CARDIOVASCULAR IMAGING AND IMAGE PROCESSING

THEORY AND PRACTICE - 1975

Editors:

DONALD C. HARRISON, M.D.
Cardiology Division
Stanford University School of Medicine
Stanford, California

HAROLD Sandler, M.D.
Ames Research Center
National Aeronautics and Space Administration
Moffett Field, California

HARRY A. MILLER
Cardiology Division
Stanford University School of Medicine
Stanford, California

Associate Editors:

MANLEY J. HOOD
PAUL E. PURSER
GENE SCHMIDT, M.D.

Sponsored by the National Aeronautics and Space Administration
Office of Technology Utilization

The Society of Photo-optical Instrumentation Engineers
Palos Verdes Estates, California
1975

Volume 72
CONTENTS

PREFACE ................................................................. ix

PROLOGUE

Technology in Cardiology: Too Much, Too Little, and
Can We Achieve a Proper Balance?
Donald C. Harrison ........................................... xi

SECTION ONE
ULTRASONOGRAPHY

TUTORIAL
Developmental Highlights and Present Applications of Cardiac
Ultrasound
Richard L. Popp ............................................ 3

INSTRUMENTATION, PROCESSING, AND DISPLAY
Chairmen: Dennis H. Le Croissette
Richard L. Popp

The Technology of Miniature Acoustic Element Arrays
N. Bom, C. T. Lancée, J. Ridder, C. Ligtvoet and J. Roelandt .. 11

Ultrasonic Imaging Using Two-Dimensional Transducer Arrays
W. L. Beaver, M. G. Maginness, J. D. Plummer, and
J. D. Meindl ................................................. 17

Sector-Scanning Echocardiography
Walter L. Henry and James M. Griffith .......................... 25

Potential of Real-Time Orthographic Ultrasonic Imaging for
Cardiovascular Diagnosis
Philip S. Green and Kenneth W. Marich ........................ 31

Computer Processing of Echocardiographic Images
William J. Sanders and Donald C. Harrison .................... 37

Dynamic Cardiac Imaging Using a Phased-Array Transducer
Joseph Kisslo, Olaf von Ramm, and Frederick L. Thurstone .... 45

DOPPLER ULTRASONIC TECHNIQUES
Chairman: Ernest P. McCutcheon

Doppler Instrumentation for Measuring Blood Velocity and Flow
Robert W. Gill, Charles F. Hottinger, and James D. Meindl .... 53

Applications of Doppler Ultrasound in Clinical Vascular Disease
R. W. Barnes, D. E. Hokanson, D. S. Sumner, and
D. E. Strandness, Jr. ....................................... 65

Processing and Display Techniques for Doppler Flow Signals
John M. Reid .................................................. 73

DISCUSSION ...................................................... 79

CONTENTS

CLINICAL APPLICATIONS
Chairman: Harold T. Dodge

Clinical Applications of a Quantitative Analysis of Regional Left Ventricular Wall Motion
Richard F. Leighton, John M. Rich, Mary E. Pollack, and Pablo I. Altieri ........................................... 203

Clinical Application of a Light-Pen Computer System for Quantitative Angiography
Edwin L. Alderman .............................................. 209

Quantitative Analysis of Regional Myocardial Performance in Coronary Artery Disease
Douglas K. Stewart, Harold T. Dodge, and Morris Frimer ................................................................. 217

Myocardial Blood Flow: Roentgen Videodensitometry Techniques
Hugh C. Smith, Richard A. Robb, and Earl H. Wood ................................................................. 225

Computer Analysis of Femoral Angiograms for Evaluation of Atherosclerosis in Post-Infarct Males - Clinical Correlates
Miguel E. Sanmarco and David H. Blankenhorn ................................................................. 233

DISCUSSION .......................................................... 241

SECTION THREE
SCINTIGRAPHY

TUTORIAL
Nuclear Cardiography and Scintigraphy
Peter McLaughlin .................................................. 245

INSTRUMENTATION
Chairman: Michel M. Ter-Pogossian

Three-Dimensional Imaging of the Myocardium with Isotopes
T. F. Budinger ................................................... 263

Dynamic Radionuclide Determination of Regional Left Ventricular Wall Motion Using a New Digital Imaging Device
Peter Steele and Dennis Kirch ................................................... 273

Positron Emission Reconstruction Tomography for the Assessment of Regional Myocardial Metabolism by the Administration of Substrates Labeled with Cyclotron Produced Radionuclides
Michel M. Ter-Pogossian, Edward J. Hoffman, Edward S. Weiss, R. Edward Coleman, Michael E. Phelps, Michael J. Welch, and Burton E. Sobel ................................................... 277
CONTENTS

USE

Chairman: Joseph P. Kriss

The Role of Technetium-99m Stannous Pyrophosphate in Myocardial Imaging to Recognize, Localize and Identify Extension of Acute Myocardial Infarction in Patients
James T. Willerson, Robert W. Parkey, Frederick J. Bonte, Ernest M. Stokely, and L. Maximilian Buja ................. 285

Assessment of Left Ventricular Ejection Fraction by Radionuclide Angiography: Comparison to Echocardiography and Serial Measurements in Patients with Myocardial Infarction
Heinrich R. Schelbert, Hartmut Henning, Robert A. O’Rourke, and William L. Ashburn .................. 293

DISCUSSION .................. 299

SECTION FOUR

COMMERCIALIZATION

INTRODUCTION

Commercialization - Issues and Answers
Gene Schmidt and Donald C. Harrison .................. 303

COMMERCIALIZATION

Chairman: Alain C. Enthoven

The Stanford-Ames Portable Echocardioscope:
A Case Study in Technology Transfer
Gene Schmidt and Harry Miller .................. 307

Commercializing the Echocardioscope:
A Case Study in Biomedical Technology Transfer
Alain C. Enthoven .......................... 313

A Venture Capital View of Technology Transfer
John S. McCullough .......................... 317

Biomedical Technology Transfer:
A Manufacturer's Viewpoint
Dean O. Morton ................................ 321

The User's View of Commercially Available Medical Technology
Donald C. Harrison .......................... 325

DISCUSSION .......................... 329
