Seventh International Conference on
TEXTURES OF MATERIALS
Holland 1984
Netherlands Society for Materials Sc
# CONTENTS

P. Jongenburger, Chairman of the Executive Committee of Icotom-7, Opening Address pp. 1

K. Lücke, Chairman of the International Committee of Icotom, Verbraak Memorial Lecture pp. 3 - 4

## CHAPTER I - DEFORMATION TEXTURES

P. van Houtte, Invited Lecture, 'Some recent developments in the theories for deformation texture prediction' pp. 7 - 23

J.M. Alberdi, J. Torrealdea, E. Erauzkin and J. Gil Sevillano 'On the origin of some transients in deformation textures at moderate strain levels' pp. 25 - 30

M. Arminjon 'Explicit relationships between texture coefficients and three-dimensional yield criteria of metals' pp. 31 - 37

H. Cortez-Regalado and S. Saimoto 'Occurrence of non-octahedral slip in ideally oriented aluminium alloy single crystals during rolling' pp. 39 - 45

C. Därmann, S. Mishra and K. Lücke 'On the rolling texture in BCC metals and comparison to theory' pp. 47 - 51

A.L. Dons and E. Nes 'TEM investigation of early stages in cube texture formation in aluminium' pp. 53 - 57

J.H. Driver, A. Skalli and M. Wintenberger 'The deformation behaviour of FCC crystals during plane strain compression and rolling' pp. 59 - 64

B.J. Duggan and W.Y. Yeung 'Shear bands and internal necks in α brass' pp. 65 - 70

C. Esling, H.J. Bunge and J. Muller 'Texture development by plastic deformation as described by the rotation field' pp. 71 - 76

Ch. Hartig and M. Feller - Kniepmeier 'Electromicroscopic investigation of deformation texture and nucleation in rolled (010) [100] ni-single crystals' pp. 77 - 82

R. Kern and H.J. Bunge 'Texture and microstructure of cold rolled high-purity iron' pp. 89 - 94

G.D. Köhlhoff, B. Krentscher and K. Lücke 'Texture development in a cube oriented copper single crystal' pp. 95 - 100

Dong Nyung Lee 'Relation between planar anisotropy and texture in FCC and BCC sheet metals' pp. 101 - 108

Dong Nyung Lee, Young Hoon Chung and Myung Chul Shin 'Preferred orientation in extruded aluminium alloy rod' pp. 109 - 114

M.J. McQueen and H. Mecking 'Textures in hot rolled sheets of FCC metals' pp. 115
K. Morii, Y. Nakayama and H. Mecking
'Factors contributing to shear band formation in Al-3%Mg single crystals'
pp. 117 - 122

W. Österle
'Influence of temperature and impurity content on the development of texture and microstructure of cold rolled iron'
pp. 123 - 128

F. Royer and C. Tavard
'Quantitative correlations between the texture of polycrystals and their plastic deformation: some applications to FCC systems'
pp. 129 - 131

A. Schubert, K.E. Hensger, P. Klimanek, S. Matthies and A. Mücklich
'Texture development in pass rolling of steel rods'
pp. 133 - 138

Kazuyoshi Sekine, Hiroshi Fukutomi and Taichi Kamiijo
'Warm rolling textures of commercial purity aluminum and aluminum alloy containing zirconium'
pp. 139 - 144

C. Tavard and F. Royer
'Plastic deformation of polycrystals: selection of active slip systems in sachs-taylor intermediate models'
pp. 145 - 151

P. van Houtte, H.R. Wenk and F. Wagner
'The curling effect as a possible explanation of the uniaxial compression textures of calcite'
pp. 153 - 158

U. Frhr. v. Schlippenbach and K. Lücke
'Deformation and recrystallization textures in a low-C-steel'
pp. 159 - 164

P. Wagner, H.R. Wenk, H. Kern and P. van Houtte
'Evolution of deformation textures in calcite'
pp. 165 - 171

K. Wierzbanowski and M. Servelleer
'Application of the multiple inclusions model for the study of intracrinar heterogeneity of the deformation and crystal rotation'
pp. 173 - 178

