9th International Conference on Computer Applications in Shipbuilding

October 13-17, 1997 in Yokohama, Japan

Volume 2

Edited by
K. Johansson
Kockums Computer Systems AB

and

T. Koyama
University of Tokyo
## Contents of Volume 2

### Structural Design

**Buckling Characteristics of a Transverse Web of a Bulk Carrier under SafeHul Loading** - Toward a Computer-Aided Rational Design against Structural Buckling -  
*D. Xiang*

An Intelligent Object Oriented Pre-processor for the Fatigue Analysis of Double Bottom Structures  

A Design Tool for Static Structural Problems of Mega-Float  
*K. Inoue*

Proposal of the Practical Design Support System for Hull Structures  
*K. Ito, S. Fukahori, M. Sonda & H. Umeda*

Unified First-Principles Ship Structural Design Based on the MAESTRO Methodology  
*R. S. Dow, O. F. Hughes & T. R. McNatt*

A Multi-User, Object-Oriented System for Hull Structure Design Based on an Engineering Model  
*M. Amabilino & A. Costabel*

### Virtual Reality

Interfacing Humans/Technology in Competitive Shipbuilding  
*C. Kuo*

The Virtual Ship: a Powerful Tool for Human Factors Engineers  
*P. J. Werkhoven*

Virtual Reality and Ship Design  
*F. Alonso, P. Brunet & L. García*

The Use of Simulation in the Design and Procurement of Naval Systems  
*G. Henry & J. Langley*

Virtual Reality Techniques for Ship and Submarine Design  
*J. Martin*

The UK Virtual Ship - The Way Forward?  
*T. Anderson*
Product Modelling
A Formal Model for Object Oriented Design of Shipbuilding Databases
G. Alexe & S. Alexe

Impacts of Product Modelling on Ship Design and Production Planning
I. Kuutti

The Development and Implementation of a Smart Product Model for Ship Structure
M. A. Polini & K. E. Meland

Development of a Ship Modelling Application Using CAS. CADE, an Object-Oriented Software Development Environment
K. Jacobsen

GPME Modeling Methodology and Applications
Y. Nagase, T. Amemiya, K. Ito & Y. Sasaki

GPME: An Information Modeling and System Integration Environment for Shipbuilding

Simulation Based Design
Creation of a 'Shared' Design Environment, Using 3-D Product Modelling and Visualisation Technologies
J. Grant, R. Cullen & R. Imber

Linking Design and Production by Production Monitoring
T. Koch

Manufacture
Flexible Manufacturing in Shipbuilding Using Laser Processing
M. Sellerup

How Ateliers & Chantiers du Havre Shipyard Has Combined the Benefits of Their New Automated Panel Production Line and CAD-CAM System
J. E. Enault, C. Gonzalez & P. Prieto

A Generic Cell Control Technology for Automated Shipbuilding
H. J. Lynggaard
Accuracy Management
Basic Studies on Accuracy Management System for Shipbuilding
   K. Aoyama, T. Nomoto & S. Takechi

An Approach to the 3D Alignment of Box-Shaped Objects
   M. Manninen & I. Kaisto

3-dimensional Line Heating System for Curved Shell Plate for Shipbuilding
   N. Kitamura, Y. Sakai & H. Murayama

A Study on the Accuracy Control of Block Assembly in Shipbuilding
   - Simulation of Residual Deformation Due to Fillet Welding
   S. I. Kim, J. M. Han, Y. K. Cho, J. K. Kang, J. Y. Lee & J. S. Lee

Simulation of Welding Distortions in Theory and Practice
   M. Birk{-}Sørensen & H. Kierkegaard

Prediction and Management of Thermal Shrinkage in Ship Production
   R. Bronsart, P. Nikolay & H. Zorn

Concurrent Engineering & Virtual Enterprise
Telematics: A Challenge to Concurrent Engineering
   P. Gómez

The Effect of CAD/CAM/CIM in Shipbuilding as It Becomes a Part of
the Infrastructure Between Subcontractors and Yards
   A. Staal & G. Tepper

Multi-Agent System to Support the Management of Decentralised
Production
   T. Kuhlmann, R. Lamping & C. Massow

Architecture of Collaborative Engineering Environment
   H. Aya & H. Araki

GPME Extension on the Network for the Virtual Enterprise
   H. Yamato, T. Koyama, A. Fushimi & Y. Tanaka

SEANET and Virtual Enterprise Support Architectures in the Maritime
Industry
   A. Healey
Expert System
Generation of Design Candidates and Design Assistance by Using Case-Based Reasoning at Preliminary Design Stage
  K. H. Lee & D. K. Lee

Development of Case-Based Expert System for Detail Structure Design of Web Frames VLCCS.
  D. Y. Yoon, W. J. Kim & D. Y. Yang

A Knowledge-Based Design System for Heavy Lift and Its Application to Shipbuilding
  Y. S. Choo, F. Ju & K. H. Lee
