Session 15
Network Video Services

15.1 An Efficient Traffic Control Framework for VBR MPEG Video Sources in ATM Networks
Byeong-hee Roh and Jae-kyoon Kim

15.2 Congestion Control of Video Traffic with Transcoders
Pedro A.A. Assuncao and Mohammed Ghanbari

15.3 Traffic Modelling of Video Sources Codified at Very Low Bit Rate with the H.263 Test Model
N. Blefari-Melazzi, G. Russo, and P. Talone

15.4 Network Design for the Provision of Distributed Home Theatre Services
Nelson L.S. Fonseca, Cristiane M.R. Franco, and Frank Schaffa

15.5 Simulation Analysis on Statistical Multiplexing of MPEG Video Sources
Jian Feng, Kwok-Tung Lo, and Hassan Mehrpour

15.6 A Policing Algorithm for MPEG Streams on ATM Networks
Wen-Tsuen Chen, Wu-Sheng Huang, and Cheng-Ho Lin

15.7 An Approach Towards Resource Management and Transportation of VBR Video Traffic
Girish Chiruvolu and Ravi Sankar

Author Index

VOLUME 2

Session 16
Topics in Information Infrastructure

16.1 Performance Evaluation of Communications Processing Module in PSTN Access Subsystem
for Interworking with PSDN
Kun Suk Kim, Tae Man Han, and Pyung Dong Cho

16.2 Calculating Cell Loss Probabilities for ON-OFF Sources in Large Unbuffered Systems
Nikolay Likhanov, Ravi R. Mazumdar, and Francois Theberge

16.3 An Analysis of Channel Assignment Problems Based on Tours
Jeannette Janssen and Kyriakos Kilakos

16.4 Heuristics for Ring Network Design When Several Types of Switches are Available
Steven Chamberland, Brunilde Sanso, and Odile Marcotte

16.5 Complete Single-Channel Solutions to Hidden Terminal Problems in Wireless LANs
Chane L. Fullmer and J.J. Garcia-Luna-Aceves

16.6 Client/Server Architectures over Wide Area Networks
Tao Zhang and John R. Hayes

16.7 On Catastrophic Nature of Network Performance Degradation Induced by Traffic Correlations
Guang-Liang Li and Fang-Ming Li

Session 17
Multi-User Detection

17.1 Performance of Multiuser Detection with Adaptive Channel Estimation
M. Stojanovic and Z. Zvonar

17.2 Noncoherent Multistage Multiuser Detection of M-ary Orthogonal Signals
Chris Hegarty and Branimir Vojcic

17.3 Coherent Decorrelating Detector with Imperfect Channel Estimates for CDMA Rayleigh
Fading Channels

xv
17.4 Channel Throughput of Slotted ALOHA in a Nakagami Fading Environment
Saud Al-Semari and Mohsen Guizani

17.5 Analysis of Decorrelating Detector Employing Common Spreading Code
Dong In Kim

17.6 Adaptive Schemes of Implementing the LMMSE Multiuser Detector for CDMA
Hongya Ge

17.7 Locally Optimum User Detection in Nakagami Interference
Jinsoo Bae, Suk Chan Kim, Kwang Soon Kim, Hiroyuki Morikawa, Seong Ro Lee, and Iickho Song

Session 18
Diversity & Antenna Processing for Fading Radio Channels

18.1 Circular Polarization Diversity with Reflector in Indoor Radio Channel
Akihiro Kajiwara

18.2 Optimum Diversity Combining with Finite-Tap Decision Feedback Equalization in Digital Cellular Mobile Radio
Sheng-Chou Lin and Vasant K. Prabhu

18.3 Joint Processing of an Adaptive Array and an MLSE for Frequency-Selective Fading Channels
Masaaki Fujii

18.4 Adaptive Antenna Transmission for Frequency Duplex Digital Wireless Communication
G.G. Raleigh and V.K. Jones

18.5 Maximizing Diversity on Block-Fading Channels
R. Knopp and P.A. Humblet

18.6 Adaptive Digital Beamforming in Cellular CDMA Systems Using Noniterative Signal Subspace Tracking
Wan Yi Shiu and Steven D. Blostein

18.7 Performance Analysis of IIR and FIR Linear and Decision-Feedback MIMO Equalizers for Transmultiplexers
L. Vandendorpe

