11th International Harbour Congress

organized by: Koninklijke Vlaamse Ingenieursvereniging (Royal Flemish Society of Engineers), Technological Institute - Section on Harbour Techniques
CONTENTS

Preface

Port Planning

Sustainable maritime (-industrial) development in perspective
G. Allaert

Port planning in the corporatised environment. The road to greater efficiency
Thong Yow Chuan

Opportunities and shortcomings of port privatisation
The Port of Rotterdam in an international perspective
H. Stevens

A resource-based perspective on strategic port planning
C. Coeck, T. Notteboom, A. Verbeke and W. Winkelmans

From port city to port network
L. Van den Berg and A. Van Klink

Proposed improvements of port services in Port of Colombo
Application of ISO 9000-series
J.E. Nilsen, E. Bratteland and D.S.B. Hettiarachchi

Environmental considerations for planning of ports and harbours in developing countries
B.K. Mazurkiewicz

Port extension in Hamburg and opening of "Alte Süderelbe"
M. Meine and P.-G. Tamminga

Planning of functional/spatial development of the Ports in Gdansk and Gdynia in new political and economical conditions
S. Szwankowski and A. Tubielewicz

Infrastructure containerhandling Maasvlakte. Barge container handling
M. Van Schuylenburg and L. Borsodi

Port of Le Havre. Development of new port (Port 2000)
P. Scherrer, J.-C. Baril and P. Galichon
Port Infrastructure Design

Performance of a concrete block quay on silty sand deposit
B. Maric, A. Markovic and R. Komen

Design and construction of two modern wharves at the Port of Fremantle
D. Vallini

Geosystems in port engineering
K.W. Pilarczyk

Two wave models for harbour layout design
Th.V. Karambas and C. Koutitas

Stability analysis of existing and renovated hydroengineering structures in ports of Vistula Lagoon in Poland
B. Zadroga and E. Dembicki

A comparison between circular cell cofferdams and double wall cofferdams and different loads by means of a simple calculation scheme
H.-D. Clasmeier

Deterministic, semi-probabilistic and F.E.M. approach of gravity quay walls
C. Bauduin and L. Maertens

Some specific design aspects in quay wall renovation projects
M. De Man, W. Thibaut, R. Dedeyne, P. De Pooter, P. Bouquet and L. Maertens

Comparison of technical and cost factors regarding different construction designs for the building of a container berth
H.P. Ducker and C. Miller

Static assumptions for the dimensioning of diaphragm walls as waterfront structures, measurements of earth-, water pressure and stresses
M. Brückner

Antwerp-Containerkaai noord : Dewatering for the construction of the new quay wall - Use of models for predicting the effect of dewatering and for determining the protective measures
F. Aerts, Chr. Van Eerdenbrugh, P. Janssens and P. De Schrijver
Design of the second container terminal, north of the "Lock of Zandvliet" in the Port of Antwerp
E. Van Celst, T. Reynaers, W. Thibaut, B. Velleman and N. Terryn

A second-order computational model of wave-induced movement of moored ships
J.M.A. Spencer and P.J. Beresford

Preparation for the construction of a concept of the second container terminal, north of the "Lock of Zandvliet" in the port of Antwerp
L. Meyvis, F. Aerts, W. Thibaut and G. Bernaers

Wave transmission and reflection for a porous rubble mound breakwater
D. McGehee

Evaluation of reliability calculations (level 1) for the north west breakwater in Zeebrugge
J. De Rouck, K. De Winne, L. Van Damme and R. De Deyne

Wave reflections from harbour breakwaters: development of new methods to assess vessel safety
W. Allsop and M.W. McBride

Wave impact loadings on vertical breakwaters: development of new prediction formulae
W. Allsop and D. Vicinanza

Berm breakwaters, tailor-made size graded structures
S. Sigurdarson, G. Viggosson, S. Benediktsson and O. Bjarki Smarason

Facility to control ice floes overtopping breakwaters due to wave action
T. Sasajima, N. Otsuka, S. Osanai and H. Saeki

Accident of a 38.000 tons oil tanker on the breakwater of the new harbour of Skikda Algeria
M. Amari

High-quality quantitative and qualitative underwater inspections of breakwaters
B. De Putter, L. Van Damme, D. Fransaer and F. Claeys

On some aspects concerning vertical caissons instrumentation and interpretation
J.R. Amoros, J.L. Ortega, R. Elvira and L. Molina
### Port Construction

