TAB.1 Adaptation of Time Differentiated Cepstrum for Noisy Speech Recognition
Tai-Hwei Hwang, *Lee-Min Lee, Hsiao-Chuan Wang
National Tsing-Hua Univ., ROC
*Chien Institute of Technology, ROC

TAB.2 On The Importance of Various Modulation Frequencies for Speech Recognition
†Noboru Kanedera, *Takayuki Arai, Hynek Hermansky, Misha Pavel
Oregon Graduate Institute of Science and Technology, USA
*International Computer Science Institute, USA
†Shikawa National College of Technology, Japan

TAB.3 A Robust RNN-Based Pre-Classification for Noisy Mandarin Speech Recognition
Wei-Ting Hong, Sin-Horng Chen
National Chiao Tung Univ., ROC

TAB.4 A Parallel Environment Model (PEM) for Speech Recognition and Adaptation
Mazin Rahim
AT&T Labs, USA

TAB.5 Adaptive Model Combination for Robust Speech Recognition in Car Environments
Volker Schless, Fritz Class
Daimler Benz AG, Germany

TAB.6 A Comparative Study of Speech Detection Methods
Stefaan Gerven Van, Fei Xie
KULEUVEN-ESAT, Belgium

TAB.7 Voice Activity Detection Using Source Separation Techniques
Nikos Doukas, Patrick Naylor, Tania Stathaki
Imperial College, UK

TAB.8 Applying Blind Signal Separation to the Recognition of Overlapped Speech
Tomohiko Taniguchi, Shojo Kajita, Kazuya Takeda, Fumitada Iakura
Nagoya Univ., Japan

TAB.9 Multiresolution Channel Normalization for ASR in Reverberant Environments
Carlos Avendano, Sangita Tibrewala, Hynek Hermansky
Oregon Graduate Institute of Science and Technology, USA

TAB.10 A Speech Pre-Processing Technique for End-Point Detection in Highly Non-Stationary Environments
Rafael Martinez, Agustin Alvarez, Vilda Pedro Gomez, Mercedes Perez, Victor Nieto, Victoria Rodellar
Universidad Politecnica de Madrid, Spain

TAB.11 Application of Several Channel and Noise Compensation Techniques for Robust Speaker Recognition
Laura Docio-Fernandez, Carmen Garcia-Mateo
Univ. of Vigo, Spain

TAC.1 Incorporating Linguistic Knowledge and Automatic Baseform Generation in Acoustic Subword Unit Based Speech Recognition................................. 1159
Trym Holter, Tor Bjørn Svendsen
The Norwegian Univ. of Science and Technology (NTNU), Norway

TAC.2 Modeling and Decoding of Crossword Context Dependent Phones in the Philips Large Vocabulary Continuous Speech Recognition System........................... 1163
Peter Beyeler, Meinhard Ullrich, Patricia Wilcox
Philips GmbH, Germany

TAC.3 Modelling Inter-Frame Dependence with Preceeding and Succeeding Frames......................................................... 1167
Philip Hanna, Ji Ming, Peter O’Boyle, F. Jack Smith
Queen’s Univ. of Belfast, N. Ireland

TAC.4 Continuous Speech Recognition Using Syllables Rhys James Jones, *Simon Downey, John S. Mason
Univ. of Wales Swansea, UK......................................................... 1171
*BT Laboratories, UK

TAC.5 A New Approach to Generalized Mixture Tying for Continuous HMM-Based Speech Recognition........................................... 1175
Daniel Willett, Gerhard Rigoll
Gerhard-Mercator-Univ. Duisburg, Germany

TAC.6 State Tying for Context Dependent Phoneme Models.......................................................... 1179
Klaus Beulen, Elmar Bransch, Hermann Ney
RWTH Aachen Univ. of Technology, Germany

TAC.7 A Novel Node Splitting Criterion in Decision Tree Construction for Semi-Continuous HMMS................................. 1183
Jacques Duchateau, Kris Demuyynck, Dirk Van Compernolle
Katholieke Univ. Leuven-E.S.A.T, Belgium

TAC.8 Creating Unseen Triphones by Phone Concatenation in the Spectral, Cepstral and Formant Domains............................. 1187
Mats Blomberg
KTH, Sweden

