## Volume 1

**AUTHOR INDEX**  
Please see end of Volume 2

### Beltwide Cotton Production Conference

Meeting Challenges to U.S. Cotton, Thomas W. Smith ........................................... 3

The 1996 Production Year, Anne F. Wrona, Shane T. Ball, Charles Glover, J.C. Banks, Charles H. Burmester,  
C. Dale Monks, Steven M. Brown, Keith Edmisten, Kater Hake, Ken Lege, Robert Lemon, Charles Stichler,  
Billy Warrick, James Mainland, William Mayfield, Will McCarty, Boyd Padgett, Bobby Pippees, Bill Robertson,  
Paulus Shelby, Jeffrey C. Silvertooth, Ron Vargas and David L. Wright .......................... 5

Crop Protection: Seedling Diseases and Nematodes, T.A. Wheeler ............................... 12

Competitive in Every Quarter Crop Protection: II. Insects, Gary A. Herzog ................... 14

Crop Protection: III. Weeds. New Herbicides will Help Cotton Growers Remain Competitive, A.C. York .......................................................... 15

Farming with Transgenics, Will McCarty ........................................................................ 16

A Look to the Future and What it Holds for New Cotton Production Systems, Andrew G. Jordan ................................................................. 18

Boll Weevil Eradication: Status and Future Plans, Charles H. Parker ............................ 19

Food Quality Protection Act of 1996, James V. Aidala, Jr. ........................................... 22

Marketplace Insights, William B. Dunavant, Jr. .......................................................... 24

Longer Term Prospects for U.S. Cotton, K. J. Collins .................................................. 26

Fiber Needs for Textile Consumer, Andrew G Macdonald ............................................ 29

Raw Cotton Imports and Price Behavior, Gaylon B. Booker ........................................ 30

### New Developments from Industry

Paymaster Cottonseed Cotton Varieties Pm 2200 RR and PM 2326 RR, Richard H. Sheets and Tom Speed ................................................................. 39

Paymaster’s Picker Type Transgenic Cotton Varieties for 1997,  
Curtis Williams, James Mitchell, Michael Swindle and David Albers ............................... 40

All-Tex Seed Cotton Variety All-Tex Top-Pick, Mike Nelson ......................................... 41

BXN47: A New Buctril Resistant Cotton Variety from Stoneville Pedigreed Seed Company,  
Don Panter, Roger Ward, Mark Barfield, Jack Kiser and Cathy Houck ............................ 43

Phytojen 33 Acala, A New High Yielding Cotton for the San Joaquin Valley,  
John C. Palmer, H. B. Cooper, Jr., John W. Pellow and David M. Anderson ........................ 43

Dropp Ultra Defoliant, P.N. Odom, Fred Strachan, Stan Lehman, J. Sanderson, G. Schwarzlose and L. Smith ................................................................. 46

GemStar® LC Biological Insecticide for Bollworm and Tobacco Budworm, Michael B. Dimock ................................................................. 46

DPX-MP062: A Novel Broad-spectrum, Environmentally Soft, Insect Control Compound,  
H.H. Harder, S.L. Riley, S.F. McCann and D.W. Sherrod ............................................. 48

Karate® CS Insecticide, a Novel Microencapsulated Formulation, S.H. Martin, J.S. Mink and R.S. Boykin ................................................................. 50

Mep Plus Biochemical Plant Growth Regulator, Rhett R. Atkins .................................. 51

Terraclor Super X® plus Di-Syston® 39.3% EC, A.W. Mitlehner .................................. 53

CRYMAX, Timothy B. Johnson and Jamie Yancy ....................................................... 54

PIX® Plant Regulator, L.P. Schell ................................................................................. 55

LepTon HTK, R.J. Cibulsky and S.S. Ng ....................................................................... 55

Pegasus Plow, Gary W. Thacker ..................................................................................... 56

Case Corporation 2555 Cotton Express® Cotton Picker, C.J. Hanson ............................ 57

Advances in Mechanical Cultivation of Cotton & Peanuts, Jim T. Noonan .................... 58

Reduced Herbicide Usage in Cotton and Other Row Crops Using Optoelectronic Detection, Jim Beck ................................................................. 62

### Information Technology Resource Special Session

CCC Loans in the Electronic Receipt Environment, Joseph T. Wyrick ............................. 69

