TABLE OF CONTENTS

Volume 1

PLENARY SESSION

Monday, April 28, 1997
8:30-11:30 a.m.

Robotics and the Nuclear Utilities / Rick Munson (ComEd/U/MRUG)*

The Role of Unmanned Ground Vehicles in the Military / Col. Jeffrey Kotora (U.S. Army)*

Robot Sentries / Douglas Gage (NRaD)*

Robotics for Hazardous Environments, A European Perspective / Colin Robson (BNFL)*

Remote Handling at the Joint European Torus / Alan Rolfe (JET Joint Undertaking—UK)*

CONTROLS AND SYSTEMS ARCHITECTURES

Monday, April 28, 1997
1:30-5:00 p.m.

Chair: Mark W. Noakes (ORNL)

Graphical Programming of Telerobic Tasks / Daniel E. Small, Michael J. McDonald (SNL) .......................... 3

Smart Handling and Assembly of Nuclear Systems Using Machine Learning and Compliance Control by Robots / Arun Jaura (CAEtech), N. Krougliits (EDTS-Canada), M. O. M. Osman (Concordia Univ) ...... 8

R^2CS—Reconfigurable Remote Control System / Laura Dussinger, D. Scott Williams (LMAES, Baltimore) .................................................. 16

Cycle-Time Reduction of Robotics-Based Systems in Design and Implementation / R. Lumia, G. Starr, J.

DOE-EM ROBOTICS INDUSTRY PROGRAM

Monday, April 28, 1997
1:30-5:00 p.m.

Chairs: Vijendra Kothari (DOE)
Cliff Carpenter (DOE)

RoboCon: Operator Interface for Robotic Applications / H. Schempf, J. Warwick, C. Piepgras, M. Fung, M. Blackwell (Robotics Inst) ........................................ 69

Interactive Computer-Enhanced Remote Viewing System / John Tourtellott (MTI) ........................................ 74

Three Dimensional Integrated Characterization and Archiving System / Robert Clark, Philip Gallman, Tony Slotwinski (Coleman Rsch), George Jarvis (TDI), Peter Griffiths (Univ of Idaho) ........................................................................ 80

Diagnostics and Data Fusion of Robotic Sensors / Manmohan Dhar (MTI) ........................................ 87

A Mobile Robot Inspector for Low-Level Stored Radioactive Waste / David N. Rocheleau (Univ of South Carolina) ........................................ 95

Wood, I. Shohet, B. Jones, E. Ledman (Univ of New Mexico) ........................................ 23

Learning and Shaping of Hierarchical Control Structures / Bruce L. Digney (DRES—Canada) ............. 30

Kinematic Control Modes for Teleoperation of Redundant Robots / Richard Hooper (Univ of Texas, Austin), Mark W. Noakes (ORNL) ........................................ 38

Tele-Robotic/Autonomous Control Using Control-Shell / Karl C. Wilhjemsen, Randy L. Hurd, Scott Couture (LLNL) ........................................ 44

Adaptive Controller for Hyperthermia Robot / Reid L. Kress (ORNL) ........................................ 52

*Oral presentations only.

SENSORS AND MACHINE VISION

Monday, April 28, 1997
1:30-5:00 p.m.

Chair: Erna Grasz (LLNL)

ARTISAN: A System for Semi-Automatic Modeling of Complex Environments / Andrew E. Johnson, Regis Hoffman, Jim Osborn, Martial Hebert (Robotics Inst) ......................................................... 111

Improvement of Laser Rangefinder Data Through Characterization / Regis Hoffman (K2T), Sachin Chheda, Cecelia Shepherd (Robotics Inst) ................ 117

Determination of Camera Locations in 6D, Based on the Image Size and Shape of a Standard Rectangle / G. Ronald Dalton, Craig Qu (Univ of Florida) .... 124

Laser Range Image Interpretation for Automated Mapping of Hazardous Environments / Ralph J. Pinheiro, Carl D. Crane, James S. Tulenko (Univ of Florida) ...... 131

A Topographical Mapping System for Radiological Environments / R. W. Gamache (MTI) ................................................................. 138

Evaluation of an Interactive Technique for Creating Site Models from Range Data / Frederick W. Hood, William A. Hoff, Robert King (CSM) ............. 146