Session 19
Multiple Access & Networking in Satellite Communications

19.1 Direct Data Distribution from Low-Earth Orbit
James M. Budinger, Gene Fujikawa, Richard R. Kunath, Nam T. Nguyen, Robert R. Romanofsky, and Rodney L. Spence

19.2 Capacity of a Multi-Beam, Multi-Satellite CDMA Mobile Radio Networks with Interference-Mitigating Receivers
R. De Gaudenzi, F. Giannetti, and Marco Luise

19.3 Performance Evaluation of Rate-Based Congestion Control Schemes for ABR Service over Broadband Satellite Networks Interworking with ATM/B-ISDNs
Bin Zhang and Victor C.M. Leung

19.4 Multi-Code TDMA (MC-TDMA) for Multimedia Satellite Communications
R. Di Girolamo and T. Le-Ngoc

19.5 Connection Control and Buffer Dimensioning in Broadband Satellite Systems
Yeong M. Jang
19.6 A Global Multi-Satellite Network for Multi-Media and PCS Services with Fault and Disaster Avoidance Characteristics
Stamatios V. Kartalopoulos

19.7 Collision Avoidance and Resolution Multiple Access: First-Success Protocols
Rodrigo Garces and J.J. Garcia-Luna-Aceves

Session 20
Modulation & Coding in Communication Channels

20.1 Iterative Decoding of Generalized Concatenated Convolutional Codes
K. Fazel

20.2 Design of Serially Concatenated Interleaved Codes
S. Benedetto, D. Divsalar, G. Montorsi, and F. Pollara

20.3 Mitigating Clipping Noise in Multi-carrier Systems
Jacky S. Chow, John A.C. Bingham, and Mark S. Flowers

20.4 Efficient Methods for the Addressing / Decoding of a Lattice-based Fixed-rate, Entropy-coded Vector Quantizer
S. Nikneshan and A.K. Khandani

20.5 Description of GSM Enhanced Full Rate Speech Codec

20.6 Unequal Error Protection on the Turbo-Encoder Output Bits
Atousa H.S. Mohammadi and A.K. Khandani

20.7 Capacity Enhancement in Digital Cellular Systems using Variable Bitrate Speech Coding
C.P. Mammen and Bhaskar Ramamurthi

Session 21
Topics in ATM Switching

21.1 BATMAN: A New Architectural Design of a Very Large Next Generation Gigabit Switch
Muh-rong Yang and GinKou Ma

21.2 Interoperability Mechanism of ABR/ABTCapability in ATM Public Networks
Woo-Seop Rhee, Yoon-Young An, Hwa-Suk Kim, and Hong-Shik Park

21.3 A Distributed Grant Based High-Speed ATM MAC Protocol
Sun-Moo Kang, Byung-Cheon Jeon, and Dae-Young Kim

21.4 Analysis of Queueing Schemes for Batcher-Banyan Network with Speedup Under Various Traffic Loading
ByoungSeob Park and SungChun Kim

21.5 NOSES Distributed Communication Switching Software Structure Based on CORBA
Hiroshi Sunaga and Tetsuyasu Yamada

21.6 Data Link Level Support for Handoff in Wireless ATM Network
Sueng-Yong Park, Vaduvur Bharghavan, and Sung-Mo Kang

21.7 The Dual-Banyan (DB) Switch: A High-Performance Buffered-Banyan ATM Switch
Christos Kolias and Leonard Kleinrock

Session 22
Multimedia Services

22.1 Object-Oriented Modelling of Distributed Multimedia Services
Tae-Hyoung Yun, Ji-Young Kong, and James W. Hong
22.2 Multimedia Courseware Delivery over Broadband Networks  
R. Wang and A. Karmouch

22.3 Redundant Array of Inexpensive Servers (RAIS) for On-Demand Multimedia Services  
P.C. Wong and Y.B. Lee

22.4 Efficient Transport of Stored Video Using Stream Scheduling and Window-Based  
Traffic Envelopes  
Wei Zhao, Marwan Krunz, and Satish K. Tripathi

22.5 Comparison of Video Conference Realization Schemes  
P. Pancha, M. Veeraraghavan, and S. Rai

22.6 Dynamic Hypermedia Presentations: A Model and its Implementation  
Yung-Chen Hung

22.7 Conducting a Multiparty Multimedia Session over ATM using Hierarchically Encoded Data  
Nachum Shacham, Madhu Sudan, and Michael Brown