G.P.S. Controlled Precision Spraying Minimizing Costs and Environmental Impact, Cleve Turner III ................................................................. 70

Farmers’ Use of Computers to Gather Information, M.J. Thach .................................... 71

The Cotton Pickin’ Web: A New Information Source for Cotton Producers, R. E. Stinner, J. Van Duyn and P. O’Leary ........................................ 72

### Cotton Disease Council

Thielaviopsis – A Grower’s Perspective, Gary O’Neill .................................................... 75

Prevalence and Distribution of Thielaviopsis Basicola, C.S. Rothrock ............................ 75
Interaction of Thielaviopsis Basicola with Pythium Spp. and Rhizoctonia Solani, T.A. Wheeler and J.R. Gannaway

Control Approaches (Cultural and Chemical) for Black Root Rot of Cotton, J.E. DeVay and R.H. Garber

Artificial Inoculation of Field Plots for Evaluation of Soil Fungicides for Cotton Seedling Disease Control, Albert Y. Chambers and Tracy D. Bush

In-furrow Fungicides for Seedling Disease Control in Cotton, M.A. Newman

The Value of In-furrow Fungicides, Albert B. Bassi, Jr. and Greg S. Faust

Efficacy of Rovral® for Cotton Seedling Disease Control, C.H. Baldwin, Jr. and C.W. Hogue

Suppression of Rhizoctonia Solani by Kodiak®, a Bacillus Subtilis Biocontrol Seed Treatment, P.M. Brannen

Field Efficacy of Viridiol(-) Mutants of Trichoderma Virens for Biocontrol of Cotton Seedling Diseases, C.R. Howell, J.E. DeVay, R.H. Garber and B.L. Weir

Soilborne Pathogenic Fungi and Seedling Diseases in Cotton Following Winter Cover Crops, Donald R. Sumner, Charles F. Douglas, Sharad C. Phatak and Shelby H. Baker

Reniform Nematode and Its Influence on the Cotton Industry in the United States, C. Overstreet and E.C. McGawley

Efficacy of Foliar Application of Vydate CLV for Supplemental Nematode Control in Cotton, T.L. Kirkpatrick, Gus Lorenz and R.T. Robbins

Impact of At-plant and Post-plant Nematicides on Cotton Production in Reniform Nematode Infested Fields, Charles Burmester, William Gazaway, D.J. Potter, D. Derrick, Edwin Ingram

Crop Rotation—its Impact on Cotton Production in Reniform Infested Fields, J.R. Akridge, W. Gazaway, R. Rodriguez-Kabana and O. Farrior

Root-knot and Reniform Nematodes Associated With Cotton Production in Mississippi, G.W. Lawrence, K.S. McLean and G. Hankins

Plant-parasitic Nematodes Associated with Non-delta Cotton Production in Mississippi, G.W. Hankins, G.W. Lawrence and F. Killebrew

The Effects of Root-knot (Meloidogyne Incognita) and Black Root Rot (Thielaviopsis Basicola) on Cotton (Gossypium Hirsutum Cv Suregrow 501) in Microplots, N.R. Walker, C.S. Rothrock and T.L. Kirkpatrick

The Performance of Several Commercial Cotton Cultivars Over Three Years in a Reniform Nematode Infested Field, Gus Lorenz, Terry Kirkpatrick and R.T. Robbins

Seasonal Population Dynamics of Phyllosphere Bacteria on Cotton Foliage, V.J. Elliott

Biotransformation of the Phytoalexin Hibiscanone by Verticillium Dahliae and Toxicity of the Biotransformed Product, R.D. Sipanjovic, L.S. Puckhaber and A.A. Bell

Agrobacterium Root Rot and Wilt: A Widespread Seedborne Disease of Cotton and Legumes A.A. Bell, H. Orta and Y. Cui

Identification of QTLs in Cotton Confering Resistance to the Bacterial Blight Pathogen, R.J. Wright, P.M. Thaxton, A.H. Paterson and K.M. El-Zik

Simple Selective Media for Isolating Trichoderma Viens Strains from Field Soil and Cotton Roots, C.R. Howell

Regulation of Aflatoxin Production in Aspergillus Parasiticus, J.K. Hicks, N.P. Keller, J.-H. Yu and T.H. Adams

Potential Role for Storage Proteins and Sugars in Cottonseed Susceptibility to Aflatoxin Contamination, J.E. Mellon and P.J. Cotty

