PROCEEDINGS

1997 SPE Annual Technical Conference and Exhibition

Drilling and Completion

5–8 October 1997
San Antonio, Texas

SOCIETY OF PETROLEUM ENGINEERS INC.
Meeting the 10km Drilling Challenge ........................................... 191
S. Modi, C.J. Mason, and P.J. Tooms, BP Exploration Operating Co. Ltd., and G. Conran, Anadric Schlumberger

Well Control Considerations for Underbalanced Drilling .......................... 207
A.T. Bourgoyne Jr., Louisiana State U.

In-Situ Casing Consolidation By Electrokinetic and Electrochemical Methods ... 215
R.C. Wrixon and G.A. Cooper, U. of California

Detecting Whirling Behaviour of the Drill String From Surface Measurements ... 223
I. Rey-Fabret, M.C. Mobile, and N. Oudin, Inst. Français du Pétrole

A Systematic Approach to Developing Engineering Data for Fracturing Poorly Consolidated Formations ............................... 233

Enhancing Frac-Pack Evaluations With Directional and Spectral Gamma Ray Measurements .............................................. 241

Embedment and Fracture Conductivity in Soft Formations Associated with HEC, Borate and Water-Based Fracture Designs ....................... 255

Productivity Performance Comparisons of High Rate Water Pack and Frac-Pack Completion Techniques .............................. 269
K.R. Powell and R.L. Hathcock, Pennzoil E&P; M.E. Mullen, Completion Engineers; W.D. Norman, Schlumberger-Dowell; and P.D. Baycroft, BJ Services

Water-Fracturing vs. Frac-Packing: Well Performance Comparison and Completion Type Selection Criteria ................................ 285
S.P. Mathis and R.J. Saucier, Baker Oil Tools

A Contemporary Approach to Matrix Acidizing ................................ 297

New HF Acid System Produces Significant Benefits in Nigerian Sandstones ..... 309

Evaluation of Treatments for Control of Fines Migration in the Ceuta Field in Venezuela ..................................................... 317
F.J. Colmenares and A. Padron, Marven S.A., and K. Bennaceur, Schlumberger Dowell

Advanced Sandstone Acidizing Designs Using Improved Radial Models .......... 327
Rick Gdanski and Chris Shuchart, Halliburton Energy Services Inc.

Cement Design Based on Cement Mechanical Response .......................... 337
M.J. Thiercelin, B. Dargaud, and J.F. Baret, Schlumberger Dowell, and W.J. Rodriguez, Intevep S.A.

Highly Relaxed Fluid Loss, Surfactant Enhanced Cement Improves Results on Deep Gas Wells ........................................ 349
R.L. Dillenbeck and Jim Smith, BJ Services

Case History: Integration of Rock Mechanics, Structural Interpretation and Drilling Performance to Achieve Optimum Horizontal Well Planning in the Llanos Basin, Colombia, South America ........................................ 359
N.C. Last, BP Colombia; J.D. Lopez, Ecopetrol; and M.E. Markley, Schlumberger GeoQuest

Front End Loading Pays Dividends on a Deep Exploration Well in North Texas ... 375

Analysis of Temperature Measurements During Drilling ............................ 381
Eirik Kårstad and B.S. Aadnøy, Stavanger College

Triptank Levels After Pumping a Slug ............................................ 393
J. van Wijk, Shell U.K. E&P
SPE 38627  Expanding the Options for Complex Multilateral Completions .................................................. 597
Matthew Jobs, Baker Oil Tools

SPE 38629  Improved Recoveries in the Pickerill Field From Multilateral Drilling into Tight Gas Sands ...................... 605
S.W. Bokhari, A.J. Hatch, A. Kyei, and O.C. Werngren, Arco British Ltd.

SPE 38631  Factors Affecting Hydraulic Fracture Initiation in High In-Situ Stress Conditions: A Wellbore Stress Modelling Approach ................................................................. 621

SPE 38632  Wellbore-to-Fracture Communication Problems Pose Challenges in California Diatomite Horizontal Wells .......... 635
C.A. Wright, W.A. Minner, L. Weijers, and E.J. Davis, Pinnacle Technologies Inc.;
G.M. Golich, Aera Energy LLC; and H. Kikuchi, Japan Natl. Oil Corp.

SPE 38633  An Experimental Study in Perforating and Gravel Packing Unconsolidated Sand Formations ...................... 649
G.K. Wong, Shell E&P Technology Co.; S.M. Willson, BP Exploration; and A.D. Black, TerraTek Inc.

