Rapid Prototyping
State of the Industry
1997 Worldwide Progress Report

Executive Summary

Terry Wohlers

COPYRIGHT © 1997 BY WOHLERS ASSOCIATES, INC.
"Keynote Presentations: Industry Perspectives"
Automotive - Dr. Charles Wu, Ford Motor Company
Consumer - Gerald Angeli, Eastman Kodak Corporation
Medical - Dr. William Coyne, 3M Corporation

TABLE OF CONTENTS - CONFERENCE PROCEEDINGS

Anthony Anderson, Ford Motor Company ................................................................. 1
"Rapid Tool Fabrication By Powder Metal Forging"

Daniel Anderson, DePuy Orthopaedics ............................................................... 11
"Using Rapid Prototyping Technologies In The Design and Production Of Joint Replacement Implants"

Owen Baumgardner, Texas Instruments ................................................................. 17
"Selling Rapid Prototyping To Management"

Bill Berry (with Dave Rogers), General Motors Corporation .............................. 31
"Rapid Design With The ACTUA 2100 Concept Printer"

Walter Bradley, Texas A&M University ............................................................... 43
"Rapid Prototyping of EDM (Electric Discharge Machining) Electrodes"

Scott Burmeister, Outboard Marine ................................................................. 71
"3D Printing"

Robert Connelly, Becton Dickinson ................................................................. 89
"Rapid Tooling for Medical Products Using 3D-Keltool"

Stephen Deak, Hasbro Toy Group ................................................................. 101
"Material-Correct Prototypes For Toy Development"

Karl-Heinz Dusel, University of Stuttgart ......................................................... 121
"Materials for Rapid Tooling Techniques"

Robert Dzugan (with Robert Yancey), EMTEC .................................................. 143
"Investment Cast Tooling for Metal Casting and Plastic Injection Applications Using Rapid Prototyping"

Bert Evans, Parts Now ................................................................. 175
"Production Outsourcing in Metal Casting - Providing a Seamless Transition from CAD to Manufacturing Metal Parts"

* = Indicates paper was not available at time of print.
TABLE OF CONTENTS - CONFERENCE PROCEEDINGS (continued)

Boris Fritz, Northrup Grumman Corp. 207
  "Making Hydropress Formblocks Utilizing Photopolymer Epoxy Resin And Liquid Molding Compounds"

Vito Gervasi, Milwaukee School of Engineering 231
  "Quality Of Investment Castings Using Rapid Prototyping Patterns"

Reg Gustafson, Clinkenbeard & Associates 245
  "Rapid Prototype Sand Cores vs. Sand Cores Derived from CNC/Traditional Tooling"

James Harrison, Coulter Corporation 251
  "Benchmarking Various Methods of Rapid Prototyping Systems"

Jeffery Heath, Xerox Corporation* 279
  "SL Rapid Tooling Enables Time To Market"

Masato Imamura, Institute of Physical and Chemical Research (RIKEN) 283
  "Advances in Rapid Prototyping Research and Development in Japan"

Greg Kirkorian, Plynetics Express* 319
  "CNC vs. Cast Epoxy Tooling"

Li Li Man (with Norman Sin Wing Chan), Hong Kong Productivity Council 323
  "Reverse Engineering, The Hong Kong Experience"

Creve Maples, MUSE Technologies, Inc. 343
  "Prototype Visualization And Exploration"

Lothar Merz, Fraunhofer-Institut fur Chemische Technologie 351
  "Laser Sintering of Polymer Coated Metal and Ceramic Powders and Partial Debinding by Supercritical Fluid Extraction (SFE)"

Dan O'Brien, Armstrong Mold 371
  "Structural R.I.M. (Reaction Injection Molding) Of A Closed Cell Foam Polyurethane Using Low Cost Tooling"

Dave Peltier, ABB Autoclave Systems 381
  "Advanced Forming Technology to Achieve Rapid Prototyping"

Todd Ray, Compression, Inc. 413
  "Direct Rapid Prototype Tooling"

* = Indicates paper was not available at time of print.