Session 23  
Advances in Traffic Modelling & Management for B-ISDN

23.1 Modelling the Output Process of an ATM Multiplexer with Correlated Priorities  
Nelson L.S. Fonseca and John A. Silvester

23.2 Overflow Probability in an ATM Queue with Self-Similar Input Traffic  
Boris Tsybakov and Nicolas D. Georganas

23.3 Packing and Least-Loaded Based Routing in Multi-Rate Loss Networks  
Ibrahim Matta and Marwan Krunz

23.4 On the Extension of ABR Flow Control to Legacy LANs  
John B. Pippas, Iakovos S. Venieris, and Jorge-A. Sanchez-Papaspiliou

23.5 Fuzzy Leaky Bucket Congestion Control in ATM Networks with Markovian and Self-Similar Traffic  
Jianqin Weng, Ioannis Lambadaris, and Michael Devetsikiotis

23.6 A Theoretic Analysis Model for VBR Video Traffic in ATM Networks  
Shugong Xu, Zailu Huang, and Yan Yao

23.7 Engineering VBR Traffic Parameters for WAN Voice  
Jonathan D. Rosenberg

23.8 Performance Models for Multiplexed VBR MPEG Video Sources  
Nikolaos D. Doulamis, Anastasios D. Doulamis, George E. Konstantoulakis, and George I. Stassinopoulos

Session 24  
Intelligent Architecture Management & Control

24.1 Routing in Networks with Random Topologies  
Keith Scott and Nicholas Bambos

24.2 Distributed Fuzzy Agents: A Framework for Intelligent Network Monitoring  
Thomas D. Ndousse

24.3 Communication Platform for Service Operations Systems in Advanced Intelligent Network  
Naoto Makinae, Hikaru Suzuki, and Satoshi Minamoto

24.4 Design Methodology for ETSI SDH Subnetworks Employing SNCP-Rings  
Andreas Antonopoulos, J.J. O'Reilly, and P. Lane

24.5 SS7 Network Management Using Link Monitors  
Edmund Jackson, Robert Spindley, Mark C. Sinclair, and Simon Reader
24.6 An Implementation of OSI Management Q3 Agent Platform for Subscriber Networks
Toshio Tonouchi, Takashi Fukushima, Asuka Manki, and Shin Nakajima

24.7 Providing a Web-Based View of Your Managed Network
Jim Boyle, Hieu Truong, and Nina Nour

Session 25
CDMA Systems / Power Control

25.1 A Method to Partially Suppress ISI and MAI for DS SS CDMA Wireless Networks
Beata J. Wysocki and Tadeusz A. Wysocki

25.2 Noncoherent Detection of FSK Signals Transmitted over Linearly Time-Selective Rayleigh Fading Channels
Giorgio M. Vitetta, Umberto Mengali, and Desmond P. Taylor

25.3 Iterative Decoding and Despreading Improves CDMA-Systems using M-ary Orthogonal Modulation and FEC
Rupert Herzog, Andreas Schmidbauer, and Joachim Hagenauer

25.4 Bit Error Computations for Space-Time Narrowband Interference Suppression in CDMA Communications
A. Shah and A.M. Haimovich

25.5 Noncoherent Decorrelative Multiuser Detection for Nonlinear Nonorthogonal Modulation
Mahesh K. Varanasi and Arthur Russ

25.6 Modeling Mobility in Power Control
Chin-Tau Lea and Li-Chun Wang

Session 26
Parallel Transmission for Wideband Radio

26.1 Parallel Transmission Scheme Using Cyclic Modified M-Sequence CDM for Broadband Mobile Communications
Hiroshi Harada, Gang Wu, Kazumasa Taira, Yoshihiro Hase, and Hideichi Sasaoka

26.2 Coded OFDM for Broadband Indoor Wireless Systems
Aleandro S. Macedo and Elvino S. Sousa

26.3 Description of a Frequency and Symbol Synchronization System for OFDM Signals and Simulation Results in a Multipath Radio Channel
Giovanni Santella and Francioli Andrea

26.4 OFDM Spread Spectrum Communications using Lapped Transforms and Interference Excision
Gary J. Saulnier, V.A. Alanzo Whyte, and Michael J. Medley

