IJCAI-97

Proceedings of the Fifteenth International Joint Conference on Artificial Intelligence

Nagoya, Japan
August 23–29, 1997

Volume 1

Sponsored by the
International Joint Conferences on Artificial Intelligence, Inc. (IJCAII)
Japanese Society for Artificial Intelligence
Contents

VOLUME 1

AI CHALLENGES

CHALLENGE 1
The Predictive Toxicology Evaluation Challenge
A. Srinivasan, R. D. King, S. H. Muggleton, and M. J. E. Sternberg ........................................ 4
Challenge: What is the Impact of Bayesian Networks on Learning?
Nir Friedman, Moises Goldszmidt, David Heckerman, and Stuart Russell ..................................... 10
Adaptive Web Sites: an AI Challenge
Mike Perkowitz and Oren Etzioni ........................................ 16

CHALLENGE 2
The RoboCup Synthetic Agent Challenge 97
Hiroaki Kitano, Milind Tambe, Peter Stone, Manuela Veloso, Silvia Conadeschi, Eiichi Osawa, Hitoshi Matsubara, Issuki Noda, and Minoru Asada ........................................ 24
Understanding Three Simultaneous Speeches
Hiroshi G. Okuno, Tomohiro Nakatani, and Takeshi Kawai ........................................ 30
Distributed Vision System: A Perceptual Information Infrastructure for Robot Navigation
Hiroshi Ishiguro ........................................ 36

CHALLENGE 3
Challenges in bridging plan synthesis paradigms
Subbarao Kambhampati ........................................ 44
Ten Challenges in Propositional Reasoning and Search
Bart Selman, Henry Kautz, and David McAllester ........................................ 50
Challenge: How IJCAI 1999 can Prove the Value of AI by Using AI
James Geller ........................................ 55

AUTOMATED REASONING

AUTOMATED REASONING 1: BELIEF REVISION
Qualitative Relevance and Independence: A Roadmap
Didier Dubois, Luis Fariñas del Cerro, Andreas Herzig, and Henri Prade ........................................ 62
The Complexity of Belief Update
Paolo Liberatore ........................................ 68
Anytime Belief Revision
Mary-Anne Williams ........................................ 74

AUTOMATED REASONING 2: BELIEF REVISION
Towards Generalized Rule-based Updates
Yan Zhang and Norman Y. Foo ........................................ 82
Representation Theorems for Multiple Belief Changes
Dongmo Zhang, Shifu Chen, Wajia Zhu, and Zhaqian Chen ........................................ 89
Nonmonotonic Reasoning and Multiple Belief Revision
Dongmo Zhang, Shifu Chen, Wajia Zhu, and Hongbing Li ........................................ 95

AUTOMATED REASONING 3: THEOREM PROVING
High Performance ATP Systems by Combining Several AI Methods
Jörg Denzinger, Marc Fuchs, and Matthias Fuchs ........................................ 102
Equational Reasoning using AC Constraints
David A. Plaisted and Yunshan Zhu ........................................ 108
Strategies in Rigid-Variable Methods
Andrei Voronkov ........................................ 114

AUTOMATED REASONING 4: PROPOSITIONAL KBS
Tractable Cover Compilations
Yacine Boufkhad, Éric Grégoire, Pierre Marquis, Bertrand Mazure, and Lakhdar Sais ........................................ 122
A Four-Valued Fuzzy Propositional Logic
Umberto Straccia ........................................ 128

AUTOMATED REASONING 5: DESCRIPTION LOGIC
Autoepistemic Description Logics
Francesco M. Donini, Daniele Nardi, and Riccardo Rosati ........................................ 136
Reifying Concepts in Description Logics
Liviu Badea ........................................ 142

AUTOMATED REASONING 6: NONMONOTONISM
Circumscribing Inconsistency
Philippe Bernard and Torsten H. Schaub ........................................ 150
A default interpretation of defeasible network
Xianchang Wang, Jia-Huai You, and Li Yan Yuan ........................................ 156
A Cumulative-Model Semantics for Dynamic Preferences on Assumptions
Ulrich Junker ........................................ 162
Compiling reasoning with and about preferences into default logic
James P. Delegrande and Torsten H. Schaub ........................................ 168
AUTOMATED REASONING 7: NONMONOTONISM FOR LOGIC PROGRAMMING
Learning Extended Logic Programs
Katsumi Inoue and Yoshimitsu Kudoh .......................... 176
Compiling Prioritized Circumscription into
Extended Logic Programs
Toshiko Wakaki and Ken Satoh ................................. 182