Electromagnetic Acoustic Transducers—Recent Automated and Hazardous Applications / Steven P. Clark, Dennis D. Lang, Wayne M. Latham, Daniel T. MacLauchlan (B&W) .................................................. 161

Equipment Mounted Buried Utility Detection System / S. J. Lorenc, L. E. Bernold (NCSU) ................................................................. 169

Remote Diversion of a Highly Radioactive Process Line / C. J. Robson (BNFL–UK) ......................... 186

Design and Operational Experience of the Remotely Controlled Material Handling System (RCMHS) for the Fernald Thorium Overpackaging Project / Brian R. Fuller, Gordon Rife (SES—Canada) ........ 195

T-Rex—a Remotely Operated Excavator for Hazardous Environments / Thomas Andreychek (LMAES, Baltimore) ............................................ 201

Telerobotics for Dry Size Reduction / A. J. Sturm, Jr., Dean R. LaValle (PaR Sys) ......................... 209

Hazardous-Duty Applications for Unmanned Ground Vehicles / Mark Tchenrnesshoff (REMOTE) .... 217

MANIPULATOR RESEARCH
AND DEVELOPMENT

Tuesday, April 29, 1997
8:00-11:30 a.m.

Chairs: Leona C. Bares (RedZone Robotics) Roy D. Merrill (LLNL)

An Input Shaping Controller Enabling Cranes to Move Without Sway / Neil Singer (Convolve), William Singhose (MIT), Eric Kriikku (Westinghouse SRC) .... 225

Control Issues Related to Bilateral Teleoperation of Long-Reach, Flexible Manipulators / Lonnie J. Love (ORNL) ........................................... 232

Development of a Coordinated Motion Controller for a Front Shovel Excavator / Daniel W. Johnson, Gilbert H. Lovell III (LMAES, Baltimore), John J. Murray (Signal Sys) ........................................... 239

Cartesian Control of Truss-Based Manipulators / Robert L. Williams II (Ohio Univ), James B. Mayhew IV (Consult), Joseph C. Tucker (PNNL) .......... 255

A Variable Geometry Truss Based Five DOF Manipulator for Heavy Loads / J. C. Tucker (PNNL), E. L. Ahl (NASA, Langley) ....... 263

An Advanced Six Axis Patient Positioner for Use in Proton Therapy / Gerald Silke, Lloyd Nissley, Tom Hurn, Roger Junge (General Atomics), Yves Jongen, Steve Laycock (IBA–Belgium) .......................................... 270

Planet Rover Board Manipulator Construction for Investigation of Surface / Michel I. Malenkov, Victor L. Gorbunov, Vladimir I. Kucherenko (Mobile Vehicle Eng Inst—Russia), Viacheslav M. Linkin, Viacheslav M. Rodin (Space Rsch Inst–Russia), Boris N. Martynov (Lavochkin Assoc–Russia) .......... 275
REMOTE OPERATIONS IN HAZARDOUS ENVIRONMENTS

Tuesday, April 29, 1997
8:00-11:30 a.m.

Chair: Scott A. Couture (LLNL)

Robotics, Automation, and Tele-Operation Program for Safe Handling and Long-Term Storage of Nuclear Components / Alan A. Barhorst (Texas Tech Univ), Richard A. Volz (Texas A&M), George V. Kondraske (Univ of Texas, Arlington) ................................................. 283

Bagless Transfer at the Savannah River Site / Lane Rogers (Westinghouse SRC) .................................................. 287

Automation in a Material Processing/Storage Facility (U) / John R. Gordon, Kurt D. Peterson (Westinghouse SRC) .................................................. 289

Design of the National Ignition Facility Roving Mirror and Roving Calorimeter System / Gretchen Ellis, Pete Pittman, Michael Catanach (LANL) .......................... 294

Design of the National Ignition Facility Target Chamber Service Robot / Pete Pittman, Danny Gallant (LANL) .................. 301

In the Corridors of Power (Remote Maintenance in ITER Ducts) / Julian Millard (Spar, Brampton–Canada), John Blevins (CFTP–Canada) .................. 308

First Operating Experience with the KHG Heavy Manipulator Vehicle System for Emergency Response / Michael Gustmann (Kerntechnische Hilfsdienst–Germany), Bernd Birkicht (Telerob–Germany) .................. 316

AUTONOMOUS SYSTEMS AND MOBILE ROBOTS

Tuesday, April 29, 1997
8:00-11:30 a.m.

