CONTENTS

Author Index ........................................................... v
Seminar Committee ..................................................... vi
Preface, Frank P. Lewandowski ...................................... vii

SESSION I. STATIC IMAGE GENERATION
Introduction, Richard F. Riesenfeld .......................... 1
Geometrical Graphics, Daniel VanArsdale, Jim Tsukida ...... 12
Simulation and Computer Aided Geometric Design, Richard F. Riesenfeld .................... 17
Computer Animation Using Parametric Models, Frederic I. Parke ..................... 20

SESSION II. DYNAMIC IMAGE GENERATION
Introduction, Carl R. Driskell .................................... 23
Night Calligraphic Digital Visual System, Wei L. Chen .................. 40
Holographic Carrier Landing Simulator, Alfred H. Rodemann, Denis R. Breglia ........ 55

SESSION III. IMAGE PICKUP AND DISPLAY DEVICES
Introduction, David A. Ansley .................................... 59
Displays in Flight Simulation, Daniel G. O’Connor .......... 61
Optical Scanning Probe Technology, Martin Shenker .......... 71
Television Projectors, Herbert C. Hendrickson, Jerrett D. Stafford ................. 88
Recent Advances in the Single-Gun Color Television Light-Valve Projector, William E. Good .................. 96
Field Sequential Color TV for Visual Simulation, Arthur Kaiser ............ 100
Collimated Displays for Flight Simulation, A. Michael Spooner ................. 108
Film-Based Systems for Flight Simulator Visual Systems, A. F. Collier ........... 117
Image Synthesis with Servoed Cameras, Dan Slater, Michael Pettus .......... 127

SESSION IV. SIMULATION SYSTEMS
Introduction, John C. Dusterberry ........................... 141
A Full Field-of-View Optical Display for Aerial Combat Simulation, Richard J. Heintzman ............... 151
UCLA Driving Simulation Laboratory—With a 360-Degree Scene around a Full-Size Car, R. H. Kemmerer, Jr., S. F. Hulbert, R. J. Donahue .......... 158
Nuclear Power Plant Simulators, Thomas E. C. Hughes .................. 171
The Movement Perception Produced without Actual Target Displacement, Kiyoe Mizusawa, Shih-yung Chung .................. 179

PANEL DISCUSSION: FUTURE OBJECTIVES OF SIMULATION
Total Simulation, Clay Vagneur ................................ 197
The Future Objectives of Research and Development Simulation, John C. Dusterberry ................. 199
Future Objectives of Army Visual Simulation, Carl R. Driskell .................. 200
