3rd ESA INTERNATIONAL CONFERENCE
ON
SPACECRAFT GUIDANCE, NAVIGATION
AND CONTROL SYSTEMS

and
Tutorial on Microsats: Design, Development and Execution of Minimum Missions

26-29 November 1996
ESTEC, Noordwijk, The Netherlands
CONTENTS

SESSION 1: IN-ORBIT RESULTS
Chairman: D. Wilson, ESA/ESTEC

ISO AOCS In-Flight Experience — The Exceptional Story of how Everything Turned out Better than Expected  
M.J.A. van Oort, P. Van Hulzen, P. Lammerise, W. Van Leeuwen, M.E. Houck, J. Busseauil, P. Scott & M. Buemi  
Life Test, In-Orbit Operations and Further Development of the Type 125 Gyroscope  
D. Reid & P. Scott  
SAX AOCS Design and In-Flight Experiences  
F.H. van der Laan, L. Karsten, S. Kampen, E.A. Silkens et al.  
Attitude Control System Experiment on Engineering Test Satellite-VI  
The Use of Magnetic Field Data to Estimate Attitude and Trajectory for the Rossi X-Ray Timing Explorer (RXTE)  
J. Deutschmann & I. Bar-Izchack

SESSION 2: STAR SENSOR DESIGN
Chairman: P. Underwood, ESA/ESTEC

Further Evaluation of an Autonomous CCD Star Tracker by the Monte Carlo Method  
J.B. Crowden & D.M. Priestley (presented by P. Cope)  
Intelligent Modular Star and Target Tracker: A New Generation of Attitude Sensors  
U. Schmidt, D. Wunder & E. Graf

SESSION 3: GPS Systems Aspects
Chairman: P. Silvestrin, ESA/ESTEC

MOMSNAV: First Analysis of GPS Flight Data from Space Station MIR  
S. Föckersperger, J.M. Fraile-Ordóñez, O. Montenbruck & E. Gill  
A GPS-Based Orbit Positioning System for the European Archimedes Mission  
J. Potti, M. Bello & A. Pasetti  
Relative GPS Navigation Design and Validation for ATV Rendez-Vous  
H. Marcille, G. Moreau & V. Pascal
SESSION 4: RVD

Chairman: W. Fehse, ESA/ESTEC

ATV GNC During Rendezvous
J. Fabrega, M. Frezet & J.-L. Gonnaud

ARPK Design and GNC Performance Evaluation for ATV-Rendezvous
J.L. Gonnaud, J. Sommer & M. Tsang

Rendezvous Strategy of the Japanese Logistics Support Vehicle to the International Space Station
K. Yamanaka

Remote Intervention in Automatic Onboard GNC Systems
A. Vankov, A. Alyoshin, P. Chliaev et al.

SESSION 5: MISSIONS 1

Chairman: F. Tolivar, JPL, USA

The Design and Development of the Attitude and Orbit Control Systems for the XMM and INTEGRAL Scientific Spacecraft
D. Jukes & D.H. Parker

The GNC&C Design of the New Earth-Observing System Common Spacecraft
T.P. Nosek

Attitude and Orbit Control System for Multimission Spacecraft Platform
M. Sghedoni, J.L. Beaupellet, J. Busseuil & F. Douillet

Attitude and Orbit-Control System Design for X-Ray Astrophysics Space Observatory ASTRO-E
K. Ninomiya, T. Hashimoto, K. Maeda et al.

SESSION 6: RE-ENTRY

Chairman: S. Strandmoe ESA/ESTEC

Navigation, Guidance and Control of the Atmospheric Re-entry Demonstrator
G. Pigné, Ph. Clar, E. Ferreira et al.

Re-entry and Aeroassisted Transfer Trajectory Optimal Control: the Gradient Restoration Algorithm
M. Belló Mora & G. Dutrueil-Lecohier

Analysis of a CTV Re-entry Navigation Concept
H. Malthan, J.M. Fraile Ordóñez & M. Krischke

Parafoil Technology Demonstrator OBC Development: A Successful Exercise in Timely and Low-Cost Development
P.H. van Rossem, P.G. Beerthuizen, J.B. Geerdes et al.
SESSION 7: INSTRUMENT POINTING AND DRAG-FREE
Chairman: P. Vuilleumier, ESA/ESTEC

Pointing System Concept for Solar Instruments Located on the International Space Station Truss
T. Blais & A. Defendini

Hexapod Pointing System
R. Trucco, P.C. Galeone, & F. Pepe

Drag-Free & Attitude Control System for the Gravity Explorer Mission
L. Vaillon & C. Champetier

