ADVANCES IN ELECTRONIC PACKAGING 1997

Proceedings of the Pacific Rim/ASME International Intersociety Electronic & Photonic Packaging Conference
INTERpack '97

Volume 2

presented at
The Pacific Rim/ASME International Intersociety Electronic and Photonic Packaging Conference
June 15–19, 1997
Kohala Coast, Hawaii

sponsored by
The Electrical and Electronic Packaging Division, ASME

edited by
E. Suhir
Lucent Technologies

M. Shiratori
Yokohama National University

Y. C. Lee
G. Subbarayan
University of Colorado

THE AMERICAN SOCIETY OF MECHANICAL ENGINEERS
UNITED ENGINEERING CENTER • 345 EAST 47TH STREET • NEW YORK N.Y. 10017

Computer-Aided Reliability Assessment of a Digital MCM-C for GPS Applications

Martin Rosman, F. Patrick McCluskey, Harold Greenhouse, and Ritesh Jain

Thermo-Mechanical Behavior of Vias in HDI Structures

Rajiv C. Dunne, Kyle Smith, and Suresh K. Sitaraman

Analysis of Thermo-Mechanical Strains Induced in the Plated Through Holes in Thick Advanced Printed Wiring Boards

K. Ramakrishna, G. H. Thiel, and B. G. Sammakia

Characterization of Boundary Conditions for Wedge-Lock-Mounted Printed Circuit Boards

Kevin E. McMurray and Larry D. Mitchell

SOLDER MATERIALS FOR ELECTRONIC PACKAGING

Microstructure and Mechanical Properties of New Lead-Free Solder

Ryuji Ninomiya, Koichi Miyake, and Junichi Matsunaga

The Effect of Lead Content and Surface Roughness on Wetting and Spreading of Low-Lead and No-Lead Solders on Copper-Clad FR-4 Laminates

Joel O. Stevenson, John L. Roberts, Rick N. Davidson, Fred G. Yost, and F. Michael Hosking

Intermetallic Compound Formation of Sn/Pb, Sn/Ag, and Sn Solders on Ni Substrate From the Molten Stage and Its Growth During Aging

Tsung-Yu Pan, Howard D. Blair, John M. Nicholson, and Sung-Won Oh

Assessing the Effect of Surface Roughness on the Wetting of Cu and Pd by Sn/Pb Solder

Edward J. O'Toole, John L. Roberts, and Frederick G. Yost

Environmentally Compatible Solder Materials for Thick Film Hybrid Assemblies

F. Michael Hosking, Paul T. Vianco, Jerome A. Rejent, and Cynthia L. Hernandez

Solder Geometry Prediction in Electronic Packaging: An Overview

S. M. Heinrich and P. S. Lee

A Computational Study of Non-Isothermal Spreading of Drops on a Horizontal Solid Surface

Timothy J. Singler, Xu Zhang, and Dorel Homentcovschi

The Relationship Between Opens and Bridges in Surface Mount Technology

David C. Whalley and Teo Kiat Choon

A Two-Body Formulation for Solder Joint Shape Prediction

F. P. Renken and G. Subbarayan

Shape Prediction of Solder Bump Joint by Surface Tension Analysis and Fatigue Strength Evaluation

Makoto Kitano and Michiharu Honda

Multiphysics Simulations for Solder Joint Formation

Christopher Bailey, Daniel Wheeler, and Mark Cross

APPLICATION OF FRACTURE MECHANICS TO ELECTRONIC PACKAGING

A J-Integral Criterion for Delamination of Bi-Material Interfaces Incorporating Hygrothermal Stress

T. Y. Lin and A. A. O. Tay

Dynamics of Moisture Diffusion, Hygrothermal Stresses and Delamination in Plastic IC Packages

T. Y. Lin and A. A. O. Tay

Measurement of Mixed Mode Fracture Toughness of an Interface Crack in Electronic Devices

Toru Ikeda, Yuji Komohara, and Noriyuki Miyazaki
Fatigue Crack Propagating Evaluation of Microelectronics Solder Joints
Qiang Yu, Masaki Shiratori, and Naoyuki Kojima
1445

Generalized Stress Intensity Factor Concept for Fatigue and Fracture Evaluations of IC Package Solder Joints
An-Yu Kuo, Wan-Lee Yin, Dan Newport, and Martin Y. M. Chiang
1451

Lifetime Prediction and Reliability Evaluation for Thermoplastics in Electronic Packaging
Alexander I. Chudnovsky, Daniel T. Baron, and Yuri B. Shulkin
1461

CHIP CARRIER AND FLIP-CHIP SOLDER JOINT RELIABILITY
Life Assessment of Solder Joint
Masaki Shiratori and Qiang Yu
1471