AUTOMATED REASONING 8: MODAL LOGIC
Prefixed Tableaux Systems for Modal Logics with
Enriched Languages
Philippe Balbiani and Stéphane Demri ......................... 190
A Set-Theoretic Approach to Automated Deduction
in Graded Modal Logics
A. Montanari and A. Policriti .................................. 196
On evaluating decision procedures for modal logic
Ullrich Hustadt and Renate A. Schmidt ....................... 202

AUTOMATED REASONING 9: ANALOGY
Preduction: A Common Form of Induction
and Analogy
Jun Arima ....................................................... 210
Analogy and Abduction in Automated Deduction
Gilles Défoueaux and Nicolas Peltier ......................... 216

CASE-BASED REASONING

CASE-BASED REASONING 1
How Similar is VERY YOUNG to 43 Years of Age?
On the Representation and Comparison of
Polymorphic Properties
WernerDubitzky, Alfonso Schuster, John G. Hughes,
David A. Bell, and Kenneth Adamson ...................... 226
The Competence of Sub-Optimal Theories of
Structure Mapping on Hard Analogies
Tony Veale and Mark Keane .................................. 232
An Average-Case Analysis of the k-Nearest Neighbor
Classifier for Noisy Domains
Seishi Okamoto and Nobuhiro Yugami ...................... 238

CASE-BASED REASONING 2
Learning to Integrate Multiple Knowledge Sources for
Case-Based Reasoning
David B. Leake, Andrew Kinley, and David Wilson ...... 246
Aggregating Features and Matching Cases on Vague
Linguistic Expressions
Alfonso Schuster, Werner Dubitzky, Philippe Lopes,
Kenneth Adamson, David A. Bell, John G. Hughes,
and John A. White ........................................... 252
Using Case-Based Reasoning in Interpreting
Unsupervised Inductive Learning Results
Tu Bao Ho and Chi Mai Luong ............................... 258

COGNITIVE MODELING

COGNITIVE MODELING 1
Acquisition of Human Feelings in Music Arrangement
Masayuki Numao, Masashi Kohayashi,
and Katsuyuki Sakamiya ...................................... 268
Using Data and Theory in Multistrategy
(Mis)Concept(ion) Discovery
Raymond Sison, Masayuki Numao,
and Masamichi Shimura ..................................... 274
An Aggregation Procedure for Building
Episodic Memory
Olivier Ferret and Brigitte Grua ............................ 280

COGNITIVE MODELING 2
An Achievement Test for Knowledge-Based Systems:
QUEM
Caroline Clarke Hayes and Michael I. Parzen .......... 288
A Functional Theory of Design Patterns
Sambasiva R. Bhatta and Ashok K. Goel ................. 294
Mental Tracking: A Computational Model of
Spatial Development
Kazuo Hiraki, Akio Sashima, and Steven Phillips ...... 301

COGNITIVE MODELING 3
In the Quest of the Missing Link
GuilhermeBittencourt ......................................... 310
Implementing BDI-like Systems by Direct Execution
Michael Fisher .................................................. 316
Managing decision resources in plan execution
Michael Freed and Roger Remington ..................... 322

COMPUTER-AIDED EDUCATION

Use of Abstraction and Complexity Levels in
Intelligent Educational Systems Design
Ruddy Lelouch and Jean-François Morin .................. 329
Reasoning Symbolically About Partially Matched Cases
Kevin D. Ashley and Vincent Aleven ..................... 335
Task Ontology Makes It Easier To Use Authoring Tools
Mitsuru Ikeda, Kazuhiro Seta,
and Riichiro Mizoguchi ...................................... 342