26.5 Parallel Coded Optical Multicarrier Frequency Division Multiplexing: A Potential Step towards High Speed, High Capacity & High Reliability in Optical Transmission Systems
Raziq Pervez and Masao Nakagawa

26.6 Transmit Optimization for Time-Invariant Wireless Channels Utilizing a Discrete Multitone Approach
Anchankeng Leke and John M. Cioffi

26.7 High-Speed Data Transmission with Multicode Modulation and Turbo-Codes for Wireless Personal Communications
P. Kuganesan and K. Ben Letaief

xix
Session 27
Capacity: Enhancement Techniques & Evaluation

27.1 Application of Dominant Interference Cancellation in Street Microcells
Pekka A. Ranta and Antti Lappetelainen
27.2 Performance Tradeoff Among Concatenated Codes and Processing Gain for High Capacity
DS/CDMA Transmission in Wireless Communications
Melanie Y.F. Wong and K. Ben Letaief
27.3 Feasibility Study on DS-CDMA/TDMA Frequency Sharing System
Takahiro Matsuda, Shinsuke Hara, and Norihiko Morinaga
27.4 Capacity Analysis of an Integrated Voice/Data DS-CDMA Network
Salim Manji and Weihua Zhuang
27.5 A Study on Dynamic Zone Control for CDMA Mobile Radio Communications
Shinichi Sato and Yaseharu Amezawa
27.6 The Capacity of Cellular CDMA in the 63-64 GHz Band
Filippo Giannetti, Marco Luise, and Ruggero Reggiannini
27.7 TCMs Matched to ISI Channels: New Results for Combined Symbol-by-Symbol Equalization
and Decoding
E. Baccarelli and S. Galli

Session 28
High Speed Access over Wired Media

28.1 Performance Investigation into an IEEE 802.14 MAC Protocol for HFC Networks
M. Ivanovich, M. Zukerman, and R.G. Addie
28.2 A Gigabit-to-the-Home (GTTH) System for Future Broadband Access Infrastructure
28.3 Telecom-DPE to the Home
Hidenori Nakazato, Motoharu Kawanishi, and Yoshikazu Takahashi
28.4 100BASE-T2: 100 Mbit/s Ethernet over Two Pairs of Category-3 Cabling
Giovanni Cherubini, John Creigh, Sedat Olcer, Sailesh K. Rao, and Gottfried Ungerboeck
28.5 Characterization of Effective Bandwidth as a Metric of Quality of Service for Wired
and Wireless ATM Networks
Abbas Mohammadi, Surinder Kumar, and David Klymyshyn
28.6 Dependency Removal for Transport Protocol Header compression over Noisy Channels
Stephen J. Perkins and Matt W. Mutka
28.7 Self-Control Cyclic Access with Time Division - A MAC Proposal for the HFC System
S.M. Jiang, Danny H.K. Tsang, and Samuel T. Chanson

Session 29A
Transmission Control Protocols

29A.1 Performance of TCP over ABR on ATM Backbone and with Various VBR Background
Traffic Patterns
Shivkumar Kalyanaraman, Raj Jain, Sonia Fahmy, Rohit Goyal, and Seong-Cheol Kim
29A.2 UBR+: Improving Performance of TCP over ATM-UBR Service
Rohit Goyal, Raj Jain, Shivkumar Kalyanaraman, Sonia Fahmy, and Seong-Cheol Kim
29A.3 Implementation and Performance Evaluation of TCP Boston: A Fragmentation-Tolerant
TCP Protocol for ATM Networks
Azer Bestavros and Gitae Kim
29A.4 Mobile-TCP: An Asymmetric Transport Protocol Design for Mobile Systems
Zygmunt Haas and Prathima Agrawal

Session 29B
Protocols for PCS

29B.1 An Energy-Conserving Access Protocol for Wireless Communication
Imrich Chlamtac, Chiara Petrioli, and Jason Redi

29B.2 Performance Analysis of the Hybrid TDMA/CDMA Protocol for Mobile Multi-Media Communications
R. Prasad, J.A.M. Nijhof, and H.I. Cakil

29B.3 Ambiguity Analysis for a Hybrid Type II ARQ/FEC Protocol on a Fluctuating Radio Channel
Mohammed Braneci and Philippe Godlewski