SPE 38634  A Model for the Transport of Sand Grains From a Perforation During Underbalance Surge ................------ 663
J.R.A. Pearson and A.F. Zazovsky, Schlumberger Cambridge Research

SPE 38635  Perforation Damage Studies in Unconsolidated Sands: Changes in Formation Particle Sizes and the Distribution as a Function of Shaped Charge Design ................................................. 677
P.M. Snider and W.M. Benzel, Marathon Oil Co., and J.M. Barker and D.J. Leidel, Halliburton Energy Services

SPE 38636  Successful Drilling Practices Study .................................................. 691

SPE 38637  Field Application of Lightweight Hollow Glass Sphere Drilling Fluid ............................................. 699
G.H. Medley Jr., Maurer Engineering Inc.; J.E. Haston, Haston Petroleum Consultants;

SPE 38638  Laboratory Studies of Plugging and Clean-Up of Production Screens in Horizontal Wellbores ................. 709
H.C. Lau and C.L. Davis, Shell E&P Technology Co.

SPE 38639  Field Implications From Full-Scale Sand Production Experiments .................................................. 725
L.A. Behrmann, Schlumberger Perforating & Testing; S.M. Willson, BP Exploration;
P. de Bree, SIEP; and C. Presles, Elf Aquitaine

SPE 38640  Gravel Packing Horizontal Wellbores With Leak-Off Using Shunts ............................................. 739
L.G. Jones, Lloyd Jones & Assocs.; R.J. Tibbles, Schlumberger Dowell; L. Myers, Mobil Equatorial Guinea Inc.; David Bryant, Mobil E&P U.S. Inc.; Jim Hardin, U.S. Filter/Johnson Screen; and Gary Hurst, Stimlab

SPE 38642  Sand Control in an Ultra-Fine Sand Environment .................................................. 747
N.J. McLeod, British Gas Int'l., E&P

POSTERS

SPE 37591  Taking Advantage of 3-Dimensional Visualization in Drilling Operations ................................................. 759
J.V. Guerrero, Halliburton

SPE 37671  New Solutions to Remedy Lost Circulation, Crossflows, and Underground Blowouts ........................................... 765

SPE 38644  Concepts and Misconceptions of Mud Selection Criteria: How To Minimize Borehole Stability Problems? ............. 781
H. Santos, Petrobras and S.A.B. da Fontoura, Catholic U. of Rio de Janeiro

SPE 38645  Multimedia Simulation Technology Develops Interactive Visualization and Analysis of Oilfield Equipment and Systems ................................................................. 797
Ken Schwendemann, Halliburton Energy Services
SPE 38498  Downhole Splitter Well for Simultaneous Injection and Production at the Valhall Field  
    W.C. Wenande, Consultant; G.V. Sund, Amoco Norway Oil Co.; and E. Helsenreen, Baker Oil Tools

SPE 38572  Surge/Swab Analysis of a Synthetic-Based Fluid in an Offshore Well  

SPE 38576  A Systematic Study of Fracture Modeling and Mechanics Based on Data From the GRI/DOE M-Site Project  

SPE 38582  Introduction of New Steerable Percussion Air Drilling System  
    A.B. Yost, U.S. Dept. of Energy; H. Bui, SII Smith Tool; B. Holmes, Union Pacific Resources Co.; and J.A. Meyers, SII Smith Tool

SPE 38585  Development of an MWD Hole Caliper for Drilling and Formation Evaluation Applications  
    C.A. Maranuk, Sperry-Sun Drilling Services Inc.

SPE 38591  A Case Study of Frac-Pack Treatments in High-Angle, Long-Interval, GP Completions: Pompano Field  
    E. Park, BP Exploration Inc., and V.M. DeBonis, Dowell

SPE 38617  Casing Design for Extended Reach Wells  
    L.B. Jaffe and E.E. Maidla, APCRC; W. Janisch, Mining U. of Leoben; and R. Irrgang, CSIRO Mathematical & Information Sciences

SPE 38630  Systematic Methodology for Effective Perforation and Fracturing Strategy  
    J.F. Manrique and K. Bjornen, Dowell, and S.A. Denoo, Schlumberger Wireline & Testing

SPE 38641  Application of Reservoir Strength Characterization and Formation Failure Modelling To Analyze Sand Production Potential and Formulate Sand Control Strategies for a Series of North Sea Gas Reservoirs  

SPE 38643  Furan Resin System Successfully Controls Sand Production on High Rate Oil Wells: An Indonesian Case History Study  
    F.O. Stanley, PT BJ Services Indonesia, and B.H. Setiyawan, Maxus Southeast Sumatra Inc.