CONSTRAINT SATISFACTION

CONSTRAINT SATISFACTION 1:
CONSTRAINT PROGRAMMING
Semiring-based Constraint Logic Programming
Stefano Bistarelli, Ugo Montanari,
and Francesca Rossi ......................................... 352
Computational Complexity of Multi-way, Dataflow
Constraint Problems
Gilles Trombettoni and Bertrand Neveu .................. 358
CONSTRAINT SATISFACTION 2: SAT
Heuristics Based on Unit Propagation for Satisfiability Problems
  Chu Min Li and Anbulagan .......................... 366
Hidden Gold in Random Generation of SAT Satisfiable Instances
  Thierry Castell and Michel Cayrol ..................... 372
Discrete Lagrangian-Based Search for Solving MAX-SAT Problems
  Benjamin W. Wah and Yi Shang .......................... 378
Learning Short-Term Weights for GSAT
  Jeremy Frank ............................................ 384
CONSTRAINT SATISFACTION 3: LOCAL CONSISTENCY
Local consistency for ternary numeric constraints
  Boi Faltings and Esther Gelle ......................... 392
Arc consistency for general constraint networks: preliminary results
  Christian Bessière and Jean-Charles Régis ............... 398
Constraint Satisfaction over Connected Row Convex Constraints
  Yves Deville, Olivier Barette, and Pascal Van Hentenryck 405
CONSTRAINT SATISFACTION 4
Some Practicable Filtering Techniques for the Constraint Satisfaction Problem
  Romuald Debruyne and Christian Bessière ................. 412
Structuring Techniques for Constraint Satisfaction Problems
  Rainer Weigel and Boi V. Faltings ...................... 418
Merging constraint satisfaction subproblems to avoid redundant search
  Javier Larrosa ........................................... 424

DIAGNOSIS AND QUALITATIVE REASONING

DIAGNOSIS 1
Locating Faults in Tree-Structured Networks
  Christopher Leckie and Michael Dale .................. 434
Diagnosing Tree Structured Systems
  Markus Stumptner and Franz Wotawa .................... 440
Event-Based Reasoning for Short Circuit Diagnosis in Power Transmission Networks
  Gianfranco Lamperti and Paolo Pogliano ............... 446

DIAGNOSIS 2
Exploiting domain knowledge for approximate diagnosis
  Annette ten Teije and Frank van Harmelen ............... 454

Semantically Guided Theorem Proving for Diagnosis Applications
  Peter Baumgartner, Peter Fröhlich, Ulrich Furbach, and Wolfgang Nejdl 460
A Static Model-Based Engine for Model-Based Reasoning
  Peter Fröhlich and Wolfgang Nejdl ........................ 466

DIAGNOSIS 3
Polynomial Temporal Band Sequences for Analog Diagnosis
  Etienne Loize and Patrick Taillibert .................. 474
Fundamentals of Model-Based Diagnosis of Dynamic Systems
  Peter Struss ............................................ 480
Comparative Analysis of Structurally Different Dynamical Systems
  H. de Jong and E. van Raalte ......................... 486

QUALITATIVE REASONING 1: MODELING SUPPORT
A Web-Based Compositional Modeling System for Sharing of Physical Knowledge
  Yumi Iwasaki, Adam Farquhar, Richard Fikes, and James Rice 494
A Causal Time Ontology for Qualitative Reasoning
  Yoshitoh Kitamura, Mitsuru Ikeda, and Riichiro Mizoguchi 501

QUALITATIVE REASONING 2: PERCEPITION AND BELIEF
Qualitative Reasoning about Perception and Belief
  Alvaro del Val, Pedro Maynard-Reid II, and Yoav Shoham 508
Rule-based Contact Monitoring Using Examples Obtained by Task Demonstration
  Pavan Sikka and Brendan J. McCarragher ................. 514

QUALITATIVE REASONING 3: GEOMETRIC AND SPATIAL REASONING
On the Complexity of Qualitative Spatial Reasoning: A Maximal Tractable Fragment of the Region Connection Calculus
  Jochen Renz and Bernhard Nebel ........................ 522
Automation of Diagrammatic Reasoning
  Mateja Jamnik, Alan Bundy, and Ian Green ............... 528
Structural Inferences from Massive Datasets
  Kenneth Yip ............................................. 534

