro Project on the Yellow River and Its Benefits (Invited) ................................................................. 445
Yang Qing'an and Zhang Jinliang, CHINA

Environmental Protection in Hydroprojects on the Yangtze and Yellow Rivers .... 453
T.L. Jin, CHINA

The Impact Study of Hydraulic Structures on Mountainous Rivers in Taiwan ..... 460
Hsieh, Gwo-Jeng, Wu, Sue-Jen and Huang, Che-Yuan, CHINA

Adverse Impacts of Water Resources Projects ....................................................... 468
SU Yan, CHINA

Effect of Water Projects on Water Volume of Yellow River .................................. 474
Mao Chunmei and Tang Deshan, CHINA

The Morphological Impact of the Sulin Dam ......................................................... 480
Ke, Wu-Sung, Wu, Sue-Jen and Huang, Che-Yuan, CHINA

Alteration of Hydrological Regime and Bed Deformations of the Enisei River Below Dams ......................................................... 487
N. Vinogradova and V. Ivanov, RUSSIA

Study on the Influence of the Environment Condition Affected by Depositing or Building the Relative Underground Yellow River .................. 492
Shang Hongqi and Wang Puqing, CHINA

Modeling Circulation and Freshwater Transport in Choctawhatchee Bay ............. 497
Wenrui Huang, W.K. Jones, and T.S. Wu, USA

Qualitative Environmental Impact assessment of Meghan-Dhonagoda Irrigation Project in Bangladesh .............................................. 505
Mohammad Rezaor Rahman, BANGLADESH
Ecological Monitoring and Combat against the Irrigational Desertification: Ecological Background and Principles of Activities
V.S. Zaletaev, RUSSIA

The Damage of Valea Stefancei I Decantation Pond and His Influence over the Surface Water Quality
Mihaela Lazarescu, ROMANIA

A Study of Comprehensive Environment Impact Assessment of River Development Project by Grid System Method
Li Xijing and Li Baoan, CHINA

Water Quality and Pollution

Water Pollution - a Challenge for the Future, and Emerging Approach to Conservation of Water Resources
J. Niemczynowicz, SWEDEN

A Study of Water Quality Models and Prediction System of the Reach from Mengjin to Huayuankou of the Yellow River
Wang Renxiang, Zhao Peilun, Li Hongye and Hu Guohua, CHINA

Application of Fuzzy Synthetic Judgment to Water Quality Evaluation
Tao Chuankao, Tao Chuanzhi and Tao Zunli, CHINA

Assessment on Regional Water Quality of Xifeng City and Proposals Concerning Development and Utilization
Guo Rui and Liu Bin, CHINA

Water Pollution and Management in Tolo Harbour - a Land Locked Embayment in North-Eastern Hong Kong
H. Chua, K.W. Chau and F.L. Hua, HONG KONG

In Vitro Study of Sediment Oxygen Demand and Nutrient Release in Tolo Harbour - a Land-Locked Embayment in North-Eastern Hong Kong
H. Chua, K.W. Chau and F. L. Hua, HONG KONG

A Finite Fourier Series Representation of Long Term Source for Coastal Pollution
Seung Won Suh, R.O. KOREA, and E. Eric Adams, USA

The Study of Douhe Reservoir Nonpoint Pollution Model
Lu Xiánbi, Zhang Sicong, Wu Xiaofeng, Ma Zengtian, Wang Liqing and Zhi Deguo, CHINA
Residual Arsenic In Yellow River Fish and Effects of Suspended Sediment
Zhang Shuguang, CHINA

Study on the Concurrent Adsorption by Sediment with Different Grain Sizes
Suiliang Huang and Zhaohui Wan, CHINA

Effect of Substances Released from Sediment on Instream Aeration
Xu Ying and Zhu Jiazheng, CHINA

A Study on Heat Exchange Through Interface between Water (ICE) Body and Atmosphere in Winter Seasons
Ha Huanwen, Lu Shunan and Jiang Han, CHINA

Hydraulic Properties of Oncomelania and Mode of Its Diffusion Motion in River
W. Zhang, Z.A. Xiong, Q.S. Pan, A.S. Huang and X.X. Yang, CHINA

Experimental Studies on the Threshold Velocity of Oncomelania in Flume
Zhaohan Pan, Hechun Chen and Changhao He, CHINA

III. MANAGEMENT OF WATER AND LAND RESOURCES

* Hydrological Modeling

Structure of the Ten-Days Natural Flows of the Blue Nile
A.M. Negm, EGYPT, A.S. Al-Turbak, SAUDI ARABIA, A.H. El-Sayed and A.A. Saiad, EGYPT

A Study on the Incoming Runoff and Sediment Changes in the Upper Yellow River and Its Effects on the Ning-Meng Reach
Cheng Xiwen, Tian Zhizhon, Shang Hongxia and Yang Xiaobing, CHINA