Chair: James B. Jenkins (SRTC)

Internal Correction of Odometry Errors with the OmniMate / Johann Borenstein, David K. Wehe (Univ of Michigan) ................................................. 323

AMOS: World Modelling for Autonomous Mobile Manipulation / Ralf Corsépius (FAW–Germany) .................. 330

Workspace Recognition and Navigation Using Self-Creating and Self-Organizing Neural Network / Kazuo Furuta, TakaFumi Oishi, Shunsuke Kondo (Univ of Tokyo–Japan) .................. 345

A Cost-Effective Multi-Terrain Autonomous Vehicle for Hostile Environments / Mark L. Perez (LLNL) .................. 352

An Oceanographic Robot That Evolved from “Smart” Instrumentation / Everett F. Carter, Jr. (TSI) .................. 366

ROBOTICS FOR IN-SERVICE INSPECTION

Tuesday, April 29, 1997
8:00-11:30 a.m.

Chair: Joseph D. Cohen (SRTC)

Modular Robotic Tools Applied to BWR Core Shroud Inspections / S. W. Glass, M. P. Levesque (Framatome Technol) ................................................. 375

Pulsed Thermography Using Infra-Red TV for Reactor Structural Inspection / Anthony Brian August, Helena Wither, Nigel Foden (Magnox Elec–UK) .................. 379

SUPREEM: The Next Generation in Pressure Vessel Non-Destructive Examination Robotic Systems / Paul Boone (Westinghouse) .................. 387

Neptune: Above-Ground Storage Tank Inspection Robot System / Hagen Schempf, Brian Chemel (Robotics Inst) .................. 394

In-Service Inspection of Insulated Pipelines / Nand K. Gupta, Vijay K. Goyal, Kamal K. Gupta (OIT) .................. 401

Ground-Operated Teleoperation System for Live Power Line Maintenance / Jean Lessard (IRH, Quebec–Canada), Denis Faucher (GE Hydro–Canada), Jacques Côté (IRH, Quebec–Canada), Jean Yves McGee (Hydro-Quebec–Canada) .................. 407

END EFFECTORS AND SPECIAL TOOLING

Tuesday, April 29, 1997
1:30-4:30 p.m.

Chair: Robert M. Hollen (LANL)

The Application of Metal Cutting Technologies in Tasks Performed in Radioactive Environments / Robert F. Fogle, Robert M. Younkins (Westinghouse SRC) .................. 417

### Remote Thermocouple Installation Dungeness ‘A’ Power Station / Alan Foxon (Magnox Elec-UK) ................. 433

### Miniaturized Roboticly Deployed Sensor Systems for In-Situ Characterization of Hazardous Waste / G. J. Fischer (SNL) ................................................................. 441

### Radiation Hardened Mobile Vehicles for Chornobyl Stabilization and Nuclear Accident Response / Mark S. Rowland, Maynard A. Holliday (LLNL), Tim J. Denmeade, David W. White (RedZone Robotics), Jury A. Karpachov (Polytechnical Inst-Ukraine), Alexander Ivanov (IS&TC-Ukraine) ........................................... 447

### A Robotic End Effector for Unstructured Environments / V. N. Dubey, R. M. Crowder, P. H. Chappell (Univ of Southampton-UK) ......................................................... 452

### Remote Manipulator End Effectors for Magnox Electric Trawsfynydd Weld Sampling Project / Lisa D. Nishikawa, Jeffrey T. Prince (GEC ASRS) .................................................. 460

---

**REMOTE VIEWING AND TELEPRESENCE**

**Tuesday, April 29, 1997**

**1:30-4:30 p.m.**

**Chair:** Samuel R. Rod (Bristlecone)

**Remote Viewing System for Firearms Training and Remotely Operated Firearms / Samuel R. Rod (Bristlecone) ................................................................. 566**

**Metrology/Viewing System for Next Generation Fusion Reactors / P. T. Spampinato, R. E. Barry, M. M. Menon (ORNL), M. A. Dagher (Boeing, Canoga Park) .................................................. 558**