TAC.9 Creating Large Subword Units for Speech Recognition................................. 1191
Thilo Pfau, Manfred Beham, *W. Reichl, Günther Ruske
Muenchen Univ. of Technology, Germany
*Bell Laboratories, USA

TAC.10 Segmental Modeling Using a Continuous Mixture of Non-Parametric Models................................. 1195
Jacob Goldberger, David Burshtein, *Horacio Franco
Tel Aviv Univ., Israel
*SRI International, USA

TAC.11 Segmentation and Modeling in Segment-Based Recognition................................. 1199
Jane W. Chang, James R. Glass
MIT, USA
TAC.12 Using Syllables in a Hybrid HMM-ANN Recognition System
Alfred Hauenstein
Siemens AG, Germany

TAC.13 Noise Robust Segment-Based Word Recognition Using Vector Quantisation
Ramalingam Haritharan, Juha Hakkinen, Kari Laurila, Janne Suontausta
Nokia Research Center, Finland

TAC.14 Viterbi Based Splitting of Phoneme HMM’s
Luis Javier Rodriguez, *Ines M. Torres
Universidad del Pais Vasco, Spain
*UPV/EHU, Spain

TAC.15 The Demiphone: An efficient Subword Unit for Continuous Speech Recognition
Jose B. Marino, A. Nogueiras, Antonio Bonafonte
Universitat Politècnica de Catalunya, Spain

TAC.16 Organizing Phone Models Based on Piecewise Linear Segment Lattices of Speech Samples
Hiroaki Kojima, Kazuyo Tanaka
Electrotechnical Lab, Japan

TAC.17 Automatic Architecture Design by Likelihood-Based Context Clustering with Crossvalidation
Ivica Rogina
Univ. Karlsruhe, Germany

TAC.18 Towards Articulatory Speech Recognition: Learning Smooth Maps to Recover Articulator Information
Sam Roweis, *Abeer Alwan
California Institute of Technology, USA
*UCLA, USA

TAC.19 Selection of the Most Effective Set of Subword Units for an HMM-Based Speech Recognition System
Anastasios Tsopanoglou, *Nikos Fakotakis
KNOWLEDGE SA, Greece
*Univ. of Patras, Greece

TAC.20 Multi-Ban Continuous Speech Recognition
Christophe Cerisara, Jean-Paul Haton, Jean-Francois Mari, Dominique Fohr
CRIN-CNRS & INRIA Lorraine, France

TAC.21 The Design of Acoustic Parameters for Speaker-Independent Speech Recognition
Nabil N. Bitar, Carol Y. Espy-Wilson
Boston Univ., USA

SESSION: TAD
Speech Coding II
Chair: John Mourjopoulos, Univ. of Patras, Greece

TAD.1 High Quality Split-Band LPC Vocoder and its Fixed Point Real Time Implementation
Stephane Villette, Milos Stefanovic, Ian Atkinson, Ahmet Kondoz
Univ. of Surrey, UK
TAD.2 Missing Packet Recovery Techniques for DM Coded Speech
National Chiao-Tung Univ., ROC China
*Industrial Technology Research Institute, ROC China

TAD.3 Spectral Sensitivity of LSP Parameters and Their Transformed Coefficients
Vu Hai Le, Laszlo Lois
Technical Univ. of Budapest, Hungary

TAD.4 Reducing the Complexity of the LPC Vector Quantizer Using the K-D Tree Search Algorithm
V. Ramasubramanian, K.K. Paliwal
ATR Interpreting Telecommunications Res. Labs., Japan

TAD.5 LPC Quantization Using Wavelet Based Temporal Decomposition of the LSP
Awene N. Lemma, *W.Bastiaan Kleijn, Ed F. Deprettere
Delft Univ. of Technology, The Netherlands
*KTH, Sweden

TAD.6 A Novel 1.7/2.4 KB/S DCT Based Prototype Interpolation Speech Coding System
Costas S. Xydeas, Gokhan H. Ilk
Univ. of Manchester, UK

TAD.7 Improved Regular Pulse VSELP Coding of Speech at Low Bit-Rates
Yong-Soo Choi, *Hong-Goo Kang, Sang-Wook Park, †Jae-Ha Yoo, Dae-Hee Yoon
Yonsei University, Korea
*AT&T Labs, USA
†LG Electronic Inc., Korea