Aflatoxin Contamination of Commercially Grown Transgenic Bt Cottonseed, P.J. Cotty, C. Bock, D.R. Howelland and A. Tellez

Aflatoxin Contamination of Cottonseed in South Texas: The Role of Insect Injury, T. Isakeit

Phenotypic Variation Within the S Strain of Aspergillus Flavus, E. A. Sobek and P.J. Cotty

Aflatoxin Levels in Cottonseed at Weekly Intervals in Arizona, Mississippi and Texas Modules, W.E. Batson, Jr., J.Caceres, P.J. Cotty and Tom Isakeit

Screening for Resistance in Upland Cotton (Gossypium Hirsutum) to Pythium Ultimum, Rex D. Henard, John R. Gannaway and Terry A. Wheeler

Minutes of the 1997 Cotton Disease Council Business Meeting, January 9, 1997 - New Orleans, LA, Donald Blasingame

COTTON DISEASE COUNCIL, CONTINUED

Report of the Cottonseed Treatment Committee For 1996, C.S. Rothrock ................................................................. 126
Cotton Disease Loss Estimate Committee Report, Don Blasingame ......................................................................................... 130
Report of the Educational and Public Relations Committee, K.M. El-Zik ................................................................. 132
A Model System for Research on Aspergillus Flavus Infection of Undamaged Cotton Bolls, Maren Klich .................. 132
Terpenoid Aldehyde Accumulation in Roots of Cotton Seedlings in Response to Infection by Pythium Ultimum and Rhizoctonia Solani, Heping Wang and R. Michael Davis ................................. 132
Efficacy of Fungicidal and Nutritional Treatments on Cotton Root Rot Suppression, J.E. Mataocha and S.G. Vacek ................................. 135
Efficacy of Selected Seed Treatments on the Cotton Seedling Disease Complex and Cotton Yield, K.S. McLean, G.W. Lawrence, L.N Yates and B.P. Burnside ................................................................. 138
Cotton Seedling Disease and Cotton Production in Louisiana, Jennifer Mulkey, K.S. McLean and G.W. Lawrence ......................... 140
Effect of Terraclo Super X and Di-syston on Cotton Seedling Disease and Thrips on Delta and Pineland 5409 Cotton, Ronald Poole, K.S. McLean and G.W. Lawrence ................................................................................................................. 142
Effect of Terrazole 4E on Pythium spp. Cotton Seedling Disease and Seed Cotton Yield of DPL 5409, Jason Ables, K.S. McLean and G.W. Lawrence ................................................................. 143

COTTON AND OTHER ORGANIC DUSTS CONFERENCE

The Janet Fischer Lecture: The Effects of Inhaled Endotoxin, What do We Need to Learn?, Robert Burrell ................................................................................................................................. 149
The Endotoxin Criteria Document: The Risk Evaluation, Ragnar Rylander ................................................................. 153
The Endotoxin Criteria Document: Environmental Monitoring for Endotoxin Aerosols, R.R. Jacobs ......................... 156
The Role of Cytokines in Asthma and Related Occupational Lung Diseases: An Overview, A. Jones and P.J. Nicholls ................................................................................................................. 159
The Effect of Glucan on In Vitro Bronchoconstrictor Response Using Guinea Pig Trachea and Perfused Lung, A. Jones, P.J. Nicholls and R.S. Young ................................................................................................................. 166
Binding of Fungal and Plant Glucans to the Human Macrophage Receptor, David L. Williams, Antje Mueller, John Raptis, Peter Rice and James H. Quillen ................................................................................................................. 169
(1-3)-ß-D-glucan in Some Indoor Air Fungi, Birgitta Fogelmark and Ragnar Rylander ................................................................. 171
Changing Agricultural Trends in Wisconsin and Beyond, S.A. Olenchock and N.B. Young ................................................................................................................................. 173
Cotton Bracts Tannin Phosphorylates Airway Membrane Proteins, M.M. Cloutier and L. Guernsey ................................................................................................................................. 182
Toxic Pneumonitis Is Associated with Dry Cough among Recycling Workers, T. Sigsgaard ................................................................................................................................. 189
Pharmacologic Studies of Latex Dust Extracts in Isolated Guinea Pig Trachea, E. Schachter, E. Zuskin, M.G. Buck, S. Maayani, S.K. Goswami, N. Rienzi, Julia Strongwater, Hoon Shim ................................................................................................................................. 192
Cotton Dust Potential Associated with Microbial Decomposition During Storage, David T.W. Chun ................................................................................................................................. 194
An Evaluation of Extraction Solutions and Filter Types for the Recovery of Endotoxin, T.C. Wood and R.R. Jacobs ................................................................................................................................. 199
Fluorometric and Electrochemical fMLP HPLC Analysis, Nabil H. Al-Humadi and Paul D. Siegel ................................................................................................................................. 202
Pathologic Changes in the Respiratory Tract of Pigs Induced by Exposure to Feed Dust with or without Added Endotoxin, R. Jolie, L. Bückström and L. Olson ................................................................................................................................. 205
A Comparison of the Pulmonary Effects of Lipopolysaccharide, Lipid A and Detoxified Lipopolysaccharide in the Guinea Pig, R.S. Young and P.J. Nicholls ................................................................................................................................. 208