The Characteristics of Ground Water runoff and Its Influences on the Estimation of Water and Sediment Yeild
Mingying Dai, CHINA

Future Variation Tendency of Annual Runoff at Huayuankou Reach of Yellow River
--- a Study by Grey Topological Prediction
Ren Dachuan, CHINA

Cumulative Effects of Wetlands on Watershed Hydrology
Misganaw Demissie, P.E., USA
Multisite Multiseason Streamflow Simulation Using Singular Value Decomposition Approach .................................................. 681
Van-Thanh-Van Nguyen and Chavalit Chaleeraktrakoon, CANADA

A Couple Grey System Model Applied to Prediction of Precipitation and Temperature Associated Climate Change .................................................. 688
XIA Jun, CHINA

A Methodology for Integration of GIS with Hydrological Modelling ................................................................. 696
Ashantha Goonetilleke and Graham A. Jenkins, AUSTRALIA

Transfer of Hydrologic Technology from the United States to the People's Republic of China .................................................. 703
John Ingram and Curt Barrett, USA

* Management of Water Resources

Sustainable Water Resources Development in China (Invited) ................................................................. 710
Zhang Guangdou and Chen Zhikai, CHINA

Water Resources Utilization Simulation Using HEC-5 for Mae Klong River Basin in Thailand .................................................. 720
Sheng Liang, THAILAND

Water Resources Management in the Upper Volga Basin ................................................................. 729
W.I. Klepov, RUSSIA

Management of the Water Resources of the Republic of Turkey ................................................................. 735
Levent Yilmaz, TURKEY

Water Resource Management of the Red River for Sustainable Development .................................................. 743
Hoang Niem, VIETNAM

Discussion on Development and Utilization Ways of Agriculture Water Resources on the Loess Plateau in China .................................................. 750
Gao Rongle and Wang Daxiang, CHINA

Using Narrow and Deep Channel to Deliver Hyper-Concentrated Flow to the Sea .................................................. 758
Pu Qi, Houjun Zhang, Zanying Sun and Yuying Ru, CHINA

Application Research on Colmation and Soil Modification Technology in Water and Soil Resources Development of the Yellow River Delta .................................................. 766
Zhou Zhenmin, CHINA

XV
Research on Multi-Objective Optimal Utilization of Water Resources in Yellow River Basin ................................................................. 774
  Tang Deshan, CHINA

Water Environment and Management Priorities in Hong Kong .................................................. 783
  H. Chua and K.W. Chau, HONG KONG

Studies of Regulation and Control of Water Quantity in the Water Network of Suzhou .............................................................. 791
  Yao Qi and Ding Xunjiang, CHINA

Criteria of Watershed Classification for Competitive Use .......................................................... 799
  Valentina B. Iakovleva and Irina V. Lantsova, RUSSIA

Integration of Hydrodynamic, Water Quality, Sediment, Watershed Loading, and Ecosystems Models of Surface Waters (Invited) .................................................. 805
  T.S. Wu, S.C. McCutcheon, R.B. Ambrose and J.M. Hamrick, USA

Ecological Evaluation of Watershed Management Projects (Invited) ........................................ 813
  Scott S. Knight, Charles M. Cooper and F. Douglas Shields, Jr., USA

Study on Management Model and Algorithm for the Conjunctive Use of Large-Scale Surface Water and Groundwater .................................................. 822
  Zhu Wenbin, CHINA

Optimal Water Resources Utilization Model for Arid Areas .................................................... 830
  Tang Deshan, CHINA

Water Supply and Demand System Analysis in Arid and Semi-Arid Region ................................ 838
  Dong Zengchuan and Cai Jianyuan, CHINA

Strategies of the Use of Water Resources under Non-Stationary Conditions ................................ 845
  I.L. Khranovich, RUSSIA

Management of the Regime of Inland Water Bodies Used for Water Supply of Nuclear Power Plants .................................................. 853
  Mikhail. Bolgov, RUSSIA

Modeling of Saltwater Upconing .................................................................................. 858
  Ekkehard Holzbecher, GERMANY

The Strategies and the Prospects of the Development of the Yellow River in Twenty-One Century .................................................. 866
  Yean Zhao, CHINA
Intelligent Multiple Objective Decision Analysis of Macroeconomic Based Water Resources Planning
Wang Wenbin, Cai Ximing, Wang Zongjing and Shi Huibin, CHINA

Development of a water Resources Management Information System
B.Y. Chen and Q.Y. Meng, CHINA

On the Sensitivity and Vulnerability of Water Resources to Climate Change in China
Liu Chunzhen, CHINA

Problem of Water Resources Industry Management and Its Countermeasure
Zhao Min, CHINA

Multi-Layer, Multi-Objective and Group Decision-Making Framework for Water Resources Planning
Wang Hao, Wang Wenbin and Shi Huibing, CHINA

* Soil Erosion and Its control

Discussion on Research Contents of Ecological Economics for Water and Soil Conservation of Loess Plateau
Bi Cifen, CHINA