29B.4 UPC Based Bandwidth Allocation for VBR Video in Wireless ATM Links
S.K. Biswas, D. Reininger, and D. Raychaudhuri

Session 30
Intelligent Signal Processing in Communications

30.1 A Predictive Constant Modulus Algorithm for Blind Equalization in QAM Systems
Francisco Rodrigo P. Cavalcanti and Joao Cesar M. Mota

30.2 Time-Domain Equalizer Training for ADSL
Mohammed Nafe and Alan Gatherer

30.3 Fuzzy Logic in Estimation of Traffic Burstiness for Admission Control in Broadband Networks
H.R. Mehrvar and Tho Le-Ngoc

30.4 Approximate Minimum Bit-Error Equalization for Binary Signaling
Chen-Chu Yeh and John R. Barry

30.5 Self-Adaptive Decision Feedback Equalization: Application to High-Order QAM Signals
David Mottier, Maryline Helard, and Joel Labat

30.6 Effect of Average Power Estimation Error on Adaptive MQAM Modulation
Andrea Goldsmith and Larry Greenstein

30.7 Inverse Filtering of Room Acoustics Using a Nonlinear Dynamical Approach
Albert Chan and Henry Leung

Session 31
Network Design, Implementation & Simulation

31.1 Efficient Simulation of Delay Threshold Probabilities in ATM Switches with Heterogeneous Traffic
Ahmet A. Akyamac and J. Keith Townsend

31.2 Scalable Protocol Engine for High-Bandwidth Communications
Christos J. Georgiou and Chung-Sheng Li

31.3 MESH: Distributed Error Recovery for Multimedia Streams in Wide-Area Multicast Networks
Matthew T. Lucas, Bert J. Dempsey, and Alfred C. Weaver

31.4 Characterizing Communication Interactions of Parallel and Sequential Jobs on Networks of Workstations
Xing Du, Yingfei Dong, and Xiaodong Zhang
31.5 Measurement-Estimation Approach to Efficiency Evaluation of Bandwidth Allocation Scheme in ATM Networks
Li Fujian, Sun Rongheng, and Liu Zengji

31.6 Real Time Connection Admission Control using Multistate Traffic Sources
Robert Engel and Jonathan S. Turner

31.7 Dynamic Sessions Control for Multimedia Distributed Systems
Z.D. Wu

Author Index

VOLUME 3

Session 32
ATM Traffic & Network Management

32.1 An Adaptive Connection Admission Control Scheme for ATM Networks
Moshe Zukerman and P.W. Tse

32.2 Architecture for Restorable Call Allocation and Fast VP Restoration in Mesh ATM Networks
Alexander Gersht and Alexander Shulman

32.3 Heuristic Algorithms for Configuration of the ATM-Layer over Optical Networks
Tibor Cinkler

32.4 A Novel Flow Control Mechanism for ABR Traffic in ATM Networks
Ting-Li Ling and Ness Shroff

32.5 A Novel Generic Gateway Protection Configuration Applied to ATM Networks
Kris Struyve, Bart Vande Velde, and Piet Demeester

32.6 A Proposal on Design Scheme of TMN NEML Management Application Framework for ATM Switching Systems
Seok Ho Lee, Wang Don Woo, Won Su Kim, and Jai Jin Lim

32.7 Multipoint-to-Point ABR Service in ATM Networks
Wenge Ren, Kai-Yeung Siu, and Hiroshi Suzuki

Session 33
Spread Spectrum & Wireless Systems

33.1 Analysis of Multicarrier Transmission in Time-Varying Channels
Suhas N. Diggavi

33.2 Bayesian Approach for the Generation of Side Information in Frequency-Hop Communications with Selective Fading and Multiple Access Interference
Giovanni E. Corazza and Silvia De Fina

33.3 MAC Protocol for a CDMA Based Wireless ATM LAN
Stephen G. Fischer, Tadeusz A. Wysocki, and Hans-Jurgen Zepernick

33.4 A Simple Packet Combining Technique in Frequency-Hopped Spread-Spectrum Multiple Access Communication Networks
Jik Dong Kim and Sang Wu Kim

33.5 Type-Based Detection for Spread Spectrum
Yuan Kang Lee, Don H. Johnson, and Owen E. Kelly

33.6 Markov Oscillators and Direct Sequence Spread Spectrum
John Hershey and Amer A. Hassan