COTTON ECONOMICS AND MARKETING CONFERENCE

Washington Update, Wayne Bjorlie ....................................................................................................................................... 215
U.S. and World Cotton Outlook, Stephen MacDonald and Leslie Meyer ................................................................................................................................. 217
New Trends in the Marketing and Consumption of World ELS Cotton, Matthew S. Laughlin ....................................................................................................................................... 221
Producer-Mill Marketing/A Symbiotic Relationship, Cecil Brookin ................................................................................................................................. 226
Cotton Price Outlook, Sharon C Johnson ....................................................................................................................................... 228
Analysis of Selected Futures Markets Cotton Trading and Pricing Strategies, Alexy Kokarev, O.A. Cleveland and C.W. "Bill" Herndon, Jr. ................................................................................................................................. 238
Comparison of Costs and Returns Associated with Heliothis Resistant Bt Cotton to Non-resistant Varieties, Joe W. Gibson IV, David Laughlin, Randy G. Luttrell, Don Parker, Jack Reed and Aubrey Harris ................................................................................................................................. 244
COTTON ECONOMICS AND MARKETING CONFERENCE, CONTINUED

Economic Analysis of Insect Management Strategies for Transgenic Bt Cotton Production in South Carolina,
Roderick M. ReJesus, Jeremy K. Greene, Michael D. Hammig and Charles E. Curtis ............................ 247

Economics of Transgenic Cotton: Some Indications Based on Georgia Producers, C. Robert Stark, Jr. ......... 251

Farmers' Expectations in the Production of Transgenic Bt Cotton: Results From a Preliminary Survey in South Carolina,
Roderick M. ReJesus, Jeremy K. Greene, Michael D. Hammig and Charles E. Curtis ............................ 253

NATRES: Cotton Research Database and Links on the Internet,
M. Mohammadioun, J.K. Apodaca, B. Kellison, S. Ahmed and P. Patel ............................................... 256

Master Marketer Program, Jackie Smith, Steve Amossen and Mark Waller ............................................. 258

Farm Level Profitability and Resource Requirements of Cotton Farming Systems, E. Segarra, S. Teal and J.W. Keeling .... 259

Hedonic Valuation of Cotton Base Acreage in Louisiana,
Gary A. Kennedy, Lonnie R. Vandeveer, Steven A. Henning and Ming Dai ............................................ 262

Break-even Yields and Prices for Cotton and Alternative Crops, Mississippi, 1997, Keith Saum and D.W. Parvin .... 267

Impacts of Biotechnology on Financial Survival of Cotton Farms in the Texas High Plains,
Aubrey P. Haynes and Phillip N. Johnson ............................................................. 270

Economic Impacts of Crop Biotechnology in a Risky Cotton Production System: An Application to the High Plains of Texas,
M.R. Middleton and E. Segarra .......................................................... 274

A Review of the Land Rental Arrangements of Texas South Plains Cotton Producers: Preliminary Results of a Survey,
Jackie G. Smith, Thomas O. Knight, Siddhartha Dasgupta and H. Alan Love ........................................ 278

Global End-use Demand for Cotton: A Time-Varying Parameter Model, Stephen MacDonald ....................... 278

Do Cotton Prices Move Together?, John Baffes and Panos Varangis ..................................................... 282

Cotton Production and Use in Pakistan and India, Anita Regmi and Ronald R. Roberson ............................ 285

The Turkish Cotton Industry: Structure and Operation, Darren Hudson ................................................. 287

