Proceedings of the

1995 International Meeting on Fully Three-Dimensional Image Reconstruction in Radiology and Nuclear Medicine

July 4-6, 1995 – 4-6 juillet 1995 – Aix-les-Bains – Savoie – France
Table of contents

Session 1 : Angiography

3D X-Ray angiography : from numerical simulations to clinical routine (invited lecture)

Stochastic active contour model for 3D structures reconstruction from two X-rays projections
M. Senasli, L. Garnero, A. Herment, C. Pellot 13

An adaptative and constrained model for 3D X-ray vascular reconstruction
E. Payot, R. Guillemaud, Y. Trousset, F. Prêteux, 19

Session 2 : Patient motion and gated SPECT

Axial head motion correction in fan-beam SPECT
J. Li, R.J. Jaszczak, R. E. Coleman 27

Evaluation of 3D OS-EM reconstruction algorithm for correction of patient motion in emission tomography
R.R. Fulton, B. F. Hutton, M. Braun, P. K. Hooper, S. Eberl, S.R. Meikle 33

Space-time Gibbs priors applied to gated SPECT myocardial perfusion studies
D.S. Lalush , B. M. W. Tsui 37

«Reconstruction of cardiac gated SPECT images»
J. de Murcia, P. Grangeat 43
Session 3 : PET quantitation

Design and performance of 3D single photon transmission measurement on a positron tomograph with continuously rotating detectors
R.A. de Kemp, W.F. Jones, R.S. Beanlands, C. Nahmias 51

Attenuation correction for a combined 3D PET/CT scanner
Th. Beyer, P. Kinahan, D. Townsend, D. Sashin 55

Normalization using rotating rods for 3D PET
J.S. Liow, S. C. Strother 61

A component based method for normalization in volume PET
M. E. Casey, H. Gadagkar, D. Newport 67

Posters - Session 1

Model-based interactive 3D reconstruction of a vascular network in biplane angiography
L. Lecornu, J.J. Jacq, C. Roux 75

Tomographic reconstruction using two views
Ph. Guerville, A. Mathews 81

Image quality and quantification in SPECT using maximum entropy preprocessing of the projections
A.J. Aldous, J.S. Fleming, D.E. Simpson 83
Anatomical data fusion for quantitative reconstruction in cardiac
tomoscintigraphy using a spline model of the organs of thorax
F. Coutan, L. Garnero, J. Fonroget 85

An analytical approach for compensation of non-uniform attenuation
in cardiac SPECT imaging
S. J. Glick, M. A. King, T-S. Pan, E.J. Soares 91

Convergence study of iterative algorithms for attenuation
correction in SPECT
A. Mallon, P. Grangeat, Q. Donner 97

Frequency filtration in the algebraic algorithms of 3D-tomography
A.V. Likhachov, V. V. Pickalov 103

First Compton scatter correction in SPECT using PVM
V. Bouchard, Ph. Cinquin, L. Desbat 109

Transaxial distribution of scatter in positron volume imaging of the torso
R.L. Harrison, S.D. Vannoy, D.R. Haynor, W.L.S. Costa,
S. G. Kohlmyer, T.K. Lewellen 113

3D imaging study of activity distribution in massive granite with
positron emission tomography
R.P. Maguire, J.H. Missimer, F. Emert, D.W. Townsend,
H. Dollinger, K.L. Leenders 117

3D scatter characteristics for large area PET cameras
R.J. Ott, R. Veugen, M.A. Flower, D. Visvikis, K. Wells 121

Quantitation in 3D PET : the effect of scatter correction on recovery coefficients
R. Trebossen, B. Bendriem 127
Statistical noise property in 3D positron imaging and optimal condition for the signal-to-noise ratio of the reconstructed image
H. Murayama and N. Nohara 133
Sequential update methods for maximum likelihood reconstruction in fully 3D PET
J.M. Ollinger; A. S. Goggin 139
Transaxial image plane resolution in the reprojection reconstruction algorithm
C.W. Stearns 141

Session 4 : SPECT quantitation 1

Statistical methods for reconstruction in single photon emission computed tomography (invited lecture)
S. Geman, K.M. Manbeck, D.E. Mc Clure 147

Statistical model for 3D noise filtering in SPECT
M. Pelegrini, H. Benali, M. Ricard, I. Buvat, F. Frouin, G. El Fakhri, B. Aubert, R. Di Paola 149

Quantitative brain SPECT in three dimensions : an analytical approach without transmission scans
Z. Liang, J. Ye, J. Cheng, D. P. Harrington 155

Characteristics of reconstructed point response in three-dimensional spatially variant detector response compensation in SPECT
B.M.W.Tsui, X.D. Zhao, E.C. Frey, Z. W. Ju, G.T. Gullberg 161
Session 5 : SPECT quantitation 2