<table>
<thead>
<tr>
<th>Title</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>Protection of new container terminal at Zeebrugge against chloride ingress</td>
<td>345</td>
</tr>
<tr>
<td>D. Van Gemert, J. Van Tongelen and J. Fremout</td>
<td></td>
</tr>
<tr>
<td>The application of stone columns and vibro-compaction in harbour construction - Concept, design and performance</td>
<td>351</td>
</tr>
<tr>
<td>F. De Cock</td>
<td></td>
</tr>
<tr>
<td>Installation experience with combiwall systems in the Port of Rotterdam</td>
<td>363</td>
</tr>
<tr>
<td>J.G. De Gijt and P.J.M. Heijndijk</td>
<td></td>
</tr>
<tr>
<td>A comparison of two unconventional quay refurbishment projects</td>
<td>371</td>
</tr>
<tr>
<td>G. Rankine</td>
<td></td>
</tr>
<tr>
<td>Construction of the caisson quay wall for the Flanders container terminal in Zeebrugge</td>
<td>383</td>
</tr>
<tr>
<td>M. Denayer, C. Treve, P. Verswijvel, R. Dedeyne, J. Fremout and D. Maly</td>
<td></td>
</tr>
<tr>
<td>Construction of a diaphragm wall quay in a tidal dock (Osaka berth)</td>
<td>393</td>
</tr>
<tr>
<td>P. Scherrer, J.-C. Baril and P. Heber</td>
<td></td>
</tr>
<tr>
<td>Antwerp Container Quay North - Execution</td>
<td>403</td>
</tr>
<tr>
<td>F. Aerts, P. Hoppenbrouwers, F. De Meul and W. De Laet</td>
<td></td>
</tr>
<tr>
<td>Harbour bottom erosion at berths due to propeller jets</td>
<td>411</td>
</tr>
<tr>
<td>H.P. Dümker and C. Miller</td>
<td></td>
</tr>
<tr>
<td>In-Situ tests of current velocities and stone movements caused by a propeller jet against a vertical quay wall</td>
<td>425</td>
</tr>
<tr>
<td>T. Blokland and R.H. Smedes</td>
<td></td>
</tr>
<tr>
<td>The effects of ship propellers on bottom velocities and on scour near berths and protection methods using thin flexible revetments</td>
<td>433</td>
</tr>
<tr>
<td>M. Sas, L. Raes and F. Elskens</td>
<td></td>
</tr>
</tbody>
</table>
Uses of wire enclosed riprap to protect against bow propeller effects
A.D. Crowhurst

Effect of compression speed on fender performance
M. Sakuraoka

Fenders and mooring ropes for large vessels need dash-pots
F. Vasco Costa

Fender design "a new concept"
H.L. Sijberden, R.H. Smedes and J.G. de Gijt

Large diameter tyre fenders
P.N. Raw and D.J. McGillewie

Adoption of post tensioning techniques for anchoring quay walls
C. Van Rooten and A.J. Zielinski

Port access

Port approaches, balancing safety and cost
F.R. Kalff, J.T.M. Van Doom and V. Meenakshisundaram

Probabilistic admittance policy Euro-Maas channel
R.P.A.C. Savenije, C. Deelen, J.C. Wüst and H. Keijser

An integrated approach to improve the efficiency of shipping in the Port of Rotterdam
C. Deelen, J.P. Prince and W. Hoebee

Detailed hydraulic and navigational design of approach channels
G.M. Watson, W. McBride and J.V. Smallman

Influence of the ship's length on the manoeuvrability in a canal
E. Laforce, P. Claeyssens and M. Vantorre

Hydrodynamic phenomena affecting manoeuvres at low speed in shallow navigation areas
M. Vantorre and K. Elloot

Model pilot for simulation studies
E.J. Reynolds and M.R. Renlison

Evaluating mariners' preferences in planning breakwater layouts
K. Inoue
Risk of ship collisions at the entrance of waterworks  
J. Van Dyck, E. Laforce, W. Grare and D. Veneziano

Influences of the closure of one entrance to the Neustadt Harbour in Bremen  
H. Nasner, R. Pieper and P. Tom

The artificial approach to the new harbour of Hooksiel - stressfield between ecology and economy  
H.-D. Clasmeier and H. Manzenrieder

New developments in environmental dredging: from scoop- to sweep dredge  
S. Vandycke, P. Standaert and J. Claessens

Geo-electric surveying on water  
J. Matthe

Maintenance

Proposed port maintenance improvements for Port of Colombo  
E. Bratteland, J.E. Nilsen and M.S.S. Devapriya

An environmental audit and impact assessment of a former Soviet-Baltic Seaport  
J. Snowden and C.R. Hoggart

Methods for the control of waterfront structures as aids for decision-taking in harbour management  
K.H. Jonetzki

Environmental management on large industrial sites - A case from the Europoort-Botlek area, The Netherlands  
E. Schurink and P. Stienstra

Modern methods for assessing soil contamination on large industrial sites  
P. Stienstra and E. Schurink

Remediation of soil and groundwater in the port of Antwerp  
A case study  
W. Mondt, F. Monteny and J. Bronders
Posters

The changing role of the port planner in the 1990's
S. Cork and S. Marshall

Storm surge barrier and marine environment
PH. Rigo, S. Rodriguez and J.L.J. Marchal

Langrangian flow velocities measured with DGPS drifter buoys
H. Nasner, R. Pieper and P. Tom

Waterfront redevelopment plan creates port diversification opportunity. Port of Tampa's Garrison Seaport Center
A case study
C.A. Towsley

Simulation of container terminals using discrete simulation
S. Bonsall

Computer simulation method for optimum seaport size
A. Ergin, A.C. Yalçiner, F.P. Genç and I. Güler

Suspended sediment concentrations along the Belgian coast
Under storm conditions and over an M2 tidal cycle
B. De Putter, P. De Wolf, R. Houthuys, J; Van Sieleghem and D. Fransaer

Wharf diagnosis and rehabilitation
D. Bouheniche

Author index
