MACHINE LEARNING

Proceedings of the Fourteenth International Conference (ICML '97)

Edited by
Douglas H. Fisher, Jr.
Department of Computer Science
Vanderbilt University

Nashville, Tennessee
July 8–12, 1997

MORGAN KAUFMANN PUBLISHERS
San Francisco, California
Contents

Preface
Advisory Committee
Program Committee
Tutorials
Workshops
CONTRIBUTED PAPERS

Feature Engineering and Classifier Selection: A Case Study in Venusian Volcano Detection 3
Lars Åker and Richard Maclin

Robot Learning From Demonstration 12
Christopher G. Atkeson and Stefan Schaal

On Learning from Multi-Instance Examples: Empirical Evaluation of a Theoretical Approach 21
Peter Auer

Using Optimal Dependency-Trees for Combinatorial Optimization:
Learning the Structure of the Search Space 30
Shumeet Baluja and Scott Davies

The Canonical Distortion Measure for Vector Quantization and Function Approximation 39
Jonathan Baxter

FONN: Combining First Order Logic with Connectionist Learning 48
Marco Botta, Attilio Giordana, and Roberto Piola

Improving Minority Class Prediction Using Case-Specific Feature Weights 57
Claire Cardie and Nicholas Howe

A Comparative Study of Inductive Logic Programming Methods for Software Fault Prediction 66
William W. Cohen and Prem Devanbu

Learning Symbolic Prototypes 75
Piew Datta and Dennis Kibler

PAC Learning with Constant-Partition Classification Noise and
Applications to Decision Tree Induction 83
Scott E. Decatur

Efficient Feature Selection in Conceptual Clustering 92
Mark Devaney and Ashwin Ram

Knowledge Acquisition from Examples Via Multiple Models 98
Pedro Domingos

Improving Regressors using Boosting Techniques 107
Harris Drucker
Learning Goal-Decomposition Rules using Exercises ........................................... 278
  Chandra Reddy and Prasad Tadepalli

Learning String Edit Distance ................................................................. 287
  Eric Sven Ristad and Peter N. Yianilos

An adaptation of Relief for attribute estimation in regression ......................... 296
  Marko Robnik-Šikonja and Igor Kononenko

Predicting Multiprocessor Memory Access Patterns with Learning Models .......... 305
  M. F. Sakr, S. P. Levitan, D. M. Chiarulli, B. G. Horne, and C. L. Giles

Using output codes to boost multiclass learning problems .............................. 313
  Robert E. Schapire

Boosting the margin: A new explanation for the effectiveness of voting methods 322
  Robert E. Schapire, Yoav Freund, Peter Bartlett, and Wee Sun Lee

Why Experimentation can be better than “Perfect Guidance” ......................... 331
  Tobias Scheffer, Russell Greiner, and Christian Darken

Characterizing the generalization performance of model selection strategies .... 340
  Dale Schuurmans, Lyle Ungar, and Dean P. Foster

A Bayesian Approach to Model Learning in Non-Markovian Environments ............. 349
  Nobuo Suematsu, Akira Hayashi, and Shigang Li

Hierarchical Explanation-Based Reinforcement Learning .............................. 358
  Prasad Tadepalli and Thomas G. Dietterich

Stacking Bagged and Dagged Models .................................................... 367
  Kai Ming Ting and Ian H. Witten

Declarative Bias in Equation Discovery ................................................ 376
  Ljupco Todorovski and Sašo Džeroski

Functional Models for Regression Tree Leaves .......................................... 385
  Luis Torgo

Integrating Feature Construction with Multiple Classifiers in Decision Tree Induction 394
  Ricardo Vilalta and Larry Rendell

Instance Pruning Techniques ............................................................... 403
  D. Randall Wilson and Tony R. Martinez

A Comparative Study on Feature Selection in Text Categorization .................... 412
  Yiming Yang and Jan O. Pedersen

Machine Learning by Function Decomposition ............................................ 421
  Blaž Zupan, Marko Bohanec, Ivan Bratko, and Janez Demšar

Author Index .............................................................................................. 430