Novel closed-form methods for accurate reconstruction in 3D SPECT
X. Pan, C.E. Metz 169

A filtered backprojection algorithm for attenuated cone-beam projections sampled on a sphere
Y. Weng, G.L. Zeng, G.T. Gullberg 175

Design of an efficient 3D projector and backprojector pair for SPECT
T. - S. Pan, D.- S. Luo, M. A. King 181

An accelerated algorithm for 3D SPECT image reconstruction with generalized matrix inverses
M. F. Smith 187

Session 6 : SPECT Scatter compensation

Comparison of 2D, combined 2D/3D and fully 3D iterative scatter compensation in SPECT
F.J. Beekman, M. A. Viergever 195

Reducing reconstruction time for 3D iterative reconstruction scatter compensation
E.C. Frey, Z - W. Ju, B.M.W. Tsui 201

Compensation for Tc-99M contamination of TI-201 images in simultaneous dual-isotope SPECT : effects of size of scattering medium
S.C. Moore, T.R. McIlvain, M. F. Kijewski 207
Session 7 : PET evaluation

A single scatter simulation technique for scatter correction in 3D PET
C.C. Watson, D. Newport, M.E. Casey 215

The effect of energy threshold on image variance in fully 3D PET
J.M. Ollinger 221

Performance characteristics of PET scanners operated in 3D mode
D. Townsend, P. Kinahan, Th. Beyer, F. Jadali, D. Sashin, M. Mintun 225

Session 8 : PET reconstruction

Improved functional brain mapping using three dimensional imaging
(invited lecture)
B. Mazoyer, F. Crivello 233

A new rebinning algorithm for 3D PET : principle, implementation
and performance
M. Defrise, P. Kinahan, D. Townsend 235

FIPI : Fast 3-D PET reconstruction by Fourier inversion of
rebinned plane integrals
C. Wu, C. E. Ordonez , C. T. Chen 241

Performance of a fast maximum likelihood algorithm for
fully 3D PET reconstruction
S. Matej, J. A. Browne 247
Session 9: Cone-beam reconstruction

Exact cone-beam reconstruction with a new completeness condition
H. Kudo, T. Saito 255

Eigen analysis of cone-beam scanning geometries
G.L. Zeng, G.T. Gullberg, S.A. Foresti 261

Comparison of three 3D reconstruction methods from cone-beam data
C. Axelsson-Jacobson, R. Guillemaud, P. E. Danielsson, P. Grangeat, M. Defrise, R. Clack 267

Region of interest cone-beam computed tomography
S. G. Azevedo, Ph. Rizo, P. Grangeat 273

Session 10: Cone-beam and new geometries reconstruction

A theorem on divergent projections
P. Edholm and P - E. Danielsson 277

Efficient sampling in 3D tomography: parallel schemes
L. Desbat 281

Helical scan 3D reconstruction using the linogram method
J. Eriksson and P - E. Danielsson 287

Image reconstruction for the FASTSPECT imaging system using low-resolution and high-resolution detector elements
D.W. Wilson, H. Gifford, and H. Barrett 291
Posters - Session 2

X-Ray cone-beam tomography with nonplanar orbits
A.V. Bronnikov 299

A new cone-beam reconstruction algorithm for the circle-and-line orbit
H. Hu 303

Evaluation of parallel approaches for 3D cone-beam reconstruction
C. Laurent, F. Peyrin, J.M. Chassery 311

Exact Radon space based cone-beam image reconstruction algorithm
K. C. Tam 317

Reconstruction of cone-beam projections with free source path by the generalized Fourier method
S. R. Zhao, H. Halling 323

Three-dimensional SPECT reconstruction of combined cone-beam and fan-beam data acquired using a three-detector SPECT system
G.T. Gullberg, G.L. Zeng 329

Cone-beam algebraic reconstruction using edge-preserving regularization
I. Laurette, L. Blanc-Féraud, P. Charbonnier, P.M. Koulibaly, J.C. Nosmas, M. Barlaud, J. Darcourt 333

Single photon emission computed tomography employing a rotating slat collimator
M. A. Lodge, M. A. Flower, S. Webb, D.M. Binnie 337
A triple-head SPECT system with parallel-hole collimators of different collimation angles

Z. Cao 343

Fully 3D reconstruction for SPECT systems using parallel-plus collimators

C. Wu, D. L. Gunter, C. T. Chen 349

The implementation of an iterative reconstruction scheme to limited angle positron cameras

K. Lauckner, W. Enghardt, J. Pawelke, M. Sobiella 355

3D PET image reconstruction using an intel i860-array supercomputer

G. J. O'Keefe, G.F. Egan, I. Morrison 359

Axial resolution, noise and artefacts in the spiral CT reconstruction process

Late submission section 367