SESSION 8: ANALYSIS I
Chairman: Th. Lange, DLR, Germany

MIMO Control for 6DoF Relative Motion
E.J. Mora, J.B. Serrano & F. Ankersen

H∞ Techniques: From Research to Industrial Applications
B. Frapard & C. Champetier

Controller Design for RVB with a HERA-Type Manipulator
H. Strauch, T. Goerlach & F. Ankersen

Robust Attitude Control of a Telecommunications Satellite: an L.M.I. Approach
R. Drai, M. Bordier & M. Mayer

SESSION 9: GPS HARDWARE
Chairman: J.-L. Gerner, ESA/ESTEC

Localisation of Spacecraft with Multistandard GPS/GLONASS/RA Receiver
C. Mehlen, M. Toledo Lopez & C. Møeller

The GPS at GTO Experiment
N. Shave & P. Coulson

A New GPS Receiver for Small Satellite Positioning and Attitude Determination Experimentation in Orbit
M. Unwin, Y. Hashida & A. Pasetti

GNSS Receiver Design for Attitude Determination
P. Silvestrin, E. Aardoom, G. Brodin et al.

SESSION 10: STAR SENSOR SYSTEMS
Chairman: K. Ninomiya, ISAS, Japan

Autonomous Attitude Determination Using Star Camera Data
B.R. Quine
Autonomous Attitude Determination from Stars  
I. Barraco & F. Donati  

The Advanced Stellar Compass onboard the Oersted Satellite  
J.L. Joergensen, C.C. Liebe, A. Eisenmann & G.B. Jensen  

SESSION 11: GPS ANALYSIS  
Chairman: F. Sarti, ESA/ESTEC

The GPS Tensor™ Receiver Development  
L. Marradi & D. Fossati  

Multipath Rejection and Attitude Determination Using GPS Experiment  
M. Sghedoni & D. Guichon  

A Visibility-Based Algorithm for the GPS Initial Integer Ambiguity Problem  
A. Pasetti, P. Colmenarejo & F. Gottifredi  

SESSION 12: LAUNCHERS  
Chairman: D. Paris, ESA/ESTEC

Guidance and Control System for J-1 Launch Vehicle  
H. Suzuki, W. Kobayashi, Y. Suzuki & K. Ayabe  

Reliability of Launcher Control System  
V.V. Malyshev, V.T. Bobronnikov, K.A. Karp et al.  

H∞ Method Applied to Launcher Control During Atmospheric Flight  
S. Mauffrey, F. Chabert & M. Schoeller  

Hardware-in-Loop Simulation of Brazilian Launcher VLS  
W. De Castro Leite Filho & D. Salvio Carrijo  

SESSION 13: MISSIONS II  
Chairman: L. Virdee, Intelsat, USA

Galaxy III-R Transfer Orbit Attitude Control  
J. Salvatore, M. Barsky & R. Quartararo  

ODIN Attitude Control System — Design, Development and Test  
O. Jirlow, A. Ptak & R. Augustsson  

Attitude and Orbit Control System for an Infrared Imaging Surveyor  
K. Ninomiya, T. Hashimoto & H. Iida  

Tethered Satellite System Reflight Mission Attitude Dynamics and Control: On-Flight Results  
B. Musetti, B. Cibrario & P. Martella
SESSION 14: LANDING AND PLANETARY MISSIONS
Chairman: M. Lang, ESA/ESTEC

Hazard Avoidance Based on Optical Sensing for Lander Missions
E. Zekri & F. Guettache

A Preliminary Assessment of Various Autonomous Navigation Techniques for Interplanetary Missions
J.B. Serrano, J. Prieto & S.E. Strandmoe

Navigation for Autonomous Landing on Unknown Planetary Surface Using Conical Laser Scanner
T. Kubota, I. Nakatani, T. Yamaizumi & H. Hayashida

Vision-Based GNC Design for the LEDA Mission
B. Frapard, C. Champetier, S. Kemble et al.

SESSION 15: HIGH ACCURACY POINTING SYSTEMS I
Chairman: Ph. Marchal, CNES, France

Towards GAIA: A Ground Demonstration of Nanoradian Sensing and Control
P. Cope

A Two-Stage OPD Control System for Free-Flyer Interferometry Missions
I. Laine, L. Vaillon, H. Lambert et al.