K. Wierzbanowski, A. Hiihi, M. Serveiller and A. Clément
'Rolling textures predicted by self-consistent model and continuity equation'
pp. 179 - 184

M. Woch and R. Rutkowski
'Development of texture in α-brass tubes in dependence on the reduction in thickness to the reduction in diameter ratio
pp. 185 - 191

CHAPTER II - RECRYSTALLIZATION TEXTURES

K. Lücke, Invited Lecture,
"Verbraak Lecture"
'The formation of recrystallization textures in metals and alloys'
pp. 195 - 210

A.T. Alpas and T. Öztürk
'Influence of precipitation on the development of annealing textures in a Cu-1.7% Be alloy'
pp. 211 - 216

H.J. Bunge, H.P. Lee and E. Dahlem
'Growth selection and texture changes during continuous grain growth'
pp. 217 - 220
H.W. Erbsloh, P. Bronder and K. Lücke  
'Texture development after cold rolling and recrystallization in commercial AlFeSi alloys'  
pp. 221 - 226

H.W. Erbsloh, J. Matuschek and K. Lücke  
'Separation of continuous and discontinuous recrystallization of high purity AlFeSi alloys'  
pp. 227 - 232

P. Ernst and P.J. Wilbrandt  
'Growth selection experiments in tensile deformed <100> - oriented copper single crystals'  
pp. 233 - 238

Evan Grant, Dorte Juul Jensen, Brian Ralph and Niels Hansen  
'Texture development during grain growth in pure copper'  
pp. 239 - 244

M. Hatherly, A.S. Malin and C.M. Carmichael  
'The distribution of annealing twins in 70:30 brass'  
pp. 245 - 249

D. Juul Jensen, N. Hansen and F.J. Humphreys  
'The development of recrystallization textures in aluminium containing large intermetallic particles followed by neutron and electron diffraction measurements'  
pp. 251 - 256

R. Kern, J. Grewen and H.J. Bunge  
'Development of the recrystallization texture and microstructure of high purity-iron'  
pp. 257 - 262

S. Kohara  
'Recrystallization texture in unidirectionally recrystallized aluminum'  
pp. 263 - 268

S. Mishra, C. Därman and K. Lücke  
'On the mechanism of the formation of the goss texture in Fe3%Si'  
pp. 269 - 274

M.Y. Nazmy, R.F. Singer and E. Török  
'Texture development and recrystallization in two dispersion-strengthened nickel-base alloys'  
pp. 275 - 280

B.B. Rath  
'Recrystallization texture in iron crystals'  
pp. 281 - 286

R.K. Ray and K. Lücke  
'Deformation and recrystallisation textures in nickel-iron alloys'  
pp. 287 - 292

Tetsuyuki Taniguchi, Kunio Ito and Hideo Abe  
'Recrystallization textures of a two-stage annealed P-bearing Al-killed steel'  
pp. 293 - 300

K. Ushioda, J. Ågren and W.B. Hutchinson  
'Role of carbide dissolution in texture development of low carbon steel during continuous heating'  
pp. 301 - 306

Tadao Watanabe  
'The anisotropy of grain growth due to the migration of plane-matching grain boundary in Fe-3%Si'  
pp. 307 - 312

CHAPTER III - TRANSFORMATION TEXTURES

E. Aernoudt, A. Razavi and K. Mols  
'Texture control in copper-base shape-memory alloys'  
pp. 315 - 319

M. Humbert, P.I. Welch and H.J. Bunge  
'Texture transformation with variant selection'  
pp. 321 - 325

N. Inakazu and H. Yamamoto  
'Formation process of transformation texture during cold drawing in austenitic stainless steels'  
pp. 327 - 332
P. Klimanek, M. Betzl, G. Hötzsch, S. Matthies and A. Mücklich
'Fibre textures in low-temperature deformation of two-phase stainless steel X5CrNiTi26.6'
PP. 333 - 338

B.B. Rath, J.S. Kallend, C.L. Vold, R.A. Masumura and M.A. Imam
'Prediction of transformation texture in titanium alloys'
PP. 339 - 343