TAD.8 Joint Estimation of Pitch Band Magnitudes, and VUV Decisions for MBE Vocoder
Yong Duk Cho, Hong Kook Kim, Moo Young Kim, Sang Ryong Kim
Samsung Advanced Institute of Technology, South Korea

TAD.9 A New Distance Measure in LPC Coding: Application for Real Time Situations
Balazs Kovesi, Samir Saoudi, Jean Marc Boucher, *Gabor Horvath
ENST-Br, France
*Technological Univ. of Budapest, Hungary

TAD.10 Consideration of Processing Strategies for Very-Low-Rate Compression of Wideband Speech Signals with known Text Transcription
Peter Vepvek, Alan B. Bradley
RMIT, Australia

TAD.11 Zero-Redundancy Error Protection for CELP Speech Coders
Norbert Gortz
Univ. of Kiel, Germany

TAD.12 Low Bit Rate Speech Coding Using an Improved HSX Model
Ridha Matmati, Milan Jelinek, Jean-Pierre Adoul
Univ. of Sherbrooke, Canada

TAD.13 Phonetic Vocoding with Speaker Adaptation
Carlos M. Ribeiro, Isabel Trancoso
INESC, Portugal
TAD.14 Quantization of Spectral Sequences Using Variable Length Spectral Segments for Speech Coding at Very Low Bit Rate
Geneviève Baudoin, *Jan Cernocky, †Gerard Chollet
ESIEE, France
*FEIVUT, France
†ENST, France

TAD.15 On Modeling Event Functions in Temporal Decomposition Based Speech Coding
Shahrokh Ghaemmaghami, Mohamed Deriche, Boualem Boashash
Queensland Univ. of Technology, Australia

TAD.16 Phase Quantization by Pitch-Cycle Waveform Coding in Low Bit Rate Sinusoidal Coders
Soledad Torres, *Javier F Casajus-Quiros
Universidad de Valladolid, Spain
*Universidad Politécnica de Madrid, Spain

TAD.17 A Perceptual Study of the Greek Vowel Space Using Synthetic Stimuli
Antonis Botinis, *Marios Fourakis, †John W. Hawks
Athens Univ., Greece
*The Ohio State Univ., USA
†Kent State Univ., USA

TAD.18 Mixed Multi-Band Excitation Coder Using Frequency Domain Mixture Function (FDMF) for a Low-Bit Rate Speech Coding
Woo-Jin Han, Sung-Joo Kim, Yung-Hwan Oh
KAIST, Korea

TAD.19 Robust GSM Speech Decoding Using the Channel Decoder’s Soft Output
Tim Fingscheidt, Olaf Scheufen
Aachen Univ. of Technology, Germany

TAD.20 A Low-Bit-Rate Speech Coder Using Adaptive Line Spectral Frequency Prediction
Carl W. Seymour, Tony A. Robinson
Cambridge Univ., UK

SESSION: W1A
Dialogue Systems/Applications
Chair: Norman Fraser, Univ. of Surrey, UK

W1A.1 Experiments in Spoken Queries for Document Retrieval
James Barnett, Steve Anderson, *John Broglio, Mona Singh, †R. Hudson, †S.W. Kuo
Dragon Systems, USA
*Univ. of Massachusetts, USA
†Intermetrics Inc., USA

W1A.2 Towards an Automated Directory Information System
Frank Seide, *Andreas Kellner
Philips Research Laboratories Taipei, Taiwan
*Philips GmbH Aachen, Germany

W1A.3 A Strategy for Mixed-Initiative Dialogue Control
Lars Bo Larsen
Aalborg Univ., Denmark
W1A.4 On the Design of Effective Speech-Based Interfaces for Desktop Applications
Jim Hugunin, Victor Zue
MIT, USA

W1A.5 Dialogue Strategies Guiding Users to their Communicative Goals
Mathias Denecke, Alex Waibel
Carnegie Mellon Univ., USA

W1A.6 A Speech Interface for Forms on WWW
Sunil Issar
Carnegie Mellon Univ., USA

SESSION: W1B
Speech Production Modelling
Chair: Michael D. Riley, AT&T Labs, USA

W1B.1 Voice Conversion by Codebook Mapping of Line Spectral Frequencies and Excitation Spectrum
Levent M Arslan, David Talkin
Entropic Research Laboratory, USA