South Korea: The Outlook Through 2002 for U.S. Cotton Sales, Terry L. Turner .................................... 292

Organically Grown and Naturally Colored Cotton: A Global Overview,
David Katz, Nathan Boone and James M. Vreeland, Jr. .................................................................... 293

The Analysis of Cotton Acreage Response in the Presence of Government Programs,
Olga Isengildina, O.A. Cleveland and Cary W. Herndon .................................................................. 297

Minimizing Farm-to-Mill Cleaning Cost for Irrigated and Dryland Cotton, Blake K. Bennett and Sukant K. Misra .... 301

The Effect of Planting Flexibility on Cotton Industry Infrastructure in Mississippi, John R.C. Robinson and David Mancill .... 306

Effect of Cotton Planting Dates on Farm Profitability, Chuck Danehower and Delton Gerloff ...................... 310

Cost and Returns to Narrow-Row Cotton Production in Mississippi, Fred T. Cooke, Jr. and James C. Walker III .... 311

Economic Feasibility Analysis of Ultra-Narrow-Row Cotton in Tennessee,
James A. Larson, Burton C. English, C. Owen Gwathmey and Robert M. Hayes ...................................... 315

Standardized Performance Analysis of Cotton Production: Initial Results from the Texas High Plains,
April Clark, Phillip Johnson, James McGrann and Jackie Smith ............................................................ 318

Economic Feasibility of Feedlot Manure Utilization in Cotton Production: An Application to the Texas High Plains,
Jason L. Johnson and Eduardo Segarra .............................................................................................. 323

Causal Factors of Cotton Quality Discount and Premiums in the Mid-South: 1973 - 1995,
Michael Barnes and C.W. “Bill” Herndon, Jr. ..................................................................................... 326

Cost of Cotton Insect Control in the Mississippi Delta in 1992, 1994, and 1995,
Thomas B. Freeland, Jr., Fred T. Cooke, Jr. and William P. Scott ......................................................... 330

Economic and Environmental Analysis of the Boll Weevil Eradication Program in Mississippi, Keith D. Saum ............................................. 334

Comparative Value per Acre by Fruiting Site for Two Plant Growth Regulators, Dave Parvin and Rhett Atkins .... 336

An Analysis of the Southern Regional Cotton Marketing Research Project Committee's Recommendations on the Cotton Industry in Northeast Arkansas, James R. Lindsey and Corbet J. Lamkin ......................... 338

An Analysis of the Southern Regional Cotton Marketing Research Project Committee's Recommendations on the Cotton Industry in Northwest Mississippi, C.J. Lamkin .............................................................. 344

Texas-Oklahoma Producer Cotton Market Summary: 1995/96, Hope Flocck, Darren Hudson and Don Ethridge .... 352

A Loan Schedule Based on Texas and Oklahoma Producer Market Premiums and Discounts, Clay Carr and Don Ethridge .... 352

Cost Trade-Offs of Stripper-Mounted Bur Extractors from the Producers’ Perspective,
Sukant K. Misra, Blake K. Bennett, Brent D. McPeek and Alan Brashears ................................................ 355

The Effects of Net Returns on Seed Cotton Planted Area in Antalya, Burhan Ozkan ..................................... 359

Economic Costs and Returns on Seed Cotton Production, Burhan Ozkan .................................................. 362
# Cotton Engineering-Systems Conference

Let Your Palmtop Do the Spraying – A Functional, Computerized Plot Spray System, *Jack T. Reed and Michael S. Howell, Michael Moncrief* ................................................................. 369

The Effect of Degree Days on the Crop Coefficient and Water Use by Cotton, *W.R. DeTar, S.J. Maas and J.R. McLaughlin* .................................................................................... 370

Cotton Response to Automated Irrigation Control, *Donald F. Wanjura* .................................................. 376

Gossym/Comax—the Quixotic Quest, *Kit Boone and Dana O. Porter* .......................................................... 380

Sigma Plus: A Cotton Crop Model, *Hal Lemmon and Ning Chuk* ................................................. 383

# Cotton Ginning Conference

Other Emerging Gin Technology, *S.E. Hughes* ................................................................................. 390

The Long Range Impact of Fair Act on Ginning, *Carl G. Anderson* ................................................... 391

First in an Annual Series—My Gin Management Philosophy, *Charles Owen* ........................................... 394