QUALITATIVE REASONING 4: CAUSALITY
Qualitative Analysis of Causal Graphs with Equilibrium Type-Transition
  Koichi Kurumatani and Mari Nakamura ................. 542
Action Localness, Genericity and Invariants in STRIPS
Norman Y. Foo, Abhay Niyak, Maurice Pagnucco,
Paulos Peppas, and Yan Zhang .......... 549
Causality, Constraints and the Indirect Effects of Actions
Hector Geffner ................. 555

QUALITATIVE REASONING 5
Redesigning a Problem-Solver’s Operators to Improve Solution Quality
Eleni Stroulia and Ashok K. Goel .......... 562
Formal Specifications for Hybrid Dynamical Systems
Peter J. Mosterman and Gautam Biswas .......... 568

DISTRIBUTED ARTIFICIAL INTELLIGENCE

DISTRIBUTED AI 1: INTERAGENT COMMUNICATION
Middle-Agents for the Internet
Keith Decker, Katia Sycara, and Mike Williamson .... 578
Semantics and Conversations for an Agent
Communication Language
Yannis Labrou and Tim Finin ................. 584
Persuasion among Agents: An Approach to Implementing a Group Decision Support System
Based on Multi-Agent Negotiation
Takayuki Ito and Toramatsu Shintani ............. 592

DISTRIBUTED AI 2: COORDINATION AND COOPERATION
Cooperation Structures
Mark d’Inverno, Michael Luck,
and Michael Wooldridge .......... 600
Exploration and Adaptation in Multiagent Systems:
A Model-based Approach
David Carmel and Shaul Markovitch .......... 606
The Effects of Runtime Coordination Strategies
Within Static Organizations
Edmund H. Durfee and Young-pa So ........... 612

DISTRIBUTED AI 3: MULTIAGENT ALGORITHMS
Dynamic Prioritization of Complex Agents in Distributed Constraint Satisfaction Problems
Aaron Armstrong and Edmund Durfee .......... 620
A dynamic theory of incentives in multi-agent systems
Yoav Shoham and Kazumitsu Tanaka .......... 626
On the Gains and Losses of Speculation in Equilibrium Markets
Tuomas Sandholm and Fredrik Ygge .......... 632

DISTRIBUTED AI 4: MULTIAGENT ALGORITHMS
The Use of Meta-level Information in Learning Situation-Specific Coordination
M. V. Nagendra Prasad and Victor R. Lesser .......... 640
Analysis of Inheritance Mechanisms in Agent-Oriented Programming
Lovel Cramonas, Anand S. Rao,
and Kotagiri Ramamohanarao .......... 647

EXPERT SYSTEMS
An Expert System Using Nonmonotonic Techniques for Benefits Inquiry in the Insurance Industry
Leona Morgenstern and Moninder Singh .......... 655
Can We Benefit from Metrics in KBS Development?
Stefan Kramer, Hermann Kaindl, and Stefan Schlee .......... 662
Multi-Perspective Modelling of the Air Campaign Planning process
John Kingston, Anna Griffith, and Terri Lydiard .......... 668

GAME PLAYING

GAME PLAYING 1: GO
A Model of Strategy for the Game of Go Using Abstraction Mechanisms
Patrick Ricaud .......... 678
An Evolutionary Algorithm Extended by Ecological Analogy and its Application to the Game of Go
Takuya Kojima, Kazuhiro Ueda,
and Saburo Nagano .......... 684

GAME PLAYING 2
Search Versus Knowledge in Game-Playing Programs Revisited
Andreas Junghanns and Jonathan Schaeffer .......... 692
Learning Strategies in Games by Anticipation
Christophe Meyer, Jean-Gabriel Ganascia,
and Jean-Daniel Zucker .......... 698

INFORMATION RETRIEVAL

INFORMATION RETRIEVAL DISTINGUISHED PAPER
Translingual Information Retrieval:
A Comparative Evaluation
Jaime G. Carbonell, Yiming Yang, Robert E. Frederking,
Ralf D. Brown, Yibing Geng, and Danny Lee .......... 708