W1B.2 Optimal State Dependent Spectral Representation for HMM Modeling: A New Theoretical Framework
Chafic Mokbel, Guillaume Gravier, Gerard Chollet
France Telecom, France
*ENST, France

W1B.3 Speech Analysis and Systems Using an AM-FM Modulation Model
Alexandros Potamianos, Petros Maragos
AT&T Labs-Research, USA
*ILSP & Georgia Tech, Greece & USA

W1B.4 Synthesis of Fricative Consonants by Audiovisual-to-Articulatory Inversion
Khaled Mawass, Pierre Badin, Gerard Bailly
ICP, INPG, France

W1B.5 New Transformations of Cepstral Parameters for Automatic Vocal Tract Length Normalization in Speech Recognition
Tom Claes, Ioannis Dologlou, Louis ten Bosch, Dirk Van Compernolle
Lernout & Hauspie Speech Products, Belgium
*K.U. Leuven-E.S.A.T, Belgium

W1B.6 A Multiresolutionally Oriented Approach for Determination of Cepstral Features in Speech Recognition
Simon Dobrisek, France Mihelic, Nikola Pavesic
Univ. of Ljubljana, Slovenia

SESSION: W1C
Speaker Recognition II
Chair: Aaron Rosenberg, AT&T Labs, USA

W1C.1 Speaker Identification with User-Selected Password Phrases
Aaron E. Rosenberg, S. Parthasarathy
AT&T Labs, USA

W1C.2 Speaker Verification Based on Phonetic Decision Making
Jesper Olsen
Aalborg Univ., Denmark
W1C.3 Analysis and Comparison of Score Normalisation Methods for Text-Dependent Speaker Verification
A.M. Ariyaeinia, P. Sivakumaran
Univ. of Hertfordshire, UK

W1C.4 Automatic Speaker Recognition on a Vocoder Link
Frederic Jauquet, Patrick Verlinde, Claude Vloeberghs
Royal Military Academy, Belgium

W1C.5 Likelihood Ratio Adjustment for the Compensation of Model Mismatch in Speaker Verification
Frederic Bimbot, *Dominique Genoud
ENST/CNRS, France
*IDIAP, Switzerland

W1C.6 A Lognormal Tied Mixture Model of Pitch for Prosody-Based Speaker Recognition
Kemal M. Sonmez, Larry Heck, Mitchel Weintraub, Elizabeth Shriberg
SRI International, USA

SESSION: W1D

Speech Enhancement I
Chair: Hynek Hermansky, Oregon Graduate Inst. of Science and Tech., USA

W1D.1 Residual Noise Suppression Using Psychoacoustic Criteria
Tim Haulick, Klaus Linhard, Peter Schlogmeier
Daimler Benz AG, Germany

W1D.2 Processing Linear Prediction Residual for Speech Enhancement
*B. Yegnanarayana, Carlos Avendano, Hynek Hermansky,
*P. Satyanarayana Murthy
Oregon Graduate Institute of Science and Technology, USA
*ITT MADRAS, India

W1D.3 Combined Acoustic Echo Control and Noise Reduction for Mobile Communications
Stefan Gustafsson, Rainer Martin
Aachen Univ. of Technology, Germany

W1D.4 A Nonstationary Autoregressive HMM and its Application to Speech Enhancement
Ki Yong Lee, Yeol Rheem
Changwon National Univ., Korea

W1D.5 Spectral Subtraction and Mean Normalization in the Context of Weighted Matching Algorithms
Nestor Becerra Yoma, Fergus R. Mclnnes, Mervyn A. Jack
Univ. of Edinburgh, UK

W1D.6 Improving the Intelligibility of Noisy Speech Using an Audible Noise Suppression Technique
Dionysios Tsoukalas, John Mourjopoulos, George Kokkinakis
Univ. of Patras, Greece
SESSION: W2A
Spoken Language Understanding
Chair: Ioannis Dologlou, ESAT-M12, KU-Leuven, Belgium

W2A.1 Automatic Acquisition of Salient Grammar Fragments for Call-Type Classification .................. 1419
Jerry H. Wright, Allen L. Gorin, Giuseppe Riccardi
AT&T Labs-Research, USA

W2A.2 Stochastically-Based Natural Language Understanding Across Tasks and Languages ........... 1423
Minker Wolfgang
LMSI, France