F. Wagner, M. Humbert, C. Esling and H. Bergmann
'On the origin of the variant selection in the texture transformation of Fe 30 Ni'
PP. 345

CHAPTER IV - TEXTURES IN FILMS AND THIN LAYERS

S. Radelaar, Invited Lecture,
'Texture formation in thin solid films'
PP. 349

H.W. Bergmann and W. Witzel
'Textures in rapidly solidified metals'
PP. 351 - 358

S. Ono, P. Delaneau and B. Thomas
'The influence of intercritical annealing temperatures and times in simulated conditions of continuous annealing on the drawability of Al-killed low carbon steels. Role of initial carbide morphologies'
PP. 359 - 365

CHAPTER V - TECHNOLOGICAL APPLICATIONS, STEEL AND OTHER FERROUS ALLOYS

S. Nagashima, Invited Lecture,
'Anisotropy in mechanical properties and texture control in steel making technology'
PP. 369 - 382

W. Bleck and U. Lotter
'The development of texture in microalloyed extra-low-carbon steels'
PP. 383 - 388

M.A. Burke, B.T. Mole and G.J. Davies
'The influence of textural anisotropy on fatigue crack propagation in cubic metals'
PP. 389

C.F. Chang and G.T. Higgins
'Goss texture development in an aluminum killed low carbon steel sheet'
PP. 391 - 396

F. Emren and K. Lücke
'On the textural development of rapidly annealed deep drawing steels'
PP. 397 - 402

J.M. Hauser, B. Baroux and G. Blanc
'Textures of Ti - or Zr - bearing ferritic stainless steel sheets'
PP. 403 - 407

W.B. Hutchinson and K. Ushioda
'The effect of carbon on annealing textures in steels'
PP. 409 - 414

E. Lhuire, Tran-Huu-Loi, J.P. Morniroli and M. Gantois
'Brittle fracture of drawn tungsten rods and wires'
PP. 415 - 420

S. Mandziej, C.A. Verbraak, J. Beyer and B.H. Kolster
'Texture and anisotropic behaviour of dual-phase steel'
PP. 421 - 426

A. Okamoto and N. Mizui
'Effect of nitrogen on the recrystallization texture development in high purity iron'
PP. 427 - 432
H. Sumitomo and H. Yoshimura
'Influence of microstructures before cold rolling and
austenite stability on the plastic anisotropy in austenitic
stainless steel sheets'

T. Suzuki
'Recristallization texture in low-carbon titanium-added
sheet steels'

CHAPTER VI - TECHNOLOGICAL APPLICATIONS, NON-FERROUS
METALS AND OTHER MATERIALS

H.J. Bunge, Invited Lecture,
'Technological applications of texture analysis'

R. Ampe, E. Aernoudt, P. van Houtte and J. Mewis
'The determination of the O.D.F. of stretched polyethylene
terephthalate films'

P. Bankwitz, M. Betzl, L.P. Drechsler, K. Feldmann,
L. Puentes, H. Kaempf, S. Matthies and K. Walther
'Investigation of preferred orientations of the quartz
crystallites in granulite rocks by neutron time-of-flight
diffraction'

C. Carré, C. Bastide, M. Pernot and R. Penelle
'Determination of yield loci of zirconium and zircaloy
thin sheets'

D. Charquet and G. Blanc
'Texture in hexagonal close packed metals : the case of
zircaloy 4 sheets'

G.J. Davies, T. Öztürk and M. Bridge
'The processing of sheet for optimal formability - FCC metals
and alloys'

T. Fujii, Y. Hiraoka, M. Okada and R. Watanabe
'Preparation of a large-scale and optional shape molybdenum
single crystal by means of secondary recrystallization'

K. Hennig, A. Mücklich, I.I. Novikov, V.K. Portnoy,
V.M. Ilenko and S. Matthies
'Study of superplasticity of Al-5Ca-5Zn via neutron
texture analysis'

G. Ibe, B. Grzemba, W.D. Hannibal and G. Scharf
'On the origin of cube texture in thin tapes of high-
furity aluminium'

J. Kusnierz, M. Gasperini, A. Mokhtari, M. Pernot and
R. Penelle
'Shear bands in deep drawing of an aluminium-magnesium
sheet'