Whole Cottonseed Research & Promotion Program at Cotton Incorporated, *T.C. Wedegaertner and W.F. Lalor* ................................................................. 398

An Update on Gin Labor Issues: A Legislative Perspective, *Patty Adair* ................................................... 399

Southern Cotton Ginners Association Safety Program, *Larry Davis* ................................................................. 406

# Cotton Improvement Conference

Fruiting Patterns, Maturity, and Yield of Bollgard and Roundup Ready Cotton Varieties, *David W. Albers, Curtis Williams, and James Mitchell* ........................................ 411

Development and Maturity Measurements on Transgenic Bt And Roundup Ready™ Cotton, *C.L. Cheatham, J.N. Jenkins, and J.C. McCarty, Jr.* ................................................................. 412

Effect of Insect Control Regimes on Bt, Nectarless, and Non-Bt Varieties’ Maturity, Yield, And Fiber Quality, *W.R. Meredith, Jr.* ................................................................. 412

Field Evaluation of Cotton Transformed for Tolerance to Imidazolinone Herbicides, *David Anderson, John Pellow, John Palmer, John Grula, H.B. Cooper, and K. Rajasekaran* ................................................................. 412

Phenology and Yield of Eight Mar Cotton Genotypes Under Irrigation and Water Stress, *Yuksel Bolek, Kamal M. El-Zik, Peggy M. Thaxton and Thomas J. Gerik* ................................................................. 414

An Introduction to AFIS for Cotton Breeders, *D.S. Calhoun, J.D. Bargeron, and W.S. Anthony* ................................................................. 418

Processing Quality of San Joaquin Valley Cottons, *C.K. Bragg, C.L. Simpson, S.E. Hughes, H.B. Cooper, and Dick Bassett* ................................................................. 424

Comparison of Fiber Development and Boll Maturity by Fruiting Sites of an Early and Full Season Cotton Cultivar, *S.R. Crawley, J.N. Jenkins, and J.C. McCarty, Jr.* ................................................................. 437

Relationships Between Maturity and Fiber Properties for Cotton Cultivars in Arkansas, *J.T. Johnson, F.M. Bourland, and C.E. Watson* ................................................................. 438

Total Biology of Cotton Planting Seed Quality Relative to Obtaining Productive Plant Populations, *L.S. Bird* ................................................................. 438

Cool Germination Test on Cotton—Variability Between Seed-Testing Laboratories, *Jean Tolliver, Bryan R. Savoy, and E.A. Drummond* ................................................................. 442

New Sources of Resistance to Root-Knot and Reniform Nematodes in Mexican Accessions of the USDA Cotton Germplasm Collection, *A.F. Robinson, A.E. Percival, and A.C. Bridges* ................................................................. 443

Effects of the Reniform Nematode and Silverleaf Whitefly on Cotton, *CG. Cook, A.F. Robinson, J.N. Jenkins, and J.C. McCarty, Jr.* ................................................................. 444

Different Sources of Root-Knot Nematode Resistance, *Michael R. Robinson, J. N. Jenkins, and J.C. McCarty, Jr.* ................................................................. 444

Effects of the Reniform Nematode and Silverleaf Whitefly on Cotton, *CG. Cook, A.F. Robinson, J.N. Jenkins, and J.C. McCarty, Jr.* ................................................................. 444

Damage and Behavioral Patterns of Heliothis Virescens and Helicoverpa Zea on Upland Cotton, *D.B. Shoemaker, J.N. Jenkins, J.C. McCarty* ................................................................. 446

Variation in Number of Trichomes on Bracts of Cotton Plants, *R.E. McGowen Jr., F.M. Bourland, and S.L. Latimer* ................................................................. 446

Mapping Cotton Genome with Molecular Markers, *John Yu, Yong-Ha Park, Gerard R. Lazo, and Russell J. Kohel* ................................................................. 447

Genetics of Photoperiodism in Gossypium Hirsutum Race Stocks, *J.B. Creech, J.N. Jenkins, and J.C. McCarty, Jr.* ................................................................. 447

Transgenic Brown Lint Cotton, *H.B. Cooper, John Pellow, John Palmer, and David Anderson* ................................................................. 447