W2A.3 Transducer Composition for Context-Dependent Network Expansion ................................. 1427
Michael Riley, Fernando Pereira, Mehryar Mohri
AT&T Labs, USA

W2A.4 Giving Prosody a Meaning ......................... 1431
Christian Lieske, *Johan Bos, †Martin Emele, ‡Björn Gambach, *C.J. Rupp
Swiss Federal Institute of Technology Lausanne, Switzerland
*Univ. of Saarland, Germany
†Univ. of Stuttgart, Germany
‡Royal Institute of Technology, Sweden

W2A.5 Feature-Based Language Understanding .......... 1435
Kishore A. Papineni, Salim Roukos, Todd R. Ward
IBM, USA

W2A.6 Speech Translation Based on Automatically Trainable Finite-State Models ......................... 1439
Universitat Jaume I, Spain
*Universidad Politécnica de Valencia, Spain
†RWTH, Germany

SESSION: W2B
Language Model Adaptation
Chair: Herman Ney, RWTH, Germany

W2B.1 Document Space Models Using Latent Semantic Analysis ............................................. 1443
Yoshihiko Gotoh, Steve Renals
Univ. of Sheffield, UK

W2B.2 Adaptive Topic-Dependent Language Modelling Using Word-Based Varigrams .................... 1447
Sven C. Martin, Jörg Liermann, Hermann Ney
RWTH Aachen, Germany

W2B.3 A Latent Semantic Analysis Framework for Large-Span Language Modeling .......................... 1451
Jerome R. Bellegarda
Apple Computer Inc, USA
W2B.4 A Maximum Likelihood Model for Topic Classification of Broadcast News..........................1455
BBN Systems and Technologies, USA
*NHK, Japan

W2B.5 Language Modelling for Task-Oriented Domains
Cosmin Popovici, *Paolo Baggio
ICI-Institutdo de Cercetari in Informatica, Romania
*Centro Studi e Laboratori Telecomunicazioni (CSELT), Italy ..................1459

W2B.6 Chinese Language Model Adaptation Based on Document Classification and Multiple Domain-Specific Language Models .................................................................1463
National Taiwan University, ROCina
*Academia Sinica, ROCina

SESSION: W2B
Language Modelling for Broadcast News
Chair: Richard Schwartz, BBN Systems and Technologies, USA

W2B.1 Estimating Prosodic Weights in a Syntactic-Rhythmic Prediction System ..................1467
Langlais Philippe
CERI, France

W2B.2 Syntactic Information Contained in Prosodic Features of Japanese Utterances ..............1471
Kazuhiko Ozeiki, Kazuyuki Kousaka, Yujie Zhang
The Univ. of Electro-Communications, Japan

W2B.3 Hierarchical Duration Modelling for Speech Recognition Using the ANGIE Framework ......1475
Grace Chung, Stephanie Seneff
MIT Laboratory for Computer Science, USA

W2B.4 On the Use of Prosody in a Speech-to-Speech Translator ......................................1479
Univ. of Bonn, Germany
*German Research Center for AI, Germany
†Univ. of Wein, Austria
‡Univ. of Erlangen-Nurnberg, Germany

W2B.5 Automatic Recognition of Sentence Type from Prosody in Dutch ..............................1483
Vincent J. van Heuven, *Judith Haan, Jos J.A. Pacilly
Leiden University, The Netherlands
*Nijmegen University, The Netherlands

W2B.6 Automatic Word Demarcation Based on Prosody
Paul Munteanu, Bertrand Caillaud, Jean-Francois Serignant, Genevieve Caelen-Haumont
CLIPS/IMAG, France ..........................1487
W2D.1 A 16-KBIT/S Wideband Speech Codec Scalable with G.729
Akitoshi Kataoka, Sachiko Kurihara, Shigeaki Sasaki, Shinji Hayashi
NTT, Japan

W2D.2 Comparison of Auditory Masking Models for Speech Coding
Michelle E. Lynch, Eliathamby Ambikairajah, *Andy Davis
RTC, Ireland
*BTLabs, UK

W2D.3 Wideband Speech Coding Based on the MBE Structure
Anne Amodio, Gang Feng
Univ. Stendhal/INPG, France