Y. Millet, B. Champin and G. Blanc
'Anisotropies from various origins in a titanium alloy'

M.J. Philippe, C. Esling and B. Hochedid
Comparison of texture 'The deformation mechanisms and
the formability of titanium and zirconium'

A. Pochettino, R. Penelle and P. Dervin
'Simulation of the anisotropy of plastic behaviour of
titanium sheet from a reduced texture'

P.I. Welch and W. Skrotzki
'Deformation and recrystallization in extrusion of cubic
ionic polycrystals'
CHAPTER VII - RELATIONS BETWEEN PROPERTIES AND TEXTURE

C.M. Brakman and P. Penning 'Effects of texture in steel specimens on residual stress analysis' pp. 561 - 566

H.J. Bunge and C. Esling 'Non-conventional symmetries in polycrystals' pp. 567 - 571

G.R. Canova and U.F. Kocks 'The development of deformation textures and resulting properties of FCC metals' pp. 573 - 579

C.S. da Costa Viana and L.P. Mendonça Brandão 'Texture and formability of a dual-phase Al-killed steel' pp. 581 - 584

C.S. da Costa Viana and M.M. de Souza 'The contribution of texture to the splitting phenomenon in steel plates' pp. 585 - 588

B.J. Duggan and W.T. Hui 'Effects of cold rolling on fatigue in α-brass' pp. 589 - 594

J. Hoffmann, H. Neff, B. Scholtes and E. Macherauch 'Texture pole figures and lattice deformation pole figures of materials having pronounced deformation textures' pp. 595 - 600

M.Y. Huh, J. Hirsch and K. Lücke 'Microstructure and texture in cold rolled copper at very high strain' pp. 601 - 606

Y. Iida, K. Iwamoto, T. Goto and I. Matoba 'Influence of finely dispersed carbide particles on recrystallization and magnetic properties in 3.3% Si-Fe' pp. 607 - 612

W. Jagusztyn and J.A. Szpunar 'Influence of texture and grain size on static magnetic permeability in Fe-Si steel sheet pp. 613 - 617

H. Kobyashi, T. Shimomura and K. Matsudo 'Effects of carbon and nitrogen contents on the deep drawability of box annealed Al-killed steel' pp. 619 - 624

H. Krause and E. Öcalan 'Development of the tribological textures and residual stresses at the surface of contacting bodies during rolling/sliding motion' pp. 625 - 630

H. Krause and E. Öcalan 'The effect of initial orientation on the formation of tribological textures and on the wear behaviour of the regions in the proximity of surface layers under continuous sliding motion in tribological systems' pp. 631 - 636

U. Lotter and W. Bleck 'Comparison between calculated and measured values of young's modulus lankford parameter, and yield strength for sheet steel' pp. 637 - 641
'Effect of carbon and manganese on the deep drawability of cold rolled steel sheets'
pp. 643 - 648

M. Mehta, R.A. Buckley and G.J. Davies
'Texture development in non-grain oriented silicon steels'
pp. 649

K. Mols, K. van Praet and P. van Houtte
'A generalized yield locus calculation from texture data'
pp. 651 - 656

A. Mücklich, K. Hennig, J. Bouillot and S. Matthies
'Magnetic texture study of an Fe-Ni base alloy by means of Mössbauer spectros-copy and neutron diffraction'
pp. 657 - 662

E. Nes, J. Hirsch and K. Lücke
'On the origin of the cube recrystallization texture in directionally solidified aluminium'
pp. 663 - 668

K.H. Puch and K. Puch
'Comparison of measured and calculated mechanical properties for steels with elongation without necking'
pp. 669 - 674

P.I. Welch, L. Ratke and G. Wassermann
'The effect of deformation on young's modulus in iron-silver sheet composites'
pp. 675 - 680

F. Robbe - Valloire, B. Osdoit and R. Penelle
'Influence of recrystallization on the ridging and formability of ferritic stainless Fe 17Cr'
pp. 681 - 685

P.M.B. Rodrigues, W. Hauser, W.T. Roberts and D.V. Wilson
'The influence of {110} sheet textures on limit strains in biaxial stretching'
pp. 687 - 693

