2nd European Oxygen Steelmaking Congress

EOSC '97

Taranto, Italy 13-14-15 October 1997

Organized by
AIM - Associazione Italiana di Metallurgia

In co-operation with
Centro Sviluppo Materiali

117 236 217
INDEX

KEY NOTE LECTURE
Oxygen Steelmaking in the 21st century
J.W. Edington

PRESENT STATUS AND DEVELOPMENT OF OXYGEN STEELMAKING

The economics of modern LD-steelmaking
E. Fritz, W. Pirklbauer, K. Antlinger

Development of hot metal pretreatment and BOF operating at Nagoya Works, Nippon Steel Corporation
H. Shima, S. Fujino, T. Sado

Slagfree tapping with the Interstop Tap Hole Gate Type TAP 120
G. Böcher, J. Kempken, E. Schnurrenberger, K. Rietmann, H. Müller

Operational and metallurgical results of combined blowing at AHMSA’s No.2 Steel Shop
J. Sandoval, L. J. Vélez, J. M. Fuentes, H. Zamora

The improvement of technological flow solutions for the No. 1 converter steel plant at Sidex Galati
Gh. Iorga, Fl. Zaman, N. Radu, M. Dobra

Nitrogen-alloying of liquid steel by gas-injection
B. Prothmann, H. Lachmund, D. Huin, H. Saint-Raymond

The LBE process at Siderar
U. Bertezzolo, R. Donayo, A. Gomez, G. Denier, H. Stomp

Use of new lance tips in steel-shop n. 1 at ILVA Taranto
G. Valentino, G. Mancano, A. De Cesare
Revamping of B.O.F. plant no. 1 from SIDEX s.a. Galati
S. Pileandra, P. Balint, I. Tofan

Looking to the future at Burns Harbor - production and productivity issues
J. A. Barbus

Development of high efficient stainless steelmaking by chromium ore smelting reduction
H. Morioka, Y. Kishimoto, H. Nomura, H. Take

Three years of practical experience with coal addition during blowing at BOS no. 1 of Hoogovens
P.G.J. Broersen, A. Hamoen, M.C.B. van Vliet

A new high performance AOD converter
A. Chiappero, S. Barozzi, G. Barilati

Converter process developments at Hoogovens Staal

Technical improvements for high productivity in steel making process
D. Kim, S. Lee, D. Lee, H. Choi

CONVERTER LINING AND OPERATING LIFE

Development of a continuous measurement probe of the tuyere length in converters
G. Didry, J.M. Ritter, G. Schmitt, F. Garavaglia, C. Grisvard, D. Pernet

The use of photogrammetry to measure hot refractory wear in hot vessels
B.C. Welbourn, P. Bell, R.P. Mark, H.J. Riedel

Installation of a new converter taphole drilling machine at Sollac FOS Steelplant
G. Pittini, M. Deffe, J.M. Fourcade

</tbody>
</table>
The application of XRF analysis to converter fume in British Steel
D. Amoss, N.E. Jesper, B.C. Welbourn

Development of a slopping prediction and control system in BOF operation
T. Kanai, A. Sakai, J. Tani, S. Yoshida, N. Matsui

New process control automation for K-OBM converter at Cornigliano steel-work Riva Group
S. Fera, M. Cergnul

BOF EIC integrated system at Keihin Works in NKK
T. Hatanaka, Y. Arai, N. Kato

Various designs, applications and typical results of modern sublance probes
W. Van der Perre

Experience of waste gas analysis based control system for the LD-LBE-Process at SSAB Tunnplåt AB, Luleå, Sweden
D. Bergman, P. Hahlin

CONVERTER LINING AND OPERATING LIFE

BOF practice with 60 hours relining time
C.E. Grip, S. Mukka, M. Seger, H. Wahlberg

Improvement of converter lining performance
J.A. Terblanche, J.P. Pienaar

A new method for thermo-mechanical analysis in refractory lined vessels for steel manufacturing
M. Lucchesi, C. Padovani, G. Pasquinelli, N. Zani

Improving the lining life of 300T converter at Bokaro Steel Plant
Increased lining life of vessels and steelcasting ladles with the help of laser-optical measurement of refractory linings
R. Lamm, D. Amoss, R. Adams, D. Taylor

Didier prompt tap-xchange. An optimized converter-taphole repair system sets new standards
T.C. Brugger, H. Rothfuss, P. Scheliga, A. Ott

Use of high strength insulation board to improve lining stability and energy efficiency in converters' steel ladles
M.H. Frechette, B. Smith

THEORETICAL ASPECTS OF OXYGEN REFINING

Development of a low manganese converter practice
M. Hartwig, A.B. Snoeijer, N.H. Hazebelt

Interference of scrap melting and slag foaming with converter operation
B. Deo, M. Gupta, P. Misra, R.P. Chhabra

Enhancements in blowing control at Teesside BOS Plant
P.D. Smith, G. Harland, D. Bryce

Mathematical model of LD conversion process
A. Di Donato, P. Granati, A. Poli, A. De Cesare

Metallurgical aspects of oxygen and soluble aluminium control of low carbon aluminium killed silicon free converter steels
G. Jánosfy, S. Kónya, Z. Károly, G. Károly

Physico-chemical and mineralogical properties of EAF and AOD slags
F.A. Lopez, A. Lopez-Delgado, N. Balcazar

ENERGY RECOVERY AND ENVIRONMENTAL TECHNOLOGY IN STEELMAKING

Optimising the dust cycle in LD III
B. Fritz, J. Heiss, B. Kohl, T. Weber
The use of dynamic fume analysis as an aid to BOS waste gas cleaning developments in British Steel
S.R. Dye, R. Colquhoun, N. Cosby

A new BOF slag treatment technology
M. Kühn, P. Drissen, J. Geiseler, H. Schrey

Recycling short-flame slurry from rolling mills in the steel-shop converter: results
J.M. Fourcade, S. Audebert, P. Galimant

Slag, dust and debris from an oxygen steel plant - substances of value
O. Köller, K.P. Cervinka, W. Leipold, H. Kolb, W. Schmid

Recycling of steelmaking sludge and dust through the BOF vessels by cold bonded pelletizing
H-S. Choi, S. Seo, Y. Yoon

Slag recycling in ferrous metallurgy
A.G. Svyazhin, E.H. Shakhpazov