W2D.4 Perceptual Filter Comparisons for Wideband and FM Bandwidth Audio Coders
Marcos Ferreux-Guimaraes, *Nicolas Moreau, Madeleine Bonnet
Univ. René Descartes - Paris 5, France
*ENST, France

W2D.5 Wideband Coding of Speech Using Neural Network Gain Adaptation
Cheung-Fat Chan, Man-Tak Chu
City Univ. of Hong Kong, Hong Kong

W2D.6 Wideband-Speech APVQ Coding From 16 To 32 KBPS
Josep M. Salavedra
Universitat Politecnica de Catalunya, Spain
WMA.5 Relative Mel-Frequency Cepstral Coefficients Compensation for Robust Telephone Speech Recognition
*Jiqing Han, Munsung Han, Gyu-Bong Park, Jeongue Park, Wen Gao
Systems Engineering Research Institute, ETRI, Korea
*Harbin Institute of Technology, ROChina

WMA.6 Robust Speech Detection Method for Speech Recognition System for Telecommunications Networks and ITS Field Trial
Seiichi Yamamoto, Naito Masaki, Shingo Kuroiwa
KDD R&D Labs, Japan

WMA.7 The Tuning of Speech Detection in the Context of a Global Evaluation of a Voice Response System
Laurent Maunuary, Lamia Karray
France Telecom, France

WMA.8 New Methods in Continuous Mandarin Speech Recognition
C. Julian Chen, Ramesh A. Gopinath, Michael D. Monkowski, Michael Picheny, Katherine Shen
IBM, USA

WMA.9 Automatic Transcription of General Audio Data: Effect of Environment Segmentation on Phonetic Recognition
Michelle S. Spina, Victor Zue
MIT, USA

WMA.10 Automatic Recognition of Continuous Cantonese Speech with Very Large Vocabulary
Alfred Ying Pang NG, L.W. Chan, P.C. Ching
Chinese Univ. of Hong Kong, Hong Kong

WMA.11 Source Normalization Training for IMM Applied to Noisy Telephone Speech Recognition
Yifan Gong
Texas Instruments, USA

WMA.12 The Development of a Speaker Independent Continuous Speech Recognizer for Portuguese
IST, Portugal
*INESC, Portugal

WMA.13 Blame Assignment for Errors Made by Large Vocabulary Speech Recognizers
Lin Chase
Carnegie Mellon Univ., USA

WMA.14 Predicting Speech Recognition Performance
Atsushi Nakamura
ATR JLT, Japan

WMA.15 A Voice Activity Detector for the ITU-T 8kbit/s Speech Coding Standard G.729
The Univ. of Liverpool, UK
*BT Laboratories, UK

WMA.16 Vocabulary-Independent Recognition of American Spanish Phrases and Digit Strings
Yeshwant K. Muthusamy, John J. Godfrey
Texas Instruments, USA
WMA.17 Recognition of Spoken and Spelled Proper Names
Michael Meyer, Hermann Hild
Univ. Karlsruhe, Germany

WMA.18 HMM Compensation for Noisy Speech Recognition Based on Cepstral Parameter Generation
Takao Kobayashi, Takashi Masuko, *Keiichi Tokuda
Tokyo Institute of Technology, Japan
*Nagoya Institute of Technology, Japan

WMA.19 On the Robustness of the Critical-Band Adaptive Filtering Method for Multi-Source Noisy Speech Recognition
George Nokas, Evangelos Dermatas, George Kokkinakis
Univ. of Patras, Greece

WMA.20 A Space Transformation Approach for Robust Speech Recognition in Noisy Environments
Cun-tai Guan, Shu-hung Leung, Wing-hong Lau
City Univ. of Hong Kong, Hong Kong

WMA.21 Robust Isolated Word Recognition Using the WSP-PMC Combination
Tzur Vaich, Arnon Cohen
Ben Gurion Univ., Israel

SESSION: WMB
Multimodal Speech Processing, Emerging Techniques and Applications
Chair: Giorgio Micca, Centro Studi e Laboratori Telecomunicazioni (CSELT), Italy

WMB.1 Fuzzy Logic for Rule-Based Formant Speech Synthesis
Spyros Raptis, George Carayannis
ILSP, Greece

WMB.2 Integrating Acoustic and Labial Information for Speaker Identification and Verification
*IRCAD/IDIAP, France
*IDIAP, Switzerland