Implementation of Disturbance Function to Determine Thermal Fatigue Life of Solder Joints in QFP Packages
John Chia and Hans Chia
1479

Role of Underfilling Imperfections on Flip-Chip Reliability
Stelios Michaelides and Suresh Sitaraman
1487

Temperature Cycling Fatigue Analysis of Fine Pitch Solder Joints
H. L. J. Pang, Y. T. Kwok, Jih-Shun Wu, and C. W. SeeToh
1495

Estimating Lifetime of Soldered Joints of QFP Leads
Mami Nagatake, Nobutaka Itoh, Mitsunori Abe, and Ken-Ichiro Tsubone
1501

Reliability Modeling for Ball Grid Array Assembly With a Large Number of Warpage Affected Solder Joints
1507

MECHANICS OF SOLDER ALLOYS
Life Prediction Modeling of Solder Interconnects for Electronic Systems
Darrel R. Frear, Steven N. Burchett, and Michael K. Neilsen
1515

Computational Continuum Modeling of Solder Interconnects: Applications
S. N. Burchett, M. K. Neilsen, and D. R. Frear
1523

The Influence of Microstructure on the Mechanics of Eutectic Solders
J. W. Morris, Jr., and H. L. Reynolds
1529

Factors Affecting Creep-Fatigue Interaction in Eutectic Sn/Pb Solder Joints
Ahmer R. Syed
1535

Interfacial Fracture Mechanism of BGA Packages on Electroless Ni/Au
Z. Mei, P. Callery, D. Fisher, F. Hua, and J. Glazer
1543

Rate-Controlling Mechanism During Plastic Deformation of 95.5Sn4Cu0.5Ag Solder Joints at High Homologous Temperatures
H. Conrad, Z. Guo, and Yi-Hsin Pao
1551

Sensitivity Study on Material Properties for the Fatigue Life Prediction of Solder Joints Under Cyclic Thermal Loading
Shi-Wei Ricky Lee and Xiaowu Zhang
1559

Experimental Correlations of an Energy-Based Fatigue Life Prediction Method for Solder Joints
Hasan U. Akay, Hongyan Zhang, and Nasser H. Paydar
1567

Fatigue Crack Nucleation and Growth in Microelectronics Solder Joints
Makio Iino, Ken Kaminishi, and Motoharu Taneda
1575

An Integrated Fatigue Life Prediction Methodology for Optimum Design and Reliability Assessment of Solder Interconnections
J. Liang, N. Gollhardt, P. S. Lee, S. Heinrich, and S. Schroeder
1583
Experimental Study for Solder Joint Reliability of Surface-Mounted Assembly Subjected to Mechanical Overload
S. J. Ham and S. B. Lee................................................................. 1593

A Unified Viscoelastic Constitutive Model for Tin-Lead Solder Joints
Zhengfang Qian and Sheng Liu.................................................. 1599

Disturbed State Unified Constitutive Modelling for Thermomechanical Behavior and Computer Analysis of Chip-Substrate Systems
Chandra S. Desai........................................................................... 1605

VBO: A State Variable Constitutive Equation for a Solder Alloy
Luca Maciucescu, Ting-Leung Sham, and Erhard Krempl................. 1615

Mechanical Properties and Estimation of Thermal Fatigue Properties of Lead-Free Solders
Tadashi Takemoto, Ryuji Ninomiya, Masahiro Takahashi, and Akira Matsunawa......................................................... 1623

Deformation Behavior of Two Lead-Free Solders
Richard W. Neu, Robert S. Whitelaw, and Daniel T. Scott............... 1629

RELIABILITY OF DCA/UNDERFILLED PACKAGES
Wetting Test to Evaluate the Compatibility of Lead-Free Solders for Fine Pitch Soldering
Makoto Miyazaki, Tadashi Takemoto, Tatsuya Funaki, and Akira Matsunawa................................................................. 1633

Effect of Material and Design Parameters on the Stresses Induced in a Direct-Chip-Attach Package During Underfill Cure
K. Ramakrishna and Zane Johnson................................................ 1639

Thermo-Mechanical Reliability Analysis of Flip Chip Assemblies by Combined Microdac and the Finite Element Method
Andreas Schubert, Rainer Dudek, Jürgen Auersperg, Dietmar Vogel, Bernd Michel, and Herbert Reichl.............................. 1647

Coffin-Manson Based Fatigue Analysis of Underfilled DCA
Vadim Gektin, Avram Bar-Cohen, and Sorin Witzman...................... 1655

Influence of Die Size on the Magnitude of Thermomechanical Stresses in Flip Chips Directly Attached to Printed Wiring Board
C. A. Le Gall, J. Qu, and D. L. McDowell........................................ 1663

Analysis of Bending and Shearing of Tri-Layer Laminations for Solder Joint Reliability
Edward K. Buratyinski.................................................................. 1671