Digital Controllers for Attitude Manoeuvring: Experimental Results
S. Di Gennaro, S. Monaco, D. Normand Cyrot & A. Pignatelli

Dynoptix: A Software Tool for Dynamics and Control Analysis of Optical Systems
I. Laine, D. Dubet, A. Defendini & C. Champetier

SESSION 16: SMALL SATELLITES
Chairman: M. Huddleston, DRA, UK

Onboard Attitude Determination for a Small Satellite
T. Bak

A New Approach for CHAMP Safe Mode Attitude Control
H. Bauer & C. Schmitt

Passive Aerodynamic Stabilisation of Low Earth Orbit Satellite
T. Bak & R. Wisniewski

SESSION 17: HIGH ACCURACY POINTING SYSTEMS II
Chairman: C. Philippe, ESA/ESTEC

Test Results on the High Accuracy Optical Pointing Payload OASIS
J.L. Carel, J.M. Michelin, B. Groult & M. Le Du
GOMOS Dynamics and Pointing, an Innovative Concept for High-Accuracy Pointing Instruments
C. Lemercier, J. Dekneudt, M. Bréart de Boisanger et al.

SOHO Microvibrations: Analyses, Tests and Flight Results
Ph. Laurens, E. Decoux & M. Janvier

Passive and Active Microvibration Control for Very High Pointing Accuracy Space Systems
L. Vaillon, C. Champetier, V. Guillaud et al.

SESSION 18: CONTROL HARDWARE
Chairman: G. Coupe, ESA/ESTEC

In-Flight Experience of the Space Inertial Reference Unit Utilizing the Solid State HRG
G. Londerville, R. Ciolino & D. Haley

Control Moment Gyroscopes (CMG’s) and their Application in Future Scientific Missions
X. Roser & M. Sghedoni

Intelsat VII DIRA Calibration Using an Extended Kalman Filter
K.V. Raman

SESSION 19: ANALYSIS II
Chairman: F. Ankersen, ESA/ESTEC

Spillover Reduction Technique for Flexible Spacecraft Control Problem
F. Curti & C. Arduini

Non-Linear Control for Large Angle Attitude Slew Manoeuvres
C.R. McInnes

Tether Deployment by Fuzzy Logic Controller
R. Licata

SESSION 20: CONTROL SYSTEMS
Chairman: M. Weinberger, ESA/ESTEC

Optimization of Magnetic Attitude and Angular Momentum Control for Low Earth Orbit Satellites
J. Bals, W. Fichter & M. Surauer

Attitude Control of Geostationary Satellites with Minimal Use of Gyros
M. Surauer, P. Zentgraf & W. Fichter

Spacecraft Attitude Rate Measurement Systems without Gyros
J.B. Serrano, E.J. Mora, F. Sarti et al.

Software to Support the ESA Pointing Error Handbook
D.G. Dungate
POSTERS AND STORYBOARDS

The PRONAOS Pointing and Stabilisation System
S. Berrivin, M. Le Du & A. Robert 597

An Autonomous and Integrated Attitude and Orbit Measurement System for
Future Communication Satellites in Non-Conventional Orbits
E.J. Mora & J.B. Serrano 603

Improved Star Tracker for ODIN Satellite
P. Pissavin, J.P. Krebs, P. Lelong et al. 611

An Interactive Software for Orbit and Attitude Parameters Specification
W. de Castro Leite Filho 617

Star Trackers for Accurate Pointing and Attitude Determination
— In-Flight Results of High-Accuracy Star Trackers of ISO and SAX
— New Development Towards Navigation Autonomy
A. Landi, M. Buemi & D. Procopio 621

AOCS Design Software
Y. Roche & M. Sghedoni 631

Attitude Control Simulation for Equator-S Using Object Oriented Modelling
W. Enderle, U. Feucht & D. Moormann 633

A Prototypal Platform for Attitude and Configuration Control
P. Di Giamberardino, F. La Gala & S. Monaco 639

CFIE: In-Orbit Active Damping Experiment Using Strain Actuators
A. Conde Reis, N. Loix, J. Dettmann & P. Brazzale 645

An Overview on Aerospatiale Magnetic Bearing Products for Spacecraft Attitude Control
and for Industry
A. Samuel & B. Lechable 649

Strategies for Orbit Injection that Includes Yaw Manoeuvre
W. de Castro Leite Filho 657

LIST OF PARTICIPANTS 663

LATE PAPERS

FEERP Thrusters Applications to Constellations and Small Satellites
S. Marcuccio, A. Genovese, M. Andrenucci et al. 689

Drag-Free, Attitude and Orbit Control for LISA
H. Klotz, H. Strauch, W. Wolfsberger et al. 695