WMB.3 Subword Unit Representations for Spoken Document Retrieval
Kenney Ng, Victor Zue
MIT, USA

WMB.4 Non-Linear Representations, Sensor Reliability Estimation and Context-Dependent Fusion in the Audiovisual Recognition of Speech in Noise
Pascal Texisier, Jean-Luc Schwartz, *Anne Guerin-Dugue
*Laboratoire de Traitement D’Images et de Reconnaissance des Formes, France

WMB.5 Securized Flexible Vocabulary Voice Messaging System on Unix Workstation with ISDN Connection
Philippe Renevey, Andrzej Drygajlo
Swiss Federal Institute of Technology Luusanne, Switzerland

WMB.6 Automatic Deriving of Multiple Variants of Phonetic Transcriptions from Acoustic Signals
Houda Mokbel, Denis Jouvet
France Telecom, France
WMB.7 Improved Bimodal Speech Recognition Using Tied-Mixture HMMs and 5000 Word Audio - Visual Synchronous Database
Satoshi Nakamura, Ron Nagai, Kiyohiro Shikano
Nara Institute of Science and Technology, Japan

WMB.8 On the Use of Phone Duration and Segmental Processing to Label Speech Signal
Philippe Depambour, Regine André-Obrecht, *Bernard Delyon
IRIT - Equipe IHMPT, France
*IRISA, France

WMB.9 Automatic Detection of Disturbing Robot Voice-and Ping Pong-Effects in GSM Transmitted Speech
Martin Paping, Thomas Fahmle
Ascom Systec AG, Switzerland

WMB.10 Speech Synthesis Using Phase Vocoder Techniques
Joseph Di Martino
Univ. Henri Poincaré Nancy I, France

WMB.11 Integration of Eye Fixation Information with Speech Recognition Systems
Ramesh R. Sarukkai, *Craig Hunter
Univ. of Rochester, USA
*Univ. of Rochester,

WMB.12 Generation of Broadband Speech from Narrowband Speech Using Piecewise Linear Mapping
Yoshihisa Nakatoh, M. Tushima, T. Norimatsu
Matsushita Electric Industrial Co, Ltd, Japan

WMB.13 An Assessment of the Benefits Active Noise Reduction Systems Provide to Speech Intelligibility in Aircraft Noise Environments
Ian E.C. Rogers
Defence Evaluation and Research Agency, UK

WMB.14 OLGA - A Dialogue System with an Animated Talking Agent
Jonas Beskow, Kjell Elenius, *Scott McGlashan
KTH, Sweden
*Swedish Institute for Computer Science, Sweden

WMB.15 Towards Usable Multimodal Command Languages: Definition and Ergonomic Assessment of Constraints on Users’ Spontaneous Speech and Gestures
Sandrine Robbe, Noelle Carbonell, *Claude Valot
CRIN, France
*IMASSA-CERMA, France

WMB.16 Exploiting Repair Context in Interactive Error Recovery
Bernhard Suhm, Alex Waibel
Carnegie Mellon Univ., USA

WMB.17 An Hybrid Image Processing Approach to LipTracking Independent of Head Orientation
Lionel Reverté, *Frederique Garcia, †Christian Benoit, *Eric Vatikiotis-Bateson
INPG/ENSERG, France
*ATR, Japan
†INPG, France
WMB.18 Automatic Modeling of Coarticulation in Text-To Visual Speech Synthesis
Bertrand Le Goff
Univ. of Stendhal, France

WMB.19 A Multimedia Platform for Audio-Visual Speech Processing
Ali Adjoudani, Thierry Guiard-Marigny, Bertrand Le Goff, Lionel Reveret, Christian Benoit
Univ. of Stendhal, France

WMB.20 An Intelligent System for Information Retrieval Over the Internet Through Spoken Dialogue
Hiroya Fujisaki, *Hiroyuki Kameda, Sumio Ohno, Takuya Ito, Ken Tajima, Kenji Abe
Science Univ. of Tokyo, Japan
*Tokyo Engineering Univ., Japan
WMB.21 Data Hiding in Speech Using Phase Coding
Yasemin Yardimci, *Enis A Cetin, *Rashid Ansari
Bilkent University, Turkey
*Univ. of Illinois, USA

1679

Denis Burnham, John Fowler, Michelle Nicol
Univ. of NSW, Australia

1683