COTTON QUALITY MEASUREMENTS CONFERENCE, CONTINUED

Strength and Structure of Cotton Fiber During Development, You-Lo Hsieh ................................................................. 505
Interpretations of Single Cotton Fiber Tensile Properties, Xiao-Ping Hu and You-Lo Hsieh .......................................................... 507
Brushing Effects on Cotton Bundle Strength, R. Bäumer, Th. Schneider and H. Harig .............................................................. 511
Relationship Between AFIS Fiber Characteristics and Yarn Evenness and Imperfections, J.L. Chanselme, E. Hequet and R. Frydrych ...... 512
The Positive Effect of High Micronaire on Spinning Performance of Two California Acala Varieties, J. Pellow, H.B. Cooper, Jr., J. Palmer and D. Anderson ................................................................. 518
Relative Humidity Monitoring to Assess Cotton Sample Conditioning, D.W. Earnest, J.L. Knowlton, G.K. Cowden and M. Matthews ............... 521
Evaluation of HVI Trashmeter Calibration, James L. Knowlton ................................................................................................. 526
Chromatic Image Analysis for Cotton Trash and Color Measurements, B. Xu, C. Fang and M.D. Watson .............................................. 532
Preliminary Comparison of Waste and Cotton Fiber Loss Using a Shirley Analyzer and Shirley Trash Separator, Steven J. Thomson, W. Stanley Anthony and Gino J. Mangialardi, Jr. ................................................................. 540
The Importance of Fiber Properties in Evaluating West Texas Cottons, L.B. De Luca, D.P. Thibodeaux and J. Gannaway ............................ 544
An Investigation on Fiber Length Comparisons of Cottons by Use of Number and Weight Based Statistics, Xiaoliang "Leon" Cui, Timothy A. Calamari, Jr. and Moon W. Suh ................................................................. 545
Relating Single Fiber Measurements to Cotton Strength, Structure, and Morphology, D.P. Thibodeaux, J.J. Hebert, L.B. DeLuca and J.S. Moraitis ........................................................................................................ 545
Cotton Fiber Friction: The Unknown Quality of Cotton, Yehia El Mogahzy, Roy Broughton, Jr., Hong Guo and R.A. Taylor ............... 545
Fast Determination of Maturity and Fineness by NIR with a Diode-Array HVI. Part 2. Reference Method, J.G. Montalvo, Jr. and S.E. Faught ........................................................................................................ 554
Measuring Natural Waxes on Cotton Using NIR Absorbance, R.A. Taylor and L.C. Godbey ................................................................. 557
How Variety and Weather Determine Yarn Properties and Dye Uptake, Judith M. Bradow and Philip J. Bauer ........................................... 560
Australian and American Experience with Rapidicron, Frederick M. Shofer, Michael D. Watson and Robert S. Baird ................................. 564
Variatel Effects on the White Speck Phenomenon, P.D. Bel-Berger, T.M. Von Hoven and W.R. Goynes .................................................. 565

COTTON SOIL MANAGEMENT & PLANT NUTRITION CONFERENCE

Starter Fertilizer Placement in North Carolina, K.L. Edmisten and A.M. Stewart ................................................................. 575
Proximity Effects of a Calcium Nitrate Starter Fertilizer Solution on Cotton, Jac J. Varco .................................................................. 575
Cotton Yield Response to Pre-Bloom and Bloom Applications of Foliar Urea, Ken E. Legé and Robert M. Lippert ............................... 576
Nitrogen Management for Cotton Following Cotton on Coastal Plain Soils, Glen Harris and Shelby Baker ............................................... 576
Using Drainage lysimeters to Evaluate Irrigation and Nitrogen Interactions in Cotton Production, E.C. Martin, E.J. Pegelow and J. Watson ........................................................................................................ 578
Profile Distribution of Nitrate-Nitrogen in an Alfisol Cropped to Continuous Cotton, J.S. McConnell, W.H. Baker and B.S. Frizzell ........... 580
Spatial Variability of Soil-Test Nitrogen and Phosphorus on Texas Southern High Plains Sandyland Soils, Michael G. Hickey and Arthur B. Onken ........................................................................................................ 588
Interpretation of Grid Sampling Techniques for Soil Nutrient Status, M.W. Ebelhar ........................................................................ 592
The Use of Plant Mapping Techniques to Assess Spatial Variability in Commercial Cotton Production, J.A. Landivar, S. Searcy and G. Anderson ........................................................................................................ 592
Economic Thresholds for Irrigation Management Decisions, M.D. Sheedy, J.E. Watson and E.C. Martin ........................................................................ 593