**The Automatic Production of As Built CAD Models for Process Plant / Graham Dalton, Sandra Del Corso, David Hines, Erik Wolfart (UK Robotics Ltd.-UK) .................................................. 550**

**Field Trials of a Prototype Lunar Rover Under Multi-Sensor Safeguarded Teleoperation Control / E. Krotkov, M. Hebert, L. Henriksen, P. Levin, M. Maimone, R. Simmons, J. Teza (Robotics Inst) .................................................. 575**

**A Genetic Algorithm Based Navigation and Planning Methodology for Planetary Robotic Exploration / Shane Farritor, Steven Dubowsky (MIT) .................................................. 583**

**On-Line Collision Avoidance for the Ranger Telerobotic Flight Experiment / Bruce Bon, Homayoun Seraji (JPL) .................................................. 590**

---

**REMOTE HANDLING FOR ER&WM**

**Tuesday, April 29, 1997**

**1:30-4:30 p.m.**

**Chair:** Maurice J. Ross (INEL)

**Rosie Mobile Worksystem for D&D: Overview of System Capabilities and CP-5 Reactor Application / Leona C. Bares, Louis S. Conley, Bruce R. Thompson (RedZone Robotics) .................................................. 471**

**The Selective Equipment Removal System Dual Arm Work Module / M. W. Noakes, D. C. Haley (ORNL), W. D. Willis (INEL) .................................................. 478**

**Remote Manipulator End Effectors for Magnox Electric Trawsfynydd Weld Sampling Project / Lisa D. Nishikawa, Jeffrey T. Prince (GEC ASRS) .................................................. 460**

**Remediation of an Auxiliary Charcoal Bed at the Molten Salt Reactor Experiment / Kenneth L. Walker (ORNL) .................................................. 500**

**Robust Telerobotics: An Integrated System for Waste Handling, Characterization and Sorting / Scott A. Couture, Randy L. Hurd, Karl C. Wilhelmsen (LLNL) .................................................. 492**

**Windscale Pile Core Surveys / R. F. Curtis (Magnox Elec-UK) .................................................. 507**

**Decommissioning of the Dry Granulation Production Plant at Sellafield Using Remote Assistance / G. Hardey (BNFL-UK), D. A. Webster (BNFL, Chester-UK) .................................................. 516**

**Pavement Trimmer Technology for Removal of Contaminated Soil / Georg F. Mauer (UNLV) .................................................. 523**

**The Automatic Production of As Built CAD Models for Process Plant / Graham Dalton, Sandra Del Corso, David Hines, Erik Wolfart (UK Robotics Ltd.-UK) .................................................. 550**

**Robots in Space: U.S. Missions and Technology Requirements into the Next Century / Charles Weisbin (JPL), Dave Lavery (NASA) .................................................. 603**

---

**SPACE SYSTEMS**

**Tuesday, April 29, 1997**

**1:30-4:30 p.m.**

**Chair:** Dave Lavery (NASA)

**Field Trials of a Prototype Lunar Rover Under Multi-Sensor Safeguarded Teleoperation Control / E. Krotkov, M. Hebert, L. Henriksen, P. Levin, M. Maimone, R. Simmons, J. Teza (Robotics Inst) .................................................. 575**

**A Genetic Algorithm Based Navigation and Planning Methodology for Planetary Robotic Exploration / Shane Farritor, Steven Dubowsky (MIT) .................................................. 583**

**On-Line Collision Avoidance for the Ranger Telerobotic Flight Experiment / Bruce Bon, Homayoun Seraji (JPL) .................................................. 590**

**Calibrated Synthetic Viewing / Won S. Kim, Donald B. Genney, Eugene C. Chalfant (JPL), Lucien Q. Junkin, Ivan M. Spain, Suzie B. Rogers (Lockheed Martin, Houston) .................................................. 596**

**Robots in Space: U.S. Missions and Technology Requirements into the Next Century / Charles Weisbin (JPL), Dave Lavery (NASA) .................................................. 603**
The Virtual Robotics Laboratory / R. L. Kress (ORNL), L. J. Love (ORISE) ........................................... 611

Volume 2
MANIPULATORS, TELEOPERATORS, AND TELEROBOTS

Wednesday, April 30, 1997
8:00–11:30 a.m.