Reliability Study of Chip-on-Board Technology for Space Applications With a 3-D Stacked DRAM as Test Vehicle
Elbert Nhan, Binh Q. Le, Richard H. Maurer, Ark L. Lew, Juan R. Lander, Paul D. Schwartz, and Ann Garrison Darrin................. 1679

RELIABILITY OF SURFACE MOUNT PACKAGES
Dynamic Response of Microelectronics and Photonics Systems to Shocks and Vibrations
E. Suhir.......................................................................................... 1685

Finite Element and Moiré Interferometry Study of Chip Capacitor Reliability
S. T. Lin, J. C. Suhling, R. W. Johnson, B. Han, and J. L. Evans.......... 1687

Reliability of Chip Capacitors in Plastic Pin Grid Array (PPGA) Packages
Deepak Goyal and Mirng-Ji Lii..................................................... 1695

Capacitor Lead Fatigue Life Under Random Vibration
Ravi Gonugondla and Abhijit Gupta............................................. 1701
Pressure Drop Prediction for Heat Sinks: What is the Best Method?  
*Catharina R. Biber and Christian L. Belady* .................................................. 1829

Forced Air Cooling by Using Manifold Microchannel Heat Sinks  
*B. C. Pak, W. C. Chun, B. J. Baek, and D. Copeland* ........................................ 1837

Effect of Base-to-Fin Joint Thermal Resistance on Fabricated Heat Sinks  
*Seri Lee and Christopher A. Soule* ............................................................... 1843

A Parametric Study of Turbulent Fluid Flow and Heat Transfer in a Flow Channel With Distributed Heated Modules  
*Prasanta Deb, Biswajit Basu, and Pradip Majumdar* ....................................... 1849

A High-Performance Heat Sink for Electronic Cooling Applications  
*S. Sridhar and Keith E. Herold* ................................................................. 1857

An investigation of the Thermal Performance of a Medium-Voltage Vacuum Circuit-Breaker  
*Lei Z. Schlitz and Suresh V. Garimella* ...................................................... 1875

Efficiency and Cost Tradeoffs Between Aluminum and Zinc-Aluminum Die Cast Heat Sinks  
*Kurtis P. Keller* ............................................................................................... 1883

A Numerical Investigation Into Geometrical Effects on Extruded Heat Sink Performance Under Natural Convection  
*Jan A. Visser and Frederik J. Thirion* ............................................................ 1889

Heat Pipes: A Practical and Cost Effective Method for Maximizing Heat Sink Effectiveness  
*Scott D. Garner and Jerome E. Toth* ............................................................. 1897

On Heat Sink Measurement and Characterization  
*Sung J. Kim and Seri Lee* .................................................................................. 1903

**THERMAL MANAGEMENT: COLD PLATES**

Thermal Analysis in Multilayer Cold Plates  
*Yung-Ming Lee* .............................................................................................. 1911

Electronic Component Cooling Using Critical Radius Concepts  
*Edwin P. Russo and William W. St. Cyr* ....................................................... 1919

The Design of a Double-Sided, Conduction-Cooled VME 6U Module  
*Jack Berenholz, Eric D'Agostino, Greg Bartlett, and William Yacovitch* ............... 1925

Minimum Thermal Resistance of a Convectively Cooled Isotropic Plate With Non-Uniform Heat Flux  
*John W. Welch and Tung T. Lam* .................................................................. 1933

Problems in the Use of Heat Pipes in Cold Plates Beneath Electronic Boxes  
*Robert C. Prager* ......................................................................................... 1941

Minimum Thermal Resistance of a Convectively Cooled Orthotropic Plate With a Uniform Heat Flux  
*Tung T. Lam, Juan G. Santiago, and William D. Fischer* .................................. 1947

**THERMAL MANAGEMENT: MODELING**

Thermal Characterization of Electronic Packages Using a Three-Dimensional Fourier Series Solution  
*J. Richard Culham and M. Michael Yovanovich* ............................................. 1955

Application of Compact Model Methodologies to Natural Convection Cooling of an Array of Electronic Packages in a Low Profile Enclosure  
*Vance H. Adams, Yogendra Joshi, and David L. Blackburn* ............................... 1967

Reliability of Low Cost "Clip-on" Heat Sink Attachment for Pin Grid Array Ceramic Packages  
*Angelo Villani* .............................................................................................. 1975

Electronic Module Coolability Analysis  
*Richard C. Chu and Gregory M. Chrysler* ..................................................... 1983
Estimation of an Overall Cooling Performance in Electronics Thermal Design:
The Case of Forced Convection
Ken Ogiso................................................................. 1989
Thermal Management of Office Data Processing Centers
R. R. Schmidt.......................................................... 1995

THERMAL/ELECTRICAL COUPLING