Dam System Engineering, A Key Link to Deduct the Sediment in Yellow River
Kemin Chen, CHINA

A Prediction Model of Water and Sediment Yield from the Watershed of Middle Yellow River Basin
Tang Liqun and Chen Guoxiang, CHINA

The Estimation of Soil Water Resources
Nadezhda A. Shumova, RUSSIA

Impact of Watershed Management in Different Period on Sediment Yield
Liu Xiaoying, CHINA

Nitrate and Pesticide Losses under various Tillage/Cropping Management Systems (Invited)
J. Kent Mitchell, Michael C. Hirschi, Allan S. Felsot and Sharyl E. Walker, USA

A Nonlinear Model for Soil and Water Conservation Planning of Small Watershed Control
Li L. Ren and Jia P. Hua, CHINA
A Conceptual Model for Soil Erosion and Sediment Transport ........................................ 958

Bao Weimin, CHINA

* Flood Control

Uncertainty of Flood Prediction (Invited) ............................................................... 967

Shou-shan Fan, USA

Microcomputer Package for Automatic Forecasting of Floods .................................... 974

Chen Zhaohe, Zhang Feimu, Ye Shouzhong and Rao Jiaozong, CHINA

A Decision Support System for Watershed Flood Design Purposes in China .................. 982

Lars Bengtsson, Laszlo Iritz, Tielin Zhang, Ronny Berndtsson and Janusz Niemczynowicz, SWEDEN

Impact of New Swedish Criteria for Design Floods on Bridge Structures ....................... 990

Xiao-Liang Yang and Christina Thoms-Hjarpe, SWEDEN

Two-Dimensional Unsteady Flow Modelling for Flood Propagation in Alluvial Flat and Detention Area of the Lower Yellow River .................................................. 998

X.T. Cheng, H. Lan and X.J. Chen, CHINA

Application of Kalman Filter Algorithm to Establish a Deterministic Flood Routing Model .......................................................... 1006

Chang-Shian Chen, Shaohua Marko Hsu and Tsuen-Chii Kang, CHINA

A Method for Extrapolation of Historical Storms for Design Purpose .......................... 1014

Cecilia Svensson, Janusz Niemczynowicz and Ronny Berndtsson, SWEDEN

Flash Flood and Catchment Management .................................................................... 1023

Cao Dang Du, VIETNAM

Development of Bangkok Flood Control System Operation ........................................... 1029

T. Tingsanchali and T. Kitpaisalsakul, THAILAND

Shanghai: Integrated Flood Risk Management System .................................................. 1037

A. CABAL, FRANCE, NING Xiangbao and FAN Yushen, CHINA, J.L. RAHUEL, FRANCE

Experimental Study of the Huaihe River Flood Control Model in the Reach from Huaibin to Zhengyangguan ................................................................. 1045

Chen xianpu, Tan Peiwen, Chen Liye, Liang Bin and Chen Biao, CHINA
Support System for Flood Control Decision in China
   Luo Zewang, CHINA

Establishment and Prospects of the National Flood Control and Information System
   Chen Zhaohui, CHINA

Construction and Prospects for the Yellow River Flood Control Information System
   Huang Ziqiang and Cui Jiajun, CHINA

* Social-economic Analysis

Socio-Economic Problems and Environmental Constraints, Increasingly Governing Factors in Water Resources Development (Invited)
   H. Scheuerlein, AUSTRIA

Strategic Relationships between Sustaining Economic Development and Utilization and Protection of Water Resources in Pearl River Delta
   Liu Zhisen and Luo Chengping, CHINA

Sustainable Water Resources Management and Economic Development
   Jing-San Hwang, CHINA

Analysis of Reservoir Works Impact on Local Social Economy
   Yuan Ruhua, Hu Weisong and Li Shuo, CHINA

Study on Social Evaluation of Agricultural and Urban Water Supply Projects
   Dai Shu Sheng, CHINA

Methods for Calculation of Economic Benefit of Flood Control Projects
   Hengan Wu, CHINA

Economic Optimization Model of River Course Floodproofing Engineering System
   Chunlin Dong and Jide Sha, CHINA

The Floodproofing Capacity of River Course Floodproofing Engineering System and the Analysis of Disaster Reduction Benefit
   Jide Sha and Chunlin Dong, CHINA

A Theoretical Study and Its Model on Environmental Capacity of Reservoir Resettlement
   Xun Houping and Shi Guoqing, CHINA
Theory of Rural Resettlement Population Balance and Its Application ........................................1141
Shi Guoqing, Yu Wenxue and Chen Heng, CHINA

Study on Optimal Model of Enterprise Projects Arranging Reservoir-Induced
Resettlement .............................................................................................................................1149
Zhao Min, Li Shuo and Hu Weisong, CHINA

A Study of Social Effects appraisal on Resettlement Operation in Conservancy Project ... 1156
Shi Guoqing and Chen Shaojun, CHINA