J.A. Szpunar and J. Kulka
'The influence of texture on magnetostriction and magnetocrystalline energy in Fe-Si steel'
pp. 695 - 700

'Magnetic properties of textured magnetic fluids'
pp. 701 - 706

B. Szpunar and J.A. Szpunar
'Influence of texture and particle shape distribution on the magnetic properties of alnico alloys'
pp. 707 - 713

J.A. Szpunar and B. Szpunar
'Application of a mean field model to the description of changes in the magnetic properties in various directions of textured specimens of steel'
pp. 715 - 721

W. Truszkowski
'Quantitative aspects of the relation between texture and plastic anisotropy'
pp. 723 - 728

Zhou Zhi-Gang
'Deformation texture of hot-forged ferroelectric ceramics'
pp. 729 - 734

CHAPTER VIII - EXPERIMENTAL AND COMPUTATIONAL TECHNIQUES OF TEXTURE DETERMINATION AND PRESENTATION

S. Matthies, Invited Lecture,
'The present situation in the field of ODF reproduction and ghost correction'
pp. 737 - 751
'Progress in neutron time-of-flight texture studies at pulsed reactor IBR-30' pp. 753 - 758

C. Darmann, M. Holscher, S. Mishra an K. Lücke
'On the structure of ODFs in Fe3%Si' pp. 759 - 763

J. Hirsch, M. Loeck, L. Loof and K. Lücke
'An automatic goniometer and program system for high speed texture measurement and ODF analysis' pp. 765 - 770

F. Humphreys
'A method for determining textures by electron diffraction' pp. 771 - 776

Dorte Juul Jensen, Niels Hansen, Jürgen K. Kjems and Torben Leffers
'On-line registration of ODF changes during recrystallization' pp. 777 - 782

John S. Kallend and Y.C. Huang
'The determination of the orientation dependence of the stored energy of cold work' pp. 783 - 786

H. Krause and M. Mathias
'A new goniometer for simultaneous determination of textures and residual stresses in crystalline materials' pp. 787 - 792

H.P. Lee, C. Esling and H.J. Bunge
'Determination of the complete ODF of hexagonal metals by the zero-range method' pp. 793 - 798

H.P. Lee, P.I. Welch, C. Esling and H.J. Bunge
'On the definition of the zero-range in the zero-range method' pp. 799 - 803

T. Leffers and D. Juul Jensen
'Correlation between texture and line width in FCC material with deformation twin lamellae' pp. 805 - 810

K. Pawlik, J. Jura and J. Pospiech
'On the reproduction of the orientation distribution function from one pole figure using J. Imhof's concept' pp. 811 - 816

J. Pospiech, J. Jura, K. Lücke and J. Hirsch
'Applications of models in texture analysis' pp. 817 - 820

J. Pospiech and K. Lücke
'The problem of the reproduction of an unequivocal ODF' pp. 821

J. Pospiech, M. Romanska and K. Lücke
'Discussion and examples of the reproduction of the ODF from pole figures by the vector method' pp. 823 - 827

K.H. Puch and H.J. Bunge
'Experimental determination of the influence of the pole figure "window"' pp. 829 - 832

H. Schaeben
'Mathematical analysis and improvement of the vector method' pp. 833 - 838

R. Schwarzer and H. Weiland
'On-line computerized evaluation of kikuchi patterns for the determination of preferred orientations and orientation correlations' pp. 839 - 843

J.A. Szpunar and S.T. Davies
'Application to synchrotron radiation to texture experiments' pp. 845 - 849
P. van Houtte
'An improved method for ODF analysis from incomplete pole figures'  pp. 851 - 856

H. Weiland and R. Schwarzer
'The determination of preferred orientations with the TEM' pp. 857 - 862

P.I. Welch
'A new method of smoothing polefigure data' pp. 863 - 868

Supplement CHAPTER VI

I. Tomov, D. Stoychev and I. Vitanova
'Texture transformation during primary recrystallization in copper coating at room temperature' pp. 869

AUTHOR INDEX pp. 871-873