Chair: Reid L. Kress (ORNL)

Telerobots and Their Logistics for Intervention After Major Accidents in Nuclear Environment / Alain Bonneville (GIE INTRA–France), Françoise Gendreau (SGN–France), Bernard Thiebaut (EdF Villeurbanne–France) .................................................. 632

State-of-Art Telerobotic System Performs Challenging Manipulation Tasks in Underwater Work Sites / Roberto Finotello, Tiberio Grasso, Antonio Terribile (Tecnomare–France) .................................................. 638

Development of the EMMA Manipulator for Hazardous Waste Remediation / Ronald E. Graham (Grey Pilgrim), Roger V. Bostelman (NIST) ................. 646

Remote Robotic Replacement for M.S. Manipulator / F. M. Heckendorn, D. C. Iverson (Westinghouse SRC), D. R. LaValle (PaR Syst) ......................... 651

A Highly Dexterous Serpentine Robotic Manipulator / Jesse Alan Willett (PNNL) ........................................ 658

Adaptive Control Techniques for Teleoperated Manipulators / Leonid I. Slutski (Ben–Gurion Univ–Israel) .................................................. 661

A New Control Concept for Commercially Available Teleoperated Manipulators / David Bennett, Aaron Needles (GASRS) .................................... 668

REMOTE HANDLING FOR UNDERGROUND STORAGE TANKS

Wednesday, April 30, 1997
8:00–11:30 a.m.

Chair: Kurt D. Peterson (SRTC)

Viewing Systems for Large Underground Storage Tanks / F. M. Heckendorn, C. W. Robinson, E. K. Anderson (Westinghouse SRC), A. F. Pardini (Westinghouse Hanford) .................................................. 675

Houdini™: A Remote Mobile Platform for Tank Waste Retrieval Tasks / Tim J. Denmeade, Adam D. Slifko, Bruce R. Thompson, David W. White (RedZone Robotics) .................................................. 682

Technology Transfer of Remote Retrieval Processes / Michael W. Rinker (PNNL) ........................................... 690

Equipment and Techniques for Remote Sampling of Stored Radioactive Waste / T. A. Nance (Westinghouse SRC) .................................................. 700

RoboCrane and EMMA Applied to Waste Storage Tank Remediation / Roger V. Bostelman, James S. Albus (NIST), Ronald E. Graham (Grey Pilgrim) ................. 708

Magnetically Attached Crawler (MAC) / D. Keith Appel (Remote Tools) .................................................. 714

VIRTUAL REALITY FOR TELEPRESENCE

Wednesday, April 30, 1997
8:00–11:30 a.m.

Chair: Michael H. Sims (NASA)

Virtual Collaborative Simulation Environment for Integrated Product and Process Development / Brian Christensen (Deneb Robotics) ........................................... 723

The VirtualwindoW for Nuclear Applications / M. O. Anderson, M. D. McKay, W. D. Willis (INEL) .................................................. 728

Remote Viewing and Inspection of Radioactive Sites / Alan Barhorst (Texas Tech Univ), Wookho Son, Louis Everett, Jeff Trinkle (Texas A&M), George Kondraske (Univ of Texas, Arlington), Richard Volz, Jarrett Redd, Jason Xue (Texas A&M) .................................................. 735

Rocinante, A Virtual Collaborative Visualizer / Michael J. McDonald (SNL), Lisa G. Ice (Univ of New Mexico) .................................................. 742

CITADIN: Computer Integrated Teleoperation and Dismantling in Nuclear Installations / Jean–Paul Grandjean (CEA, Bagnols–France), Pierre Valentin (CEA, Pierrelatte–France) .................................................. 748

NUCLEAR POWER PLANT APPLICATIONS

Wednesday, April 30, 1997
8:00–11:30 a.m.

Chair: Kenneth R. Brittain (EPRI)

Robotic Innovations at Millstone Nuclear Power Station / Kirk S. Miles (NNE) .................................................. 757

Remote Tube Removal from a Dismantled PWR Heat Exchanger / Alfred Kioloß, Yves André (AnsA–France) .................................................. 761