INFORMATION RETRIEVAL 1
Adaptive Personal Information Filtering System that Organizes Personal Profiles Automatically
Toshiki Kindo, Hideyuki Yoshida, Tetsuro Morimoto,
and Taisuke Watanabe .......... 716
An Index Navigator for Understanding and Expressing User's Coherent Interest
Yukio Ohsawa and Masahiko Yachida ........................................ 722

Wrapper Induction for Information Extraction
Nicholas Kushmerick, Daniel S. Weld, and Robert Doorenbos .............. 729

INFORMATION RETRIEVAL 2
COSPEX: A System for Constructing Private Digital Libraries
Masanori Sugimoto, Norio Katayama, and Atsuhiro Takasu ................ 738

Using a Bayesian Network Induction Approach for Text Categorization
Wai Lam, Kon Fan Low, and Chao Yang Ho ................................ 745

Toward Structured Retrieval in Semi-structured Information Spaces
Scott B. Huffman and Catherine Baudin ...................................... 751

INFORMATION RETRIEVAL 3
The Self-Organizing Desk
Daniela Rus and Peter de Santis ................................................ 758

A Learning System for Selective Dissemination of Information
Gianni Amati, Fabio Crestani, and Flavio Ubaldini .......................... 764

Thorsten Joachims, Dwayne Freitag, and Tom Mitchell ..................... 770

INFORMATION RETRIEVAL 4
Recursive Plans for Information Gathering
Olivier M. Duschka and Alon Y. Levy .......................................... 778

Efficiently Executing Information-Gathering Plans
Marc Friedman and Daniel S. Weld ............................................ 785

AUTHOR INDEX ................................................................. 792

VOLUME 2

LEARNING

LEARNING 1
Unbiased Assessment of Learning Algorithms
Tobias Scheffer and Ralf Herbrich ............................................. 798

Is Nonparametric Learning Practical in Very High Dimensional Spaces?
Gregory Z. Grudic and Peter D. Lawrence .................................. 804

Discovering Admissible Models of Complex Systems Based on Scale-Types and Identity Constraints
Takashi Washio and Hiroshi Motoda ......................................... 810

LEARNING 2: REINFORCEMENT LEARNING
An Adaptive Architecture for Modular Q-Learning
Takayuki Kohri, Kei Matsubayashi, and Mario Tokoro ...................... 820

A convergent Reinforcement Learning algorithm in the continuous case based on a Finite Difference method
Rumi Munos ................................................................. 826

Ants and Reinforcement Learning: A Case Study in Routing in Dynamic Networks
Devika Subramanian, Peter Druschel, and Johnny Chen ..................... 832

LEARNING 3: DECISION TREES
Integrating Models of Discrimination and Characterization for Learning from Examples in Open Domains
Paul Davidson ............................................................... 840

Decision Tree Grafting
Geoffrey I. Webb .......................................................... 846

Noise-Tolerant Windowing
Johannes Fürnkranz ........................................................... 852

LEARNING 4: CLASSIFICATION
Ensembles as a Sequence of Classifiers
Lars Asker and Richard Matlin ............................................... 860

Stacked Generalization: when does it work?
Kai Ming Ting and Ian H. Witten .......................................... 866

LEARNING 5: APPLICATIONS
Alignment Algorithms for Learning to Read Aloud
Charles X. Ling and Handong Wang ........................................ 874

Socially Embedded Learning of the Office-Conversant Mobile Robot Jiio-2
Hideki Aso, Satoru Hayamizu, Isao Hara, Yoichi Motomura, Shota Akaho, and Toshihiro Matsui 880

LEARNING 6: LOGIC AND ILP
Tractable Induction and Classification in First Order Logic Via Stochastic Matching
Michèle Sebag and Céline Rouveiro ........................................ 888

RHB+: A Type-Oriented ILP System Learning from Positive Data
Yutaka Sasaki and Masahiko Hamana ......................................... 894

Integrating Explanatory and Descriptive Learning in ILP
Yannis Dimopoulos, Saso Dzeroski, and Antonis Kakas .................... 900

LEARNING 7: DYNAMIC ENVIRONMENTS
Combining Knowledge Acquisition and Machine Learning to Control Dynamic Systems
G. M. Shinu and C. Sammut ............................................... 908
